- (32) *+bayyən +pàltən,| +báyyən +pàltən| xázzən +'átri mù-ilə,| xázzən 'átri mù-ilə.* 'I want to go out, I want to go out and see how my land is, see how my land is.' (A 2:1)
- (33) *'o-+tájər ka-dá cačála +rábə ci-+bayyíva. ... +rába ci-+bayyíva ka-dá cačála.* 'The merchant used to like this bald man very much. ... He used to like this bald man very much.' (A 1:2)
- (34) *málca bərràxšələ. ka-xa-yárxa bərràxšələ.* 'The king goes away. He goes away for a month.' (A 2:13)
- (35) *márrə málca t-ávət basíma| 'ána 'ína vazzírət bábat dìyyux. vazzírət bábat dìyyux-ínva.* 'He says "King, be well, I was the vizier of your father. I was the vizier of your father." (A 2:25)

In (36) the pair of clauses express a decision after much thought, which is a prominent point in the narrative:

- (36) *'á bəspàrələ| +rába taxmùnələ. b-léla b-yúma léla bədmàxa. PbəlāxaráP +bəkrayéla 'an-cačálə xínə. cačálə xínə cíllə +bəkrayéla.* 'He waits and thinks a lot. Night and day he does not sleep. In the end he calls the other bald men. He calls all the other bald men.' (A 1:23)

In (37), from dialogue in a narrative, the prominence of the statement is also expressed by the use of the independent copula (§ 10.5.2., § 12.1.2.) rather than the enclitic copula. Note the heavier morphological coding of the second clause by the use of the independent genitive particle and the heavier prosodic coding through the insertion of an intonation group boundary after the subject:

- (37) *+jóri 'íla +ràba xelána.* | *+jórət dìyyi'l 'íla +ràba xelána.* | 'My husband is very strong. My husband is very strong.' (A 38:8)

Another motivation for repetition is to clarify potentially ambiguous references of pronouns, e.g.

- (38) *márələ kàtu* | *+Axíkar ka-+dàv márələ* | 'He says to him. Axiqar says to him ...' (A 3:33)
- (39) *mórrə kàtu* | *+tājər márre ka-caçàla* | 'He said to him, the merchant said to the bald man ...' (A 1:3)

Some verbs are repeated to express a protracted continuous event (40–41) or intensity (42), e.g.

- (40) *'ína dòmmu +šaršùrə* | *+šaršùrə* | *xàšla.* | 'But as his blood drips and drips it (the animal) went away.' (A 39:5)
- (41) *xarbúsuna m-* | *+al-pallacàna.* | *candúrə candúrələ* | 'They throw him down from the stairs. He rolls and rolls.' (B 16:8)
- (42) *+úxča t-íva malyúzə malyúzə,* | *á +saválto šlèxla,* | *pólla +al-+pallacàna.* | 'She was in such a great hurry, that her shoe came off and fell on the stairs.' (A 51:8)

Occasionally a verb is repeated with a change of the initial consonant into a labial, as in (43):

- (43) *sákəl bákəl!* | 'Dress up dress up (= Dress up beautifully)!' (A 51:4)

This can be compared to the repetition of nouns with the replacement of the initial consonant of the second noun with *m-* (§ 9.13.).

### 13.6 Interrogative of Clause Sequences

A question can apply to the connection between clauses rather than the content of the clauses, e.g.

- (1) *á muújurra xášla +kàtu bíyyat ... +arpámma xamšámma cilomátrə 'ùrxə,*  
*xášla +tàma* | *xa-lèlə* | *kdálət +karúvvət dìyyux +kçila* | *'u-tìla,* | *+dórra tìla?* |  
 'How is it that the cat went there on a journey of four hundred or five hundred kilometres in one night, snapped off the neck of your rooster and came back, returned and came back?' (A 3:82)

- (2) *'áha xá-'axča +šúla +júra 'ávə výyya ju-da-+'átrət díyyi, 'ána lā-+yat̪ən?* '(Is it the case that) such a mighty matter as this has taken place in this land of mine and I do not know about it?' (A 1:38)
- (3) *'íman 'á málca víləl 'áxnan +xábra lòtlən?* 'When did this man become king (while) we had no word of it?' (A 1:42)

### 13.7 Intonation Patterns

The relationship between clauses is also signalled by the pitch contours associated with the nuclear stress in an intonation group. By means of intonation contours the speaker conveys to the hearer a wide range of signals, some of which belong to levels of expression that have no direct correlations in linguistic structure, such as numerous personal attitudes. For this reason it was decided not to mark the intonational pitch contours in the transcription of the texts. Here we shall restrict ourselves to a brief examination of some of the main intonational signals, with special attention to those that mark semantic continuity and discontinuity across clauses. The semantic connection between clauses is an issue that has been discussed in numerous places in the foregoing discussion of syntactic structure.

We may distinguish two basic types of intonational contours that are relevant for the present discussion, namely a contour expressing disjunction and one expressing conjunction. Following the terminology that is customary in the field of intonation, we may refer to these as 'major juncture' and 'minor juncture' respectively.

#### 13.7.1 Major Juncture

The intonation expressing major juncture is characterized by a low fall in pitch at the end of the intonation group. There is sometimes a slight rise in pitch on the nucleus. Any syllables occurring after the nucleus have decreasingly lower levels of pitch. This contour is represented by the symbol ↘ . It expresses completeness and disjunction from what follows. As is the case with many syntactic expressions of disjunction, the decision as to where such a signal of disjunction should be placed is generally governed by the choice of the speaker as to how he wishes to present the discourse to the hearer. Examples:

- (1) *'ázax xázzax. ↘* 'Let's go and see.' (A 2:4)
- (2) *málca +rába +naràhat výyələ. ↘* 'The king becomes very upset.' (A 2:8)
- (3) *'ánnə +xuyravátuna. ↘* 'They are our friends.' (A 2:7)

Speakers separate clauses with major juncture to express lack of sequentiality in a variety of contexts.

In (4) the short clauses that are separated by major juncture are not connected in temporal sequentiality, but rather are overlapping temporally:

- (4) *hamzùməna*,<sup>↓</sup> *tanìyəna*,<sup>↓</sup> *jàxcəna*,<sup>↓</sup> +*bixàləna*,<sup>↓</sup> *bəštəyəna*.<sup>↓</sup> ‘They are speaking, telling stories, laughing, eating, drinking.’ (A 2:5)

In (5) the events of sitting and drinking tea overlap temporally with the event of asking:

- (5) +*xárta* +*bakúrəna*,<sup>↓</sup> *bətyávəna* +*tàma*<sup>↓</sup> +*čày bəštá* +*šúla*,<sup>↓</sup> +*bakúrəna* *kát* +*jór dá-baxta* *ícalə*.<sup>↓</sup> ‘Then they ask—they sit and drink tea and so forth—they ask where the husband of the woman is.’ (A 2:7)

In (6) the effect of separating the three clauses by major juncture is to present them as overlapping aspects of the same overall event rather than closely sequential events:

- (6) *vázzər mən-málca* +*plàtəna*.<sup>↓</sup> *b-ricávə bərràxşəna*.<sup>↓</sup> +*bəxdàrəna*.<sup>↓</sup> ‘The vizier and the king go out. They go with horsemen. They tour around.’ (A 2:3)

Major juncture is used to join two clauses with overlapping content, as in (7):

- (7) *’ána ’ína vazzírət bábət dìyyux*.<sup>↓</sup> *vazzírət bábət dìyyux-ína*.<sup>↓</sup> ‘I was the vizier of your father. I was the vizier of your father.’ (A 2:25)

In (8) there is a discontinuity in illocutionary force. The first clause makes a statement where the second is deontic:

- (8) *bálcət lèna* +*šámyə*.<sup>↓</sup> *’ázax xàzzax*.<sup>↓</sup> ‘Perhaps they have not heard. Let’s go and see.’ (A 2:4)

A preliminary formula at the beginning of speech is generally separated from the main body of the speech, e.g.

- (9) *márrə málca ’ávət basıma*,<sup>↓</sup> *’ána mìrən*.<sup>↓</sup> ‘He said “King, be well. I have said (what you ordered me to say).”’ (A 2:4)

Occasionally major juncture breaks up even the constituents of clauses when the speaker wishes to present them with particular prominence. This is the case in (10), which is a stern public declaration:

- (10) *'ána lè-<sup>+</sup>bayyən<sup>↓</sup> háč xa-<sup>+</sup>šrà<sup>↓</sup> óya ju-màta.* <sup>↓</sup> 'I do not want any lantern to be in the village.' (A 2:1)

### 13.7.2 *Minor Juncture*

The intonational contour that is typically associated with minor juncture consists of a rise in pitch on the nucleus. This is typically followed by a mid fall on the syllables coming after the nucleus. Such a contour is represented here by the symbol ↗. Occasionally there is only a rise without a mid fall (↗). Minor juncture contour signals incompleteness and indicates that the content of the intonation group is closely related to what follows. Some of the ways it is used are described in this section.

It is generally used on a clausal constituent that is uttered in an intonation group that is separate from that of the rest of the clause. This applies to the clause initial subjects and objects in (1)–(4) and clause initial adverbs (5):

- (1) *bàxta<sup>↗</sup><sup>↓</sup> lèla bəšvača.* <sup>↓</sup> 'The woman does not allow it.' (A 1:6)
- (2) *háčxá<sup>+</sup>šrà<sup>↗</sup><sup>↓</sup> là-layya ju-batvátə.* <sup>↓</sup> 'No lantern should be lit in the houses.' (A 2:2)
- (3) *'ína cùllə<sup>+</sup>o-<sup>+</sup>xiyàvand<sup>↗</sup><sup>↓</sup> ó nišànčələ.* <sup>↓</sup> 'The whole street is (marked with) the same sign.' (A 2:9)
- (4) *cúl-màndit<sup>+</sup>áttə nàčva<sup>↗</sup><sup>↓</sup> p-šaklátta m-pát<sup>+</sup>árra.* <sup>↓</sup> 'Whatever has female kind you must take away from the face of the earth.' (A 2:11)
- (5) *b-lèlə<sup>↗</sup><sup>↓</sup> vázzər mən-málca<sup>+</sup>plàtəna.* <sup>↓</sup> 'At night the vizier and king leave.' (A 2:3)

Minor juncture joins clauses that are syntactically dependent, such as main clauses and complement content clauses, e.g.

- (6) *málca=da yúvvəl dàstur<sup>↗</sup><sup>↓</sup> kat-cùllə panánnum.* <sup>↓</sup> 'The king has given a command that I should eradicate everybody.' (A 2:17)
- (7) *hál<sup>+</sup>dérən<sup>+</sup>átnən<sup>↗</sup><sup>↓</sup> cōc nàčva la-šóčat.* <sup>↓</sup> 'Before I return and come back, do not leave female kind (alive).' (A 2:11)
- (8) *bəxzáyələ mən-ràčka<sup>↗</sup><sup>↓</sup> 'ína xá-dana<sup>+</sup>šrávéla bəlláya.* <sup>↓</sup> 'He sees from afar a lantern burning in a house.' (A 2:4)
- (9) *ju-<sup>+</sup>átrət díyyi áha móndi<sup>+</sup>ávə<sup>↗</sup><sup>↓</sup> 'ána lè kablánna.* <sup>↓</sup> 'I will not permit this thing to exist in my country!' (A 2:12)

It is used to join a protasis of a conditional construction to the apodosis and a subordinate temporal clause to the following main clause, e.g.

- (10) *'án kāl-jóxca +šmílux ↗ xùš. ↘ ... 'án kāl-bàxya +šmílux, ↗ cl. ↘ 'If you hear the sound of laughter, go. ... If you hear the sound of weeping, wait.'* (A 2:30)
- (11) *'e-+dān-sòvlux, ↗ t-ávə brùna kátux. ↘ e-+dān-màtlux, ↗ +áynux p-+čamla. ↘ 'When you become old, he will be a son for you. When you die, he will close your eyes.'* (A 3:6)
- (12) *'e-+dántat 'ínya jvànka, ↗ +tàrri mxílun. ↘ 'When I was young, they banged on my door.'* (A 2:26)
- (13) *+ták ju-vàtta ↗ +tárra ptáxli +bar-dàha. ↘ 'When there was a knock, I opened the door after him.'* (A 2:29)

The same prosodic pattern is used with main clauses that are close in function to protases or temporal clauses, e.g.

- (14) *'útən 'a-+šúla vùdlə ↗ lá-'avilux +šùla. 'Do (= if you do) that task and you will have no problem.'* (A 2:21)
- (15) *sépi maxáñvala +al-cipa ↗ +čambərrònvala. ' (When) I used to strike my sword on a stone, I split it.'* (A 2:25)
- (16) *xá tré +tlá šabáta +várəla, ↗ áyya báxta bərráxšəla +hàmmam. ' (When) one, two, three weeks pass, the woman goes to the bathroom.'* (A 1:6)

Minor juncture is also used more generally to express a close sequential connection between events, e.g.

- (17) *málca bəkyàməla, ↗ júllu šaluxèla, ↗ yavél kàtu. 'The king gets up, takes off his clothes and gives them to him.'* (A 1:41)
- (18) *vázzər +plàtəla ↗ jàr bədráyəla. 'The vizier went out and made an announcement.'* (A 2:2)
- (19) *'ána júlli lvišéli, ↗ tálvi +al-síysə +házər, ↗ sépi=da p-ídi. 'I put on my clothes, sat ready on the horse, my sword in my hand.'* (A 2:28)
- (20) *ta:jàldə. ↗ 'átlı pəhtiyàj<sup>P</sup> +állux. 'Come quickly. I have need of you.'* (A 2:26)
- (21) *kámla zurázla káto +támota, ↗ 'u-júllo lvišéla, ↗ cačála +plàtəla. 'She got up and prepared breakfast for her, she put on her clothes and the bald man went out.'* (A 1:15)

When a clause is repeated in narrative (§13.5.) as in (22)–(23) the first is typically given major juncture and the second minor juncture, indicating that the second coheres closely with what follows:

- (22) *báxta čarčürəla.* ↗ *čarčürəla* ↗<sup>u</sup> + *hàjìl* 'stvalə xá-dana riya. ↗ 'The woman screams. She screams. Now the pilgim had a servant.' (A 1:6–7)
- (23) +*tàrri mxílun.* ↗ +*tárri mxílun,* ↗ +*tuktàkłun* ↗<sup>u</sup> + *plàtlì.* ↗ *áxči* +*šmíli* *mára ta-jálđa* ↗ *átli* Pəhtiyāj<sup>P</sup> +*állux.* ↗ 'Somebody banged on my door. Somebody banged on my door, somebody knocked, and I went out. I only heard somebody saying "Come quickly, I need you (to do something for me)." ' (A 2:26)

In (24) the chain of clauses in the complement after *kat* is connected by minor juncture. This reflects the packaging of the events as preparatory acts for the final core event of appearing before the king, which is expressed in the last clause and closes with major juncture.

- (24) *útən +xábra hal-ka-cíllə +'àtra* ↗ *kat-cíllə nòkva* ↗<sup>u</sup> *ó-t-átlə júllə šapírə*  
*šakèllun* ↗<sup>u</sup> *ó-t-làtlə-da* ↗<sup>u</sup> *zàvən* ↗<sup>u</sup>, | *tavoryàtu zabánnun* ↗, | *cut-* *átlə* ↗<sup>u</sup>  
*zabànnə* ↗<sup>u</sup> *šákəl áxči júllə šapírə* ↗<sup>u</sup> +*pàlət kam-málca.* ↗ 'Give an order to all the land that all women—whoever has fine clothes should take them, whoever does not have any should buy them, should sell his cows, should sell everything he has, and take fine clothes and come out before the king.' (A 2:20)

Minor juncture is typically used to connect a clause containing a verb of speaking together with the following reported speech, e.g.

- (25) *ka-vázzər màrələ* ↗<sup>u</sup> *ku-* +*yàrmox* ↗ 'He says to the vizier "Let's go!" ' (A 2:8)

In (26) the first clause has a correlative quantifier that requires completion in the second clause and so is marked by minor juncture:

- (26) *'ína +úxča sìvəva* ↗<sup>u</sup> *múttuva ju-xá ... +kərtàla* ↗<sup>u</sup> *ju-ctàna* ↗ 'But he was so aged that they had placed him in a basket, in cotton.' (A 2:14)

In (27) the anaphoric adverbial *'atxa* 'thus' points forwards and this is signalled prosodically by minor juncture:

- (27) *'atxa vília kóssat.* ↗ 'The story was as follows ... ' (A 2:17)

Minor juncture can be used to join together a series of parallel clauses that are presented as components of the same overall event, as in (28):

- (28) *cúllə myàtəna. ↘ abúna myàtəla. ↗ káša myàtələ. ↗ šamáša myàtəla. ↘*  
 'They all die. The bishop dies. The priest dies. The deacon dies.' (A 6:10)

Minor juncture signals that a clause is closely linked in information status to what follows. In (29), for example, the minor juncture is used to present the clause 'we are foreigners' as part of the primary message of the first clause. Major juncture would have been preferred if the speaker wished to present it as supplementary background information.

- (29) *'áxnan tílan ju-dá + àtra ↗ karibàyəvax. ↘* 'We came to this land (while) we are foreigners (i.e. we came to this land as foreigners).' (A 2:6)

Phrases that are attributes are joined to their head by minor juncture if they are part of the primary message, e.g.

- (30) *jaššúkələ 'ína xá-dana bàxta ↗ mán tøryəssàr 'úrza. ↘* 'He looks (and sees) a woman with twelve men.' (A 2:5)

If, on the other hand, they are presented as supplementary information they are separated from their head by major juncture, e.g.

- (31) *bæxzáyələ mən-ràkkə ↗ 'ína xá-dana + šrá véla bøllàya ↘ ju-xa-bèta. ↘* 'He sees from afar a lantern burning, in a house.' (A 2:4)

The binding of a clause to what follows is sometimes strengthened prosodically by giving the minor juncture contour greater prominence by shifting the stress to the final syllable and increasing the height of the rising intonation pitch (represented here by ^). This is often found in the protasis of conditional or temporal constructions, e.g.

- (32) *savúni-da é-+dán 'azálva + árra xapørvälà, ^| nitynə ci-+pal̥tíva m-jávo. ↘*  
 'When my grandfather went to dig the field, fish came out of it.' (A 36:15)
- (33) *'ón 'ázən| bnāt-málca mayyənnùn, ^| mü p-tanitùn? ↗* 'If I go and fetch the daughters of the king, what would you say?' (A 45:17)
- (34) *'ón 'ána 'ázən yámmi mayyənnà, ^| bá 'át mü b-tànyat? ↗* 'If I were to go and bring my mother, what would you say?'

- (35) *bas-’ən-xamšámma ’əštámma cilomətrənà|^ ba-mújjurra susavátət márət díyyi +táma hehehé hurhàmlun,| susavátət díyyux làxxal murxəšlun?^~|* ‘But if (the distance) is five hundred or six hundred kilometres, how is it that the horses of my master neighed there and your horses here aborted?’  
(A 3:82–83)

This prosodic pattern is also used to introduce a new topic of discourse which sets the topical frame for what follows, e.g.

- (36) *+bəddáyət kəssàttət| báxtət +tajər^| mən-+hàji?^~|* ‘Do you know the story of the wife of the merchant with the pilgrim?’ (A 1:34)

In (37) the strategy is used to re-introduce a given referent at the beginning of a new section of discourse, signalling that it is topically prominent in what follows:

- (37) *bábi kát +rábi Daryavuš-và|^ bitàyəla.^~|* ‘My father, who was Rabi Darius, comes.’ (A 41:16)

This prosodic strategy is sometimes used in vocative expressions when the speaker wishes to gain the attention of the hearer for what follows:

- (38) *mára brun|^ +bəddáyət mu-’ítən?^| cùlla fvìrəna.~|* ‘My son, do you know what? Everybody is married.’ (A 44:1)

The devoicing of the last mora of word-final *-i* [iç], which is a feature of words in pause before an intonation group boundary (§ 1.7.1.4.), typically occurs when the word has major juncture intonation but often does not occur when it has minor juncture. This is because the phenomenon is dependent on the duration of the final vowel being extended, which is a characteristic feature of the closure of a unit expressed by major juncture but is not so common with minor juncture, e.g.

- (39) *dámmo máttìla ’al-jùlli [-i]^~|* ‘Put its blood on my clothes.’ (A 1:9)  
(40) *+ktìlìali [-iç]~|* ‘I have killed her.’ (A 1:9)

### 13.7.3 *Interrogative Clauses*

Interrogative clauses are uttered with a rise from a higher level of pitch than that of minor juncture. There is a short fall on syllables after the nucleus. The contour is represented here by the symbol ^~:

- (1) *muyyàlux?^x̄|* 'Have you brought her?' (A 2:10)
- (2) *mú-'et +xàbra?^x̄|* 'What news is there?' (A 2:15)
- (3) *'a-mú-ila +šrá bəllá +tàmma?^x̄|* 'What is that lantern burning there?' (A 2:4)

In (4) the first intonation group, which contains the interrogative particle, has interrogative intonation, but the second group, which presents a nominal phrase that is a clarificatory supplement has major juncture:

- (4) *bas-'ànnə mó-inə láxxa,^x̄| 'ánnə 'ùrzə +šúlə?^x̄|* 'But who are these here, these men and so forth?' (A 2:7)

Greater prominence is sometimes given to questions by shifting the stress of the final word of the intonation group to the final syllable and increasing the height of the rising intonation pitch (represented here as '^'), e.g.

- (5) *+xámra mójjurra vaduxvà?^x̄|* 'How did we make wine?' (B 17:14)
- (6) *'adíyya-da lèt muxzíyyú?^x̄|* 'Have you not shown him?' (B 17:17)

When a question is rhetorical and does not expect an answer, it may have a low fall intonation characteristic of major juncture, e.g.

- (7) *mən-'álaha lèla +tšítə,↓| mónnux müt +tšítəla?^x̄|* 'It is not hidden from God, why should it be hidden from you?' (A 2:17)
- (8) *lá 'adíyya kə-díyyi-da +kàtəl?^x̄|* 'Will he now not kill also me?' (A 2:23)

# Syntactic Subordination of Clauses

## 14.1 Relative Clauses

Relative clauses take as their antecedent a nominal, a pronoun or an adverbial, which they follow. In most cases they are syndetic, in that they are introduced by a subordinating particle. On some occasions, however, they are asyndetic without any such particle.

### 14.1.1 *Syndetic Relative Clauses*

Relative clauses of this type are formed either by the subordinating particle *t* or by the form *kat*, which consists of the preposition *ka-* and the subordinating particle. On some occasions both *t* and *kat* are used in the same construction. The form *kat* is not used in the variety of the dialect spoken Georgia.

#### 14.1.1.1 Definite Nominal Antecedent

##### 14.1.1.1.1 *t*

The subordinating particle *t* is generally attached as an affix to an antecedent noun immediately before the relative clause. The relative clause in such constructions is generally restrictive. Restrictive relative clauses assist in the identification of the reference of the antecedent and are fully integrated syntactically in the nominal phrase of the antecedent, which serves as its syntactic head. They are non-assertive in that they do not express a proposition that can be evaluated as true or false. A definite antecedent nominal of a restrictive relative is generally introduced by an anaphoric demonstrative pronoun. This pronoun is generally from the default series of demonstratives (§ 2.2.8., § 9.2.4.5.). The restrictive relative clause, which is intended to provide the means of identifying the referent, is sometimes the only source of identification. The anaphoric link, therefore, is clearly internal to the nominal phrase, e.g.

- (1) *'u| +mixulta=zə ci-lablíva| ... ka-dán nášət c-atíva!* 'They also took food ... for those people who came.' (B 11:4)
- (2) *'an-nášət +báyyi 'áti xuš-'áti!* 'Those people who want to come, let them come!'
- (3) *lá šváklun hamzəmmíva lišána +aturáya| yán 'o +lázzət tánax suryoyo!* 'They did not allow the majority of Jacobites to speak the Assyrian language, or the dialect we call *suryoyo*.' (B 1:8)

- (4) *mádrə máxi ju-<sup>+</sup>xàsu hal-dé-<sup>+</sup>jøt <sup>+</sup>yáttə e-<sup>+</sup>ídət távtəla kàmtəl ... <sup>+</sup>ət-mànila.*  
 'They would again bang on his back, until when (literally: that time that) he knows whose is the hand that is put down first.' (B 9:9)

In (5) the near deixis singular demonstrative *'a* is used with this function and in (6) the near/middle deixis plural demonstrative *'annə*:

- (5) *'á-məndit báxta 'odálə hác-naša lè-avədla.* 'The thing that a woman does, no man can do.' (A 5:3)
- (6) *'ánnə nášə kát 'átvəlun tùp, xelànta tùp, t-azíva turànə, maxíva xzìyra.*  
 'Those people who had a shotgun, a powerful shotgun, would go to the mountains and shoot pigs.' (B 4:6)

In most cases a demonstrative is used with a head nominal whose referent has been mentioned or inferable in the preceding context. Even here, however, the restrictive relative clause, with which the head is syntactically linked, can be regarded as the primary referential link of the anaphoric demonstrative, e.g.

- (7) *'o-cačálət bràta mýyolə vágəla málca, šópət málca.* 'The bald man who has brought the girl becomes the king, in place of the (real) king.' (A 1:24)
- (8) *bəxzáyəl 'o-xmárət kúdmə zvìnuval 'ína +támələ.* 'He sees that the donkey that he had bought yesterday is there.' (A 28:6)
- (9) *e-dársət yávvonva kátu kámtəl lélə lípo bəxšávən +spày.* 'I don't think he has learnt well the lesson that I gave him some time ago.' (A 3:87)
- (10) *ó nišánkət 'ána mùttun +áv-da vél-+támma.* 'The sign that I had placed was in the entire street.' (A 2:10)
- (11) *ci-bašlákłun har-b-dé səstímət ju-màta c-odáxvala.* 'We cook them, just like the system that we used to practice in the village.' (B 12:9)

On some occasions the near deixis demonstrative is used, e.g.

- (12) *'áha móndit 'ána +báyyən tanònnəl bədvákələ mən-cúllə matvátət dìyyan.*  
 'This thing that I want to say (= what I want to say) holds for all our villages.' (B 2:1)

In the examples above a copula element remains in its normal position in the subordinate clause, i.e. an enclitic on the predicate or on a compound verbal form. Sporadically, however, it is moved to the front of the clause and is attached to the subordinating particle. In such cases the particle is detached

from the head noun and has the form of a tense stop *t*- due to coalescence with the initial laryngal of the copula (§ 1.15.2.), e.g.

- (13) *cúllə-da* 'an-<sup>+</sup>*sarbàzə* *t*-*íva mónnu* *cúllə* *šátyəna* *+rùyəna*.| 'All the soldiers who were with him are all drunk and inebriated.' (A 3:35)
- (14) *báva* 'avíla *marzanàna* *yánət míyya* *t*-*it-bəšvəké* *jávo* *m-l-á-yba* *xína* *lá* *tápxi*.| 'A basin has sides, so that the water that you release into it does not spill from the other side.' (B 17:30)

In (15) two nouns are presented as alternative heads:

- (15) *'ita* 'ó *nášət* *+accárət* *+dàna yúvvuval* *ju*-<sup>+</sup>*fəllan* *yúma* *ya*-<sup>+</sup>*fəllan* *šábtə* *jàři* *mən-kám-*<sup>+</sup>*dana* *avíva zíyzu* *+purriyyé*.| 'Now the man or the farmer to whom he had given (a deadline) on such-and-such a day or such-and-such a week had to have paid his money beforehand.' (B 13:2)

The head noun in (16) lacks the demonstrative pronoun. The relative clause, which should be interpreted as restrictive, is separated from the head by an intonation group boundary and the subordinator particle *t* is repeated at the front of the clause:

- (16) *cyùlət* *t*-*ívən cílu* *+tarra* *manšənnə*.| 'I shall forget the measurement that I made for the door.' (A 16:3)

In (17)–(19) the relative clause is non-restrictive. It is separated from its head by an intonation group boundary:

- (17) *láxxa* *+ántəla*, *’at-dokètla* *núyra pás šapìra*.| 'Here is the airhole, which you close for the fire to remain good.' (B 7:12)
- (18) *'an-júlla júrət dmàxə* *t*-*ína malàpə* | 'the big clothing of bedding, which are sheets' (B 17:27)
- (19) *+xárta* 'é *bráta* *t*-*íva tárta* *+al-’ilàna* *+róba* *+rədyálə* *’á brún-màlcə*.| 'Then the son of the king took a great fancy to the girl, who was sitting on the tree.' (A 56:2)

A prepositional phrase or adverb may modify a head noun with the subordinating particle *t* without a copula. Such constructions may be regarded as reduced relative clauses, e.g.

- (20) *ka-dan-nášat mònnu mára xá-dana +kátu dùkun.* ‘He says to the people with him “Take a cat.” (A 3:78)
- (21) *nášat xut-ýdat díyyi mùdi váyəna?* ‘What would the people under my command become?’ (A 3:61)
- (22) *ctayátat láxxa! véna máya bíyya là b-+karúvva.* ‘The chickens here produce eggs without a rooster.’ (B 7:4)

Likewise an adjective is occasionally found connected to the head noun with the subordinating *t* and this too can be interpreted as a reduced relative clause:

- (23) *cərvíšət dmáxta xazzívala.* ‘They used to see a rabbit that (was) asleep.’ (B 4:4)

In (24) the reduced relative clause is fronted before the head noun:

- (24) *+róba ’ət-košunàya +dóstə ’átvəla.* ‘He had many friends who (were) military (people).’ (A 41:17)

#### 14.1.1.1.2    *kat*

Relative clauses introduced by *kat* that have a definite nominal antecedent may be restrictive or non-restrictive.

A definite head of a restrictive relative clause is generally preceded by a demonstrative, which binds the noun anaphorically with the descriptive content of the relative clause. The demonstrative is either from the default or the near deixis series, e.g.

- (1) *é báxta kát pyàyəla láxma! bədráyula +al-de-màzrak.* ‘The woman who was baking bread would put it on the baking cushion.’ (B 10:14)
- (2) *ka-cúlla dánnə +parsúpə kátju-dé dóštət ’Ùrmi ci-xáyyi! kát məššəlmànəna! ci-+kárax +hošārə.* ‘We call all those people that live in the plain of Urmi who are Muslims *hošārə*.’ (B 2:16)
- (3) *án čám kamáyə məššənnérə kát tilun! ju-dóštət ’Ùrmi.* ‘the very first missionaries that came to the plain of Urmi’ (B 2:12)

In (4) the head nominal is fronted before the verb, which separates it from the following relative clause:

- (4) *xáti ka-dá yála +byáyəla kat-nùynə zabúnəla.* ‘My sister loves the lad who sells fish.’ (A 34:4)

A copula element within the relative clause is occasionally fronted and attached to the *kat* particle, in which case the final /t/ becomes a tense stop /t̪/, due to its coalescence with the initial laryngal of the copula, e.g.

- (5) *cačála kat-íla málca| ... bədráyələ kálə ...* 'The bald man who is the king ... shouts ...' (A 1:29)

In (5) the head noun does not have a demonstrative. This may be due to the fact that the referent is easily recoverable from the preceding discourse and additional anaphoric cues are unnecessary.

In many cases the relative clause introduced by *kat* after a definite nominal antecedent is non-restrictive, i.e. it occurs in a context where the speaker assumes that the hearer can identify the referent of the head nominal without further modification. In such cases the function of the relative clause is to add supplementary, often recapitulatory, information concerning the antecedent and is assertive. In most cases such clauses convey information that has a background status in the discourse, e.g.

- (6) *Nátan brúnu kat-jurvássuva fú ... malciytəva| +naràhat víla.* 'His son Natan, whom he had brought up and (who) was (now) in the royal court, became discontent.' (A 3:17)
- (7) *'á 'axúna +júra kat 'ótłə xačlánə +raba| bitáyələ +bətlábələ mən-'axúnū +hayyárta.* 'The eldest brother, who has many fields, comes and asks his brother for help.' (A 38:2)
- (8) *'ánnə míyyət +'ánvə kat c-avíva xvítələ 'áx míyya +t̪inànəl ka-móriša c-avíva 'ax-ət-'ámri +sápyə 'ax-zýa.* 'The grape juices, which were mixed like muddy water, in the morning were, as they say, clear as a bell.' (B 12:3)

The non-restrictive relative is often separated syntactically from the head by intervening material and also detached prosodically by being presented in a separate intonation group. This suggests that they are not integrated syntactically in the nominal phrase of the antecedent but rather are related to the antecedent noun in a looser relationship, which may be termed supplementation,<sup>1</sup> e.g.

- (9) *+yánə 'an-jardéya xrúzlun +'ál ju-dàrta 'átxa,| +xárta xa-tre-+tlá dánə=za +'áil váddar mən-dàrtal kat 'áha| bát ... +'áxəl mənné| +xárta p̪t-ázəl.* 'Lay

---

<sup>1</sup> Cf. the terminology proposed by Huddleston and Pullum (2002, 1058) for the syntax of English.

out the round loaves together in the courtyard like this, then two or three outside of the courtyard, which he will eat, then he will go along.' (A 37:3)

- (10) *'u-+byáyələ mən-de-yòmmu| kət-ilə xumìtu| báxtət +'Axìkar| ávə mónnō 'áx +jòra.'* 'He wants to be with his mother, who has nurtured him, the wife of Axiqar, as a husband.' (A 3:38)

Example (9) from a narrative contains a non-restrictive relative clause that serves to continue the event line of the narrative. Such continuative non-restrictive relatives in narratives convey foreground information.

#### 14.1.1.3 t + *k*at

These are functionally equivalent to constructions in which the head is marked by the affix *t* alone. The relative clause after a definite head is restrictive and the head is preceded by a demonstrative pronoun, e.g.

- (1) *'o-násət kát... +al-málcat jànu| Pxäyānàt<sup>p</sup> 'ávəd,| +xəltə 'ávəd| +al-'alàha-zə vádələ| +xəltə|* 'The man who does treachery to his own king, who commits a fault, commits the fault also against God.' (A 3:48)
- (2) *'áyən xəzyálun| ju-ctávə bəctàvəna,| 'o-ctávət kət-ctívuna ká bòard-at diyyé| ju-Bòston,| láxxa ju-'Amèrica,| márəna ...* 'They saw it (the plain of Urmia) and write in their book, the book that they wrote to their board in Boston here in America, they say ...' (B 2:14)
- (3) *'án məndyánət kət-kámta mirevá kátu|* 'the things that he had previously told him' (A 3:89)
- (4) *'u-'a-vazzírət kət-ilə cəs-málca| šámmu-da 'Alla-Vardi-+Xàn-ilə|* 'And the vizier who is with the king, his name is also Allah-Vardi-Khan.' (A 1:28)

#### 14.1.1.4 Demonstrative Pronoun + t

Occasionally a non-restrictive relative construction is formed by resuming the head noun with a demonstrative pronoun combined with the relative particle *t*, rather than attaching the *t* directly to the head noun. This is often placed in a separate intonation group, but is occasionally in the same intonation group as the head noun, as in (4):

- (1) *cúllə mən-dánnə košüynu| 'án-t bitáyəna kát ka-díyyi ... +kàtlí| xá samé bət- +kətłənnə|* 'All of those troops of his, who are coming to kill me, I shall kill a part of them.' (A 39:42)
- (2) *'é cə́ččə xúš 'atyàni,| 'é t-ín 'ána +byàyo,| 'ána +spáy t-avìna|* 'Let that girl come, the one whom I love, and I shall get better.' (A 56:3)

- (3) *'o-súysət ḁat-múyyulə mənnu,| 'o=t-márən ḁat-m-ju-+hàva práxələ,| 'àha bətyávələ +'ällu.|* 'He sits on the horse that he brought with him, the one that I say flies in the air.' (A42:22)
- (4) *'átxa +bar-náša| zabúmal ḁa-+tálə,| +tálə 'o=t mən-cúllə bišələ.|* 'The man betrays the fox in this way, the fox, which is the most wicked of all (animals).' (A 47:20)

In (5), in a text from Georgia, the predicative adjective of the embedded clause is fronted before the relative particle:

- (5) *xášle ćen +karavàšu,| +šudrèlə| cás de-çàččələ | é +cásəb t-íva.|* 'His servants went off, he sent them to the girl, the one who was poor.' (A 56:3)

#### 14.1.1.5 $\dot{t}$ -i

In the variety of the dialect spoken in Georgia the relative particle occasionally has the form  $\dot{t}$ -i, e.g.

- (1) *+xárta árak=da ci-+pál̥ti b-dé pílluš- $\dot{t}$ -i-+jámmax-xina.|* 'Then they produce arak from the grape must that we gather.'

This particle, which is more frequently used in Georgia as a temporal particle or complementizer of a content clause (§14.5.3.2.), appears to have arisen by a shortening of the combination of the particle *t* with the copula, i.e.  $\dot{t}$ -i <  $\dot{t}$ -ilə.

#### 14.1.1.2 Indefinite Nominal Antecedent

##### 14.1.1.2.1 t

A relative clause following an indefinite antecedent nominal with the subordinating particle *t* may be restrictive or non-restrictive.

When the clause is restrictive the indefinite head by itself may refer to a set of referents or to a generic class, e.g.

- (1) *lá jáxcət bí ... nášət +dòstux=ina.|* 'Do not laugh at people who are your friends.' (A 3:9)

In such cases the head may be preceded by the universal quantifier, e.g.

- (2) *cíl-məndit +bàyyət b-yavvànnux.|* 'I shall give you everything that you want.' (A 3:85)

The phrase *cul-məndit* is often contracted in fast speech to *cu-mət*. In (3) the relative particle is elided, resulting in a further truncation:

- (3) *'ádi cù-m<sup>+</sup>báyyət̪ fu-da-dúnyə 'ána ka-díyyux yàvvən.*! ‘Now I shall give you everything that you want in the world.’ (A 40:8)

In (4) the head consists of two nouns linked by the disjunctive particle *yan* ‘or’. Each noun has the relative particle:

- (4) *fu-dan-<sup>+</sup>madrašyàtə<sup>!</sup> +rabíyyət̪ yán<sup>!</sup> rabíyyátət̪ 'átvə ci-<sup>+</sup>ma᷑krīva.*! ‘In those schools male teachers and female teachers that were there used to teach.’ (B 1:31)

When the indefinite antecedent has a specific referent, the relative clause is non-restrictive. In such cases the relative clause is often detached prosodically from the antecedent. This is likely to reflect the different pragmatic status of non-restrictive relatives. Whereas restrictive relatives typically contain presuppositional information, a non-restrictive relative is typically assertive and therefore more prominent, e.g.

- (5) *'átvəlun<sup>!</sup> +rába dàvə<sup>!</sup> t-íva<sup>!</sup> +júmma mán ... škilé mán ducána xìna.*! ‘They had a lot of gold coins, which they had gathered from ..., they had taken from other places.’ (A 37:22)
- (6) *'átvə hádax<sup>!</sup> +dána<sup>!</sup> 'at-kənyàna<sup>!</sup> tavərta<sup>!</sup> hám=da<sup>!</sup> +'álma m-<sup>+</sup>ùydalə ci-xayyíva.*! ‘There was such a time when cattle, a cow, and also people lived together.’ (B 17:39)
- (7) *'a-Nàtan<sup>!</sup> 'átvəl xa-'axúna.<sup>!</sup> +'Axiqar<sup>!</sup> xùbba maxzíva ka-dá 'axúna,<sup>!</sup> xá 'axúna xìna 'at-'átvələ<sup>!</sup>* ‘Natan had a brother. Axiqar showed love to this brother, another brother that he had.’ (A 3:17)

In (5) the subordinating particle is separated from the antecedent by an intonation group boundary and attached to a following copula. In (6) and (7) the particle stands independently from the antecedent and is a proclitic of what follows.

#### 14.1.1.2.2 *kat*

Likewise, after *kat* the indefinite antecedent may refer to a set of referents or generic class rather than a specific referent, in which case the relative clause is restrictive, or the antecedent may have a specific referent and the relative clause is non-restrictive.

In the attested examples clauses introduced by *kat* exhibit a greater syntactic and prosodic independence from the antecedent than constructions with the *t* particle even when the clause is restrictive. In the following examples of restrictive relatives the relative particle is in many cases separated from the head by an intonation group boundary:

- (1) *háč náša láttən kat-káti ́átə mák̥kəm mən-da-+’arrə.* ‘There is nobody to come and get me up from the ground.’ (A 33:1)
- (2) *háč náša ju-dúnyə láttən kat-ká-diyi +’aldə.* ‘There is nobody in the world who could trick me.’ (A 22:1)
- (3) *náša lət̥l̥ kat-’á-məndi ’avədla.* ‘There is nobody who can do this.’ (A 3:45)
- (4) *lāttən xá məndi<sup>l̥</sup> jáv +’átra<sup>l̥</sup> kat<sup>l̥</sup> xušbiyna ’ódət +’allu.* ‘There is nothing in the land that you can count on.’ (A 1:21)
- (5) *lá ’ávət mən-xa-bàxta<sup>l̥</sup> kat<sup>l̥</sup> jóro mítələ.* ‘Do not be with a woman whose husband has died.’ (A 3:10)
- (6) *xa-mándi +báyyən tānat kat-háč náša lə-’avə +šámyu ju-dúnyə.* ‘I want you to tell me something that nobody in the world has heard.’ (A 3:75)
- (7) *+’ràba məndyánə, šácar<sup>l̥</sup> yàn<sup>l̥</sup> xácmá məndyánə kat<sup>l̥</sup> ju-matvátə lətva<sup>l̥</sup> ci-zonìva.* ‘They used to buy many things, sugar or things that did not exist in the villages.’ (B 2:8)

Note that the unrealis *patəx* form is used after the antecedents that refer to generic classes (§ 10.2.1.1.5.). This is the case where the speaker is not committed to the existence of a referent in the class, i.e. the class may be empty of referents in reality. This is explicitly the case when the existence is denied as in (1)–(4).

Examples of non-restrictive relative clauses following an antecedent with a specific referent are:

- (8) *’áha málca káti ́va xá +karùvvəl̥ kat<sup>l̥</sup> +’úxča šapíra kàla ’átvələ.* ‘This king was a rooster to me, who had such a beautiful voice.’ (A 3:81)
- (9) *’ádi xa-bába xína týyələ kat-’át ’ax-brúnuvət.* ‘Now another father has come, whose son you are like.’ (A 3:93)
- (10) *’áha-zə xá mən-+adáttət bne-’Úrmila<sup>l̥</sup> kat<sup>l̥</sup> ju-mátxət šánnə vidoна.* ‘This too is one of the traditions of the Urmi people, which they have practiced for a period of (many) years.’ (B 12:9)
- (11) *bəškálələ mádrə xá-duryə ménđi šapíra<sup>l̥</sup> kat<sup>l̥</sup> müyyulə mən-Màcca.* ‘He again takes a load of beautiful stuff, which he has brought from Mecca.’ (A 1:16)

In (12) the head noun is qualified first by a restrictive relative clause introduced by the subordinator *t* and then subsequently by non-restrictive clauses introduced by *kat*:

- (12) *’áha jári ’avəl ’o-nášət ’ána +byàyun| kat-lá-’avilə +’àx| kat-lá-’avilə xàšša.*  
 ‘This must be the man I want, who does not have “ah!”, who does not have sorrow.’ (A 4:4)

#### 14.1.1.2.3 t + *kat*

Relative clauses in constructions combining the *t* particle on the antecedent with a following *kat* are restrictive in the attested examples:

- (1) *xáslux cás nášət kat p-ida plíxəna| là cəs-’aláha.* ‘You went to people who were made by hand (idols), not to God.’ (A 3:5)  
 (2) *+rába=zəjordéyə ci-maġjábva| jordéyə yán cècəl məndyánət kat yámmu é-dána bašlāva.* ‘He very much used to like round loaves, round loaves or cakes, things that his mother used to cook at that time.’ (A 37:2)

#### 14.1.1.3 Pronominal Antecedent

The antecedent of a relative clause may be pronominal. This is either a universal quantifier used pronominally, a demonstrative pronoun, an interrogative particle or an indefinite particle.

##### 14.1.1.3.1 Universal Quantifier

In most cases this is the quantifier particle *cút*, which is a contraction of *cul* + the subordinating particle *t*. The relative clause is restrictive in that it specifies which of the potential set of referents of the head the speaker has in mind, e.g.

- (1) *cút la-pàləx| lé +’àxəl.* ‘Whoever does not work does not eat.’ (A 35:17)  
 (2) *cút tílə t+axlənnə| maķdànnə.* ‘Whoever comes, I shall eat him, I shall burn him.’ (A 40:9)  
 (3) *cut-maččəlx| xá-dana +dínar b-yavvànnə.* ‘Whoever finds it, I shall give him a dinar.’ (A 26:1)  
 (4) *cút mučxélə| +záya ’ət-+dàvun-ilə.* ‘Whoever finds them, the foal is his.’ (A 38:7)  
 (5) *cúllət +báyyət ӯdət b-rišu vùd.* ‘Do whatever you want to do to him.’ (A 3:88)  
 (6) *cút-ilə bitáya màra.* ‘Whoever comes says ...’ (A 3:43)  
 (7) *cút +šrá tapəl ’ət-jarìma.* ‘Whoever lights a lantern (= if anybody lights a lantern), there is a fine.’ (A 2:2)

In (8) the relative clause has been reduced with loss both of the copula and the subordinating particle *-ət*:

- (8) *cul-víyya viyyələ.* ‘Whatever has been has been.’ (A 3:54)

#### 14.1.1.3.2 Demonstrative Pronoun

A default anaphoric pronoun is generally used when the relative clause is restrictive and the reference of the pronoun is internal to the noun phrase, the identity of the referent being established by the content of the relative clause. In most cases the relative particle is *t*, e.g.

- (1) *ð=ə=t-ləjúllə šaþírə šakəllun.* *ð=t-lətlə-dəl zàvən.* ‘Whoever has fine clothes should take them. Whoever does not have any should buy them.’ (A 2:20)
- (2) *kámēta +šadúrlə   =t mótyəva +  llo k  m  ta.* ‘First he sends the one (= the girl) whom he had reached first.’ (A 39:15)
- (3) *k  m  ta   n=t ju-m  y  a buþ  lt  la may  l  a yav  l  a k  tu.* ‘First she brings those that she has cooked in water and gives them to him.’ (A 36:8)
- (4) *m  t n  yn  ?* *  n=t   na m  nju-+  rra +pult  nva.* ‘“What fish?” “The ones I had taken out of the field.”’ (A 36:14)
- (5) *+þ  é +al-d  =t   ha v  d  l  l  .* ‘How fortunate for him who has done this.’ (A 45:16)
- (6) *x   m-d  n-t-  v  a mx  y  u +mat  l  su.* ‘One of those who were hitting it would stick it in.’ (B 17:1)
- (7) *    t mx  y  l  a r  x  k  l   =t l  axxa c  ly  l  l   +b  rx  k  t  l  l  .* ‘When he hits it far, the one who is standing here, he would run.’ (B 9:7)

Sporadically the relative particle is *kat*, e.g.

- (8) *+r  ba bas  ma c-  v  a,* *v   +þam  na c-  v  a m-d   k  t b   ... +n  y  l  a b-+jaz  yl v  duna.* ‘It (i.e. the bread of the traditional oven) is very delicious, and it is more tasty than the one they make with oil or diesel fuel.’ (B 14:4)
- (9) *  na +by  y  n   nn   +al-da-+m  ydan +j  my  na,* *+jam  hat +  lm  a,* *+b  kri* ... *  l   k  t-+k  tl  l  un m  nil  .* ‘I want these people who have gathered in this square, this crowd of people, to ask ... who is the one whom I have killed?’ (A 48:19)

On some occasions, the relative clause is non-restrictive. In such cases a deictic pronoun with a deictic function may be used (11):

- (10) *'á-da mən-jibət +dàvun| kat kày máxyələ| 'ána kàx mxíli.* ‘There, instead of him, who has hit me, I have hit you.’ (A 21:3)
- (11) *+'avva-t-ílə bitá +maṭilux.* ‘That one, who is coming, will reach you.’ (A 7:4)

In (12)–(15) a pronominal head is followed by an adverbial without a copula. This may be considered to be a reduced relative clause:

- (12) *bí jarúma +úllul 'átvala cipa,| trè cípəl| xà-dana| càlyələ| ő=t +úllul partùləva.* ‘On an axle on top it had a stone, two stones, one was stationary, the one on top turned.’ (B 17:6)
- (13) *ő=t cípələjári +yáttə 'ídət mág=la ę=t xùta.* ‘The one who is bending down must know whose hand is the one that is below.’ (B 9:9)
- (14) *ő=t kámta* ‘the one that (existed) formerly.’ (B 17:33)
- (15) *ę=t laxxa* ‘the one (f.) who is here’

In some comparative constructions the demonstrative head may be elided, e.g.

- (16) *'ána yuvválli káto xámša tákə mán dő-t yuvválli ka-+dàv.* ~ *'ána yuvválli káto xámša tákə mán d-yuvválli ka-+dàv.* ‘I gave her five times more than I gave him.’

In cases such as this where there is no syntactic head item the relative particle has the voiced form *d-*. One may compare this to the occurrence of voiced *d-* before a numeral in indefinite ordinal constructions without a head (§ 9.14.):

*xa xabuyšət +ar̥pa* ‘a fourth apple’  
*škúl d-+ar̥pa!* ‘Take a fourth one!’

#### 14.1.1.3.3 *Interrogative Pronoun*

The interrogative pronouns *mani* ‘who’ and *'əm-* ‘which’ may act as indefinite pronominal heads of a relative clause. These may be combined with the subordinating particle *-t* (*mani=t* and *'əmnət*), e.g.

- (1) *máni=t 'átvala jòzə,| józə +mráčəva bədráyəva jávo.* ‘Whoever had walnuts would crush walnuts and put them in it.’ (B 15:9)
- (2) *'əmnət tilə,| b-sépa kđálū mxila.* ‘Whoever came she beheaded.’ (A 43:2)

These types of heads are also combined with the relative clause asyndetically (§ 14.1.2.3.).

#### 14.1.1.3.4 *Indefinite Cardinal Numeral*

The head may be an indefinite numeral without a specific referent, e.g.

- (1) *'ána +bayyən xá=t lélə +šmīta.* | 'I want one that is not broken.'

#### 14.1.2 *Asyndetic Relative Clause*

##### 14.1.2.1 Indefinite Nominal Head

Relative constructions containing indefinite antecedent nominals may be asyndetic, with no connective particle.

In some cases the clause following the antecedent noun is restrictive in function and so may be identified on semantic grounds as a relative construction that is syntactically integrated with the antecedent noun, which functions as the head of the construction. The head generally does not have a specific referent. The verb of the relative clause is often an irrealis form (§ 10.2.1.1.5.), e.g.

- (1) *lábbu +bətlába +'al-xá-naša 'ax-diyyu 'áva.* | 'His heart was seeking somebody who would be like him.' (A 3:14)
- (2) *'átlux xa-násá! mattótlə šòpux?* | 'Do you have a person whom you could put in your place?' (A 3:14)
- (3) *xa-mándi-da látvá 'ána +axlənva.* | 'Moreover there was nothing that I could eat.' (A 36:10)
- (4) *májar 'áttən málca xína ju-da-+átrət díyyi 'ána lēn-+bəddà?* | 'But is there another king in this country of mine whom I do not know?' (A 1:28)

Constructions such as (5) may also be interpreted as asyndetic relative clauses:

- (5) *yávvat kátu xá móndi +'áxla.* | 'Give her something to eat (= something that she may eat).' (A 35:6)

In (6) and (7) the indefinite head has a specific referent:

- (6) *+kúsárta miyyovət 'átnə! cmá-+dana kám 'adíyya, +bayyənna.* | 'I want a pot that you took some time ago.' (A 8:5)
- (7) *xá yúma 'áttən ju-Zumállan ci-+jammilə.* | 'There is a day in Zumallan that they jointly hold.' (B 11:11)

In many cases a clause containing an indefinite noun with a specific referent is followed asyndetically by a clause that presents supplementary information about this referent. Such clauses are idiomatically translated into English by relative clauses. There is generally nothing structural or semantic in the NENA

dialect, however, that is clearly diagnostic of their subordinate status and integration into the matrix construction. Examples:

- (8) *xa-náša 'áttənju-<sup>+</sup>düssak<sup>l</sup> bədmáyəla<sup>+</sup>älli.* ‘There is a man in prison who resembles me.’ (A 3:35)
- (9) *'átvə lətval<sup>l</sup> xá yálə 'átvəl<sup>+</sup>másta<sup>l</sup> <sup>+</sup>al-ríšu<sup>l</sup> <sup>+</sup>rába lətva.* ‘Once upon a time, there was a lad who did not have much hair on his head.’ (A 37:1)
- (10) *xa-bàxta bəjvárələ<sup>l</sup> šámmo<sup>l</sup> <sup>+</sup>Máhəva.* ‘He marries a woman, whose name is <sup>+</sup>Mahə.’ (A 40:1)
- (11) *'áha málca<sup>l</sup> 'átvələ xa-báxča<sup>l</sup> <sup>+</sup>rába šap̄rta,<sup>l</sup> jávo<sup>l</sup> 'átvələ xa-'ilánət xabùšə.* ‘This king had a very beautiful garden, in which there was an apple tree.’ (A 39:1)
- (12) *ju-matvátə 'átvə tanúrə<sup>l</sup> tanúrə<sup>l</sup> <sup>+</sup>rába 'átxa<sup>l</sup> <sup>+</sup>ámku<sup>l</sup> javé láxma ci-yap̄iva.* ‘In the villages there were ovens, ovens, very deep like this, in which they used to bake bread.’ (B 2:9)
- (13) *<sup>+</sup>ál dán pardívvə-də ci-mattíva<sup>l</sup> <sup>+</sup>pavánət 'ilànə<sup>l</sup> brízə,<sup>l</sup> čarpívvə ci-tanáx-valun<sup>l</sup> <sup>+</sup>áxnan.* ‘On the laths they put dry branches of trees, which we used to call twigs.’ (B 2:20)

On some occasions such clauses are kept together with the noun they relate to in the same intonation group, e.g.

- (14) *dúlə 'axúnan muyyíla xá<sup>l</sup> <sup>+</sup>séda t-<sup>+</sup>axlàxlə.* ‘Look our brother has brought a item of prey that we shall eat.’ (A 37:12)
- (15) *ci-<sup>+</sup>pal̄tívalun<sup>l</sup> lablívalun<sup>l</sup> <sup>+</sup>érxa-<sup>+</sup>átvə.* ‘They used to extract it (the wheat) and take it to a water-mill that was (in the village).’ (B 2:9)

In (14)–(15) the relative clauses, although non-restrictive, do not present background information, as is typically the case with non-restrictive clauses, but rather are part of the primary message of the matrix clause. In (14) the main point is that the prey is something the speakers can eat. In (15) the assertion about the existence of the water-mill within the community of the speaker would be redundant as background information. Rather it should be interpreted as being within the foreground of the matrix clause, which could be paraphrased thus: ‘there was a water-mill and they take it to the water-mill’.

Similar remarks apply to (16), in which a generic antecedent ‘stars’ is followed by a non-restrictive relative clause. The relative clause cannot be restrictive, since all stars shine in the sky, but it is part of the primary message and not a piece of supplementary background information. In this case the relative clause is not joined prosodically to the head, since it is separated from it by

an intonation group boundary. The construction does, however, exhibit greater syntactic integration with the head than typical non-restrictive relative clauses, since the verb is irrealis, which is a feature of restrictive relative clauses after a generic head.

- (16) *madmuyévən +al-càxvəl ávíju-šmáyya +balbiùsə.* ‘I compare them to stars that shine in the sky’ (A 3:62)

The asyndetic construction is found when the head indefinite nominal phrase is preceded by the interrogative particle *'əm-* ‘whichever’:

- (17) *'əm- +jora +báyyə 'àtə, 'àtə.* ‘Whichever man wishes to come with me, let him come.’

In some cases a copula is elided from an asyndetic relative clause, e.g.

- (18) *jašúkələ xá báxta cóso bulmàlla ... dúla tila.* ‘He looks (and sees) that a woman with entangled hair has come.’ (A 39:33)  
 (19) *xá-yuma bøtpákələ bí xá dána xìvvəl túpru +kèçya.* ‘One day he meets a snake, the tail of which has been cut off.’ (A 46:4)  
 (20) *xá bráta átlun šámmo Suriyya.* ‘They have a daughter whose name is Suriya.’ (A 36:2)  
 (21) *mən-dó-yba bitáyəna susavàyl +allé +sayàdəl* ‘From the other side horses come, on which there are hunters.’ (A 47:18)  
 (22) *xa lišanu +yarixa* ‘somebody with a long tongue’ (i.e. a voluble person)

In these constructions the relative clause is syntactically integrated with the head both through the elision of the copula and also through the fact that it occurs in the same intonation group as the head. As in the constructions (14)–(16) above, the content of the relative clauses in (18)–(21) can be interpreted as a component of the primary message. In (22), which has an indefinite pronominal head, the relative clause is restrictive.

A clause with a locative predicate that lacks the copula may be juxtaposed with the head noun as its modifier. The lack of the copula reflects a degree of grammatical integration with the head, e.g.

- (23) *+m̄lìlunl +al-xa-kùnyal xa-cípa +rába +jùra +állu.* ‘They arrived at a well, over which there was a very large stone.’ (A 39:6)

When the subject of such locative phrases is the same as the head, they may be juxtaposed asyndetically after both definite and indefinite nouns. When the noun is definite, it is sometimes combined with an anaphoric pronoun binding the head to the modifier, which is a characteristic feature of the structure of restrictive relative clause constructions, e.g.

- (24) *xa-mən-dan-šəcvàñəvən| xut-’áklət málca.* ‘I am one of the ants under the foot of the king.’ (A 3:66)

#### 14.1.2.2 Definite Nominal Head

Sporadically a relative clause following a definite head is asyndetic, e.g.

- (1) *váy márrə +mámuni! ’ávət basíma! +’al-dá násyat ká-díyyi yuvválux.* ‘Oh, uncle, thank you for this advice that you have given me.’ (A 42:9)

#### 14.1.2.3 Pronominal Head

The subordinating particle *t* is omitted after the interrogative pronoun *’am-* ‘which’ when this has a pronominal or nominal complement, e.g.

- (1) *’á +xlúyla ’axnòxun! ’ámne +bayyítun mazmərrítun! ’ámne +bàyyəl ràkəd.* ‘In this wedding you make sing whoever you wish, who should dance.’ (B 5:4)
- (2) *’ámnoxun +báyyə ’áta mənni, ’ázax.* ‘Whichever of you wants to come with me, let’s go.’
- (3) *’ámnat násə ’átlə jøddášta motàna! +jammíva! p̄t-azíva ja-bēt-+dàvun.* ‘Whoever of the people has had an accident or somebody deceased, they would gather and go to his house.’ (B 5:6)

The *t* is sometimes omitted elsewhere after interrogative pronominal heads, e.g.

- (4) *máni +byáyələ ’áta mənni, ’ázax.* ‘Whoever wants to come with me, let’s go.’
- (5) *mánilə nòbu! +’avun ci-maštíva.* ‘Whoever’s turn it is, he would irrigate.’ (B 17:29)

In (6) the subordinating *t* has been omitted after the pronominal head *’annə*. This is followed by a predicate of the embedded clause which has the annexation particle *’at-*:

- (6) *'ánnə 'ət-+'àrbab=ina| dàj mxayéna.* ‘They mark with a stamp those that belong to the landlord.’ (B 3:18)

#### 14.1.2.4 No Head

Asyndetic relative constructions include relative clauses that lack both a relative particle and also the explicit syntactic expression of the head. The zero head has the sense of an indefinite pronoun with a non-specific referent ('some', 'something', 'things') and the relative clause is non-restrictive. This is found in existential constructions such as (1) and (2):

- (1) *'éttən háda banívalun.* | *'éttən cúlla bí +tìna ci-banívalun.* ‘There were (some who) built like that. There were (some who) built them all with mud.’ (B 3:37)
- (2) *ham=da 'át mənné 'átle miyya.* | ‘There are also (some) among them (who) have water.’ (B 17:31)

Zero heads can also be identified as existing in naming constructions such as those in (3)–(5) in which the name of the item in question takes the nuclear stress and is typically fronted before the verb:

- (3) *+arabána 'átvala tré pàlla +bøkráyøva.* ‘The cart had two (things that) they called shafts.’ (B 17:52)
- (4) *+bár +mráxtat 'ánnə +'ànvø,| 'ánnə míyyat ... +'ánvø ci-darívalun ju-xácma ... +tagjärət ci-+karáxlun.* | ‘After crushing the grapes, they used to pour the juice of the grapes into some ... (things) we used to call “bins.”’ (B 12:2)
- (5) *ci-+kattíva címo| 'áxnan ci-tanàxlun xína.* | ‘They used to cut (something) we called “sods.”’ (B 2:18)

#### 14.1.3 Adverbial Antecedent

A number of subordinate clauses that have adverbial antecedents are equivalent in structure to relative clauses. This is the case, for example, with the common construction in which the noun *+dana* ‘time’ is used adverbially at the head of a relative construction (§ 14.5.5.1), e.g.

- (1) *'é-+danət sátvə tìyyølə| ... jári 'é-+dana 'ázi kësə máyyi.* | ‘At the time that (= when) the winter has come, ... at that time they must go and fetch wood.’ (A 37:13)
- (2) *'é-+dánət lèx béta,| ... 'ázət xá xáčča miyya mayyátlan.* | ‘At the time that (= when) we are not at home, ... go and bring us some water.’ (A 37:14)

The subordinating affix *t* is often contracted, e.g.

- (3) *č-+dān +bīlan maplāxxax| mánno maplāxxax.* ‘Whenever we want to use (it), we can use some of it.’ (A 37:18)
- (4) *hàl’ ’ám-+dān +bayyíva šatíva c-atíva patxívalə| b-+tása šaklíva| šatíva.* ‘Until whenever they wanted to drink, they would come and open it, they would take it in a cup and drink it.’ (B 3:16)

In (5), in which iterative activities are expressed, the demonstrative is omitted before the adverbial:

- (5) *bərráxša bərráxša| +dánət tétu karbántu| xzílə là| xína hóč-məndi lèla macúxə.* ‘He goes and goes, but when he comes and approaches, he saw that no, he does not find anything.’ (A 4:3)

Other adverbial heads include cases such as the following:

- (6) *’ó-yumət xmártux +tlájáhə +’arṭàla,| ’ó-yuma mètət.* ‘On the day that your jenny farts three times, on that day you will die.’ (A 32:2)
- (7) *’é=jøt tile,| látva tàxta,| látvale hóč mándi.* ‘At the time that they came, there was no wooden bed, they had nothing.’ (B 17:34)

In (8) the adverbial *e=jøt* is followed by an adverbial without a copula. This may be regarded as a reduced relative clause:

- (8) *’é=jøt kàmta!* ‘in the time of before (= in former times)’ (B 17:33)

The adverbial interrogative *’ica?* ‘where’ may serve as a head, e.g.

- (9) *’à-sepət díyyi! ’ícət maxənva| c-odáñvalə trè.* ‘Wherever I struck my sword, I cut (the victim) in two.’ (A 2:28)
- (10) *’ícət ’áttēn cačàlə| bədvačé mayèna.* ‘Wherever there are bald men they seize them and bring them in.’ (A 1:40)
- (11) *’ícət ’átlax júllə šapírə| hállun káti jàldə!* ‘Wherever you have beautiful clothes, give them to me quickly!’ (A 1:13)
- (12) *jáldə m-ícət týyəvət +dùr.* ‘Quickly from wherever you have come, return (there).’ (A 39:11)

Sometimes the main clause contains a demonstrative element that has a correlative linkage to the adverbial relative clause:

- (13) *'ícət sítysi clilə,| 'ána +tàma.|* 'Wherever my horse stops, I (shall stop) there.' (A 42:32)
- (14) *'ícət ju-dəm-mándit sítysi' clilə,| kam-dəm-+tàrra,| 'ána t-+òrən fu-do-bèta.|* 'Wherever, at whatever thing my horse stops, before whatever door, I shall enter into that house.' (A 43:13)

In (15) it is connected to the clause by *kat*:

- (15) *xá-yuma +vára jàv! bétət yála súra 'íca kát dmìxələ| jašúkəna +al-jarjúšta xívva tìvalə.|* 'One day they go into the house where the child is sleeping and see that a snake is sitting on the cradle.' (A 46:1)

In (16), in a text from Georgia, the head *'ica* is connected to the embedded clause by two relative elements. These include the affix *-t* on the head and the particle *t-i* on the verb. The particle *t-i* is a distinctive feature of the variety of the dialect spoken in Georgia (§ 14.1.1.1.5., § 14.5.3., § 14.5.3.2.):

- (16) *xóšlə 'á náša sàval módrə +tàmal 'ícət ý nuýna t-í dvikàlə.|* 'The old man went off again there where he caught the fish.' (A 54:4)

In (17) a relative clause with the definite universal quantifier *culla* as head has a causal adverbial function:

- (17) *'axúna súra cílla t-ílə plíxa! +rába šuršìyyələ.|* 'The younger brother, due to all he has worked, is very tired.' (A 38:4)

#### **14.1.4    *The Internal Structure of Relative Clauses***

When the referent of the head nominal is the subject of the relative clause, it is expressed by the subject inflection of the verb or copula. When the referent of the head has some other grammatical relation in the relative clause, this is expressed by coreferential pronominal suffixes in the appropriate syntactic position. This is illustrated in the foregoing examples. Some structures, however, require further comment.

The resumptive pronominal element in the relative clause may occur on a verb that is embedded under another verb, e.g.

- (1) *'áha móndit 'ána +báyyən tanìnna! bədvákələ mən-cíllə matvátət dìyyan.|* 'This thing that I want to say (= what I want to say) holds for all our villages.' (B 2:1)

When the referent of the head has the function of complement of a preposition or adverbial within the relative clause, the resumptive element is sometimes omitted, e.g.

- (2) *ka-báxtu maxzúyol dúcta kat-mítələ*.| 'He shows his wife the place where he has died.' (A 33:2)
- (3) *ci-bašlaxlun* | *har-b-dé səstímət ju-màta c-odáxvala*.| 'We cook them, just like the system that we used to practice in the village.' (B 12:9)
- (4) *ducánə xína kát tpíkəna b-+Már +Avrám, +Már Yósəp, +Mar 'Illyya, +Már Yuxànnan* | 'other places in which they have met Mar Abraham, Mar Joseph, Mar Elijah and Mar John' (B 2:15)
- (5) *ána hác-ducta là mučáxlí* | *kat-báxti mattánna hemánta*.| 'I did not find any place to leave my wife in trust.' (A 1:5)
- (6) *+mṭílan +al-dé-ducta kát málca márləs kátu* | *kát ...* 'We reached the place in which the king says to him ...' (A 3:29)
- (7) *muttéla ju-‘upra +támə* | *é-duca kat-+màlla ptàna t-avádva*.| 'She put them in the ground, there, in the place where the mullah would plough.' (A 5:5)

When the referent of an indefinite head of a syndetic relative construction is a generic class and has the function of object in the relative clause, the resumptive object pronominal element is often omitted, e.g.

- (8) *cúl-məndit +báyyət b-yavvànnux*.| 'I shall give you everything that you want.' (A 3:85)
- (9) *cúllət +báyyət ódət bərríšu vùd*.| 'Do whatever you want to do to him.' (A 3:88)
- (10) *+rába-zəjərdéyə ci-májjábva, jərdéyə yán cècəl məndyánət kát yámmu é +dána bašlava*.| 'He very much used to like round loaves, round loaves or cakes, things that his mother used to cook at that time.' (A 37:2)
- (11) *cut-báxtət xázzət, méla làxxa*.| 'Bring here every woman you see.'
- (12) *cut-báxtət xzilə, miyyálə làxxa*.| 'He brought here every woman he saw.'

On some occasions a resumptive pronominal element is used, e.g.

- (13) *xa-mándi +báyyən tānət káti* | *kat-hác náša là-‘avə +šámyu ju-dúnyə*.| 'I want you to tell me something that nobody in the world has heard.' (A 3:75)
- (14) *cut-báxtət xazzətta, méla làxxa*.| 'Bring here every woman you see.'
- (15) *cut-báxtət xəzyálə, miyyálə làxxa*.| 'He brought here every woman he saw.'

When the relative construction is asyndetic, an indefinite head that has the function of object in the relative clause is regularly resumed by a pronominal object, e.g.

- (16) *'átlux xa-nàša| mattótło šòpux?'* 'Do you have a person whom you could put in your place?' (A 3:14)

As remarked above, a copula element within the relative clause is sometimes fronted and attached to the *t* element or the *kat* particle. This movement of the copula occurs only in a minority of relative clauses that contain it. In most of the attested examples the head noun of the construction has the role of subject in the relative clause and the copula is third person, e.g.

- (17) *cúllə=da 'an-+sarbàzə t-íva mónnu| cílla šátyəna +rùyəna.'* 'All the soldiers who were with him are all drunk and inebriated.' (A 3:35)
- (18) *'u-'a-vazzírət kat-íla cəs-màlca| šómmu-da 'Alla-Vardi-+Xān-ilə.'* 'And the vizier who is with the king, his name is also Allah-Vardi-Khan.' (A 1:28)
- (19) *sábab baxtày ci-bašliva làxma| +cavútra ci-lablíva ka-'urzán t-ína pəlxána +'al-vàddar.* 'because women would bake bread and take lunch to the men who were working ouside.' (A 5:6)
- (20) *cálba +bärkátna +'al-jánət dá móndi súra t-íla bità.* 'The dogs run to attack the little thing that is coming.' (A 38:18)
- (21) *cút-ilə bitáya màra|* 'Whoever comes says ...' (A 3:43)
- (22) *'u-+byáyələ mən-de-yòmmu| kat-íla xumítu| báxtat +Axiqar| ávə mónnō 'áx +jòra.* 'He wants to be with his mother, who has nurtured him, the wife of Axiqar, as a husband.' (A 3:38)

In these examples the relative clause is restrictive (17–21) or has the informational profile of restrictive relatives (22). In (22) the relative clause 'who has nurtured him' is non-restrictive on semantic grounds, but it is intended as part of the primary message of the matrix clause, rather than being presented as supplementary background information, as is typically the case with non-restrictive relative clauses. It is, therefore, more integrated with the head than typical non-restrictive clauses. The relative clauses in (17)–(22) are non-assertive, in that they do not express a proposition that can be evaluated as true or false.

In (23) and (24) the head noun is object in the relative clause:

- (23) *ó cačála xína kat-íva +tájər vídu| ... bəkyáməl màra|* 'The other bald man whom he had made into the merchant ... gets up and says ...' (A 1:37)

- (24) *cyùlət| t-ívən cílu +tàrra| manšènnə.* ‘I shall forget the measurement that I made for the door.’ (A 16:3)

The relative clause in (25) is non-restrictive and presents supplementary information:

- (25) *bitáyələ cəs-do-xóru xína| t-ílə xmárət +málla zùbnu.* ‘He comes to his other friend, who has sold the donkey of the mullah.’ (A 28:5)

In (26) the referent of the head noun has the role of genitive complement in the relative clause and the subject of the relative clause is the feminine noun *baxtu* ‘his wife’. The fronted copula of the relative clause, however, agrees with the head noun and is masculine singular:

- (26) *xá vádulə ... +tàyər| kat-ílə báxtu tlókta.* ‘He makes one into a merchant whose wife is lost.’ (A 1:24)

In (27) and (28) the copula is omitted in a relative clause with a pronominal head:

- (27) *cúlla kat-yívvə sadiyta| +jummél +tàma.* ‘He gathers there all who have given testimony.’ (A 1:42)  
 (28) *čén-t táza xátna càlu| ci-damxíva +tàma.* ‘Those who are recently the groom and bride (= the newlyweds) used to sleep there.’ (B 5:5)

Occasionally speakers disconnect the copula from the relative particle prosodically. This is found, for example, in several cases in text B1, e.g.

- (29) *’ína sámət kát ’íva ju-dòšta| ’átvəlun kənyànə.* ‘But the group who were on the plain had cattle.’ (B 1:23)

In (30) an independent copula is used in a non-restrictive asyndetic relative clause after an indefinite head with a specific referent. The relative clause is identificatory, which is one of the conditions of the use of the independent copula before the predicate (§ 10.5.2.):

- (30) *bədráyələ kálə ka-xá mən-cačáləl ilə| vazzər.* ‘He shouts to one of the bald men, who is the vizier.’ (A 1:29)

Some relative constructions with an indefinite head that refers to a class of entities have semantic parallels with conditional and temporal constructions. This is reflected also structurally by the use of verb forms that are characteristic of the protasis of conditional constructions (§ 14.6.), such as the *ptaxla* form referring to a possible situation in the future (31–32) and the irrealis *pataxva* form (33):

- (31) *cút mučxèla* +záya ’at-+dàvun-ilə. ‘Whoever finds them, the foal is his.’ (A 38:7)
- (32) *cút tíla t-+axlènnə*, *makdònna*. ‘Whoever comes, I shall eat him, I shall burn him.’ (A 40:9)
- (33) *cul-nášət* ... ó *xabúša* +axèlvalə, ... *ci-havíva jìl*. ‘Everybody who used to eat that apple would become young.’ (A 39:1)

This semantic overlap has occasionally resulted in blend constructions such as (34), which contains the temporal conjunction *íman* and the relativizer *kát*, and (35), which contains the conditional particle *’ən* and the relative head *cumandit*:

- (34) *íman xa-náša kát tánə* ’ána ’àtxən! ’ána ’àtxən, *’áha ci-tanyànnə katé*. ‘When a person says “I am like this, I am like that (= I am suffering)”, I tell this to them.’ (A 4:16)
- (35) *mattáva ju-de-sálta* ’án *cú-məndit* ’àtva. ‘She placed in that basket whatever there was.’ (B 9:5)

As for the word order of the core constituents of relative clauses, both subject and object constituents are generally placed before the verb.

Subject constituent:

- (36) ó *nišánkət* ’ána mütturn! +’áv-da vēl-+tàmma. ‘The sign that I had placed was in the entire street.’ (A 2:10)
- (37) *lá* ’ávət mən-xa-bàxta! *kát* +jóro mítəla. ‘Do not be with a woman whose husband has died.’ (A 3:10)
- (38) +rába-zəjordéyə ci-majgjábva, *jordéyə yán cèca*! *məndyánət kát yámmu* ’é-+dána bašlava. ‘He very much used to like round loaves, round loaves or cakes, things that his mother used to cook at that time.’ (A 37:2)
- (39) *xa-mándi* +báyyən tānat *kátíl* *kat-háč náša* *là-’avə* +šámyu *ju-dúnyə*. ‘I want you to tell me something that nobody in the world has heard.’ (A 3:75)

In (40) the subject and object are placed between the auxiliary and the resultative participle in a *vayələ ptixa* construction:

- (40) *'ína +bar-náša kát vágəl +tálə xáyyu purkè,| xáyyat +bar-náša,| +bar-náša ka-dó +tálə zabùnələ.* 'The man, whose life the fox had saved, the life of the man, the man betrays the fox.' (A 47:20)

In (41) the relative clause has an independent pronoun expressing the possessor in a dative possessive construction with the existential particle. The pronoun here is behaving like the subject of a verb.

- (41) *hákyaṭ bitáyələ +al-xá-dana mən-+adáttət áxnan žtlanju-mátat Zumàllan| b-šámmət mərtúxət +Márezə.* 'The story is about one of the customs that we have in the village of Zumallan by the name of (the festival of) the cake dough of St. Zayya.' (B 11:2)

Object constituent:

- (42) *náša lát! kat-á-məndi 'avádlə.* 'There is nobody who can do this' (A 3:45)  
 (43) *'íta ci-mapləxxíva táxta ... +doránəl mán mázrač! ó-t làxma ci-mattívələ +állu.* 'So they used to use a board, a rolling pin together with a dough-cushion, on which they used to put the bread.' (B 2:9)  
 (44) *ju-matváta átva tanúrə! tanúrə +rába átxa 'ámku! javé láxma ci-yapíva.* 'In the villages there were ovens, ovens, very deep like this, in which they used to bake bread.' (B 2:9)

Components of the embedded clause are occasionally fronted before the relative particle. In such cases the relative particle is positioned immediately before the verb or copula of the embedded clause.

In (45)–(47) an adverbial phrase is fronted in this way:

- (45) *'ána! +báyyan tányan! šámmənət xácmə +tálýátəl b-surútan kát +túlxəjumavátə.* 'I want to tell the names of some of the games that we played during our childhood in the villages.' (B 9:1)  
 (46) *yalé ju-madrásə kát 'íva +bəkrá c-avíva +rába zərrac.* 'Their children who were studying in the schools were very intelligent.' (B 1:41)  
 (47) *b-+kéṭəl tānax! 'ánnəl +tunyátə búš kámta kát 'íva +mṭá 'íva məšməšə.* 'In summer, we may say that the fruit that ripened first were apricots.' (B 1:23)

In (48) and (49), in texts from Georgia, a predicative adjective is fronted before the relative particle:

- (48) *xášle* ́én +*karavàšu*,| +*šudrèlə*| *cás de-çòččəl* ́é +*càsəb t-íva*.| ‘His servants went off, he sent them to the girl, the one who was poor.’ (A 56:3)
- (49) ’át *xácma mənné* ... *’atìkə t-avíle*.| ‘There are some ... who have old ones.’ (B 17:56)

When components of the embedded clause are fronted in this way, there is sometimes a double marking of the relative particle, one on the head nominal and the other before the verb or copula, e.g.

- (50) *ka-mù?*| *m-såbab*| *naravátət mən-dánnə* +*turánə t-íva* +*bəslàya*| +*várəvajuf-yámtət* ’Urmi,| +*’álmat dìyyan*,| *m-såbab* ́íva +*accàra*| *marzanánət dánnə naravátə matvátə muttílun*.| ‘Why? Because the rivers that descended from the mountains and entered the lake of Urmia—our people, since they were farmers, established villages around these rivers.’ (B 1:21)

In (51) an object referent is fronted in a double-marked relative construction:

- (51) *xášla* ́á *náša sàva*| *mádrə* +*tàma* | *’icət* ́é *núyna t-í dvíkàla*.| ‘The old man went off again there where he caught the fish.’ (A 54:4)

In (52) the non-restrictive relative clause contains a conditional construction:

- (52) *’ánnə=da* *xá dúnyə dàvəna*| *kàtux*| *kát* ́én *xurájlux* *ka-bàxti*,| ́én +*bsàrrun*| *’ána p̄t-átən b-yavvònun*.| ‘These are a load (literally: world) of gold coins for you, which, if you spend them on my wife, if they are insufficient, I shall come and pay them (back).’ (A 1:5)

In (53) the resumptive element in a non-restrictive relative construction is in a complement clause embedded under a matrix verb:

- (53) *’ánnə m-+údalə bət-+dárši* ́én *’ána kémən* ... *dyànta* *’ódən súsa yavvónna* +*záya yavvónna* *ká* ... *’axúna sùra*| *kát* +*bəddáyən=zə* | *’ét sùstələ*.| ‘They will argue together if I make a judgement to give the horse, give the foal, to the younger brother, although I know it (literally: which) is of the mare.’ (A 38:5)

The particle *kat*, which is used to introduce some relative clauses, originated as a combination of the dative particle *ka-* with the subordinating particle *t*. This is used to introduce purpose clauses, where its dative function is transparent (§ 14.5.3.1.4.), e.g.

- (54) *màyuna| kat-<sup>t</sup>kaṭlila|* ‘They bring him to kill him.’ (A 3:31)
- (55) *xa-<sup>t</sup>bázza bəšvàkəna| kat-napásu là-<sup>t</sup>kaṭta|* ‘They leave a hole so that his breathing would not be cut off.’ (A 3:36)

In some contexts there is some degree of ambiguity as to whether the construction should be interpreted as containing a purpose clause or a relative clause, e.g.

- (56) *<sup>t</sup>jámmila 'e-kóšun buš-xelànta| kat-xazzánna kam-für'un|* ‘Muster a stronger army so that I can see it (stand) before Pharaoh’ ~ ‘Muster a stronger army that I can see (stand) before Pharaoh.’ (A 3:24)
- (57) *náša lát| kat-á-məndi 'avòdla|* ‘There is nobody who can do this’ ~ ‘There is nobody for the purpose of doing this.’ (A 3:45)

In such cases the head noun, in the interpretation of the construction as a relative clause, refers to a generic class. Such nouns have an irrealis form of verb in the relative clause (§ 10.2.1.1.5.). The use of *kat* would then have been extended to realis relative clauses due to its reanalysis as a relative marker.

There is also a degree of ambiguity in constructions such as (58) in which the *kat* could be interpreted as a causal conjunction ‘on account of the fact that’, which corresponds to one meaning of the preposition *ka-* (§ 11.4.3.), or could be interpreted as a relative particle. These constructions also, therefore, could have driven the reanalysis of the *kat* particle as a relativizer:

- (58) *xá xabúša ka-díyyux kát <sup>t</sup>smìlux|* ‘one apple for you because you have listened/who have listened’ (A 38:19)

Constructions that contain both the subordinating particle *t* on the head noun and *kat* in the dependent relative clause (§ 14.1.1.1.3.) may be compared to annexation constructions in which the syntactic dependency is marked both on the head and on a dependent demonstrative item (§ 5.14.), such as *b-ríšət dó mārux* ‘by the head of that master of yours.’ (A 3:65), *márzət da-<sup>t</sup>dyna* ‘on the bank of this spring’ (A 37:8), *dópnət dé dàšta* ‘on the edge of that plain’ (B 2:13), or constructions with the independent genitive particle such as *betət diyyux* ‘your house’, in which the dependency is marked both on the head noun and on the genitive particle.

## 14.2 Cleft Constructions

The purpose of clefting is to put prominence on a particular component of the clause. In a fully formed cleft sentence the item in focus is made the predicate of a copula construction that takes as its subject a nominalization of the remainder of the clause formed by a relative particle, e.g. *I took it > It is I who took it*. In C. Urmi this fully formed type of cleft is rarely found. Rather the examples of clefting that are usually encountered are what Goldenberg (1973) calls ‘imperfectly-transformed cleft sentences’. In such constructions the item in focus has a copula enclitic but the remainder of the clause is not nominalized by a relative particle. This type of construction is common in Syriac (Goldenberg 1973, 129). Examples from C. Urmi are the following:

- (1) *'á +tuvvùltələ cúllə 'ánnə məndyánə +bixàlələ.* ‘It is this worm that is eating all these things.’ (A 39:30)
- (2) *'ánnə mút níyñənə bušòltət?!* ‘These are what fish that you have cooked? (= What [awful] fish have you cooked!)’ (A 36:7)
- (3) *'ána 'a-mút kàlat-íva vódlí?!* ‘What mistake did I make? (literally: This was what mistake that I made?)’ (A 4:10)
- (4) *+šavrá yumánələ bábo vádənə +xliyylə +šavrá lelavày.* ‘Her father’s family hold a wedding for seven days and seven nights. (literally: It is for seven days her father [and family] hold the wedding, seven nights.)’ (A 43:16)
- (5) *tré mátrəvəl míta ci-mattitunlə vúdunlə +tlà mátrə.* ‘(If) it was two metres that you used to place the dead body, make it three metres.’ (A 6:11)
- (6) *'átxa xakúvvələ kàtu! mu-táhar-va ó 'édmu dmíxələ +tàma.* ‘She tells him how it was (that) her brother-in-law had slept there.’ (A 42:36)

It can be seen from (1) that if the item in focus is the grammatical subject of the equivalent unclefted construction, then it remains the grammatical subject of the verb in the non-focused portion of the sentence.

Example (7), from a text recorded in Georgia, can be interpreted as a case of clefting to put focus on the predicate rather than a particular constituent. In this case the predicate is nominalized by the relative particle:

- (7) *+úxča t-íva jìs 'é çáččə.* ‘That girl (was) one who was so good (= so good was that girl).’ (A 51:4)

### 14.3 Indirect Questions

#### 14.3.1 Polar Questions

Indirect polar questions (i.e., yes—no questions) are asyndetic with no explicit syntactic marker, e.g.

- (1) *tíyən mənnòxun| hamzàmmən| xázzən b-ḳablítunli.* ‘I have come to speak with you to see whether you will accept me.’ (A 36:5)

If the indirect question consists of two alternatives, the second alternative may be introduced by the particle *yan*, e.g.

- (2) *'à yála| +bíl xázə dùz márəl +málla, yan-là.* ‘The lad wanted to know whether the mullah was speaking the truth or not.’ (A 14:3)

When the original question contains an imperative, this may be retained in the indirect construction, e.g.

- (3) *'ita tanánnux| +núsłə yan-là.* ‘Then I shall tell you whether to bite him or not.’ (A 47:14)

#### 14.3.2 Questions Introduced by an Interrogative Particle

Various subordinate clauses that are introduced by interrogative particles may be classified as indirect questions. These are embedded under verbs such as ‘to know’, ‘to say’, ‘to ask’, ‘to see’, ‘to understand’, ‘to forget’, or the expression ‘it depends on ...’, e.g.

- (1) *'ína lélə +bəddá 'ámneva.* ‘but he does not know which one it was.’ (A 2:9)  
 (2) *+bəddáyət mu-màrən?* ‘You know what I am saying?’ (A 3:38)  
 (3) *xázzən mü-+amsən ódən.* ‘I shall see what I can do.’ (A 1:22)  
 (4) *'ána! mānši mü humzàmlı!* ‘Forget what I said!’ (A 4:7)  
 (5) *mélə xázzən ... ḫa-mü-ilə 'átxa vída.* ‘Bring him so that I can see why he has done this.’ (A 3:26)  
 (6) *tánili mánivət.* ‘Tell me who you are.’ (A 3:65)  
 (7) *'átxa xa᷇uvvəla ḫatūl mu-táhar=va ó 'ódmu dmíxələ +tāma.* ‘She tells him how her brother-in-law had slept there.’ (A 42:36)  
 (8) *bába yámma ṭasmím dokíval 'ám brátal +ṭalbívala ḫátan.* ‘The father and mother made a decision as to which girl they would request in marriage for us.’ (B 5:1)  
 (9) *ju-matváta 'ótvalan bátə prišəl clítəva +al-nàšəl müjjurra másalan cmá*

*'á-’iva +cásəb yán dolàtmand.'* ‘In the villages we had various houses, it depended on the people, how, for example, how much he was poor or rich.’ (B 2:18)

In (10) and (11) the embedded question preserves the original wording of the direct question with a 2nd person verbal form and an imperative form respectively:

- (10) *+márya ’aláha xaltána mən-+táməl talmídu +šadúruləl mírələ kátu mū p-tánət қa-dá náša.* ‘Lord God Almighty sends his disciple from there and said to him what he<sup>2</sup> should say to this man.’ (A 49:7)
- (11) *+bəddàyət mū vùd?* ‘Do you know what you should do?’ (A 48:28)

In (12) a preposition after a matrix verb takes a demonstrative that anticipates the embedded interrogative clause:

- (12) *taxmúnəl +’al-da müjjurra +jaróblun ’ànnəl +tlá núkzət dàl ’áxún málca қátkunyél kátu.* ‘He thinks concerning how he could test the three points that the son of the king told him.’ (A 48:8)

In (13) the copula in the embedded question is omitted:

- (13) *’ána xá xázzən áyya mū +jéyran.* ‘Let me see what gazelle that is.’ (A 42:30)

A negative version of the embedded question is repeated to give the interrogative particle generic scope, e.g.

- (14) *taxmúnələl mu-’avəd, mu-lá-’avəd.* ‘He thinks (wondering) what on earth he should do.’ (A 3:73)
- (15) *+bəxdárənal xázzə mū-’ət! mū ləttən.* ‘They travel around in order for him to see whatever there is.’ (A 2:3)

When the subject of the embedded question is a full definite noun or an independent pronoun, these are often placed before the interrogative particle, e.g.

- (16) *+bəddáyəla kássat mū-ila.* ‘She knows what the story is.’ (A 3:32)
- (17) *’ita ’ána lén-+bədda áyya mū-ila.* ‘I do not know what that is.’ (A 2:4)

---

<sup>2</sup> Literally: you.

- (18) *+báyyən +pàłtən| xázzən +’átri mù-ilə.* ‘I want to go out and see how my land is.’ (A 2:1)
- (19) *’átən jári tányat ḁa-díyyi| +’áynət bábi ’icəna.* ‘You must tell me where the eyes of my father are.’ (A 39:40)
- (20) *+báyyax +yattax ’áxnan ’icəvax.* ‘We want to know where we are.’ (A 2:6)
- (21) *bəxzáyələ +’átra müjjurra +bəxdárələ. bəxzáyələ málca müjjurra| +dívan vádələ.* ‘He sees how the country is being run. He sees how the king holds a court.’ (A 1:21)
- (22) *’á yámmyi +xánəm yámmyi| kàm ’átxa vítəla?* ‘This mother of mine, the lady my mother, why has she become like this?’ (A 44:5)

In constructions such as (23) and (24) the subject refers to a generic class. In (24) it is fronted before the main verb:

- (23) *bəl-díyyi| bəl-díyyux| ’aláha ḥ-ávəd +dívan| ... +bəddáyət +dívan mù-ilə?* ‘God will hold a court (and judge) between me and you. ... Do you know what a court is?’ (A 3:93)
- (24) *’á sákłə mən-səmmálta! səmmálta +bəddáyət mù-ilə?* ‘He went up by a ladder. Do you know what a ladder is?’ (A 2:31)

The subject of the complement clause is sometimes raised into the object position of the main clause, as shown by a pronominal object on the main verb, e.g.

- (25) *+bəddáyona ’adi-cúllə ’a-+ṭálta mù-ilə.* ‘They now know what this game is.’ (A 1:25)

On some occasions the definite subject follows the interrogative particle. In such cases the subject is placed after a copula (26–27) but may be placed either before (28) or after (29) a verb, e.g.

- (26) *báxta +bəddáyələ| mù-ilə kəssat.* ‘The wife knows what the story is.’ (A 3:32)
- (27) *+’a-málla bəkyáməl, jaššúkəl ju-cısu| xázə māniva +’ávva náša.* ‘The mullah gets up and looks in his purse to see who this man was.’ (A 30:5)
- (28) *xázzax ... ka-mù ’á xá-xca murkállə.* ‘Let’s see why he has delayed so much.’ (A 37:18)
- (29) *’o-násət +úllul jaššúkəl| xázə mù ḫ-ávəd +málla.* ‘The man who is above is watching to see what the mullah will do.’ (A 14:4)

The postposition of the subject appears to be a strategy to express the close semantic relationship of the clause with the preceding discourse rather than what follows, as is the case with the postposition of definite subject constituents in main clauses (§ 12.5.2.2.).

In (30) and (31) a locative adverbial is fronted before the interrogative particle:

- (30) *+bəddáyətun ju-da-+átra mū kavvùmələ?* ‘Do you know what is happening in this land?’ (A 1:43)
- (31) *xázən ju-dan-+otájə mù ́itən.* ‘I will see what there is in those rooms.’ (A 42:10)

The indirect question is sometimes introduced by the complementizer *kat*, e.g.

- (32) *+bakúrəna kát +jőr dá-baxta ́icəla.* ‘They ask where the husband of the woman is.’ (A 2:7)
- (33) *+bəddáyəl kát ́axúnət málca mánilə.* ‘He knows who the brother of the king is.’ (A 48:3)
- (34) *’ína bəxzáyələ ká-+háji mū-ilə vāda.* ‘He sees what the pilgrim is doing.’ (A 1:21)
- (35) *jasusùyta vágəna! ká-málca ́om-+dana ́ádi ́áklu mattíla +al-jára.* ‘They act as spies (to see) at what time the king puts foot on the roof.’ (A 1:26)
- (36) *tuxmənnə! ká-’a-báxta ́ica mattíla.* ‘He thought where he could put this wife.’ (A 1:4)
- (37) *xá nišánka káti yávvət kát müjjur məttəla?* ‘Could you give me a sign as to how she has died?’ (A 1:17)

Note the position of the subject nominal in (32)–(35) and the object nominal in (36) before the interrogative pronoun.

In (38) the indirect question clause stands in apposition to the noun *kássat* ‘story’:

- (38) *kássat káto márəl ká-mü-vila.* ‘He tells her the story of what happened (literally: He told her the story that what happened).’ (A 30:6)

## 14.4 Direct and Indirect Speech

### 14.4.1 Asyndetic Direct Speech

In most cases direct speech is presented asyndetically, e.g.

- (1) *xà-yuma! málca márəl ka-+Axíkar! +Àxikar! ’át +rába dívət sìva!* ‘One day the king says to Axiqar “Axiqar, you have become very old.”’ (A 3:14)
- (2) *Nàtan ka-málca márəl bəxzáyət mu-vádələ bábi b-rišux?* ‘Natan says to the king “Do you see what my father is doing against you?”’ (A 3:22)
- (3) *málca kátu márəl +’Axíkar! ’ána mut-xərbayúta kátu xvidənva! kat-’átən ’á-+šula vódlux b-riši?* ‘The king says to him “Axiqar, what evil had I done to you that you did this against me?”’ (A 3:27)
- (4) *márəna ’áxnan! fu-+rába +atravátət dínyə +xdírəvax!* ‘They say (in the book) “We have travelled to many countries of the world.”’ (B 2:14)

### 14.4.2 Syndetic Direct Speech

On some occasions direct reported speech is introduced by the particle *kat* after a verb of speaking or utterance, e.g.

- (1) *ká fúr’un! kámtət cùllə márələ márələ kát ’ən-’ána ’ávən +sàra, nášət xut-’ídat díyyi mìdi vâyəna?* ‘He says first of all to Pharaoh “If I were a moon, what would the people under my command be?”’ (A 3:61)
- (2) *mən-+táma +šarıyána bədra-kálə ’ánnə yāl-sùrəl ká hállun mìyya, hállun +tìna!* ‘From there the children begin to shout “Give stones, give water, give clay.”’ (A 3:72)
- (3) *ka-Nàtan márələ kát ... mélə cəslı!* ‘He says to Natan “Bring him to me.”’ (A 3:26)

Sometimes the particle *kat* introduces direct speech that is not preceded by a verb of speaking or utterance, e.g.

- (4) *labúlulə ka-málca! kat-+Axíkar ’ána +k̥t̥əlli!* ‘He takes him to the king (saying) “I have killed Axiqar.”’ (A 3:36)
- (5) *’o-rišət do-náša labúlulə ká +Nuxadnásar kat-’ána +Axíkar +k̥t̥əlli!* ‘He takes the head of the man to Nebuchadnezzar (saying) “I have killed Axiqar.”’ (A 3:37)
- (6) *+xábra yávələ ka-fúr’un kat-nášət díyyi bitàvəna!* ‘He sends word to Pharaoh (saying) “My people are coming.”’ (A 3:60)
- (7) *+rába xdíla biyyu! kat-cúl-məndit +bàyyət! b-yavvənnux!* ‘He was very pleased with him (saying) “I shall give you everything you want.”’ (A 3:85)

- (8) *cicé maxrupèna dévəl kát dúlə 'axúnan tuyyílə xá +séda t-+axlàxla.* ‘All the monsters are sharpening their teeth (saying) that “our brother has brought a prey for us to eat.”’ (A 37:12)
- (9) *yàvələl dàstur ka-palàxu kät-là-šukun 'ázəl.* ‘He gives an instruction to his workers (saying) “Do not allow him to go.”’ (A 4:7)

The particle *kat* is used also to introduce a direct citation from a message, letter or letter, e.g.

- (10) *ka-báxtu +xàbra yávələl kät-ána bitáyən bëta.* ‘He sends word to his wife (saying) “I am coming home.”’ (A 3:31)
- (11) *xa-ctàva ctóvləl mən-púmmət +Axīkar ka-málcət Məssər, kät-ána +Axīkar ku-tálux Nànvəl har-'átxa la-+pláša b-yavvənnna kätux.* ‘He wrote a letter on behalf of Axiqar to the king of Egypt saying “I, Axiqar—come to Nineveh and I shall give it to you without a battle.”’ (A 3:19)
- (12) *bæctávələ ju-ctàva kät-átnən fùr'un denánət ká ... málca.* ‘He writes in a book “You, Pharaoh, are in debt to the king.”’ (A 3:76)

#### 14.4.3 *Indirect Speech*

Indirect reported speech, in which the content but not the original wording of the speech is given, may be presented asyndetically, e.g.

- (1) *málca mórrə ríšux lablánnə +tàma.* ‘The king said that I should take your head to him there.’ (A 3:35)
- (2) *'á màra! b-xá +čap̪pàltal' á 'arþí dánə dèvə bət-+kátləl.* ‘This man says that with one staff he would kill forty monsters.’ (A 37:9)
- (3) *'ána mírənva kátu baxtàtə +käfslən.* ‘I had said to him that he should kill the women.’ (A 2:23)
- (4) *+hájì káti mórrə láblən +käfslənnə.* ‘The pilgrim said that I should take her and kill her.’ (A 1:34)
- (5) *'ána p-tánən brùnūvən.* ‘I shall say that I am his son.’ (A 39:31)

On some occasions it is introduced by *kat*, e.g.

- (6) *márələ kát ... yávvi láxma yāl-súrə-da ju-dé-+kərtàla.* ‘He says that they should put food and the children into the basket.’ (A 3:71)

## 14.5 Subordinate Content Clauses

A variety of subordinate clauses that are embedded as components of a higher clause will be brought together in this section under the broad classification of ‘content clauses’. These function either as direct object complements of a verb or are governed by clausal conjunctions consisting of prepositions, adverbials and quantifiers. In most cases these subordinate clauses are introduced by subordinating particles, though they are omitted in some circumstances.

### 14.5.1 *Asyndetic Irrealis Complement*

When a clause that is the direct complement of a verb expresses an event that is unrealized, its verb is in the *patəx* or *patəxva* form (§ 10.2.1.1. and § 10.2.2.1.). In many cases the clause is juxtaposed asyndetically to the main verb, e.g.

- (1) *fúr'un +báyyə +pàləš mánnu*x. | ‘Pharaoh wants to fight with you.’ (A 3:21)
- (2) *'ína át +bílux mánno 'avátva 'ax-xa-+fòra*. | ‘But you wanted to be with her like a husband.’ (A 3:91)
- (3) *'a-dáx c-+ámsən 'ana-'à-+šula 'odánnə??* | ‘Oh how can I do this thing?’! (A 2:12)

In (4) the subject of the subordinate clause is raised into the object position of the matrix verb in the form of a pronominal suffix:

- (4) *kúdmə k̄edamta* +*bayyánna* *átya c̄slı*. | ‘Tomorrow morning I want her to come to me (literally: I want her—she comes to me).’ (A 38:13)

In (5) the complement clause is fronted before the main verb:

- (5) *'áxči* +*ju-*+*átrət díyyi* *áha móndi* *'ávə* +*ána lè kablónnə*. | ‘But I do not accept that this thing be in my land.’ (A 2:12)

### 14.5.2 *Asyndetic Direct Factive Complement*

Direct complement clauses may also be of factual content. These are typically found as complements of verbs such as ‘to say’ and ‘to know’. Such constructions may be asyndetic, in that the factive complement clause is embedded under the verb without any marking of subordination, e.g.

- (1) *mòrri* +*báxtu* +*rába honàntəva*. | ‘I have said that his wife was very clever.’ (A 3:57)

- (2) *+yat̪ánva málca 'átlə +šúla mónni.* | 'I knew that the king had work for me.'  
(A 3:81)
- (3) *+bəddáyələ cíl-məndi zrəzla.* | 'He knows that he has arranged everything.'  
(A 3:67)
- (4) *+bəddáyən +kat̪litunli.* | 'I know that you will kill me.' (B 6:4)
- (5) *+áx bas-+səmyənva! ka-díyyux +ktəllun.* | 'But I had heard that they killed you.' (A 3:68)

In (6) and (7) the copula in the factive clause has been omitted:

- (6) *'át m-íca +yáttət 'ána +Báhar šəmmi?* | 'How do you know that my name is +Bahar?' (A 42:7)
- (7) *bitáyələ bətəl báxtu bət-lábbə +joro.* | 'He comes home and his wife thinks that he is her husband.' (A 42:36)

#### 14.5.3 General Subordinating Particles

Various particles are used that have the status as general subordinators before content clauses. These perform a variety of functions.

The subordinating element *t/’at* is only marginally used as an independent particle to introduce content clauses. Far more common are general subordinating particles that are composed of a base of some other element to which the *t* element is attached.

In the Urmî region and Armenia the most common general subordinator is *kat*. This developed from the combination of the dative and purposive preposition *ka* 'to' (§ 11.4.) with the subordinating particle *t*, and so is likely to have originally had the function of expressing purpose. The range of functions of the particle *kat* has now, however, expanded to include numerous other functions. In addition to its various functions before content clauses, which are described below, it is also used to introduce relative clauses (§ 14.1.1.).

In Georgia the particle *kat* is not used as a general subordinating particle. Instead the particle *yanət* (or its abbreviated form *yan*) and the phrase *t-i* are used. The latter is attested marginally also in relative clauses.

The particle *yanət* is likely to have developed from the explicative word *+yanə/yanə* 'that is to say' (Azer. *yəni*, Pers. *yāni* < Arab. *ya’ni*).

The phrase *t-i* has developed, it seems, by a contraction of phrases consisting of a subordinating particle *t* and a third person form of the present copula, e.g. *t-ilə* (3ms) or *t-ila* (3fs). It is used predominantly before verb forms that do not contain a copula element. Clauses that contain a copula element use subordinating phrases consisting of *t* + inflected copula with the same function as *t-i*. Moreover in certain contexts a variant of *t-i* is sometimes used which has

the form *t-iva* with a clear past copula element. The distribution of these forms may be represented as follows using the common function of *t-i* to introduce a temporal clause as an illustration:

<i>t-i ptəxla</i>	'when he opened'
<i>t-iva ptəxla</i>	'when he had opened'
<i>t-ilə ptixə</i>	'when he has opened'
<i>t-ilə bəptaxə</i>	'when he is opening'
<i>t-ilə ju-beta</i>	'when he is in the house'

The phrase *t-i* is attested sporadically also in recordings from Armenia, but in the variety of the dialect spoken in Armenia *kat* is predominantly used as a general subordinating particle.

#### 14.5.3.1    *kat* (Urmia and Armenia)

##### 14.5.3.1.1    *kat* with Direct Factive Complement

Direct factive complements may be introduced by *kat*, e.g.

- (1) +bəddáyələ *kát* +Axíkar mətlə. | 'He knows that Axiqar died.' (A 3:39)
- (2) léva +bəddá *kát* 'á +rišələ. | 'They did not know that he is awake.' (A 37:19)
- (3) sáb +bəddáyələ *kát* 'é ctávta +kàryola. | 'because he knows that he has read that writing' (A 37:10)
- (4) +rába +pšáməvax *kát* m-ídayùvvovax. | 'We are very sorry that we have now lost it.' (B 2:15)
- (5) 'ávət basíma +rāba | *kát* 'a-pórsat yuvválux *káti*. | 'Thank you very much for giving me this opportunity.' (A 1:50)
- (6) +'u-háji cílla *kublálun* *kát*-at-məttət. | 'The pilgrim and everybody have accepted that you have died.' (A 1:22)
- (7) 'áyyəva *kát* +plətlun, | +'aturáyə +plətlun mən-+Úrmi. | 'It was (for) this (reason) that they left, that the Assyrians left Urmia.' (B 1:19)

In (8) a noun in the main clause contains the non-attributive modifier *xa-’axča*, which functions as a correlative and binds the reference of the nominal to the following subordinate content clause:

- (8) 'át xa-’axča | kválta 'átválux | mən-+háji | *kat-báxtux litən*, | məttəla. | 'You had such a complaint against the pilgrim (namely) that your wife was missing, that she had died.' (A 1:30)

The subject of the complement clause is sometimes raised into the object position of the main clause, e.g.

- (9) *+bəddáyolə́ áha kát baxt-+tājər=ila.* ‘He knows her—that she is the wife of the merchant (= He knows that she is the wife of the merchant).’ (A 1:12)

#### 14.5.3.1.2 *kát* with Direct Irrealis Complement

The particle *kát* is used in some circumstances to introduce a clause that is a direct irrealis complement of a verb, e.g.

- (1) *márət díyyi lèlə xšíxa| kát-ána átxa hamzámmən bàzu.* ‘My master does not need me to speak about him like this’ (A 3:64)
- (2) *málca-da yúvvəl dàstur| kát-cùlla panánnun.* ‘The king has given a command that I should eradicate everybody’ (A 2:17)
- (3) *kòl škálla mánni kát +tamrònna.* ‘She made me promise that I would bury her.’ (A 2:35)

#### 14.5.3.1.3 *kát* Expressing Cause

The particle *kát* can denote the cause of a situation. In most cases this is in a causal complement that follows the main clause, e.g.

- (1) *Nátan +rába +naràhat víla| kát +Axíkar muttíla +tapàvut, muttíla +tapàvut bəl-da-brùna bəl-+dàvva.* ‘Natan became very discontent that Axiqar made a distinction, made a distinction between this son and himself.’ (A 3:18)
- (2) *+bəttánən məntux| kát á-məndi káy tunìlux.* ‘I am grateful to you that you have told me this.’ (A 2:37)
- (3) *xúš ’aláha +barəxlux| kát-xá-’axča hòná| kərkópta kátux ’aláha yùvvəla.* ‘Go, God bless you, for God has given you such an intelligence and such a mind.’ (A 3:84)
- (4) *’ádi cù-m +báyyət ju-da-dúnyə ána ka-díyyux yàvvən, kát xàyyi purkélux.* ‘Now I’ll give you anything you want in this world, since you have saved my life.’ (A 40:8)
- (5) *basíma +rába kát ’atən-da +šəmyàlux.* ‘Thank you for listening to this.’ (A 2:37)
- (6) *+xàltə| vèdlí kát humzàmli mən-dá náša.* ‘I have made a mistake by speaking with this man.’ (A 4:8)

In some cases the causal complement precedes the main clause, e.g.

- (7) 'ànnə| *kat-màlca bərráxšələ*,| 'ánnə=da *bərráxšəna*.| 'Since the king sets off, they also set off.' (A 1:26)
- (8) *kat-íva bərráxša* 'átxa 'àtxa| léva *jaššúkəl* xášla pólle *ju-kùnyə*.| 'Because he was going like this and was not looking, he went and fell in a well.' (A 16:3)
- (9) 'ádi *kat* ... lét *bašvákə* +òrən| é +čap̄páltil| mán de-scàntil| +ráppilun *l-á-pát jiyda*.| 'Now, since you do not allow me to enter, throw me my club, together with my knife to this side of the wall.' (A 37:6)

#### 14.5.3.1.4 *kat Expressing Purpose*

A clause introduced by *kat* containing an irrealis verb form may express purpose, e.g.

- (1) *xa-+bézza bəšvákənəl* *kat-napásu lə-+kat̄ta*.| 'They leave a hole so that his breathing would not be cut off.' (A 3:36)
- (2) 'íta *b-yùma* bnàtəl ci-yatvíva *ju-+čolàtəl* *kat-jinávə la-avíva* +al-carmána +šùla.| 'During the day girls used to sit in the huts so that there would not be any thieves (breaking) into the vineyards, and so forth.' (B 2:6)
- (3) *màyuna* *kat-+kat̄lila*.| 'They bring him to kill him.' (A 3:31)
- (4) 'ó *xabúša* +nìurrəl hal-t-+màtəl *kat-ána* +axlànna,| 'ávən jíl.| 'Guard that apple until it ripens so that I can eat it and become young.' (A 39:2)

In (5) the referent of the word *cipa* is introduced here for the first time. The demonstrative pronoun has the function of binding the noun cataphorically with the content of the subordinate purpose clause, analogously to the demonstrative pronoun of nouns that are the head of relative clauses (§ 14.1.1.1.):

- (5) 'ó *cipa* +áv *xarbiùsuləl* *kat-árba* lə +pál̄ti.| 'He pushes a stone (over the entrance) so that the sheep do not escape.' (A 50:1)

Purpose clauses may also be asyndetic, without an introductory *kat* particle, e.g.

- (6) *hár* 'è-+dána +šadúrəna *xa-xína* xáčča 'ázəl míyya mayyilun.| 'They then send another one to go and get some water for them.' (A 37:16)

#### 14.5.3.1.5 *kat Expressing Result*

In some cases a clause introduced by *kat* refers to a realis event that is presented as the result of the situation expressed in the preceding clause, e.g.

- (1) *'ána mut-xərbayúta kátxux vidiðenva| kat-'átan 'á-+šula vádlux b-riši.* 'What evil had I done to you that you did this against me?' (A 3:27)
- (2) *'u-xá kənyána míyyula ktilulə. pálju +rúppula kam-+àslan| pálju kam-+káplan| kat-sikələ.* 'He has brought an ox and slaughtered it. He has thrown half of it before the lion and half before the tiger, so that he has been able to come up (literally: so that he has come up).' (A 43:8)
- (3) *mú váttəla ka-díyyux kat-xà-xča mxáyot?* 'What has it (the cat) done to you that you beat it so much?' (A 3:8o)
- (4) *bənpála bəxnákələ. +jamáhat mən-ídət dàl +pulad-dév kát prákəl.* 'He falls and is strangled, with the result that the community is saved from the hands of the great demon.' (A 50:9)

In (5) note the linkage of *kat* with the correlative *+uxča* in the preceding clause.

- (5) *'ína +Axíkar +úxča +narahàt vágələ| kat-háč xa-+xábra látla.* 'But Axiqar becomes so embarrassed that he has nothing to say.' (A 3:30)

After a negative main clause, the result clause may have an irrealis verb, since the action has not been realized:

- (6) *'ána šidána lèn kat-'átan ka-díyyux* 'I am not mad enough to come to you.' (A 40:20)

A result clause may also be expressed asyndetically without *kat*, e.g.

- (7) *'ína +úxča báxta bxila| +úxča nuníla biyyil| +úxča idə-'ákli nšíkəla| lábbi kàdlə duzúta káto.* 'But the woman wept so much, she pleaded with me so much, she kissed my hands and feet so much, that, in truth, I felt sorry for her.' (A 1:35)
- (8) *'ína +úxča sivəva| müttuva fu-xá ... +kárṭàla.* 'But he was so aged that they had placed him in a basket.' (A 2:14)

#### 14.5.3.1.6 *kat* with a Temporal Function

On some occasions *kat* is used in subordinate temporal clauses, e.g.

- (1) *kat-bitáyələ ka-dáha +àxəl| 'áha bəmxáyələ b-sèpa| mən-púmmu m-àxxa| xìvvəl +baktálulə.* 'When he comes to eat her, he strikes the snake with the sword, from its mouth, from here and kills it.' (A 39:19)

In (2) the clause introduced by *kat* is preceded by another temporal clause introduced by *'e-+dān*:

- (2) *'e-+dān tīlə| kat-cípa xurbəslə| dàna| dàna| 'árbu +pul̥lə.* ‘When he came and when he pushed the stone aside, he let out his sheep, one by one.’  
(A 50:6)

In many of the attested examples of this construction the particle is not in clause-initial position, but rather follows another fronted constituent of the clause. In (3)–(10) these are adverbials or prepositional phrase complements of the verb:

- (3) *kédamta kat-bákyməna| 'ína sústa 'u-+zayo.* ‘When they get up in the morning (they see) the mare and her foal.’ (A 38:3)  
 (4) *śítət m-+báro| kat| ... mèdrəl +tínəva xá-dana xabùša, brúnu súra márla bábi.* ‘The year after when it had again borne an apple, his youngest son says “Father ...”’ (A 39:4)  
 (5) *b-ákli kat-vòdli, kémət| 'átət còsli.* ‘When I move my leg, get up and come to me.’ (A 5:14)  
 (6) *'átxa kat-bátyàvələ, cípa dúlə bájvàja.* ‘When he is sitting like this, the stone moves.’ (A 40:7)  
 (7) *'ína 'e-+dān 'áxnan kát súrəxva| babavàtan| ... bí +bárun| bí +čarpàrəl túp malívala.* ‘But when we were young, our fathers ... used to fill the gun with gunpowder, with cartridges.’ (B 4:4)  
 (8) *'ína +xárta kat| pušányə plátlun, 'ánnəyálə jíla| mak̥kəmmívala| ci-+raxṭáva ci-maxívala.* ‘But later when bullets came out, the young lads would wake it up, it would run and they would shoot it.’ (B 4:4)  
 (9) *'ita b-šònnət| kuyáma kát kòmlə| násət mátət Zumállan| +šurílun +mašaxát-ta bitáya +'al-+átrət 'Amérca.* ‘Then, in the years when the revolution occurred, the people of the village of Zumallan began to immigrate to America.’ (B 11:11)  
 (10) *kupšína| mòriša, yúma lá zràka, c-azàxva| kát xína| kupšína kála mála lèla +bəsmáya.* ‘Quails, in the morning, before sunrise, we used to go, when the quail does not hear any sort of sound.’ (B 4:1)

In (11) the fronted element is a subject noun:

- (11) *+búsra kat-paròmva, šaklázva +ràba, 'u-kalàxvalə +búsra.* ‘When meat was slaughtered, we took a lot and we fried the meat.’ (B 7:5)

An irrealis form of the verb is used when the event of the subordinate clause has not yet taken place at the time when the event of the main clause occurs, e.g.

- (12) *+báru ƙat-yáska +ƙatlálə| +axlálə xína,| móñ +úllul mxáyələ b-sèpa.*  
‘When she is about to climb after him to kill him, to eat him, he strikes with his sword from above.’ (A 39:29)
- (13) *'ita +berašvánə-da| ƙat-àrxa 'atíva| ju-dó bét tanùyra| mattívalun xá-dana mìz.* ‘Then in the evenings, when guests (are expected to) arrive, in that oven house they laid for them a table.’ (B 14:2)

The construction in (14) casts some light on the possible original of the use of *ƙat* as a temporal subordinator. Here *ƙat* could be interpreted as a relative particle as well as a temporal particle. It is possible that the unambiguous usage of the particle as a temporal particle developed from such ambiguous contexts:

- (14) *+xárta bitàyəvax| b-+dánət mšíxayúta ƙat-íla jarvùsə.* ‘Then we come to the time when Christianity is growing (~ the time of Christianity that is growing).’ (B 1:3)

#### 14.5.3.2 *t-i* (Georgia)

One of the general features of the syntax of *t-i* and its past tense variant *t-iva* is that they are always placed immediately before the verb of the embedded clause and any other components of the clause are placed either before the *t-i/t-iva* phrase or after the verb. Moreover a subordinate clause containing these subordinating phrases sometimes has at its head another subordinating element such as *yanət/yan* or a word with the subordinator affix *t*. This has been seen already in the relative clause with an adverbial head cited in § 14.1.3. (example (16)):

- (1) *xáslə 'á náša sával módrə +táməl 'icət é níyna t-í dvíkálə.* ‘The old man went off again there where he caught the fish.’ (A 54:4)

##### 14.5.3.2.1 *t-i* with Direct Factive Complement

- (1) *txàrra| é tavórta zàrdəl t-i mórra 'én jármo +rappíle +támə.* ‘She remembered that the yellow cow said “throw its bones there.”’ (A 51:4)

#### 14.5.3.2.2 *t-i* with Temporal Function

In recordings from Georgia one of the most common functions of *t-i* and its past tense variant *t-iva* is to introduce a temporal clause:

- (1) *t-i-ptixéla* 'ani, *jušákla* *tíla* +*pltàtlə* *xá súysa smùka*.| 'When she opened them up, she saw that a red horse came out.' (A 51:4)

The *t-i* is generally placed immediately before the verb and any other components of the clause that are placed before the verb precede the *t-i*, e.g.

- (2) *'ó brūn-málca t-i pòlla* +*báro*, +*plátlə* +*báro* *tíla*, *é* +*saválta škilàla*.| 'When the son of the king went after her, went out after her, he came and took the shoe.' (A 51:8)
- (3) *'adíyya* *e-yámma* 'ýja *t-i xzila* *ka-dèxa* *brítol* *hám-da* *ánnə* *xatváto* 'ýja *mòrre*| 'Now, when the stepmother saw that daughter of hers, and also her stepsisters (saw her), they said ...' (A 51:5)
- (4) *'íta* +*xlíyla* *t-i xàsle*, *é* *yámma* 'ýja, *škólla* *ánnə* +*xàttə*.| 'Then when they went to the wedding, the stepmother took grains of wheat.' (A 51:3)

This is not regularly the case, as seen in (5), in which material intervenes between *t-i* and the following verb:

- (5) *t-i* 'at-táza +*alméni* *tíle láxxa lätvale* *háč móndi*.| 'When our people first came here, they had nothing.' (B 17:34)

When a non-verbal component is placed after *t-i*, the *t-i* is sometimes repeated before the verb, e.g.

- (6) *'é* *çáččə=da* *t-i* +*ávun* *t-i-màtlə*, *áyən=da* *jáno* +*ktilàla*.| 'Also the girl, when he died, killed herself.' (A 56:4)

Examples of constructions where the copula element after *t-* is inflected as a present enclitic copula:

- (7) *máccə* *t-ína bràza*, +*tára* +*palùtut*.| 'When maize dries, you take off the head of maize.' (B 17:46)
- (8) *t-íx* +*lavásə* *pyáya* *xá* 'ásri, *tláy* *dànə* +*xárta* *pyáyana* +*bár* *lavásə* *jordéya*, *jordéta*.| 'When we bake flat bread, (we bake) twenty or thirty of them, then, after flat breads, they bake loaves, a loaf.' (B 17:23)

When the subject of the clause has a non-specific referent there can be an ambiguity in some cases as to whether the *t-* has a temporal function or a relative function. This is the case in (9)

- (9) *bráta yála t-ína +byáya +'uydalə| 'áni járət hàammaša| 'ávi cəs-+ 'uydalə| jóri ka-+ 'uydalə.* 'When a girl and boy love each other/A girl and boy who love each other must always be together and marry each other.' (A 56:6)

It is plausible to assume that *t-* was originally a relative particle and ambiguous constructions such as these were the context in which the original relative *t-* was reinterpreted as a temporal particle. There is also ambiguity in the interpretation of the particle in (10). Note that the copula phrases with *t-* are placed at the end of the clauses:

- (10) *pučěčə| 'ánnə máccə prìmə t-ína,| máccə brìzə t-ína,| o-+ 'ákřé t-íla bràza,| + 'ávun šómmu pučěčəla.* 'Maize stalks, when the maize plants are cut, when the maize plants are dry, when their root dries, this is called "maize stalk" (*pučeča*). / 'Maize stalks, maize plants that are cut, maize plants that are dry, whose root dries—this is called "maize stalk" (*pučeča*).' (B 17:47)

Examples of temporal *t-* with the past copula element *iva* include:

- (11) *'á t-íva bitáya bëta,| +ravàyəva 'ákúbra,| pákka t-íva màyu,| pállea ju- 'áklət càlla.* 'When he was going home, the mouse was drunk, when the frog was bringing him back, she fell into a hoof print of a buffalo.' (A 52:6)
- (12) *t-íva xášle +al-+sèda,| jáški +al-xá 'ilàna| tóvtəla xá šapárta máx +šrá bəlláya bràta.* 'When they had gone hunting, they saw sitting on a tree a beautiful girl shining like a lantern.' (A 56:1)
- (13) *t-íva bəxmàya| +xárta bədráyəva cùndə| pyáyəva +lavàšə,| jərdèyə| ju-tanùyra.* 'When it leavened, they would then lay out balls of dough and bake flat breads, loaves, in the oven.' (B 17:10)
- (14) *+múṭra t-íva bitáya xelánta,| lè-+amsi jarpívala.* 'When rain fell heavily, they were not able to shovel it.' (B 17:36)

In (15) the past copula is inflected for person:

- (15) *'ána bətxárən t-ína sùra,| ju-dàrtal nanúnti ptáxəva bí laþàtka.* 'I remember when I was young my grandmother used to open up a path in the courtyard with a shovel.' (B 17:50)

In (16) the *t-íva* phrase takes the whole following clause as its complement ‘When it happened that ...’:

- (16) *'ína t-íva lèva xélo +mṭáya| bí dán pálə 'at-dáy +arabána xítə c-+asrívə xá jemášta xítə| kámáy bí +xòlə| yánət 'áyən-da +al-+hári 'odáva| jaršávala.*  
 ‘But when it happened that it did not have the strength, with the shafts of another cart they tied another buffalo at the front with ropes so that this also would help to pull it.’ (B 17:52)

#### 14.5.3.2.3 *t-i Expressing Cause*

Sporadically the particle marks the subordinate clause as the causal rather than temporal background of the main clause. This is the case in (1), in which the particle *t* is followed by the past copula:

- (1) *'íyən t-íva brítət +casibə| +'ávun brūn-málca| lèva bəšvákə| cəs-+dàvun.*  
 ‘Since she was the daughter of paupers and he was the son of a king, they did not allow her near him.’ (A 56:3)

In (2) the *t* is attached to full 3ms copula:

- (2) *pyášələ +ròba +dána| lélə bəxràva| t-íla kùlyə| ju-màšxa.* ‘It keeps for a long time without going off, because it is fried in oil.’ (B 17:16)

#### 14.5.3.3 *yanət, yan* (Georgia)

##### 14.5.3.3.1 *yanət/yan* *Introducing Direct Speech or Direct Factive Complement*

- (1) *'é tavárta zàrdə| tunítəva ká-dé čòččə| yán 'ón parmałi| éñjármo +jammàtte| +rappátte ju-xa-+čàlə| +tašyátte 'áni.* ‘The yellow cow had said to the girl that if she slaughters me, you should gather the bones and put them in a pit, hide them.’ (A 51:1)
- (2) *'átxa| xəzyən| +šəmyən| yánət ci-+xazdīva.* ‘I have heard that they used to harvest.’ (B 17:11)

It is likely that factive complements were the original context of use of this particle, e.g. ‘I have heard, namely that ...’

In (3) the factive clause introduced by *yan* also has the subordinator *t-i* before the verb:

- (3) *+xárta tíla 'é yəmma| 'u-'é jáška yan-éñ +záyo t-í púrtàcle 'éxa šítə xína.*  
 ‘Then the mother returned and sees that her young have survived that year.’ (A 53:4)

## 14.5.3.3.2 yanət/yan Expressing Direct Irrealis Complement

- (1) *+xárta R<sup>o</sup>užé<sup>R</sup> +bayyíva yán kemíva 'azíva.* ‘Then they already wanted to get up and go.’ (A 51:7)

## 14.5.3.3.3 yanət/yan Expressing Purpose

- (1) *ci-macsívalə léša!* yánət xamíva. ‘They used to cover the dough in order for it to leaven.’ (B 17:10)
- (2) *jú rùšnuc nimána! carməxxívalə!* yánət racəxva. ‘They rolled it in a damp towel so it would become soft.’ (B 17:25)
- (3) *'an-t'ína javay!* 'é tásma járət šačlila p'-ídux! yánət +kàrmi. ‘Those who are inside must take the belt from your hand in order to win.’ (B 17:3)
- (4) *ci-zonáva kámxa!* mayyáva yánət +al-dó-yuma xína mádrə payyíva. ‘They used to buy flour and bring it back so that they could bake again the next day.’ (B 17:5)
- (5) *hádax nàdəva!* yánət +ànva-da 'avívale! +máš-da 'avívale. ‘They farmed so they would have grapes and would have beans.’ (B 17:13)
- (6) *ci-daríva +állu ... 'ípral!* yánət šaxína 'avíva. ‘They put on this earth, so it would be warm.’ (B 17:35)
- (7) *'an-dárza-da bəxrazéx +al-+uydàla,* yánət +mútra javé là +sályá, là xárvi. ‘We arrange these bundles on top of each other, so that the rain does not flow down into them, so that they do not rot.’ (B 17:46)
- (8) *brún-málca!* +tavvíyəva +bàr=ət! càlu! càlu! yán javárva bràta. ‘The son of a king, was searching for a bride, a bride, in order to marry a girl.’ (A 51:2)

## 14.5.3.3.4 yanət/yan Expressing Result

In some cases a clause introduced by *yanət/yan* refers to a realis event or situation that is presented as the result of the situation expressed in the preceding clause, e.g.

- (1) *láxxa hádax kárta lèla ju-Júrjəs-+tan!* yánət xablíva. ‘Here in Georgia it is not so cold that they got cold.’ (B 17:40)

## 14.5.3.3.5 yanət/yan Expressing Cause

In the attested examples of this, *yanət/yan* introduces a causal complement with a realis verb that follows the main clause:

- (1) *búš cílla +hazərrúyta c-odívala қa-sàtva, yánət sàtva čàtun-va xéta.* ‘They made all possible preparation for the winter, because life in winter was difficult.’ (B 17:21)
- (2) *xáčča bəšvákət қa-dàni, yánət ’áni-da sàtva xú léna +myásá +xálta màčxi.* ‘You leave some for them (the bees), because also they indeed in winter cannot find food.’ (B 17:43)

#### 14.5.3.4 *t, ’at*

The subordinating particle *t/’at* is occasionally used to introduce subordinate clauses. In (1)–(2) it occurs before a purpose clause:

- (1) *ʃəddála sapkáxlə dána dána ’at-páršáxla.* ‘We take off the string, one by one, in order to separate it (the tobacco).’ (B 3:29)
- (2) *yámma bábət bráta bitáyəna b-xáčča júlla ’atíkə t-lá +yáttı ’ánnə málcalə ’áha.* ‘The mother and father of the girl come in old clothes, so that they do not know that he is the king.’ (A 35:8)

#### 14.5.4 *’ina*

This particle is occasionally used to introduce factive complements, e.g.

- (1) *+’ávva yála +bəddáyəla ’ína ýyya bráta kátu +hyáyəla.* ‘The lad knows that the girl loves him.’ (A 34:5)

For the use of *’ina* to introduce complements of verbs of perception and its other functions see § 13.1.8 and § 14.5.6.

#### 14.5.5 *Miscellaneous Heads of Content Clauses*

Content clauses may be introduced by various heads, which include prepositions, adverbials and quantifiers. Frequently these are combined with the subordinator element *t*, but this is not obligatory in some cases. In Georgia subordinate content clauses with these heads sometimes contain the subordinating phrase *t-i*, in some cases in addition to the *t* element on the head.

##### 14.5.5.1 *’e-+danət*

The adverbial phrase *’e-+danət* (literally: ‘at the time that’) is commonly used as the head of subordinate temporal clauses. The demonstrative pronoun *’e-* in the phrase is anaphoric and anticipates the content of the subordinate clause (§ 14.1.1.1.). The affix *-at* is often reduced phonetically and the phrase is contracted to the form *’e-+dān*. The subordinate clause is normally placed before the main clause and, in most cases, is uttered in a separate intonation group from that of the main clause.

The main clause may express an action that is temporally sequential to the action in the subordinate clause or one that overlaps with it temporally.

When the verb of the subordinate clause has a perfective aspect, expressing a complete event, the main clause denotes an event that is sequential to this, e.g.

- (1) *'é-+dān +mṭ̥lun tāma! mən-+táma m-+ál-susavaté +sl̥lun, jušáklun +al-dáštat 'Urmi.'* 'When they arrived there, they dismounted from their horses and looked at the plain of Urmī.' (B 2:13)
- (2) *'é-+dān t-ílə šámmu +bəsmáyu +Axíkar! fir'un! brázələ šòpu.'* 'When he hears his name Axiqar, Pharaoh dries up on the spot.' (A 3:67)
- (3) *'é-+dān cálbə karbùnəna, áha cárvaš +rappiyola.'* 'When the dogs approach, she releases the rabbit.' (A 38:18)

The *ptəxlə* form is used in such temporal clauses not only to express the perfective past, but also to express a perfective future (4) and an iterative perfective (5):

- (4) *'e-+dān-səvlux, t-ávə brùna kátux. | 'e-+dān-màtlux, +áynux p-+čámla.'* 'When you become old, he will be a son for you. When you die, he will close your eyes.' (A 3:6)
- (5) *'é-+dān +bílan mapləxxax! mónnō mapləxxax.'* 'Whenever we want to use some of it, we can use it.' (A 37:18)

When the action of the main clause overlaps temporally with that of the *'e-+danət* clause, the verb of the *'e-+danət* clause and/or of the main clause has imperfective aspect without expressing any clear temporal boundaries. In (6)–(8) the imperfective verb in the *'e-+danət* clause is habitual and the *patəxva* form is used without the *ci-* particle, even in initial /Ø/ verbs. This can be interpreted as the use of lighter coding, without the *ci-* particle, to express discourse background (§ 10.2.2.2.2.):

- (6) *'é-+dān 'atíva 'ánnə míyyət +'ánvə kát c-avíva xvìtəl 'áx míyya +tinànəl ka-móriša c-avíva 'ax-t-'ámri +sápya 'ax-zíja.'* 'When they came, the grape juices, which were mixed like muddy water, in the morning were, as they say, clear as a bell.' (B 12:3)
- (7) *'e-+dánət zamərvə, ána +šammànva.'* 'When he sang, I used to listen.' (A 3:81)
- (8) *'é-+dān 'á-yuma 'atíva! ci-+jammíva b-àlpə nášə bálcət! ju-dá yúma ju+mašṭàxət mátət Zumàllan.'* 'When this day came, the people gathered in the open space of the village of Zumallan perhaps in thousands.' (B 11:6)

When the *'e-+danət* clause expresses a progressive situation in a narrative, a progressive *bəptaxələ* or *bəptaxəva* form is used:

- (9) *'é-dān á dúcta cùtan mxáyonva cmá nùynə plátlun m-áxxa.* ‘When I was ploughing this place, some fish came out from here.’ (A 36:13)
- (10) *'é-+dān +várəna jú déjəppítə ... ýán xína cùllə cicé maxrupèna dévə kát dúla' axúnān muyyílə xá +séda t-+axlāxlə.* ‘When they enter the cave, ... all the other monsters are sharpening their teeth thinking that “our brother has brought a prey for us to eat.”’ (A 37:12)
- (11) *'e-+dánət lèx béta, xiša +bar +séda, átən míyyan pràkəna' ázət xá xáčča míyya mayyótlən.* ‘When we are not at home, having gone out to hunt, and our water is running out, you should go and bring us some water.’ (A 37:14)

In some cases the adverbial head of the temporal clause is resumed in the main clause by the adverbial phrase *'e-+dana* ‘at that time’, e.g.

- (12) *'é-+dān tilun, 'é-+dana 'urxátə-zə' ásfalt lèva výyyə.* ‘When they came, at that time the roads had not (yet) been laid with asphalt.’ (B 2:12)
- (13) *'é-+danət sátvə tìyyələ táljələ cùl díyca kàrtəla, késə lòtlun jári 'é-+dana 'ázi késə máyyi.* ‘When winter has come, there is snow and everywhere is cold, and there are no logs of wood, they must at that time go and bring logs of wood.’ (A 37:13)

On some occasions, the temporal clause is inserted within the main clause, after its subject constituent. In such cases the temporal clause has less prominence and the scope of the temporal frame that it denotes is restricted to that of the main clause rather than a wider stretch of ensuing discourse. The content of the main clause is correspondingly foregrounded to a greater extent than in constructions with the temporal clause in initial position, e.g.

- (14) *míyya 'é-+dān +mútra tálja +šúlə +rayyíva ju-béta lè +salíva.* ‘When it rained or snowed and so forth, water would not come down into the house.’ (B 2:22)
- (15) *halbáttá á 'e-+dán +bərràšəl kámta bəxjálələ.* ‘Of course when he wakes he is first startled.’ (A 37:10)
- (16) *út 'e-+dán b-nòsxu=ivət kát jánux=zə là sákđət másalan xúš késə mélan món dáyya mèša.* ‘When you are alone, so that you also do not become bored, go, for example, and bring logs from that forest.’ (A 37:14)
- (17) *'o-+tína 'e-+dán-brázələ, jári lè pákka.* ‘When the mud dries, it must not crack.’ (B 14:8)

The temporal clause may be placed after the main clause, in which case the scope of its temporal frame is likewise restricted to that of main clause, e.g.

- (18) *míyya +bərdàxa dárax +állu| 'e-+dán t-íla tòlya.* | 'Let us pour boiling water on him when he is asleep.' (A 37:19)
- (19) *nákva buš-xelántəla m-cùl-məndi| +é-dán +bayya-óda xà-məndi.* | 'A female is stronger than anything, when she wants to do something.' (A 5:1)

In (20) from a text recorded in Georgia a subordinating element *t* occurs on the clause initial adverbial and also before the copula of the compound verbal form within the clause:

- (20) *ci-maxpívala-da é-+danət 'an-bíyyo t-íva +bəjmá zòda| t-íla kapkùpə ctéta,| kapkùpə| bíyyə t-íla mattúyə +ròba| kapkùpəla.* | 'They would make it brood when an excess of its eggs gathered and when the chicken was clucking, clucking, when it lays a lot of eggs it clucks.' (B 17:41)

In texts recorded from a speaker in Armenia temporal clauses are sometimes negated. Such constructions present the event of the main clause as occurring immediately after the event of the temporal clause:

- (21) *'é-+dán lélə +vàra,| jòxcəla.* | 'Just as she enters, she laughs.' (A 43:24)
  - (22) *'é-+dán lá +várrə ju-pàja,| 'é-+dán lá 'é +móstə škilàlə,| 'é-+dan lá məxyálə šəpjòška,| xá síysa +xvárá tilə.* | 'As soon as he entered the stable, as soon as he took the hair, as soon as he lit the match, a white horse came.'
- (A 45:14)

In (23) a sequence of clauses are subordinated under the temporal adverbial *'e-+dán* but only the first clause is negated:

- (23) *'é-+dán lá mxílə| xàšlə| cílla +kutkattəla,| purziyyəla,| škilálə brát +arallag,| tilə.* | 'When he struck and went and cut them all to pieces and chopped them to pieces, he took the middle daughter and came back.' (A 45:12)

It seems that these constructions present the situation figuratively as if the main event takes place before the event of the subordinate clause has taken place ('she had not even entered, when she laughed'). The negation does not, however, behave exactly like regular negation, as is apparent in the lack of negation in all subsequent verbs of the subordinated sequence in (23). Normally the negator is not gapped from negated verbs in a sequence.

Sporadically speakers use the variant form of the temporal adverbial *e-dántət*, with the feminine form of the noun, in temporal clauses, e.g.

- (24) *'àna| ju-béti tìvənva| e-+dántət 'ína jvànka,| +tarri mxílun.|* ‘I was sitting in my house, when I was young, and somebody banged on my door.’ (A 2:26)

#### 14.5.5.2 *e-jət*

A rarer construction is the formation of a subordinate temporal clause with the adverbial *e-jət* ‘at the time that’ (<*jah, jaha* ‘time’) at its head, e.g.

- (1) *'é-jət tile,| látva tàxta,| lòtvale hóč mändi.|* ‘At the time that they came, there was no wooden bed, they had nothing.’ (B 17:34)

In (2) from a text recorded in Georgia the adverbial does not have a subordinating enclitic but the subordinating phrase *t-i* occurs before the verb:

- (2) *'é-ja 'o-tálja t-i-c-atíva| +'ávun mlàyøva ká ...| do-màndi,| ka-ilànø,| ká ... yémäš mlàyøva.|* ‘When the snow came, it filled the ... the trees, it filled the fruit.’ (B 17:50)

#### 14.5.5.3 *íman*

Temporal clauses may be introduced by the temporal interrogative particle *íman*. This heads the clause asyndetically or is combined with the subordinating particle *t*. This is attached as a clitic rather than affix, which is the general practice when the head is not a noun (§ 5.14.), resulting in the form *íman=t* (sometimes pronounced *íman-t*) with the stress retained on the initial syllable.

In most cases the temporal clause is placed before the main clause, e.g.

- (1) *'íman škòllə| júllu šulkèlə| xzíli nòkvøla.|* ‘When he took off his clothes, I saw that it was a woman.’ (A 3:32)
- (2) *'ína 'íman bæxzáyələ 'a-déva dúlə parpùlə| kat-là +katóllə| mára mú p̄t-àva.|* ‘But when he sees the monster begging him not to kill him, he says “What does it matter?”’ (A 37:10)
- (3) *'ína 'íman bæfrášolə| 'ay bæfrášela kátu.|* ‘But when he pulls it, it pulls him.’ (A 37:15)
- (4) *'íman=t +Axíkar xùbba muxzíl ka-do-'axúna súra,| Nátan brínu kat-jurvássuva jú ... malcùytøval +naràhat víla.|* ‘When Axiqar showed love to that younger brother, his son Natan, whom he had brought up and was (now) in the royal court, became discontent.’ (A 3:17)

A habitual verb is generally in the *patəx* or *patəxva* form, without the habitual *ci-* particle, e.g.

- (5) *'íman=ət xá náša +júra +avàrval jári kemátva +al-àklux.* | 'When an old person entered, you had to get up onto your feet.' (A 1:16)

In such temporal clauses, the *ptəxlə* form may be used to refer to a future event, e.g.

- (6) *'íman tíli +dàrri! bət-yavvánヌx +ràba.* | 'When I come back, I shall give you a lot.' (A 1:3)

In some cases the temporal clause is placed within the main clause or after it, resulting in a reduction in its prominence and scope of its temporal frame, e.g.

- (7) *'á-deva 'íman bitáylə kat-xázza 'á-naša mùdilə +báyya +axəlla.* | 'When this monster comes to see what man this is, he wants to eat him.' (A 37:9)  
 (8) *+jammúyol cùllə kòšun! 'íman=ət 'a-ctáva kabùlulə.* | 'He musters all the army when he receives this letter.' (A 3:25)

In (9) from a text recorded in Georgia the subject of the content clause is placed before the subordinating particle:

- (9) *'íman +xáttə t-ilə pyàša! 'o-bàlma,| 'o-jálla hí bariyza,| +al-+dàvən ci-damxíva.* | 'When wheat remains, hay, the dried grass, they slept on this.' (B 17:33)

#### 14.5.5.4      *ax, dax*

The comparative preposition *ax* and the interrogative particle *dax* 'how?' are used as heads of comparative content clauses, e.g.

- (1) *dáx=ət márri kàtux!* 'as I said to you' (A 1:44)  
 (2) *'ána! jù! duccàni 'ína! dax=ət-ídyu káti xzilux ju-duccána,| 'u-xàdyá +psixa.* | 'I was in my shop just as today you saw me in the shop, happy and merry.' (A 1:12)  
 (3) *ci-maxíva +àllu,| c-avíva +bərxàta! m-dà-riša! +al-dò-riša! m-dà-riša! ...*  
*'áx=ət +maṭríyəna sìysə.* | 'They used to strike it (while) they ran from this side to that side ... as if they were riding a (real) horse.' (A 1:1)  
 (4) *'ánnə míyyat +ánvə kát c-avíva xvìtə! 'áx míyya +tinàna! ka-móriša c-avíva*

- 'ax-ət-ámri +sápyə 'ax-zjə.* | ‘The grape juices, which were mixed like muddy water, in the morning were, as they say, clear as a bell.’ (B 12:3)
- (5) *mádrə har-b-mátxət šənnəl̥ ý +xàbra| +xdírələ víyyələ nipùxta| 'áx-ət +bəd-dáyəx əkat-‘üdyu.* | ‘Again with the passage of the years this word has turned into *nipuxta*, as we know it today.’ (B 12:8)

In the examples above the preposition *'ax* is linked to the clause by the subordinator *t*, which has the form of an enclitic. An example of the subordinator *t-i* (§ 14.5.3.) is attested in a text from Armenia:

- (6) *masálo 'ila hàda| dá məttəltə| dák t-i 'àna šámyon mən| nanùnti| mən-yèmmi| mən-sàvan.* | ‘The story of this tale is thus, as I have heard it from my grandmother, my mother and my grandfather.’ (A 48:1)

On many occasions, however, the subordinator is omitted, e.g.

- (7) *'ita sábza ci-lablívala 'áx mərrí| +al-mdítə ci-zabnáva.* | ‘Now, they used to take the vegetables, as I said, to the town and sell them.’ (B 2:8)
- (8) *+ojáxta b-šánnə əkámaya| 'áx bətxàrən| kèsə ci-mattíva +állo.* | ‘In the early years, according to what I remember, they used to put wood on the hearth.’ (B 12:4)

The clause may be given generic scope by prefixing the universal quantifier, e.g.

- (9) *'a-cúl dax-t-òya| 'ána xáčča bùš-zoda mónnux| xiyyən.* | ‘However it may be, I have lived a little more than you.’ (A 2:16)

A function similar to that of comparative content clauses is performed by constructions such as (10) and (11), in which the pronominal subject of the subordinate clause has been raised and made the complement of the preposition in the form of the genitive particle *díyyux*. The *kat* in (10) can be interpreted as a marker of a relative clause:

- (10) *'ax-díyyux əkat-káti t'lux xzilux| t'ləxa-náša káti mərrə.* | ‘Like you who came and saw me, so a man came and said to me ...’ (A 4:12)
- (11) *'ax-díyyux proféssor=ivət| +'áv-da +rába lipəva.* | ‘Like you (who) are a professor, he also was very learned.’ (A 3:1:1)

In (12) the raising is straightforward without any relative construction:

- (12) *'áx dànnə vágðuna!* 'as they do it' (B 9:5)

The comparative preposition may head a conditional clause beginning with the conditional particle *'ən*. In such constructions it is regularly followed by the subordinator *t*, which has the alloform of tense *ₖ* due to the coalescence with the following laryngal, viz. *'ax-ₖ-ən*. Such constructions may function as comparative adverbial adjunct clauses expressing a possible situation, e.g.

- (13) *'ú +hála mára dún +ₖt̥atlí, +yánə 'ax-ₖ-án 'ánnə míyya mán +ₖt̥ata tíyyəna!*  
 'This one just says "I have sweated", as if this water has come from sweat.'  
 (A 37:21)

In (14) the comparative prepositional head is placed before the main lexical verb rather than at the beginning of the construction:

- (14) *+yánə b-nobánə +báyyi 'áha-zə 'áxₖ-ən-páləx!* 'That is they want him to work as it were in turns.' (A 37:14)

In (15) the comparative subordinate clause is linked to the main clause by the correlative particle *'atxa* 'thus':

- (15) *šópu švíkələ xá ... xá k̥esal xá-məndi xína müttələlə! 'ánnəl yán júllə +šúlə müttələ 'átxa vidéłə! 'áxₖ-ən-dmìxələ!* 'He has left a piece of wood in his place, (or) he has put something else, he has placed clothes or the like, and arranged them thus as if he is asleep.' (A 37:20)

The comparative clause and the main clause are sometimes presented in parallel opposition:

- (16) *dáx xá-txa janáy +ₖt̥alt̥et̥, 'át dámmat cílla dəžmənnax šaklónna!* 'Just as you have killed so many people, I shall avenge the blood of all of your enemies.' (A 3:4)

#### 14.5.5.5 *cma*

When the quantifier particle *cma* governs a subordinate content clause, it generally quantifies the proposition in the embedded clause and expresses the sense of 'as much as,' 'however much', or 'so long as.' It is generally combined with the subordinator enclitic *t*, e.g.

- (1) *cmá=t +byàyəna| léna +bašùrə.* ‘However much they want to, they cannot (do so).’ (A 3:74)
- (2) *cmá=t ... +byáyələ ’áta hámzəm| lélə +bašùrə.* ‘However much he wants to talk, he cannot (do so).’ (A 3:30)
- (3) *cmá=t ’áttən ’ánnə ’írbə káat-bárràxşəna| +məsté kat-pólla +’al-+’árra| šaklàn-na.* ‘As many as the sheep that pass by are, I should take their hair that falls (= I should take the hair that falls of as many sheep that pass by).’ (A 18:2)
- (4) *jáldə +nùslə,| cma-t-íla jáldə.* ‘Bite him as quickly as [it is] possible.’ (A 47:13)
- (5) *hádax vàdəva| yánət +’ánvə=da ’avívəle| +màš=da ’avívəle| cmá t-íva ’úpra mláya.* ‘They farmed so they would have grapes and would have beans, as much as the land would suffice.’ (B 17:13)

In (6)–(9) the verb in the subordinate clause is in the irrealis form, since it is referring to possible situations. Note also the correlative linkage between *cma* and *buš*:

- (6) *+’árra| cmá=t óya macàxta| buš-mìyya c-ázi, jávo.* ‘As much as the ground is soft (= the more soft the ground is), the more water sinks into it.’ (A 3:11)
- (7) *cmà=t| nášə=zə +rába ’avíva ká dá pyétət láxma +hayyárta ’avíval búš jáldə ci-parkíva.* ‘The more people there were for this baking of bread, the more help there was, the quicker they would finish.’ (B 10:13)
- (8) *cmá=t ráxka ’azàlvə b-+pasulyátə ci-banàxvalun.* ‘As far as it went, we would count with steps (= We would count how far it went with steps).’ (B 9:8)

In (9) *cma* has a temporal sense:

- (9) *jáldə +nùslə,| ... cmá=t lélə b-rišux xá-məndi vída.* ‘Bite him ... before he does something against you.’ (A 47:13)

The subordinator *t* is sometimes omitted, e.g.

- (10) *’íta ’ánnə bíyyə mattáxvalun ju-màlxə,| sab-cmá pésíva ju-màlxə| lè xarvíva bíyyə.* ‘So, we put the eggs in salt, because so long as they remain in salt the eggs would not go off.’ (B 7:4)
- (11) *cmá ’áxnan búš +rába ráxka mìxyux| ’áxnan +karmànəx.* ‘When we hit it the furthest, we would be the winners.’ (B 9:8)
- (12) *cmá ’órbə ’átlux| pályət dáni ’ána ’órbə b-yavvànnux.* ‘However many sheep you have, I shall give you half as many sheep.’ (A 39:34)

14.5.5.6 *culla*

The quantifier *culla* may be made the head of an adverbial subordinate clause such as (1), which has a causal sense of 'due to all that'. It is attached to the clause by the subordinator *t*:

- (1) 'axúna súra culla t-ílə plíxa| +rába šuršìyyəla.| 'The younger brother, due to all he has worked, is very tired.' (A 38:4)

14.5.5.7 *kam, mən-kam/m-kam*

The preposition *kam* 'before' is generally combined with *mən/m-* when used before a content clause. It is sometimes combined with the subordinator enclitic *t*, e.g.

- (1) moriša-jàldə=da ci-ķemìva,| m-ķám nášə naplíva +al-+šùla.| 'In the early morning they used to get up, before people went to work.' (A 1:2)
- (2) kùl +yàrməx| 'ázax| m-ķám-ət ķa-díyan-da cápši jú +dùssaķ.| 'Come on, let's go, before they bundle also us into prison.' (A 1:39)
- (3) jàldə m-axxa-xúš| mən-ķám-ət 'ána +xìyáli šaxløppønna.| 'Go from here quickly before I change my mind.' (A 7:19)

In (4) the preposition is joined to the main clause with *kat*:

- (4) jul-máxə patxàxvalun,| +hála +tlá +arpá +sa'áttə mən-ķám kat-yásķax| dàmxax.| 'We would open up the bedding, already three or four hours before we went up to sleep.' (B 10:21)

In (5) the phrase *mən kam +dana* that heads a subordinate clause introduced by the subordinator *t* has the sense of 'beforehand when ...':

- (5) móñ ķam-+dána ... t-áva skída máržət da-+àyna| +bəkyàrələ| b-de-scántu +bəkyàrəl dé +čap̄pál̄tu| xácma ... məndyànə +bəkyárələ| ká sòdu| kát +dánu talàkla.| 'Beforehand when he was bored by the spring he carves, he carves with his knife, with his staff, he carves some things for his amusement to pass the time.' (A 37:8)

14.5.5.8 *+bar, mən-+bar/m-+bar*

Subordinate temporal content clauses introduced by the preposition *+bar* 'after' or the synonymous phrase *mən-+bar/m-+bar* are generally placed before the main clause. The subordinator enclitic *t* is generally not used, e.g.

- (1) +bár +Axíkar myàtələ| +fúr'un bæctávələ xa-ctáva ķá ... +Nuxadnàsər márlə ... 'After Axiqar dies, Pharaoh writes a letter to Nebechadnezzar saying ...' (A 3:39)
- (2) mən-+bár brèzvalə| xína míyya   -+dān +mútra tálja +šúla +rayyíva ju-béta lè +salíva. | 'After it had dried, when rain, snow and so forth fell, the water used not to run down into the house.' (B 2:22)
- (3) m-+bár +  v brèzvalə| xá júra xína +  na +  taròsva. | 'After it had dried, another type of mud used to be made.' (B 2:21)
- (4) mən-+bár +bæsmáyələ   at-  assáttat dánnə mùdila,| +bæddáyəle   at-lé- +  aməs paròšlun. | 'After the judge hears what their story is, he realizes that he cannot decide between them.' (A 38:5)
- (5) +bár   nnə míyyət +  nvə ci-darívalun ju-+ta  rə|   tva xá ... mán   upra,| c-azíva mən-xácmə +rumyáta t  mməz,| ci-ma  xivalə,| b-  ammət +xorâna. | ci-mayyívalə| xá  xa m  nné ci-+xo  ivalun ju-dánnə míyyət +  nvə. | 'After they poured the grape juice into the bins, there was (a kind of) soil, they used to go to some clean hills and find it, (it is known) by the name of +xorana.' (B 12:3)

Examples of the construction with the subordinator enclitic include:

- (6) +bár h  da| +b  r-  t +x  bra lá-vilə m  n-d  nnə,| +b  r h  da +d  rrə| c  s-  l  h  t j  nu. | 'After that, after no word was forthcoming from them, after that he appealed to his god.' (A 3:4)

In (6) the temporal clause stands in apposition to the pronominal adverbial +bar hada 'after that'.

In (7) the initial adverbial clause has been reduced by the omission of the copula:

- (7) +bar-m  tta m  ttələ. | 'After she has died, she has died (you cannot do anything about it).' (A 1:20)

In texts recorded in Georgia, the preposition +bar has the subordinating clitic and, in addition, the subordinating phrase   -i occurs before the verb of the content clause:

- (8) +b  r=t   n brit   h  m=da brun     -i-jurv  sle,| ... +x  rta +d  n  a t  la,|   nnə tp  kle b-+  ydalə. | 'After their daughter and son grew up ... then the time came when they met.' (A 55:2)
- (9) +x  rta| +b  r=t bab   y  mm     i-+dile| y  n   nnə +by  y  na +  ydalə,| ... +rázi

*là vîle.*! ‘When their father and mother knew that they loved each other ... they were not pleased.’ (A 55:2)

#### 14.5.5.9 *hal*

When this preposition governs subordinate content clauses, it is optionally combined with the subordinator enclitic *t*. Its functions can be classified as follows.

##### 14.5.5.9.1 ‘until’

In most cases subordinate clauses with these particles express an action that marks the endpoint of an action expressed in a preceding main clause and is to be translated by English ‘until’. In the following examples the verb in the subordinate clause is in the irrealis *patəx* form, e.g.

- (1) *máttunlun ju-+dùssak!* *ka-hàl motè,*! *ka-hál=t metì.*! ‘Put them in jail until their death, until they die.’ (A 1:49)
- (2) *'à-sapar!* *p-xamánnun càslí!* *ánna zìtyzə!* *hál-t o-+dínar xína +šadràtla.*! ‘This once I shall keep this money with me until you send the other dinar.’ (A 14:4)
- (3) *lá yávvat hàč mändi káto +áxla!* *hál 'ána 'átən.*! ‘Do not give her anything to eat until I come back.’ (A 35:6)
- (4) *'ó xabúša +n̄tùrrə!* *hal-t-+màtə.*! ‘Guard that apple until it ripens.’ (A 39:2)

In (5)–(7) the irrealis *patəx* verb is accompanied by a negative particle. This does not express negative polarity, but rather makes explicit that the ‘until’-clause describes a necessary condition for a change in the main-clause event (Eilam 2009).:

- (5) *'áni xáčča +róba járət bášli,*! *hál=t lá sàmkı.*! ‘They must bake quite a lot, until they are brown (i.e. so long as they are not brown, they must wait).’ (B 17:24)
- (6) *ka-díyyi jvára lòt!* *hál 'át lá mètat,*! *+tamrənnax.*! ‘Marriage is not for me until you die and I bury you (i.e. so long as you do not die and I do not bury you, marriage is not for me).’ (A 44:12)
- (7) *le-+áxlaç hàč-mändi!* *hál +ba'útan katóxun là tanáxla.*! ‘We shall not eat anything until we tell you our request (i.e. so long as we do not tell you our request, we shall not eat anything).’ (B 8:3)

The subordinate clause may be placed before the main clause, e.g.

- (8) *hál-at lá pàlxat! hác-mändi là-+amsat +áxlat át ju-da-béta!* ‘Until you work (i.e. so long as you do not work), you cannot eat anything in the house.’ (A 35:7)

#### 14.5.5.9.2 ‘before’

When the event in the main clause is perfective and is completed before the inception of the event in the subordinate clause, the appropriate translation of the particle is sometimes ‘before’ or ‘by the time that’ rather than ‘until’. The crucial factor is the information status of the subordinate clause. If the subordinate clause is assertive the translation is ‘until’. If, however, it is factive, i.e. it is presupposed that the hearer accepts it as a fact, it is more idiomatically translated by ‘before’ or ‘by the time that.’ In many cases such factive clauses are placed before the asserted main clause, e.g.

- (1) *bašlattun! hal-ána ’átən!* ‘You should cook them before I come back.’ (A 36:14)
- (2) *hál +dérən ’átən! cóc nàkva la-šòkət!* ‘Before I return and come back, do not leave female kind (alive).’ (A 2:11)
- (3) *hál-at xášli +bàru mára tuláklo! ... hál kámli mádrəl távli +al-sùysi! júlli tvišèli! xášla!* ‘Before I got to him, he disappeared. ... Before I got up and sat on my horse and put on my clothes, he went.’ (A 2:27)
- (4) *’ána hál kámli mánkal tapyànvala! áyya +kàtul +xáltula cùllə +bùsra!* ‘Before I could light the grill, that cat ate all the meat.’ (A 11:2)
- (5) *hál t-ázət bëta, <sup>R</sup>úže<sup>R</sup> o-bètux! +’zsra háda bëta t-ávə yàcca!* ‘By the time you get home, your house will be already ten times bigger.’ (A 54:7)
- (6) *’ána hál ... ýzən +máṭən +tàmma! làxma páṛək! hál nóbət díyyi-da +máṭə xína xəšca vâyəla!* ‘Before I go and arrive there, the bread will run out. Before my turn arrives, it will be dark.’ (A 19:2)
- (7) *hal-t-ila bëkyàma! ýna ýnnə cùllə +xilə šàtyə!* ‘By the time she gets up (she sees) that they have all eaten and drunk.’ (A 35:13)

#### 14.5.5.9.3 ‘until when’

Occasionally the clause introduced by the particle is presented as being connected in sense to a greater degree with what follows it. The effect of this is that it expresses an action that is the end point of what precedes but at the same time the starting point of what follows. In such contexts the appropriate English translation is often ‘until when ...’, e.g.

- (1) *bësyákəna +ùllul!, hál cma-+dána ’atxa-+ùllul bësyákəna! bàlcət! ’alpá mótrə +ùllul-inə!* ‘They go up, until when they go up for some time, they are perhaps 1,000 metres above (the ground).’ (A 3:71)

#### 14.5.6 Content Clauses after Verbs of Perception

There are various ways to express a content clause that is the complement of a verb of perception. In many cases the complement clause is combined with the matrix verb asyndetically, e.g.

- (1) *xzili* +*slíla tilə* *távla* +*al-sùysəl* *káma kam-dìyyi*.| 'I saw that he came down and sat on the horse in front of me.' (A 2:32)
- (2) *xzili* *nàkvala*.| 'I saw that it was a woman.' (A 2:32)
- (3) *baxzáyələ* +*tárrət dárta=za* 'òttən.|| 'He sees that there are some also at the courtyard door.' (A 37:4)
- (4) *'ánnə baxzáyəna cíllə mzıda šetyála*.| 'They see that he has drunk the whole waterskin.' (A 37:16)
- (5) *xzilun* +*rábä murkàlla*.| 'They noticed that he took a long time.' (A 37:18)
- (6) *xášlun* *xzilun* +*xóla* +*sírulə mán xa-kësa*.| 'They went and saw that he has tied the rope to a branch.' (A 37:18)
- (7) *xzilun* *'átxa lè-oya*| 'They realized that it does not work like this.' (A 37:19)
- (8) *baxzáyəna xá-xča míyya* +*bərdàxa dóryəna*.| 'They see that they have poured so much boiling water.' (A 37:21)
- (9) *baxzáyələ* +*hála jàldəla*.| 'He sees that it is still early.' (A 1:11)
- (10) *málca 'aslìl* *mán-vazzìru* *baxzáyəna m-ràkkəl* *ju-+dávva béta tlíxa* 'òttən +*šrayàtə bəlláyəna*.| 'The real king with his vizier see from afar that in that ruined house there are lanterns burning.' (A 1:27)

The copula in the content clause is sometimes omitted, e.g.

- (11) *baxzàyət* | *ídə 'áklux* +*sírə*.| 'You can see that your hands and feet are tied.' (A 36:17)
- (12) *baxzáyələ cíllə* +*tárra dàva*, *rijavàtə*, +*karavàšə*, *cíllə ju-bètu* | *ríša macúpə kátu*.| 'He sees that the whole door is gold, servants and housekeepers in his house are all bowing their head to him.' (A 4:8)

In some cases the complement clauses of the verb of perception contains a deictic copula, e.g.

- (13) *xa-b-xá baxzáyələ márzət* +*áyna xá ... xa-nàša dílə dmíxa*.| 'All of a sudden he sees that there is a man asleep by the side of the spring.' (A 37:7)
- (14) *baxzáyələ* 'á +*kárkála sákla* +*úllul*, | 'u-+*táma véna bədráya kàlə* | *hállun cípə* *hállun lúgnə*.| 'He sees that the basket has gone upwards, and there they are crying out "Give stones, give bricks." (A 3:59)

- (15) *bəxzáyən vélə xa-yàla mən-xa-bàxta +támma šulxàya.* ‘I see that there is a lad together with a woman over there (both) naked.’ (A 4:11)

When the complement clause contains an indefinite subject nominal, the syntactic structure is ambiguous. The indefinite nominal could be interpreted as the object of the matrix verb. If this is the case, it may be the result of raising from the perceived proposition or the following clause could be a relative clause, e.g.

- (16) *xzílan áxči xa-+šrá làxxa bəlláyəla.* ‘We saw that only one lantern is burning here ~ We saw only one lantern—it is burning here ~ We saw one lantern, which is burning here.’ (A 2:6)

In (17) and (18) a pronoun is made unambiguously the object of the verb of perception and it is most easily interpreted as the result of raising from the following clause, which expresses the perceived proposition:

- (17) *xázə ka-díyyax +rábə šap̄òrtət.* ‘He will see you—you are beautiful (= He will see that you are beautiful).’ (A 24:3)
- (18) *bəxzàyux=vən b-dà-’idux b-dè-’idux zùyza bəškala.* ‘u-bəxzáyux=vən palàxa ’átlux. ‘I see that you take money with this hand and with that hand. I see that you have workers.’ (A 4:6)

On some occasions constructions are used such as (19), in which a nominal rather than a proposition is made the object of the verb, as shown by the object agreement pronoun on the verb, followed by a non-restrictive predicative complement without a copula (§ 12.7.1). The predicative complement presents new information about the referent of the nominal and so the construction has the same function as one with a propositional content on the informational level:

- (19) *bəxzàyolə ’áyya báxtal +rábə šap̄òrtəl b-+pàgро.* ‘He sees the woman, (who is) very beautiful in her body.’ (A 1:6)

In (20) the topic of an irrealis content clause after an irrealis verb of perception is raised into object position:

- (20) *xazzénnax m-púmmax várda +rózə tápxil m-+susyátax=da dàvə hár +xar-xérri.* ‘Let me see you—roses flow from your mouth and gold coins falling from your plaits.’ (A 43:12)

In some cases the complement clause contains the particle *'ina* (§ 13.1.8.1), e.g.

- (21) *baxzàyələ| 'ína xa-bàxčələ| +úxča šap̄ərta.* 'He sees that there is a garden, which is so beautiful.' (A 39:10)
- (22) *xzílə 'ína xá-dana rìša| +bəryàmələ, bəcyàpələ.* 'He saw that a head is going up and down.' (A 1:11)

In some cases such constructions contain a deictic copula, e.g.

- (23) *baxzáyələ mən-rèkkə| 'ína xá-dana +šrá véla bəllaya| fu-xa-bèta.* 'He sees from afar a lantern burning in a house.' (A 2:4)
- (24) *'ína xášli kédamta xzilə| 'ína cíllə 'o-+xiyàvand| ó nišánkət 'ína müttun| +'áv-da vēl-+tàmma.* 'I went in the morning and saw that the same sign that I had placed was in the entire street.' (A 2:10)
- (25) *cíllə +várajaššúkəna, 'ína málca vél tívā +tàmma.* 'They all enter and look (and see) that the king is sitting there, but he is a new king.' (A 1:42)
- (26) *baxzáyələ xá-dana xmàrlə| 'ína véləfu-+tìna.* 'He sees a donkey in the mud.' (A 7:4)
- (27) *xzíl xa-nára +rába +jùra| 'ína nášə dína bədvákə niyñə.* 'He saw a very large river and people catching fish.' (A 9:2)

A copula is often omitted after the particle *'ina*, e.g.

- (28) *baxzàyələ| +Axíkar 'ína +tàma.* 'He sees that Axiqar is there.' (A 3:51)
- (29) *baxzáyələ 'ína| +háji šulxaya| ú báxta šulxëta.* 'He sees that the pilgrim is naked and the woman is naked.' (A 1:7)
- (30) *xzílə 'ína xa-+dínar +basùra.* 'He saw that a dinar was missing.' (A 14:4)

The matrix verb of perception 'to see' is sometimes omitted before a clause opening with *'ina*, e.g.

- (31) *+palùčulə| 'ína +Axíkar dáknu +rixə, ránju +rùppu| zàrda víyya, cícu cíllə xriñə.* 'He brings him out (and sees that) Axiqar's beard is long, he has lost his colour, he has become yellow and all his teeth are ruined.' (A 3:51)
- (32) *jaššúkələ 'ína cíllə 'o-+xiyàvand| ó nišánkələ.* 'He looks (and sees that) the whole street is (marked with) the same sign.' (A 2:9)

In (33) an item that is perceived and introduced onto the scene for the first time has the near deictic pronoun:

- (33) *+várrəjavàyl' ína áha náša +rába átxa +pšima.* 'He went inside (and saw) a certain (literally: this) man who was very sad.' (A 10:2)

A clause that is the complement of a verb of perception is occasionally introduced by the particle *kat*, e.g.

- (34) *Nátan bæxzáyələ kat-bábu xàyəla.* 'Natan sees that his father is alive.' (A 3:88)

#### 14.5.7 Word Order of Subordinate Content Clauses

When the complement clause contains a subject nominal, this is generally placed before the verb and after the subordinator *t* or the particle *kat*, if these are used:

- (1) *ína lè-+bayyən! hác̚ xa-+šrál' ýya fu-màta.* 'I do not want any lantern to be in the village.' (A 2:1)
- (2) *márət díyyi lèla xšíxal' kat-ána átxa hamzámmən bázu.* 'My master does not need me to speak about him like this.' (A 3:64)
- (3) *bitáyəna! +jár bædráyələ vázzər! kat-cúllə baxtátə lóši lvášta šapárta.* 'They come and the vizier makes an announcement that all women should wear fine clothing.' (A 2:22)
- (4) *+bæddáyələ kát +Axíkar mətlə.* 'He knows that Axiqar died.' (A 3:39)
- (5) *xa-+bózza bæšvákəna! kat-napásu là-+kattá.* 'They leave a hole so that his breathing would not be cut off.' (A 3:36)
- (6) *bæxzáyələ ú +kær̚ála sákla +ùllul, i u-+táma véna bædráya kálə hállun cípa!*  
*hállun lügna.* 'He sees that the basket has gone upwards, and there they are crying out "Give stones, give bricks ..." ' (A 3:59)

The subject is sporadically placed after the verb. This is attested where the subject is indefinite and newly introduced into the discourse, e.g.

- (7) *'aláha ráxma 'ávəd +állo kat-lá-avi dívə +xiло.* 'God have mercy on her that wolves have not eaten her.' (A 1:35)

When the subject is topical it is sometimes fronted before the particle *kat*, e.g.

- (8) *jár xáda 'oyànl! ... júpta kat-lá xárva.* 'It must be thus ... so that the cheese does not go bad.' (B 15:3)

In (9) a subject of a verb is fronted before a subordinating verb in an asyndetic construction:

- (9) *+rázitən bábi yóm̥mi sápən 'atìni?* 'Are you pleased for me to send for my father and mother to come?' (A 43:15)

The subject of temporal clauses may be fronted before the subordinating head of the clause, e.g.

- (10) *'o-+tína 'e-+dān-bràzələ, jári lè pákka.* 'When the mud dries, it must not crack.' (B 14:8)
- (11) *'á-deva 'íman bitáyələ kat-xázza 'á-naša mùdilə +báyya +axəlla.* 'When this monster comes to see what man this is, he wants to eat him.' (A 37:9)

A direct object nominal is generally placed before the verb in the complement clause, e.g.

- (12) *+báyyən xá-məndi tanánnux.* 'I want to tell you something.' (A 3:47)
- (13) *+byáyələ dénuš šakàlla mánnux.* 'He wants to take your debt from you.' (A 3:76)
- (14) *'ána +báyyən cíllə 'a-méša xá-ja hár +tanánnə +al-+xási.* 'I want to carry the whole of this forest in one go on my back.' (A 37:18)
- (15) *'a-dáx c-+ámsən 'ana-'á-+šula 'odánnə?!* 'Oh how can I do this thing?!' (A 2:12)
- (16) *'ána mírənva kátu baxtátə +kaṭállun.* 'I had said to him that he should kill the women.' (A 2:23)
- (17) *+bəddáyələ cíl-məndi zrəzələ.* 'He knows that he has arranged everything.' (A 3:67)
- (18) *+áx bas-+šəmyənva ka-díyyux +kṭəllun.* 'But I had heard that they killed you.' (A 3:68)
- (19) *'íman-ət +Axíkar xùbba muxzíl ka-do-axúna súra, Nátan brúnu ḳat-jurvássuva jú ... malciyávəl +naràhat víla.* 'When Axiqar showed love to that younger brother, his son Natan whom he had brought up and was (now) in the royal court became discontent.' (A 3:17)
- (20) *+jammúyol cíllə kòšunl 'íman-ət 'a-ctáva kabùlula.* 'He musters all the army when he receives this letter.' (A 3:25)
- (21) *+bár 'ánnə míyət +árvə ci-darívalun ju-+tajárlə 'ávva xá ... mán 'ùpra, c-azíva mən-xácmə +rumyáta tám̥məz, ci-mačxívalə, b-šómmət +xorána.* 'After they poured the grape juice into the bins, there was (a kind of) soil, they used to go to some clean hills and find it, (it is known) by the name of *+xorana*.' (B 12:3)

- (22) *málca-da yúvvəl dàstur| kat-cùllə panánnun.* ‘The king has given a command that I should eradicate everybody.’ (A 2:17)
- (23) *+bəttánən màntux| kát ú-məndi káy tunílux.* ‘I am grateful to you that you have told me this.’ (A 2:37)
- (24) *sáb +bəddáyələ kát ý ctóvta +kàryola.* ‘because he knows that he has read that writing.’ (A 37:10)
- (25) *’ána mut-xərbayúta kátxux vídənva| kat-’átən ’á-+šula vádlux b-riši.* ‘What evil had I done to you that you did this against me?’ (A 3:27)
- (26) *’ánnə bəxzáyəna cùllə mzida šátyála.* ‘They see that he has drunk the whole waterskin.’ (A 37:16)

The direct object is occasionally fronted before the subordinating particle of the complement clause, e.g.

- (27) *kámłə ka-da-báxta kat-màxə.* ‘He got up to beat this woman.’ (A 5:10)
- (28) *’á-jiba ’án xelánə ó xelána paršílə| zábbun mən-dó-yba kat-’ázəl mayyila.* ‘On this side the strong ones would select the strongest one to go and fetch the weaker one from the other side.’ (B 9:2)
- (29) *xívvə m-+bár +bəktálulə,* *bitáyəna xína miyya.* ‘After he kills the snake, water flows again.’ (A 39:20)

Occasionally the object is placed after the verb. This is attested where the noun is indefinite, e.g.

- (30) *ci-maxíva +’allu,| c-avíva +bərxàṭa| m-dà-riša| +al-dò-riša,| m-dà-riša| ... úx-ət +matríyəna sìysə.* ‘They used to strike it (the wooden horse) while they ran from this side to that side ... as if they were riding a (real) horse.’ (A 1:1)

The object may be fronted before the main verb. This is attested in constructions where the main verb is combined with an unrealis verb asyndetically. In such cases the two verbs are typically combined in the same intonation group, e.g.

- (31) *ka-díyyi +bílun +kàṭli.* ‘They wanted to kill me.’ (A 3:69)
- (32) *xa-mándi +báyyən tānət káti| kat-háč náša là-’avə +šámyu ju-dúnyə.* ‘I want you to tell me something that nobody in the world has heard.’ (A 3:75)
- (33) *cúllə +karavàšu,| rijavàtu,| cùllə +byáyələ màxə.* ‘All his servants and housekeepers—he wants to beat everybody.’ (A 3:38)

- (34) *+átra +báyyət yavvátla 'ázəl?* ‘You want to let the country be ruined?’  
(A 3:27)
- (35) *xá-yuma xína-zə kèsə xišəva mayyíva.* ‘On another day he had gone to bring logs.’ (A 37:17)
- (36) *'íta 'ánnə-da +báyyət šaklítlun mònni?* ‘Now, do you want to take these too from me?’ (A 1:13)
- (37) *hemánti tíyən lablònna.* ‘I have come to take what I left in trust.’ (A 1:17)
- (38) *xa-+píra táni ka-yómmax šákla| kàtla.* ‘Tell your mother to take a lamb and slaughter it.’ (A 43:12)
- (39) *sábab kənyánə +jarbíva xamívalun| hál xamšà yárxa.* ‘Because they tried to keep the cattle for five months.’ (B 1:26)

In (40) the verb is separated from its fronted object by two intervening verbs:

- (40) *'ánnə +tlá məndyàna| +báyyən 'atítun kèdamta| ka-díyi tanítunlun.* ‘I want you to come tomorrow and tell me these three things.’ (A 38:7)

A prepositional phrase that contains a topic nominal is occasionally fronted before a subordinating head of a temporal clause, e.g.

- (41) *m-mdítə 'é-+dān +plàtəna,| à| vazzírət málca bəxzàyal* ‘When they go out of the city, the vizier of the king sees ...’ (A 48:4)

When the subordinate clause contains a copula, this generally remains in its normal position, e.g.

- (42) *cúllə +bəddàyəna| kát mòttəla.* ‘Everybody knows that she is dead.’  
(A 1:20)
- (43) *sáb +bəddáyəla kát 'é ctávta +kòryolə.* ‘because he knows that he has read that writing.’ (A 37:10)
- (44) *léva +bəddá kát á +rìšəla.* ‘They did not know that he is awake’ (A 37:19)
- (45) *+rábə +pšáməvax kát m-ída yùvvovax.* ‘We are very sorry that we have now lost it.’ (B 2:15)
- (46) *Nátan bəxzáyəla kát-bábu xàyəla.* ‘Natan sees that his father is alive.’  
(A 3:88)

In temporal clauses introduced by a head adverbial phrase that contains the subordinator particle *t*, the copula may be moved to the front of the clause and in some cases cliticized to the subordinator, e.g.

- (47) *'é-+dān t-íla šámmu +bəšmáyu +Axīkar! fǖr'un! brázələ šòpu.* ‘When he hears his name “Axiqar,” Pharaoh dries up on the spot.’ (A 3:67)
- (48) *míyya +bərdàxa dárax +'állu! e-+dān t-íla təlyə.* ‘Let us pour boiling water on him when he is asleep.’ (A 37:19)
- (49) *'ána! ju-béti tivənva! e-+dántət 'ína jvànkə, +tarri mxílun.* ‘I was sitting in my house, when I was young, and somebody banged on my door.’ (A 2:26)

Such temporal clauses are non-assertive, in that they do not express a proposition that can be evaluated as true or false. They share this property with restrictive or informationally integrated relative clauses, which also exhibit copula movement (§14.1.4. examples (17)–(22)).

## 14.6 Conditional Constructions

Conditional constructions consist of two components, the protasis clause, which presents the condition, and the apodosis clauses, which expresses the consequent to the condition. The protasis is normally placed before the apodosis, though in some circumstances this is reversed and a condition of an event or situation is added after the latter has been expressed.

In most cases the protasis is introduced by the conditional particle *'an* ('if'). In some marginal cases the Persian conditional particle *'ájar* is used. In Armenia the conditional particle *'anya* or *'anyat* is also found.

In what follows, we shall classify the conditional constructions according to the verb form of the protasis and the apodosis.

### 14.6.1 *Protasis*

#### 14.6.1.1 *patəx*

The *patəx* form is commonly used in a protasis referring to a future situation the occurrence of which the speaker believes is a real possibility. The form is generally perfective in aspect, since it presents actions delimited with a start and end point or at least with a start point, e.g.

- (1) *'ən-tána kə-šámša clí, bət-cályə.* *'ən-tána +məṭra +ri, bət-+rəyya.* *'ən-tána dúnýə clí bət-cályani.* ‘If he says to the sun “stop”, it will stop. If he says “rain”, it will rain. If he says “Stop world”, it will stop.’ (A 3:64)
- (2) *'ən macərbàxlə +áv hár parpəslən.* ‘If we upset him, he will totally destroy us.’ (A 37:12)
- (3) *'ən-šúk mən-da-+xəlti, xá-məndi xína xázzət biyyi, +ktùlli.* ‘If apart from this fault of mine, you find something else against me, kill me.’ (A 3:48)

The *patəx* form of some verbs in the protasis may have an imperfective aspect, expressing a possible situation in the present, e.g.

- (4) 'ən-ávə xaya,| páljat malcúyti b-yavvónna kàtux.| 'If he is alive, I shall give you half of my kingdom.' (A 3:50)
- (5) 'ən-ána ávən +sàra,| nášət xut-ídot díyyi mùdi vágəna?| 'If I were a moon, what would the people under my command be?' (A 3:61)

In habitual contexts the *patəx* form in the protasis can express a real situation that occurs in at least a subset of all occurrences of the situation, e.g.

- (6) 'án béta ávə +júra! xá-dana stüyna-da xút ci-maxíva mən-+àrra! hál +tàmma! kát là talóxva.| 'If the house was big, they used to place a pillar underneath (coming up) from the ground up to there, so that it would not collapse.' (B 2:19)

In (7) the conditional particle is gapped from the protasis of the second of two conjoined conditional constructions:

- (7) 'án mən-màskal! óya +ràba! mən-’òštux parmánna.| óya xàčča! mən-’òštux parmánna.| 'If it is more than a gram, I shall cut it from your bottom. (If) it is less, I shall cut it from your bottom.' (A 7:11)

#### 14.6.1.2 *patəxva*

The *patəxva* form, with the past converter suffix *-va*, is used in the protasis of conditional sentences that refer to a hypothetical condition in the past, which was not fulfilled (1–3), or to a hypothetical condition in the present or future, which the speaker assesses to be impossible to fulfil (4), e.g.

- (1) 'ən-+bačrətva,| bət-yavvánvalux zìzə,| 'ína là +bučérrex.| 'If you had asked, I would have given you money, but you did not ask.'
- (2) 'ən-+yattánva šámmu mùdiva,| bət-tanànvalux,| 'ína là +yattánva.| 'If I had known what his name was, I would have told you, but I did not know.'
- (3) 'án +'aturáya là-'aviva ju-'Úrmi,| 'áxči 'avíva +'iranáya| járac +'áv 'atíva +'avárva jú ... zarduštáya +macrázva but-mšíxa.| 'If there were not Assyrians in Urmi and there were only Iranians, he would have had to come and enter among the Zoroastrians to preach about Christ (which is inconceivable).' (B 1:3)
- (4) 'ən-+masànva,| bət-'atènva,| 'ína lè-+masən.| 'If I could, I would come, but I cannot.'

In (5) the *patəxva* form is used in an asyndetic counterfactual conditional. In this example the irrealis modality is strengthened by a negative particle:

- (5) *la-’aváxva xelàna,| ’áxnan ’azàxva.* ‘If only we were strong, we would go.’  
(A 45:7)

#### 14.6.1.3 *bət-patəx*

This is used when the protasis expresses a possible situation in the future, e.g.

- (1) *’ánya xošóxun t-àtya,| pešitun.* ‘If you are (i.e. will be) happy, stay.’ (B 16:4)  
(2) *’ánya ’át-da b-’úrxət †jórax t-azátən,| brúnux kám +’áynax +kaṭlàxxə.* ‘If you go in the way of your husband, we shall kill your son before your eyes.’ (B 16:7)

#### 14.6.1.4 *ptəxlə / kam-patəx*

The past perfective form *ptəxlə* and its alternant *kam-patəx* are used in the protasis to denote a possible situation in the future, e.g.

- (1) *’ón xa-náša bukərrə mənnáx| kat-’áha| mànila,| tányat| bràtila.* ‘If somebody asks you who she is, you should say “She is my daughter.”’ (A 1:14)  
(2) *’ən-’ána mətlı,| +págri mü p̄t-ávə?* ‘If I die, what will my body be (like)?’ (A 13:1)  
(3) *’ən-šrílun nášə díyyux ka-díyyi,| tláy šənnə| mán PdarāmàdP-ət| +’átri| ... ’ána yávvən kàtux.* ‘If your people solve it for me, I shall give you thirty years of the income of my land.’ (A 3:40)  
(4) *’ón +msílun| odílə nášə díyyux,| ’ána cíllə xárjət| tláy šənnə| b-yávvánna kàtux| ət+’átri.* ‘If your men can do this, I shall give to you all the expenditure of my land for thirty years.’ (A 3:44)  
(5) *’ən-+msíli,| +’áv bət-yávválla káti.* ‘If I can (do this), he will give it to me.’ (A 3:55)  
(6) *’ón kál-jáxca +šmilux| xùš,| xína lótli PəhtiyájP +’allux.* ‘If you hear the sound of laughter, go. I do not have need for you. If you hear the sound of weeping, wait.’ (A 2:30)  
(7) *’ón +tála tílə +al-jáni bət-maxənnə.* ‘If a fox comes against me, I shall strike him.’ (A 37:6)  
(8) *’ən-vidèlan,| vidèlan.* *lá vidèlan,| tláy šənnət| PdarāmadP-ət +’átrət díyyi| jári yávvánna ká ... fúr’un,| ’ən-lá +msíli,| ’ən-+msíli,| +’áv bət-yávválla káti.* ‘If we do them, we do them (and that’s fine). If we do not do them, I have to give thirty years income of my land to Pharaoh, if I cannot (do them). If I can, he will give it to me’ (A 3:55)

- (9) *'āʃar 'aláha lá +rxəmlà,| múʃári òdax 'áxnan?|* 'If God is not merciful, what should we do?' (A 35:2)

In (10) there are two parallel conditional constructions, in the first of which the protasis has the *ptəxlə* form and in the second it has the *kam-patəxlə* form:

- (10) *'ən-'ána kákx +uldılı,| 'ánnə 'alpá +dinàrə | kàtina. | 'ən-lá kam-+aldənnux,| 'at-diyyux-na.* 'If I trick you, these thousand dinars are mine. If I do not trick you, they are yours.' (A 22:2)

#### 14.6.1.5 *ptəxvalə*

- (1) *čún 'ən-kəmvala,| bàlcət! arkàva!* 'because, if it had got up, it would possibly run away' (B 4:4)

#### 14.6.1.6 Present Copula

The present copula is used in a protasis that denotes a continuous situation in the present, which the speaker considers likely to be true, e.g.

- (1) *'áʃar məndila,| ka-diyyòxun. | 'áʃar jəns móndila,| ka-diyyila.* 'If it is a (bad) thing, it is for you. If it is a good thing, it is for me.' (A 43:5)
- (2) *bas-'ən-xamšámma 'əštámma cilomətrənəl ba-mújjurra susavátət márət diyyi +táma hehehé hurhàmlun,| susavátət díyyux làxxa! murxàšlun?* 'But if (the distance) is five hundred or six hundred kilometres, how is it that the horses of my master neighed there and your horses here aborted?' (A 3:83)

#### 14.6.1.7 Past Copula

The past copula is used when the protasis expresses a continuous situation in the past that the speaker knows to be true:

- (1) *'án 'íva mən-katulikàya xá,| búš-+raba mánđit katulikàya bəzvánəva.* 'If some of the Muslims were allied to the Catholics, they purchased mainly the goods of the Catholics.' (B 1:30)

#### 14.6.1.8 *bəptaxələ*

The *bəptaxələ* form in the protasis may express an ongoing situation in the present that the speaker considers likely to be true, e.g.

- (1) *'ən-lèt hammúna,| ku-ta-mànni.* 'If you do not believe me, get up and come with me.' (A 3:23)

It is also used where the protasis expresses a habitual situation, e.g.

- (2) *'ánjət +byáyəna bí +xlıta 'odíni,| cəšmišəl mattúvvəna jàvo.* ‘If they want to make it with something sweet, they put raisins in it.’ (B 15:10)

#### 14.6.1.9 *'aviva ptixa*

This is used in counterfactual conditional constructions, in which the speaker knows that the condition in the past that is expressed in the protasis was not fulfilled, e.g.

- (1) *+kátu 'ən-óyava +xəlta,| ádi vítəva yàccə.* ‘If the cat had eaten, she would now be huge.’ (A 11:4)

#### 14.6.2 *Apodosis*

Apodosis clauses contain various types of verbal form. These include a number of forms that contain the prefixed particle *bət-*.

##### 14.6.2.1 *bət-patəx*

This is the regular future form and is used as a future verb in apodoses that follow protases referring to the present or the future, e.g.

- (1) *'ən-tána kə-şámša clı,| bət-càlyा.* *'ən-tána +məṭra +ri,| bət-+rəyya.* *'ən-tána dúnýə clı bət-càlyani.* ‘If he says to the sun “stop”, it will stop. If he says “rain”, it will rain. If he says “Stop world”, it will stop.’ (A 3:64)
- (2) *'ən-ávə xàya,| páljət malcútyi b-yavvánna kàtux.* ‘If he is alive, I shall give you half of my kingdom.’ (A 3:50)
- (3) *'ón +tála tıla +al-jáni bət-maxənnə.* ‘If a fox comes against me, I shall strike him.’ (A 37:6)
- (4) *'ən-áyya tıla,| p̄-+karmàla kóssat.* ‘If she comes, she would win the case.’ (A 38:17)

##### 14.6.2.2 *lə-patəx*

This is the negative verbal form that corresponds to the *bət-patəx* form in the apodoses, e.g.

- (1) *'ən-vılun! +'əččámmo 'áčči 'áčča,| lè-+bayyənnun,| lè šaklónnun.* ‘If they are nine hundred and ninety-nine, I do not want them, I shall not take them.’ (A 14:3)

14.6.2.3 *bət-patəxva*

This form is used in the apodosis of conditional sentences that refer to a hypothetical condition in the past that was not fulfilled (1), or to a hypothetical condition in the present or future that the speaker assesses to be impossible to fulfil (2)–(3). It is perfective in aspect:

- (1) *'ən-+yattónva šómmu mùdiva,| bət-tanənvalux,| 'ína là +yattónva.* ‘If I had known what his name was, I would have told you, but I did not know.’
- (2) *'ən-+masənva,| bət-'atənva,| 'ína lè-+masən.* ‘If I could, I would come, but I cannot.’
- (3) *'ən-'avánva xàya| +bəddáyən mu-þt-ódənva b-rišòxun-xina.* ‘If I were alive, I know what I would do to you.’ (A 13:3)

14.6.2.4 *bət-'aviva (þt-aviva, t-aviva) ptixa*

This is used in the apodosis of counterfactual conditions referring to a possible situation in the past that was not fulfilled, e.g.

- (1) *'ávətva þt-ávətva xòzya hí?* ‘(If) you had been (here), you would have seen, heh?’ (B 17:22)

14.6.2.5 *patəx*

This form is commonly used in apodoses after protases referring to possible events in the present or future, e.g.

- (1) *'ən macərbàxlə| +'áv hár parpəslən| hár +dardàklan.* ‘If we upset him, he will totally destroy us, he will totally shatter us.’ (A 37:12)

It is also used when the apodosis is deontic, e.g.

- (2) *'ən xa-náša +buķàrrə mənnáx| ķat-'àha| mānila,| tānyat| bràtila.* ‘If somebody asks you who she is, you should say “She is my daughter.”’ (A 1:14)

14.6.2.6 *ci-patəx*

This is used when the apodosis expresses a real habitual situation:

- (1) *'ən +'òdda 'avíla| ci-+edàxla.* ‘If it has weeds, we weed it.’ (B 3:25)

14.6.2.7 *ci-patəxva*

This is found in apodoses after protases that refer to a real habitual situation in the past, e.g.

- (1) *'ón béta ávət <sup>t</sup>júral xá-dana stiúyna-da xút ci-maxíva mən-<sup>+t</sup>arrəl hál <sup>+t</sup>támma kát lá talóxva.* 'If the house was big, they used to place a pillar underneath (coming up) from the ground up to there, so that it would not collapse.' (B 2:19)

#### 14.6.2.8 *ptəxlə / kam-patəx*

The past perfective *ptəxlə* form and its functionally equivalent alternant *kam-patəx* are occasionally used in apodoses. It is attested in (1) and (2). In (1) it replicates the lexical verb and the verbal form of the protasis, referring to a possible situation in the future. In (2) it refers to a possible situation in the past that the speaker considers unlikely to be true:

- (1) *'ən-vidèlan,| vidèlan,| lá vidèlan,| tláy šənnət| <sup>P</sup>darāmad<sup>-at</sup> <sup>+átrət díyyi| jári yavvánna ká ... fūr'un.</sup>* 'If we do them, we do them (and that's fine). If we do not do them, I have to give thirty years income of my land to Pharaoh.' (A 3:55)
- (2) *bas-'ən-xamšámma <sup>ə</sup>štámma cilomətrənà| ba-mújjurra susavátət márət díyyi <sup>+t</sup>áma hehehé hurhàmlun,| susavátət díyyux láxxa| murxòšlun?* 'But if (the distance) is five hundred or six hundred kilometres, how is it that the horses of my master neighed there and your horses here aborted?' (A 3:83)

#### 14.6.2.9 Present Copula

An apodosis with the present copula is used to express a permanent situation, e.g.

- (1) *'ən-lá pšərrəl brùnilə. | 'ən-pšərrə,| ləla brúni.* 'If he does not melt, he is my son. If he melts, he is not my son.' (A 39:31)

#### 14.6.2.10 *bəptaxələ*

An apodosis with this form expresses a situation that overlaps temporally with the situation expressed in the protasis, e.g.

- (1) *'ən-ána ávən <sup>+s</sup>ára,| nášət xut-<sup>í</sup>dət díyyi mùdi vágəna?* 'If I were a moon, what would the people under my command be?' (A 3:61)

It is also used where the protasis expresses a habitual event, which follows from the protasis:

- (2) *'ányət <sup>+b</sup>yáyəna bí <sup>+x</sup>lítə 'odíni,| cəšmíšəl mattúvvəna jàvo.* 'If they want to make it with something sweet, they put raisins in it.' (B 15:10)

### 14.6.2.11 *ptixəva*

This is used in the apodosis of counterfactual conditions referring to a situation that the speaker knows is impossible since the condition in the past expressed in the protasis was not fulfilled, e.g.

- (1) +*kátu* 'ən-'*óyava* +*xəltə*,| 'ádi vítəva yàccə.| 'If the cat had eaten, she would now be huge.' (A 11:4)

### 14.6.2.12 Imperative

The apodosis may contain an imperative form:

- (1) 'ən-*šúk mən-da*-+*xəlti*,| xá-məndi xína xázzət bìyyi,| +*kxulli*.| 'If, apart from this fault of mine, you find something else against me, kill me.' (A 3:48)
- (2) 'én *kāl-jóxca* +*šmilux*| xùš.| xína látli <sup>P</sup>əhtiyáj<sup>P</sup> +*ällux*.| 'én *kāl-bàxya* +*šmilux*, *cl.*' 'If you hear the sound of laughter, go. I do not have need for you. If you hear the sound of weeping, wait.' (A 2:30)
- (3) 'ən-lèt hammúna,| *ku-ta-mənni*.| 'If you do not believe me, get up and come with me.' (A 3:23)
- (4) 'én á là humzámłə| ríšət-diyi prùmula.| 'If he does not talk, cut off my head.' (A 34:11)

### 14.6.3 'ən-la

The negation of a protasis that is placed before the apodosis is expressed by combining the conditional particle with the negator in the phrase '*ən-lá*' with stress on the negator. This is typically used in contexts where the clause expresses a negative alternative to a situation described in the preceding context. As a result, the remaining content of the clause is given or at least inferable from what precedes and the main information prominence is on the negator rather than the clause content, e.g.

- (1) 'ən-'ána kák +*uldili*,| 'ánnə 'alpá +*dinàrə*| kàtina.| 'ən-lá kam-+*aldànnux*, 'at-diyux-na.| 'If I have cheated you, these thousand dinars are for me. If I have not cheated you, they are yours.' (A 22:2)

The content of the protasis clause indeed is often gapped completely, e.g.

- (2) 'ən-*šrlun násə díyyux ka-díyyi*,| *tláy šónna*| mén <sup>P</sup>darāmàd<sup>P</sup>-at| +*ùtri*| ... 'ána yávvən kàtux.| ... 'ən-lá| 'átən xárjət *tlay-šónna díyyi*| 'atjári yávvátlə.| 'If your people solve it for me, I shall give you thirty years of the income of my land. ... If not, you must give me my expenditure for thirty years.' (A 3:40–41)

- (3) *xmári +pàlətłə| ɿn-là| +'avva-ł-íłə bitá +małlux.*! ‘Get my donkey out. If not, the one who is coming will reach you.’ (A 7:4)
- (4) *+'ávva kàlpulla.*! *ɿn-là, lè-+axlitun láxma, lé yavrúloxun lèxma.*! ‘Peel it. If not, you will not eat any food, they will not give you food.’ (A 35:17)

#### 14.6.4 Protasis after the Apodosis

A condition expressed in a protasis is occasionally placed after its consequent. The function of such constructions depends on the information status of the content of the protasis. If the situation expressed in the protasis is inferable from the foregoing discourse, the postposition of the protasis expresses the cohesion of the conditional construction with what precedes, e.g.

- (1) *+pállan náša vélə +póllan dúcta yávəłə ... láxma +xurrày.*! ... *'ána-da ɿdi t-ázən p-šákłən mən-+táməl ɿn-+'áv yávəłə.*! ‘Such-and-such a person in such-and-such a place is giving bread away free. ... I also shall now go and take from there, if he is giving away.’ (A 19:4–5)
- (2) *mára ɿa-mù-itun cálýa?*! *hállun +tìna!*! *hállun miyya!* *hállun cípa.*! ... *ba-mújjur ɿtən +byáyat +támma béta zárzən kàtux!* *ɿn-ɿtən lé-+baśrətyávvət cípa,*! *miyya.*! ‘He says “Why have you stopped? Give clay, give water, give stones.” ... “How do you want me to build here a house for you, if you cannot give stones and water.”’ (A 3:72)

In (3) the protasis has a different informational status, in that it presents new information, which has not been invoked previously. The effect of postponing such a protasis is to place enhanced focus on its contents:

- (3) *+túlvunte bnátax bət-+kàtlànnun!* *ɿn-+'áynət bábi lá yavàttun.*! ‘I shall kill the three daughters of yours if you do not give me the eyes of my father.’ (A 39:38)

In (4) and (5) the protasis expressing new information has the function of a deontic complement clause. The use of a conditional construction expresses the lack of certainty of fulfilment, which, in (4) at least, is a strategy of politeness, e.g.

- (4) *'áxnán +rába bət-xàdax!* *ɿn yavvítun ká-díyyan pərsat!* *+ijáza yavvítunlan!* *hár pésax làxxa!* *mašxàddax!* *ju-dá dùcta.*! ‘We would be very happy if you gave us the opportunity and you gave us permission to stay right here, to preach in this place.’ (B 2:14)
- (5) *'áxči xá +ba'úta ɿtli mənnòxun!* *ɿn ɿttən xá úrxə +masítun!* *ka-díyyi +mad-*

*dərrítun +'ál de-dúnyøt +'üllul.* I have only one request (to ask) from you (namely) that (literally: if) there is a way that you can return me to the world above.' (A 39:21)

#### 14.6.5 Word Order of Conditional Constructions

If there is a subject constituent in the protasis and/or apodosis in the form of a noun or independent pronoun, these are generally placed before the verb. In all attested cases of nouns or independent pronouns in the apodosis, these have different referents from the subject of the protasis, so subject—verb word order would be expected according to the normal principles of word order in main clauses (§ 12.5.2.), e.g.

- (1) *'ən-'ána ́ávən +sàra,| nášøt xut-'ídat díyyi mùdi vágøna?* 'If I were a moon, what would the people under my command be?' (A 3:61)
- (2) *'én béta ́áva +júral xá-dana stüyna-da xút ci-maxáva mən+àrra| hál +tàmma| kát là talóxva.* 'If the house was big, they used to place a pillar underneath (coming up) from the ground up to there, so that it would not collapse.' (B 2:19)
- (3) *'én xa-náša +buķàrrø mənnáx| ́kat-'áha| mánila,| tányat| bràtila.* 'If somebody asks you who she is, you should say "She is my daughter." (A 1:14)
- (4) *'ən-'ána mətlí,| +págri mù p̄t-ávə?* 'If I die, what will my body be (like)?' (A 13:1)

When the subject of the protasis is topical and has been mentioned in the preceding discourse, it is occasionally placed before the conditional particle, e.g.

- (5) *+kátu 'ən-'óyava +xèlta,| ́ádi vítøva yàccø.* 'If the cat had eaten, she would now be huge.' (A 11:4)
- (6) *+Már Túma! 'én tíyyølø +al-'Úrmi! lì +yárvø| ́atíva| ká zarduštàya +mácrózva.* 'If St. Thomas came to Urmi, he would not have dared to come to preach to the Zoroastrians.' (B 1:3)

When the subject of the protasis is topical and the proposition of the protasis coheres closely with the preceding context, the subject of the protasis may be placed after the verb, e.g.

- (7) *́ána +byáyøn mən-nášux lipø| mən-jú +'átrøt díyyux| +'árþa xamšá mən-dýánø káti! +jùvvab ́ödø ... 'ən-šrílun nášø díyyux ́ka-díyyi,| tláy šànnø| mán p̄darāmàdP-øt| +'átri! ... ́ána yávvøn kátu.* 'I want your learned men from

your land, to give me a response to four or five things ... If your people solve it for me, I shall give you thirty years of the income of my land.' (A 3:40)

- (8) *'é mumlóxta júpta| bədráyox ju-míyya mòlxá.| 'ánya +báyyax 'àxnan| kásatva| xamàxxa,| +tumòrta júpta.|* 'We put the salted cheese in salt water. If we want to keep it for the winter (we made) buried cheese.' (B 15:3)

In (9) a quantifier qualifying a gapped topical subject *kamxa* is placed before the conditional particle and in the apodosis the coreferential noun *kamxa* is placed after the verb. This follows the normal discourse principle of using verb—subject word order to express close cohesion with what precedes when there is subject continuity. This shows that the linkage between protasis and apodosis is analogous to the close coherence in discourse between main clauses:

- (9) *+róba 'ón 'átíl jarùsa vágøva kámxa.* 'If a lot (of flour) came, the flour was coarse.' (B 17:7)

In (10) there is subject continuity across the apodosis and protasis, but the subject of the protasis, which here is placed after the apodosis, comes before the verb. This is likely to be due to the fact that on the level of discourse structure the protasis constitutes a shift to elaborative background and subject preposing is the norm at such discourse boundaries.

- (10) *ba-mújjur 'átan +byáyat +támma béta zárzən kátu|x| 'ón-'átan lé-+bašrət yávvət cipa,| miyya.* 'How do you want me to build here a house for you, if you cannot give stones and water.' (A 3:72)

If a copula occurs in the predicate, this may be fronted before the predicate, e.g.

- (11) *'ón 'íva mən-katulikáyə xá,| búš-+raba mánđit katulikáyə bəzvánəva.* 'If some of the Muslims were allied to the Catholics, they purchased mainly the goods of the Catholics.' (B 1:30)
- (12) *bás 'ón 'íla 'át-+aturáyə| bás +aturáya ctívola.* 'So, if it is that of the Assyrians, then an Assyrian wrote it.' (B 1:7)

#### 14.6.6 Asyndetic Conditional Constructions

On a number of occasions the semantic relation between a series of clauses is that of condition and consequent, but they are juxtaposed asyndetically without a conditional particle. It is often appropriate to translate such clauses

by a English conditional sentence. They often contain verbal forms that are characteristic of *'on* conditional constructions, e.g.

- (1) *láxxa xá náša lá pàləx! lè-+aməs +áxəl!* 'Here if a man does not work, he will no be able to eat.' (A 35:10)
- (2) *'ína +arra-óya ķvítə míyya ju-dreté míyya c-àzi!* 'But if the ground is hard, when water is poured out, it flows away.' (A 3:11)
- (3) *xá-+dinar óya +basùrta, lè-+bayyənnun!* 'If one dinar is missing, I do not want them.' (A 14:3)
- (4) *'àtətva, ju-cúllə ánnə +xabráne ci-yavvátvələ +jùvvab!* 'If you would come, you would respond to all these requests.' (A 3:45)
- (5) *'íta 'avánva mār-zúyza, xá +čóla banánvala b-cárpač! t-odánvala bëta ķajáni!* *'íta lòtli, lèn mār-zúyza, b-ķèsəl xa-dána +čóla b-zarzánva!* 'Now, if I were wealthy, I would build a booth with bricks, I would make it into a house for myself. But, if I do not have (money) and am not rich, I would make a booth of wood.' (B 3:20)
- (6) *+al-yámmi xá lácca xzili, parzənnax!* 'If I see a mark on my mother, I will tear you apart.' (A 44:6)
- (7) *málca +dilə, maxnəkli!* 'If the kings knew about it, he would hang me.' (A 48:8)
- (8) *tunílux, tunílux! là tunílux, jòldux! p-šalxànnə malánna tiłyna!* 'If you say (the truth), you say (the truth). If you do not say the truth, I shall flay your skin and fill it with straw.' (A 1:33)
- (9) *xá-məndi tunilə t-avàdlə!* 'If he said something, he would do it.' (A 1:14)
- (10) *zúyzə muyyələ, àt škúl!* 'If he brings the money, you take it.' (A 21:3)
- (11) *'átvala yala-súra! yala-súra-da +tenávalə +al-+xàsə lablàvalə!* 'If she had a child, she would also carry the child on her back and take him (with her).' (A 5:6)

These constructions often contain the verb *+bayyə* i 'to want' in the first clause, e.g.

- (12) *'íta +bayyət +katlòtlə=da, +ktùlla!* 'So, if you want to kill him, kill him.' (A 3:50)
- (13) *+bayyət jánux bašlòtlun, ku-škúl bàšəllun!* 'If you want to cook them yourself, take them and cook them.' (A 36:8)

The first clause may have an imperative form, e.g.

- (14) *'a-+šúla vùdlə| lá-'avilux +šúla.|* 'Do this thing (= If you do this thing), and you will have no problems.' (A 2:21)

Verb forms characteristic of counterfactual conditional constructions are used to express wishes that the speaker believes cannot be realized, e.g.

- (15) *xá-ja xítə=zə +Axíkar xazzənvalə| tapókva bìyyi.|* 'áxči pàti ketáva ju-pàtu,  
bàss-iva.' 'If only I could see Axiqar once again, if only he could meet me again. If only my face could touch his face, that would be enough.' (A 3:46)
- (16) *'ávənva +xlàpux +Axíkar.|* 'Would that I were your substitute, Axiqar.'  
(A 3:60)

#### 14.7 Asyndetic Temporal Constructions

In some cases a syntactically independent clause that expresses a realis situation and is asyndetically joined to what follows supplies the setting of what follows and it is idiomatically translated by an English temporal clause, e.g.

- (1) *hár sarkàttə| dàvə tápxi.|* 'Whenever you comb it, gold coins poured down.'  
(A 43:12)
- (2) *'íta c-avíva +priṭə| +rappívalun +al-+kàṭma.|* 'Now, when they were torn,  
they used to throw them onto the ash.' (B 3:36)

#### 14.8 Concessive Constructions

A concessive construction presents a situation in the main clause that the speaker signals is unexpected as result of, or in the circumstances of, the situation expressed in the concessive clause.

The concessive clause may be introduced by the inclusive conditional expression *'up 'on* 'even if, although':

- (1) *'íp 'ón 'íva máx dót xinə| məššəlmànə|* 'ína 'íva +rába búš šap̄òrta.' 'Although it was like that of the others, the Muslims, it was much more beautiful.' (B 1:40)

The concessive clause may also be expressed by the enclitics *da* or *zə*, which are used here in their focal inclusive function with the sense of 'even including such-and-such a situation' and are appropriately translated 'even if' or

'although'. The concessive clause may be placed before or after the main clause, e.g.

- (2) *'ádi tálki=da| 'át xu-li-+yat̪tət.|* 'Even if they get lost now, you would indeed not know.' (A 39:32)
- (3) *+šúla lèva yavé,| cíllə=zə +kəryànnəvə.|* 'They did not give them work, although all of them were educated.' (A 41:15)
- (4) *'ánnə m-+údalə bət-+dárši 'én 'ána kémən ... dyànta 'ýdən súsa yavvánna| +záya yavvánna ká ... 'axúna súra| kát +bəddáyən=zə 'ít sústələ.|* 'They will argue together if I make a judgement to give the horse, give the foal, to the younger brother, which I know to be (the foal) of the mare (= although I know it is the foal of the mare).' (A 38:5)

Another type of concessive construction are cases such as (5) and (6), in which the concessive clause is subordinated under a quantifier with a correlative function ('as much as ...', 'however much ...'):

- (5) *cmá=t ... +byáyələ 'átə hámzəm| lélə +bašùrə.|* 'However much he wants to talk, he cannot do so.' (A 3:30)
- (6) *cmá=t +byàyənə| lénə +bašùrə.|* 'However much they want to, they cannot.' (A 3:74)

# The Lexicon

## 15.1 Remarks on the Lexicon

### 15.1.1 Lexical Borrowing

The most conspicuous feature of the lexicon of the C. Urmi dialect is the large number of loanwords from the languages of the Urmi region. These are mainly nouns, adjectives, adverbs and particles, but there are also some borrowed verbs. Many of the nouns and adjectives remain unadapted to NENA inflectional morphology (§ 5.11., § 6.11.). The borrowed verbs are always adapted to the NENA templates and inflection. These are generally quadriliteral and are often derived from nouns rather than directly from verbs, e.g.

- |   |  |
|---|--|
| <sup>+</sup> <i>daldən</i> QI ‘to shelter’ (root <sup>+</sup> <i>d-lđ-n</i> ) | < Azer. <i>dalda</i> ‘shelter’ (cf. Azer.<br><i>daldalamaq</i> ‘to shelter’)             |
| <sup>+</sup> <i>kandəx</i> QI ‘to swaddle’ (root <sup>+</sup> <i>k-nd-x</i> ) | < Azer. <i>qundaq</i> ‘swaddling clothes’<br>(cf. Azer. <i>qundaqlamaq</i> ‘to swaddle’) |
| <sup>+</sup> <i>dağğən</i> QI ‘to brand’ (root <sup>+</sup> <i>d-ğğ-n</i> )   | < Azer. <i>dağ</i> ‘brand’ (cf. Azer. <i>dağlamaq</i><br>‘to brand’)                     |

Many of the quadriliteral verbs expressing sounds have their source in Kurdish verbal nouns rather than verbs (§ 4.25.4.8.), e.g.

- |   |  |
|---|--|
| <sup>+</sup> <i>barbər</i> QI ‘to low, to roar’ | < Kurd. <i>bořeborž</i> ‘lowing (of oxen)’   |
| <sup>+</sup> <i>šaršər</i> QI ‘to splash’       | < Kurd. <i>šiřešiř</i> ‘plashing (of water)’ |

The common verb *hamzəm* ı ‘to speak’ is derived from the noun *heməzman* ‘word’, which appears to be a loan from Kurdish *hemziman* ‘mutual speech.’

#### 15.1.1.1 Origin of Loanwords

The majority of the loanwords are from Azeri and Persian, which are the languages that speakers of the NENA dialect have been most exposed to in recent times. Several loanwords are from Kurdish, which is spoken in the Urmi region. There are also several loanwords from Russian in all varieties of C. Urmi. In the Caucasus speakers insert numerous Russian words into their speech, as well as occasionally Armenian and Georgian, but in most cases these are unadapted loans and can be regarded as code-switching rather than lexical borrowing.

It is significant to note that a large proportion of Kurdish nouns have been adapted to NENA morphology by the addition of NENA inflectional endings, whereas only a small minority of the many Azeri and Persian loanwords have been adapted. This can be interpreted as reflecting that the Kurdish loans represent an older layer of the lexicon, which entered the dialect at an earlier historical period, before the dominance of Azeri and Persian. Nowadays speakers of C. Urmi in the Urmi region speak Azeri and Persian but generally not Kurdish.

Some of the Azeri words are found in the Azeri dialects spoken in north-west Iran but not, it seems, in Azerbaijan and are not listed in the standard Azeri dictionaries, e.g. *+candal* ‘precipice; small hill,’ *tunji* ‘pitcher, jug’ (standard Azer. *tunc* ‘bronze’), *čurətma* ‘trap, mousetrap, snare (for birds)’.

Conversely some Azeri loanwords in C. Urmi are still used in Azerbaijan but are no longer used by Azeri-speakers in north-west Iran, e.g. *+dussaq* ‘jail’ (< Azer. *dustaq*), *davula* ‘drum’ (< Azer. *davul*), *+kulluğ* ‘service’ (< Azer. *qluluq*).

A number of the loanwords are of Turkic origin but are not used today in Azeri dialects. Some of these words can be identified in Ottoman Turkish, e.g. *+karavat* ‘bed’ (< Ottoman Turk. *kerevet*), *+taslax* ‘disordered, unfinished’ (< Ottoman Turk. *taslaq*), *+oyma* ‘dress’ (cf. Ottoman Turk. *oyma* ‘decorated work’). The origin of some words that do not occur in Azeri can be traced to other Turkic languages (Ragagnin 2016), e.g. *+kapturma* ‘pouch’ (< Middle Mongol *qabturga* < Mongol *qabtag-a(n)*; cf. Lessing 1995, 899a), *čəm* ‘very, absolutely’ (cf. Chagatai *čum* (Nöldeke 1868, 168), *čung* (Zenker 1866, 375)). Such words would have entered the C. Urmi dialect at an earlier historical period when the Turkic language situation in the region was different from the present.

Many words of Arabic origin entered the dialect through the languages of the region, Azeri, Persian or Kurdish. Sometimes the phonological shape of such words gives us a clue as to which language they were taken from. Arabic loanwords in which an original initial *\*ŷ* has been devoiced to /x/ are likely to have come through Kurdish, where this shift occurs, e.g. *xam* ‘worry’ (Kurd. *xem* < Arab. *ǵam*), *+xulama* ‘servant’ (Kurd. *xulam* < Arab. *ǵulām*). Also semantic developments of some Arabic loanwords are characteristic of particular languages of the region, e.g. *şart* ‘bet’ (Kurd. *şert* ‘bet’ < Arab. *šart* ‘condition’), *+casəb* ‘poor’ (Azer. *kasib* ‘needy, poor’ < Arab. *kāsib* ‘earner’).

A number of words of Arabic origin are likely not to have been transferred to the dialect through the intermediary of the non-Semitic languages of the region. This applies in particular to words that have a pharyngal or emphatic consonant in Arabic and are emphatic in the C. Urmi dialect, e.g. *+jamma*

I ‘to gather’ (intr.), <sup>+j</sup>*jammə* II ‘to gather’ (tr.) (< Arab. *jama'a*), <sup>+'</sup>*ajjəb* QI ‘to be surprised’ (< Arab. ‘*ajiba*’), <sup>+'</sup>*ajjəz* QI ‘to be annoyed, to annoy’ (< Arab. ‘*ajjaza*’), <sup>+t</sup>*taləb* ‘to request’ (< Arab. *ṭalaba*), <sup>+x</sup>*xasina* ‘axe’ (< Arab. *xaṣīn*), <sup>+z</sup>*amət* I ‘to fill’ (< Arab. *dabaṭa?*). Arabic pharyngal and emphatic consonants are weakened when Arabic words are loaned into the non-Semitic languages of the area. These Arabic words must have entered the C. Urmī dialect at an earlier historical period. This is likely to have been when the ancestors of the C. Urmī-speakers were living in regions where Arabic was spoken in northern Mesopotamia before their eventual migration to the Urmī plain (Nöldeke 1868, xxiii; Yaure 1957, 77–79). Other words that are likely to have entered the C. Urmī dialect from Arabic in this way rather than through non-Semitic languages in the region include <sup>+t</sup>*jarəb* II ‘to try’ (< Arab. *jarraba*), <sup>+t</sup>*jarə* I ‘to flow’ (< Arab. *jarā*), *layəm* I ‘to blame’ (< Arab. *läma*), <sup>+r</sup>*ada* I ‘to like, to approve’ (< Arab. *radiya*), *tapək* I ‘to meet’ (Arab. ‘*ittafaqa*’), *sama* ‘share’ (< Arab. *sahm*). All these words are found in some of the NENA dialects of Iraq, in particular some of the Christian NENA dialects such as C. Barwar. In a few Arabic loanwords velar fricatives correspond to pharyngal fricatives in the Arabic source words, e.g. *xoda* ‘basin’ (< Arab. *ḥawḍ*), *tagala* ‘spleen’ (< Arab. *ṭihāl*). It is significant that a large proportion of Arabic loanwords discussed in this paragraph are verbs.

#### 15.1.1.2 Distribution of Loanwords in the Lexicon

A large proportion of loaned nouns are cultural loanwords, which refer to items in the cultural environment. The C. Urmī speakers shared this cultural environment with speakers of other languages and also spoke these languages, which facilitated the lexical borrowing. This applies in particular to the nouns presented in the lists in the next chapter, which relate to aspects of traditional life in the villages. In some cases a loanword is used to refer to a modern version of a traditional artefact. The native NENA word *cavə*, for example, refers to a traditional window in village houses without glass, but the loanword *panjara* (Azer. *pəncərə*, Pers. *panjare*, Kurd. *pencere*) is used to refer to a modern type of window with glass. Likewise the native word *ptana* is used to refer to a traditional wooden plough, but the loanword *cuytan* (Azer. *kotan*, Kurd. *cot*) is used to refer to a modern plough made of metal.

Within the core vocabulary of the dialect, which is not so clearly associated with the cultural environment, there are a lower proportion of loanwords. Some observations can be made on the distribution of the loanwords that do occur within areas of core vocabulary.

Within the class of adjectives, a few loanwords occur within the core semantic types of adjectives which have been identified as occurring in all languages

that have adjectives, namely those denoting dimension, age, value and colour (Dixon 2004; Dixon 2010, 2:62–114; Aikhenvald 2015, 158). The distribution of loanwords tends to correlate with the degree of basicness or semantic markedness.

In the field of colours (§ 15.2.53.4.), for example, the colours ‘black’ (*cuma*), ‘white’ (+*xvara*), ‘red’ (*smuka*) and ‘green’ (*kina*) are native NENA words, but other colours are loanwords. According to theories of the development of the colour lexicon of languages based on cross-linguistic typological studies, black, white, red and green are among the primary colours that are distinguished when the colour space is partitioned by languages. According to Kay and Maffi (1999) black and white constitute the basic partition. This is followed by the partition into ‘warm’ primary colours (red/yellow) and ‘cool’ primary colours (green/blue). Red is the most perceptually salient and this gives it primacy over other warm colours in the partition. This division of the lexicon is also reflected in the verbal system, in that verbs denoting the acquisition of the primary colours black, white and red have the morphologically unmarked pattern I, whereas verbs relating to the other colours, including green, have the morphologically marked pattern III (§ 4.25.3.1.).

Within the field of dimension adjectives listed below (§ 15.2.53.1.) ‘shallow’ is expressed by the loanword +*latṭa* (< Kurd. lat ‘flat’) whereas the term for ‘deep’ is of native NENA origin, viz. *'amku*. This can be correlated with the fact that in the pair of adjectives ‘deep’—‘shallow’, ‘deep’ is the unmarked member of the pair, whereas ‘shallow’ is semantically marked.<sup>1</sup> This is shown by the fact that *'amku* has generic value in expressions of quantified dimensions such as +*ṭla məṭra* *'amku* ‘three metres deep’ since in such constructions it is used irrespective of the depth. The term +*latṭa* is not used in such contexts. Likewise the generic abstract noun for this measure is *'amkuyta* ‘depth’ derived from *'amku*. Among the adjectives of the type expressing age, we find the loanword *jil* ‘young (person)’ (Kurd. çēl, Azer. cahil < Arab.) whereas ‘old’ (person) is expressed by native forms, e.g. *sava*, *b-šənna*. Again the item that is expressed by the loanword, ‘young’, can be regarded as the semantically marked member of the pair.

Elsewhere in the core semantic types of adjectives listed below, we find the value adjective ‘good’ expressed by the loanword +*spay* (< Kurd. spehi ‘pretty, beautiful’). This value adjective is expressed by a loanword in a large proportion of the NENA dialects. Other loanwords expressing the meaning ‘good’ that

---

<sup>1</sup> For this phenomenon of dimension adjective pairs in English see Vendler (1963) and Givón (1970, 817).

are attested in the NENA dialects include *bāš*, *baš* (C. Derabun, C. Dere, C. Has-sana, C. Nargözine-Xarjawa [nr. Aqra], C. Peshabur, C. Shosh-u-Sharmen [nr. Aqra], C. Qaraqosh, J. Amedia, J. Challal, J. Nerwa), *randa* (C. Ankawa, C. Karəm-leşh), *taza* (C. Barwar, C. Dere), *xoš* (C. Barwar, C. Hamziye, C. Telkepe), *'ayza* (J. Sanandaj), *rek* (J. Sulemaniyya). The adjective *+spay* ‘good’ is typically used in emotion-driven evaluative constructions rather than objective factual descriptions. This is reflected by its frequent placement before the head noun when used attributively (§ 9.6.1.). The association of the adjective with emotive evaluation is likely to have conditioned innovation through lexical replacement. The motivation for this would have been the loss of force of the original lexical item by frequency of use. It is relevant to note that speakers of C. Urmi sometimes code-switch into another language in emotion-driven expressions such as endearments or insults, e.g. *ka-bàxtu márələl* <sup>P</sup>ayāl-jàn<sup>P</sup> ‘He says to his wife “Dear wife.”’ (A 24:1), *márra* <sup>P</sup>ahmak! *nādān!*<sup>P</sup> ‘He said “Fool, ignoramus!”’ (A 12:3).

Within the class of nouns relating to common animals, there is a greater tendency for a loanword to be used for the male than for the female. The native female term is generally related to the collective term or generic term. This tendency is exemplified by cases such as *'arba* ‘sheep’ (pl. *'arba*), *+vana* ‘ewe’ (cf. Syriac *ānā*), *barrana* ‘male sheep’ (< Kurd. beran); *'azzə* ‘goats’, *'azzita* ‘female goat’, *kočča* ‘male goat’ (< Azer. qoç); *jammışə* ‘buffaloes’ (cf. Syriac *gāmūšē*), *jeməšta* ‘female buffalo’, *calla* ‘male buffalo’ (< Azer. kəl). The young of animals are sometimes expressed by loanwords whereas the adults are expressed by native words, e.g. *xmara* ‘male ass’, *xmarta* ‘female ass’, *curra* ‘young ass’ (< Pers. kurra); *calba* ‘dog’, *caləbta* ‘female dog’, *çurçila* ‘puppy’ (< Kurd. *kurṭ* ‘short’).

In the semantic field of kinship terms loanwords are used for some close relatives such as ‘father’, ‘wife’, uncles and aunts (paternal and maternal), ‘nephew’ and ‘niece’. This may have been motivated by the tendency to innovate by lexical replacement for terms associated with emotion, as we saw for the evaluative adjective *+spay*. Some NENA dialects use a loanword also for ‘mother’, e.g. *da'a* (J. Arbel, J. Koy Sanjaq), *da'aka*, *day* (J. Sanandaj, J. Saqqez), *dae* (J. Urmi), all of which are derived from Kurdish (Sorani *dâya*, Kurmanji *dê*, *dayik*). Loanwords are used also for step relationships, and for terms denoting the extended family.

### 15.1.1.3 Features of Loanwords

Some compound phrases are borrowed as unanalysable units. This is the case, for example, with Persian words with the negative prefix *nā-*, e.g. *nahak* ‘unjust’ (< Pers. *nā-haqq*), *+narahat* ‘uncomfortable’ (< Pers. *nā-rāhat*). The original

prefix is integrated into the domain of emphasis of the various base words, showing that the phrases are treated as units. Multiple borrowings of some compounds, however, result in the elements of the phrase being transparent and productive. This is the case with the many phrases with the Iranian prefix *be-* ‘without’, e.g. *be-+həssab* ‘numberless’, *be-+namus* ‘dishonest’, with the result that the *be-* prefix is used productively also with words of NENA origin, e.g. *behona* ‘mindless’ (§ 6.8.).

In many cases loanwords do not replace existing words of the same or similar meaning in the lexicon but rather are used to express a metaphorical extension of meaning. The Azeri word *haça* ‘fork’, for example, is borrowed to refer to a ‘forked stick used to support vines and trees’ (+*hača*), the basic meaning of the implement ‘fork’ being expressed by *čanjal*, itself a loanword (Kurd. çengal f., Azer, çəngəl, Pers. čangāl). The loanword *cira*, which is derived from Kurd. *kîr* or Pers. *kîr* ‘penis’, is used to refer to the main long pole of a plough, the body-part ‘penis’ being expressed by +*buyta*. The Arabic word *sāq* means ‘foreleg, shank’ but when this is borrowed, through Persian, in the form +*saka*, the loanword is used to refer to a ‘woolen gaiter’ or ‘legging’, the cognate native NENA word *šaka* being retained to refer to the body-part. The word *čambara* is used in the context of the harvest to refer to a ‘heap of harvested corn stalks arranged in a ring around the threshing floor’. This is derived from Azer. çənbər, which has the more generic meaning ‘circle, rim’. The native NENA word *flula* or *flulta* is retained to express the generic meaning of ‘circle’. Azer. *sınıq* ‘broken, fractured’ is borrowed in the expression +*sənnəğ* ‘avə 1, which has the metaphorical sense of ‘to be bankrupt’, i.e. broken financially, but does not replace native NENA words expressing the generic notion of ‘breaking’. The expression *dara-tapa* has the sense of ‘bump’, e.g. *ju-da baxča itən +raba darə tapə* ‘There are many bumps in this garden’. This is a metaphorical development of the meaning of the Azeri source *dərə-təpə* ‘hilly country’. The loanword +*doğma* is used in the sense of ‘stepson, stepdaughter’. This is a metaphorical usage of the Azeri source word *doğma*, which, when used as an adjective, has the sense of ‘native’, ‘one’s own’, the noun *doğma* meaning ‘birth, childbirth.’ The value adjective +*spay* ‘good’ is derived from Kurd. *spehî*, which denotes the physical property ‘pretty, beautiful’. The shift from ‘beautiful’ to ‘good’ can be regarded as a metaphorical shift. The physical property ‘beautiful’ is expressed by a native NENA word *šapıra*.

Some loanwords replace a specific area of the basic meaning of a NENA word. The word +*püza*, for example, which is derived from Kurd. *poz* or Pers. *pūz* ‘nose’, is used to refer to an animal snout, whereas the NENA word *naxira* is retained to refer to a human nose. The loanword +*püza* is also used metaphorically to refer to the ‘mouth of a bag’, the ‘spout of a vessel’, etc. Azer. *çarx* ‘wheel’

is borrowed into the dialect with the specific meaning of the ‘shaft (of a mill) to control movement of a propeller’ rather than the generic meaning of ‘wheel’, which is express by *+topa*, another Azeri loanword.

Likewise a loanword may be used with only one aspect of the meaning it has in the source language. The loanword *+čubbux*, for example, which has the sense of ‘tobacco pipe (with a long shank)’, is derived from Azer. *çubuq*, which, in Azeri, has a wider range of meaning, including ‘rod, cane, twig’ as well as ‘tobacco-pipe.’ The loanword *kənnop̪ka* means ‘press-stud’. This is derived from the Russian word *кнопка*, which means both ‘button’ and ‘press-stud’. In C. Urmi ‘button’ is expressed by the word *tarukta*.

### 15.1.2 Doublets

Occasionally doublets are found. The word *ocaq* now means ‘hearth’ in Azeri but in Ottoman Turkish it also had the meaning of ‘extended family, clan’ (i.e. people gathering around the same hearth; cf. Clauson (1972, 22–23)). The word is borrowed in C. Urmi with both these meanings but they are formally distinguished. When the word means ‘hearth’ it is adapted morphologically as *+ojaxta*, but it has the unadapted form *+ojax* when it has meaning of ‘clan’.

Another type of doublet involves two words that derive ultimately from the same Semitic root, one being a native NENA word and the other an Arabic word loaned through one of the non-Semitic languages of the region. An example of this is the pair *+nədra* I ‘item dedicated as an offering’ (native NENA) and *+nəzra* ‘dedication to the priesthood’ (Pers. *nazr* < Arab. *nadr* ‘vow’), as well as the associated verbs *+nadər* I ‘to dedicate’ and *+nazər* I ‘to vow, to dedicate to priesthood’.

Some doublets have developed within Aramaic. In some such cases a single word or verbal root has undergone a bifurcation in meaning and one of the two resultant doublets is phonologically distinguished from the other by means of suprasegmental emphasis (§ 1.5.1.), e.g.

<i>darə</i> I ‘to pour, to put’— <i>+darə</i> II ‘to winnow’	< * <i>d-r-y</i>
<i>šarə</i> I ‘to untie’— <i>+šarə</i> II ‘to begin’	< * <i>š-r-y</i>
<i>maran</i> ‘our master’— <i>+maran</i> ‘our Lord’	< * <i>māran</i>

Sometimes one of the pair of doublets is conservative of the original meaning whereas the other is innovative. The C. Urmi verb *raxəš* I ‘to creep, to crawl’, for example, corresponds in meaning to the cognate Syriac verb *rxaš*. There is a doublet of this root, however, that is used in some of the paradigms of the verb ‘to go’ (e.g. *bərraxxəla* ‘He is going’), in which the original meaning

has undergone a development whereby the feature signifying the mode of movement has been removed.

### 15.1.3 Semantic Developments of Native NENA Words

Various historical developments can be identified in the meaning of the native NENA words of the dialect from their meaning in earlier Aramaic. Many of these have parallels in other NENA dialects (Khan 2002, 510–515; Khan 2008, 1029–1035).

Native lexical items in the dialect sometimes exhibit a meaning that is more specific than that of their cognates in earlier Aramaic such as Syriac. In such cases, the basic meaning of the dialectal word is subsumed by the more general basic meaning of the Syriac word. This often arises since another lexical item is used in the dialect with a related meaning.

The word *'ərxa*, for example, denotes specifically a ‘water-mill’, whereas the cognate in Syriac *rahyā* refers to a ‘mill’ in general, including a hand-mill. The reason for the narrowing of the meaning range in the dialects is likely to be the existence of another lexical item that denotes specifically a ‘hand-mill’, viz. *jarusta*. The semantic range of the Syriac singular form *rahyā*, moreover, includes also the sense of ‘millstone’, which is a component of the mill, whereas the dialectal word *'ərxa* refers only to the mill as a whole. A ‘millstone’ in the dialect is referred to by the phrase *cipət 'ərxa*.

The cognate of Syriac *sa'rā* ‘hair’ (in general) is *+sara*, but this is restricted in sense to ‘horse’s hair’ (*+saret suysa*). Another word is used to refer to hair in general (of both humans and animals), viz. *+məsta*.

According to the Syriac dictionaries the nouns *'arbālā* and *meh̄holtā* (variant *mah̄holtā*) both mean ‘sieve’. The reflexes of these words in C. Urmi have a more specific meaning, in that they denote sieves with different sizes of hole, viz. *'orbala* ‘sieve with large holes (for wheat)’ and *məxxəltə* ‘sieve with small holes’.

The adjective *šammīnā* in Syriac has a range of meaning including the senses of ‘physically fat’ and ‘fertile’, e.g. *'ānā šammīnātā* ‘fat sheep’, *'ar'ā šammīnā* ‘fertile land’. In C. Urmi the word *šamina* is restricted to the more abstract sense of ‘fertile’, e.g. *+arrā šamənta* ‘fertile land’. The narrowing of the semantic range of the adjective in the dialect has arisen due to the existence of another adjective *+trisa*, which is used to express the sense of physically fat.

The verb *+xalləl QI* ‘to wash’ is more restricted in usage in the dialects than its Syriac cognate *hallel*. The dialectal verb is used to express the washing of individual parts of the body (such as hands, feet etc.) and various objects but not clothes. The Syriac verb, by contrast, is used to express also the washing of clothes. In the dialect another verb is used to express specifically the washing

of clothes, viz. *masə* I. To wash oneself by covering the body in water, in a bath or a shower, is expressed by another verb, viz. *xayəp* I.

Several words in C. Urmi that are restricted in their usage to activities relating to animals had a more general application in Syriac. The Syriac noun *meklā*, for example, had the general meaning of ‘food, provisions’, whereas the dialectal reflex of this <sup>+</sup>*məxla* is used to denote the ‘fodder of animals’, the general word for ‘food’ being <sup>+</sup>*mixulta*. The Syriac verb *y-l-d* ‘to give birth’ was used in relation to all living creatures, humans and animals, including the laying of eggs. The reflex of this in C. Urmi *yadla* I (3fs), however, is used only in relation to the birth of animals and the laying of eggs. The birth of humans is expressed by forms of the verb <sup>+</sup>*hasəl* II.

In other cases, by contrast, a dialect word has a meaning that is wider than that of the Syriac cognate and subsumes it. This has often arisen as a result of additions or losses in related areas of the lexicon.

The verb *drā* in Syriac has the sense of ‘to sprinkle, scatter’. The cognate verb in C. Urmi, *darə* I, has a wider range of meanings including ‘to pour’ and ‘to put’. It appears that the expression of the transference of location that was a semantic component of the Syriac verb became the dominant feature and the verb came to be used more generally without being associated with a specific manner of action. The specific actions of ‘scattering’ and ‘sprinkling’ are now expressed by other verbs, such as *bazək* II ‘to scatter (seeds)’ and <sup>+</sup>*maryəs* III ‘to sprinkle (water).’ The verb *sayəm* I, the cognate of which in Syriac is a general verb ‘to put’, has come to be restricted in C. Urmi to the sense of ‘to ordain (a priest)’ in pattern I (*pə’al*) and to the fixed collocation with the object *bala* ‘mind’ with the sense of ‘to pay attention’ in pattern III (*massəm bala*).

The basic meaning of the adjective *xriva* in C. Urmi includes both the sense of physically ‘damaged’ and also the general sense of ‘corrupt’ or ‘bad.’ The basic meaning of the cognate root in Syriac *h-r-b*, however, is restricted to the sense of ‘to be physically desolate, waste, dried up’.

In some cases the shift in meaning involves an extension of control by the subject of a verb, i.e. an increase in transitivity. The verb *d-b-q* in Syriac, for example, means ‘to stick to, to adhere’ whereas the derivative of this in C. Urmi *davək* I denotes the activity of ‘holding’ or ‘keeping’, which typically involves greater control over the object referent. This is reflected by the fact that the dialectal verb *davək* I ‘to hold, to keep’ takes a direct object, whereas the Syriac verb *d-b-q* ‘to adhere’ is connected to its complement by a preposition *b-* or *l-*. The verb *t-‘y* in Syriac has the sense of ‘to wander, to go astray’, whereas the reflex of this in C. Urmi <sup>+</sup>*tawwə* II normally has the more purposive sense of ‘to search for’, in which the subject has greater control over the action.

A further type of semantic change is where the basic meaning of the dialectal word does not directly subsume nor is subsumed by the basic Syriac meaning but rather is associated with some aspect of the contextual usage of the Syriac cognate. This is a broad category that includes various types of development, some examples of which are the following.

In C. Urmi the word *+umra* denotes ‘a church’. This is the reflex of Syriac *‘umrā*, which included the semantic range ‘life, way of life, monastic life, monastery’. The sense of ‘church’, i.e. a place of worship, is clearly associated with ‘monastic life’ and ‘monastery’. In the dialect, however, the word *‘umra* is no longer used in the sense of ‘monastery’, which is expressed rather by the noun *+dera*.

The adjective *+xlima* in C. Urmi means ‘(physically) thick’, whereas Syriac *ḥlīmā* denoted ‘sound, firm, strong’ in both a physical and spiritual sense. The feature of ‘thickness’, which is typically associated with an object that is physically robust, has become the basic meaning of the word.

The meaning of a word occasionally shifts to the extent that it denotes a completely distinct referent from the one denoted by the earlier Aramaic cognate, though in the same semantic field. This generally arises due to the use of another lexical item to express the meaning of the earlier Aramaic cognate. The word *dabburta* in C. Urmi, for example, means ‘hornet’, whereas its Syriac cognate *debburtā* normally has the sense of ‘bee’. A ‘bee’ is referred to in the dialect by the term *dabaša* (literally: ‘honey-maker’).

#### **15.1.4 Regional Differences in the Lexicon**

There are some differences in the lexicon of C. Urmi across its regional varieties. A few cases are found on the Urmi plain, e.g.

Urmi S	Urmi N
‘knife’ <i>čakku</i>	<i>scənta</i>

There are also a few differences in the lexicon of the villages of Armenia, e.g.

Urmi (S and N)	Gulasor (Arm.)	Arzni (Arm.)
‘father’ <i>baba</i>	<i>baba</i>	<i>çaccuna</i>

The greatest difference in the lexicon is found in the village of Canda in Georgia. The variety of C. Urmi spoken in Canda contains a number of lexical items that are not found in other varieties. Some examples include:

<i>pučeča</i>	'stalk of maize'
<i>+tara</i>	'head of maize'
<i>čančuyra</i>	'small plums'
<i>tambuyra</i>	'large plums'
<i>jaryarə</i>	'large apricots'
<i>+karəltə</i>	'storage pot'
<i>'aliza</i>	'mud brick'
<i>cadduda</i>	'hedgehog'

Some words that are found in all Urmi varieties have a different range of meanings in Canda, e.g.

	Urmi plain	Canda
'stomach of cow'	<i>pəssurta</i>	<i>pəssurta</i>
'stomach of a human'	<i>+stumca</i>	<i>pəssurta</i>

Semantic distinctions within the range of meanings of a single word are in a few cases given formal distinction in Canda by phonetic differences, e.g.

	Urmi plain	Canda
'girl'	<i>brata</i>	<i>brata</i>
'daughter'	<i>brata</i>	<i>brita</i>
'tomato'	<i>+badəmjan (smukta)</i>	<i>+badənjan</i>
'aubergine'	<i>+badəmjan (cumta)</i>	<i>+badərjan</i>

The first pair of words exploits the mixing in Canda of the two variant forms *brata*, which is the normal Urmi form, and *brita*, which is the form used in the Salamas group of dialects. In both Urmi and Salamas each has the range of meanings 'girl, daughter'. The distinction in the second pair appears to have developed under the impact of contact with Georgian, in which the word for aubergine is badrijani.

Some words in Canda have a different form from the cognate form in other varieties. The form in Canda often corresponds to the form used in the Salamas group of dialects, e.g.

Canda, Salamas	Urmi plain	
<i>caraz</i>	<i>caravuz</i>	'celery'
<i>penč</i>	<i>peč</i>	'screw; iron stove'
<i>sini</i>	<i>majma</i>	'tray'
<i>mešof</i>	<i>mecu</i>	'measuring bag'

## 15.2 Semantic Fields

In this chapter a selection of the lexical items of the spoken C. Urmi dialect are arranged according to semantic fields. A full glossary of the lexical items of the dialect that I have gathered in the course of my fieldwork follows the chapter. The glossary is followed by a series of sketches illustrating various artefacts and structures that were found in the villages. Some cases where the lexical items differ in the dialects of Gawilan and Salamas are indicated, in particular in the semantic fields of artefacts.

### 15.2.1 *The Human Body*

*+paǵra* n.m. (pl. *+paǵrə*) **body**

*rīša* n.m. (pl. *rīšə*, *rīšanə*) **head**

*+məsta* n.f. **hair (collective)**

*+məstita* n.f. **hair (individual item)**

*+masusa* n.m. **clump of hair; quiff**

*+susita* n.f. (pl. *+susiyyatə*) **plait**

*bulət cosa* n.m. (pl. *bulə*, *bulalət cosa*) **lock of hair**

*bəsca* n.m. (pl. *bəscə*) **cock of hair**

*bukla* n.m. (pl. *buklə*) **curly lock of hair**

*çərṭa* n.m. (pl. *çərṭə*) (Kurd. *kurt* 'short') **curl**

*pata* n.f. (pl. *patvatə*) **face**

*yalma* n.f. (pl. *yalmə*) **countenance, physiognomy**

*+kəssa* n.m. (pl. *+kəssə*) **forehead**

*+munta* n.f. (pl. *+muntatə*) **fontanelle, soft part of front of head**

*caculta* **front of head without hair**

*kam-nata* **temple (on head)**

*+’ayna* n.f. (pl. *+’aynə*, *+’aynatə*) **eye**

*bəbbəlta*, *bibəlta* n.f. (pl. *bəbbəlyatə*, *bibəlyatə*), *bəbbəltət/bibəltət* *+’ayna* **pupil**

*təlpa* n.m. (pl. *təlpəpə*) **eyelash**

*+xasət +’ayna* n.m. **eyelid**

*jniwa* n.m. (pl. *jniwə*) **eyebrow**

*naxira* n.m. (pl. *naxirə*) **nose**

*+bəzzət naxira* (pl. *+bəzzazət naxira*) n.m. **nostril**

*miyyət naxira* n.pl.tantum **nasal mucus, snot**

*nəzla* n.m. **pus, matter**

*pudə* n.pl.tantum **snot, snivel**

*+čəmčə* n.pl.tantum **pus, mucus (from nose, ears)**

*rərə* n.pl.tantum, *rukə* n.pl. **saliva**

*rukta* n.f. **spittle**

*xabuyšət pata* n.m. cheek bone

*nata* n.f. (pl. *natyata*) ear

<sup>+</sup>*sasa* n.m. (pl. <sup>+</sup>*sasanə*) cheek

*jaxucə* n.pl. (sing. *jaxucta*) dimples

*pumma* n.m. (pl. *pummanə*) mouth

*šamaf* n.m., *šamaxta*, *šamacta* n.f. palate

*səpta* n.f. (pl. *səppatə*, *səpvatə*) lip

*səmbuylalə*, *sumbuylalə* n.pl. (sing. *səmbulta*, *sumulta*) (Kurd. simbēl)

### moustache

*cica* n.m. (pl. *cicə*) tooth

*xota* n.f. (pl. *xoyata*) molar tooth

*naštar* n.m. (pl. *naštarə*) (Pers. ništar) canine tooth

*cicət hona* n.m. wisdom tooth

*šamaja* n.m. (pl. *šamajə*) gum

*kopasta* n.f. (pl. *kopasyatə*) cover; cap (on teeth)

*lišana* n.m. (pl. *lišanə*) tongue

*'anya* n.m. (pl. *'anyə*) jaw (of human and animal) | *'anyət* <sup>+</sup>*ullul* upper jaw;

*'anyət* <sup>+</sup>*əltəx* lower jaw

<sup>+</sup>*baluta* n.f. (pl. <sup>+</sup>*baluyatə*) throat

<sup>+</sup>*bəzzət* <sup>+</sup>*baluta* n.m. pharynx

<sup>+</sup>*xərxərrə* n.f. (pl. <sup>+</sup>*xərxərrə*) larynx, wind-pipe

*xabuyšət կdala* n.m. Adam's apple

*čanna* n.m. (pl. *čannə*), *čannita*, *čannəcta* n.f. chin

<sup>+</sup>*buxaxta* n.f. place under the chin, fat under chin, fleshy (double) chin

(also of pelican)

*dəkna* n.m. (pl. *dəknə*) beard

*čacmita* n.f. (pl. *čacmiyyatə*) sideburn, side whiskers

*կdala* n.m. (pl. *կdalə*) neck

<sup>+</sup>*bar-կdala* back of neck

<sup>+</sup>*ruyša* n.m. (pl. <sup>+</sup>*ruyšanə*) shoulder

<sup>+</sup>*rušta* n.f. shoulder blade

<sup>+</sup>*kursəltə*, <sup>+</sup>*kursulta* n.f. (pl. <sup>+</sup>*kursulyatə*, <sup>+</sup>*kursalyatə*) elbow

*'ida* n.f. (pl. *'idatə*) hand; arm

*laxta* n.f. (pl. *laxyatə*) palm (of the hand)

*laxpa* n.f. (pl. *laxpə*) palm of the hand

*javət 'ida* n.m. palm

*zulət 'ida* n.pl. lines of the hand

<sup>+</sup>*buğum* n.f. (pl. <sup>+</sup>*buğuymə*) (Azer. boğum) knuckle

*mušta* n.m. (pl. *muštə*) (Pers. mošt) fist

<sup>+</sup>*sişa* n.m. span of the hand

- bilacta* n.f. (pl. *bilacyatə*) (Azer. bilək) **wrist**
- lucma* n.m. (pl. *lucmə*) (Kurd. kulm) **fist**
- +*drana* n.m. (pl. +*dranana*) **arm**
- xut-xača* n.m. (pl. *xut-xačə*) **armpit**
- +*suþþa* n.f. (pl. +*suþþatə*) **finger**
- +*suþþa surta* n.f. **little finger**
- +*suþþatə aralləj* n.f. **middle finger**
- čəltəc* n.m. **little finger**
- maxziyyanta* n.f. **index finger**
- +*kučə* n.m. (pl. +*kučə*, +*kučačə*) **thumb, big toe**
- +*tupþurta* n.f. (pl. +*tupþuryatə*) **fingernail**
- +*sadra* n.m. (+*sadrə*) **breast, chest**
- cisa* n.f. (pl. *cisatə*) **belly (stomach + intestines)**
- +*stumca* n.f. (pl. +*stumcə*) **stomach**
- pəssurta, psurta* n.f. **stomach of an animal (Canda: also of a human)**
- şopət yala* n.m. **womb**
- dəpnə* n.f. (pl. *dəpnatə*) **side, flank**
- nica* n.f. (pl. *nicacə*) **thigh**
- +*ətma, uþma* n.f. (pl. +*ətmatə, uþmatə*) **thigh, lobe of buttocks**
- +*xasa* n.m. (pl. +*xasə*) **back**
- +*katrət xasa* **small of the back**
- jarmət tupra* n.m. **coccyx at bottom of spine**
- nəkkatta, nəkkattət xasa* n.f. **waist**
- camar* n.f. (pl. *camarə*) (Pers. kamar) **waist**
- šurta* n.f. (pl. *šuryatə*) **navel; umbilical cord**
- xana* n.m. (pl. *xanə*) **lap**
- +*maxusna* n.f. **groin**
- šurrə murra* n.pl. **sexual organs, private parts**
- 'əscita n.f. (pl. 'əscatə) **testicle**
- +*buyþa* n.m. **penis**
- +*buyþita* n.f. **small penis**
- 'era n.m. **penis, dick**
- +*kuyþa* n.m. **vulva**
- +*kuyþita* n.f. **small vulva**
- səbba* n.m. **hair of the crotch**
- 'əšta n.f. (pl. 'əštata) **bottom, buttocks, fundament**
- şərma n.f. (pl. şərma, şərmətə) **buttocks**
- +*tiza* n.m. (pl. +*tizə*) **anus, fundament**
- šaka* n.m. (pl. šakə) **shin, lower leg**
- luylət aklə* n.m. **shin**

*bərca* n.f. (pl. *bərcacə*) **knee**

*šəxxərtə* n.f. (pl. *šəxxəryatə*) **kneecap**

*'akla* n.f. (pl. *'aklə*) **leg; foot** | *patət 'akla* n.f. top of the foot; *məsrəktət 'akla* n.f. fan of bones at the top of the foot; *xut-'akla* n.m. bottom of the foot; *'əštət 'akla* n.f. heel of foot; *panjət 'akla* n.m./f. toes of the foot; *xabuyşət 'akla* n.m. ankle of the foot

<sup>+</sup>*payət 'akla* n.m. (Pers. pā 'leg') **calf muscle**

*'əštət 'akla* n.f. **heel**

*'əčca* n.f. (pl. *'əčcatə*) (Turk. ökçe) **heel; anklebone**

<sup>+</sup>*pəçuyra* n.m. (pl. <sup>+</sup>*pəçuyrə*) **ankle, ankle bone**

*šaķula* n.m. (pl. *šaķula*) **ankle bone**

*xərda* n.m. (pl. *xərdə*) **small protruding bone in foot or wrist**

<sup>+</sup>*kuṭra* n.m. (pl. <sup>+</sup>*kuṭra*) <sup>+</sup>*kuṭrət 'akla* **arch of the foot**

*jəlda* n.m. (pl. *jəldə*) **skin**

<sup>+</sup>*mača* n.m. (pl. <sup>+</sup>*mačə*) (Pers. māhiče) **muscle**

*tarba* n.m. **fat**

<sup>+</sup>*tata* n.f. **sweat**

<sup>+</sup>*kurməçča* n.m. (pl. <sup>+</sup>*kurməçčə*) **wrinkle**

*jarma* n.m. (pl. *jarmə*) **bone**

*muxət jarma* n.m. **marrow of bone**

*karkəpta* n.f. (pl. *karkəpyatə*) n.f. **skull** | *karkəptət rişa* crown of the head

*muxa* n.m. (pl. *muxə*) **brain**

<sup>+</sup>*varida* n.m. (pl. <sup>+</sup>*varidə*) **artery, vein**

*dəmma* n.m. **blood**

*ləbba* n.m. (pl. *ləbbə, ləbbavata*) **heart**

<sup>+</sup>*kaburğa* n.m. (pl. <sup>+</sup>*kaburğə*) (Azer. qabırğə) **rib**

<sup>+</sup>*jıyar cumta* n.f. **liver or simply cumta**

<sup>+</sup>*jıyar* <sup>+</sup>*xvarta* n.f. **lung**

<sup>+</sup>*rata* n.f. **lung**

<sup>+</sup>*mayə* <sup>+</sup>*jurə* n.pl. **large intestine**

<sup>+</sup>*mayə surə* n.pl. **small intestine**

*cəllita* n.f. (pl. *cəlliyatə*) **kidney**

*tagala* n.f. **spleen**

*prakta* n.f. (pl. *prakyatə*) **gland; tonsil**

<sup>+</sup>*mralta* n.f. **gallbladder**

<sup>+</sup>*jurə* n.pl. **tantum urine**

<sup>+</sup>*bra=jurta* n.f. (pl. <sup>+</sup>*bra=juryatə*) **bladder**

*'əxrə, +'axrə* n.pl. **tantum faeces, excrement**

### 15.2.2 *Illnesses*

<sup>+</sup>*marra* n.m. (pl. <sup>+</sup>*marrə*) **illness**

<sup>+</sup>*mar-riša* n.m. **headache**

<sup>+</sup>*čiban* n.f. (Azer. čiban) **boil; ulcer**

<sup>+</sup>*uxla* n.m. **rash (on skin)**

*jørva* n.f. **leprosy**

*parta* n.f. **dandruff**

*muxu* <sup>+</sup>*skətłə* He had a stroke

*šəxna* n.m. (pl. *šəxnə*) **tumour, carbuncle, boil; plague, pestilence**

<sup>+</sup>*amma* n.f. (Arab. ‘āmma) **epidemic typhus**

<sup>+</sup>*mata* n.f. (pl. <sup>+</sup>*mayatə*) **pimple, pustule, spot (on skin)**

*rpupłyja* n.f. **rash**

*puppacta* n.f. **rash (wet)**

*paruxta* n.f. **eczema on skin**

<sup>+</sup>*karuva* n.m. **sty (on eye)**

*šalķu* n.f. **pox**

*šalķuntat* *miyya* **small pox**

*šalķu smukta* **measles**

*šalķu* <sup>+</sup>*xvarta* **smallpox, chickenpox**

*šalķunta* n.f. **small rash of pox**

*šoba* n.m. **cough**

*šoba mila* **whooping cough**

<sup>+</sup>*marra* *šaxina* n.m. **typhoid**

*xamxamta* n.f. **fever**

*zyura* n.m. **swelling**

<sup>+</sup>*kabar* n.f. (pl. <sup>+</sup>*kabara*) (Azer. qabar) **blister**

<sup>+</sup>*səndan* n.m. **swelling in the glands**

*majju* n.f. (pl. *majjunyatə*) **swelling on skin**

*majjunta* n.f. (pl. *majjunyatə*) **small swelling on skin**

*čučumanta* n.f. (pl. *čučumanyatə*) **hard blister on skin**

<sup>+</sup>*šamma* n.f. (pl. <sup>+</sup>*šammata*) **mole on skin**

*parda* n.m. **cataract (lit. curtain)** (Azer. pərdə, Pers. parde) | *xa pardə*

*dvəktola* <sup>+</sup>*aynu* He had a cataract in his eye

*miyya cuməju-* <sup>+</sup>*aynu* n.pl. **ophthalmia (lit. black water in his eye)**

<sup>+</sup>*bavasər* n.m. (Arab. bawāsīr) **haemorrhoids**

*nvalta* n.f. **tuberculosis**

*čixotça* n.f. (Russ. чахотка) **tuberculosis**

### 15.2.3 *Kinship Terms*

*+jora* n.m. (pl. *+joravata*), *+t̪liba* n.m. (pl. *+t̪libə*) **husband**

*baxta* n.f. (pl. *baxtatə*) (Kurd. bext ‘honour’, ‘luck’) **wife**

*baba* n.m. (pl. *babavata*) (Kurd. bav) **father**

*çaçcuna* n.m. (Kurd. kek ‘elder brother’) **father** (Arzni)

*yamma* n.f. (pl. *yammata*) **mother**

*'avahatə* n.pl. **parents**

*'axuna* n.m. (pl. *'axunvata*) **brother**

*xata* n.f. (pl. *xatvata*) **sister**

*savuna* n.m. (pl. *savunvata*) **grandfather**

*nanunta* n.f. (pl. *nanunyata*) **grandmother**

*bruna* n.m. (pl. *bnunə*) **son, boy**

*brata* n.f. (pl. *bnatə*) **daughter, girl** (Sal. and Gaw. *brita*)

*brita* n.f. (pl. *bnatə*) **daughter** (esp. N and Canda, *brata* girl)

*buni* **my son (hypocoristic)**

*bati* **my daughter (hypocoristic)**

*buna, būna* n.m. **son (hypocoristic)**

*yala sura* n.m./f. (pl. *yalə surə*) **baby**

*yalə* n.pl. **children**

*jammə* n.pl., *jamməccə* n.pl. **twins**

*+buxra* n.m. **firstborn child**

*riš-ķenna* n.m. **firstborn child**

*xasra-ķenna* n.f. **last hatched in the nest, last born in a family**

*+mamuna* n.m. (pl. *+mamunvata*) (Kurd. mam) **paternal uncle**

*+amtə* n.f. (pl. *+amtavata*) (Arab. ‘amma) **paternal aunt**

*+xaluvva* n.m. (pl. *+xaluvvata*), vocative *+xalu* (Arab. kāl) **maternal uncle**

*xalta* n.f. (pl. *xaltavata*) (Arab. kāla) **maternal aunt**

*brunət +mamuna, brūn-+mamuna* n.m. (pl. *bnunət +mamuna*) **paternal**

**cousin (m.) (son of paternal uncle)**

*brunət-+amtə, brūn-+amtə* n.f. **paternal cousin (m.) (daughter of paternal aunt)**

*bratət +mamuna, brāt-+mamuna* n.f. (pl. *bnatət +mamuna*) **paternal cousin (f.) (daughter of paternal uncle)**

*bratət +amtə, brāt-+amtə*, n.f. **paternal cousin (f.) (daughter of paternal aunt)**

*brunət +xaluvva, brūn-+xaluvva* n.m. (pl. *bnunət +xaluvva*) **maternal cousin (m.) (son of maternal uncle)**

*bratət +xaluvva, brāt-+xaluvva* n.f. (pl. *bnatət +xaluvva*) **maternal cousin (f.) (daughter of maternal uncle)**

*brunət xalta, brūn-xalta* n.m. (pl. *bnunət xalta*) **maternal cousin (m.) (son of maternal aunt)**

*bratət xalta, brāt-xalta* n.f. (pl. *bnatət xalta*) maternal cousin (f.) (daughter of maternal aunt)

*xəmyana* n.m. (pl. *xəmyanə*) father-in-law

*xmata* n.f. (pl. *xmayata*) mother-in-law

*xətna* n.m. (pl. *xətnavata*) son-in-law

*calta* n.f. (pl. *calata*) daughter-in-law

*'idamta* n.f. (pl. *'idamyatə*) wife of the brother of husband

*'ədma* n.m. (pl. *'ədmavata*) brother of husband

*barəxmaya* n.m. (pl. *barəxmayə*) brother of wife

*barəxmeta* n.f. (pl. *barəxmayata*) sister of wife

*xətna* n.m. (pl. *xətnavata*) husband of sister

*+yaysa* n.m. (pl. *+yaysə*) husband of sister of wife

*bax-'axuna, calta* n.f. wife of brother

*bax-+mamuna, bax-+mamu* n.f. wife of paternal uncle

*bax-+xaluvva, bax-+xalu* n.f. wife of maternal uncle

*brunət 'axuna, brūn-'axuna* n.m. (pl. *bnunət 'axuna*) nephew (brother's son)

*bratət 'axuna, brāt-'axuna* n.f. (pl. *bnatət 'axuna*) niece (brother's daughter)

*xvarzaya, xvarza* n.m. (Kurd. *xwarzê*) nephew (sister's son)

*xvarzeta* n.f. (Kurd. *xwarzê*) niece (sister's daughter)

*yəmma 'uja/yəmma 'ujə, bax-baba* n.f. stepmother

*baba 'uja, +jorət yəmma* n.m. stepfather

*yala 'uja, yalət +jora, +doǵma* n.m. stepson

*brata 'uja/brata 'ujə, bratət +jora, +doǵma* n.f. stepdaughter

*xurja* n.m. (pl. *xurjə*) stepson, son of wife by another marriage, half-brother

*xurəfta* n.m. (pl. *xurəfyata*) stepdaughter, daughter of wife by another marriage, half-sister

*+'arta* n.f. (pl. *+artata*) rival wife

*cəlpət* n.f. (pl. *cəlpattə*) (Azer. *külfət*) nuclear family; wife

*betuyta* n.f. extended family

*+ojax* n.m. (pl. *+ojaxə*) (Azer. *oqaq*) extended family

*xəzmanə, xəz mavata* n.pl. (sing. *xəzma* n.m., *xəzmita* n.f.) (Kurd. *xizm*) blood relatives, members of extended family

*xəzmayuyta* n.f. family relationship

*+xnamiyə* n.pl. (sing. *+xnamı* n.m., *+xnamita*) (Kurd. *xinamî*) relatives by marriage

*yaluda* n.m. lad

*jvankə* n.m. (pl. *jvankə*) (Kurd. *ciwan*, Azer. *cavan*) young unmarried man

*xamta* n.f. (pl. *xamatə*) young woman of marriageable age

*navəffa* n.m. grandson

- navəʃta* n.f. granddaughter  
*navəʃʃə* n.pl. grandchildren  
*natija* n.m. (pl. *natijə*) (Arab. *natija*) great-grandson  
*natəʃta* n.f. (pl. *nataʃyatə*) great-granddaughter  
*nadida* n.m. (pl. *nadidə*) great-great-grandson  
*nadətta* n.f. (pl. *nadədyatə*) great-great-granddaughter  
*'armila* n.m. (pl. *'armilə*) widower  
*'arməlta* n.f. (pl. *'arməlyatə*) widow  
*yaççana* n.m. (pl. *yaççanə*) (Kurd. *yek*, Pers. *yak* 'one') only son  
*calu* n.f. (pl. *calunyata*) bride  
*xətna* n.m. (pl. *xətnavata*), *+tliba* n.m. (pl. *+tlibə*) groom  
*karıva* (N), *+karıva* (S) n.m. (pl. *karıvə*, *+karıvə*) best man (at wedding);  
 godfather (Sal., Gaw. *karıva*)  
*karuta* (N), *+karuta* (S), *+karita* (Dizatacyə S) n.f. bridesmaid; godmother  
*btuyla* n.m. (pl. *btuylə*) n.m. celibate bachelor  
*yatuyma* n.m. (pl. *yatuymə*) orphan

#### 15.2.4 Professions

- +accara* n.m. (pl. *+accarə*) farmer  
*+bukraya*, *+bukraci* n.m. keeper of cattle  
*'arbači* n.m. (pl. *'arbačiyə*) shepherd  
*'erxači* n.m. (pl. *'erxačiyə*) keeper of a watermill  
*darzi* n.m. (pl. *darziyə*) (Azer. *dərzi*) tailor  
*+xayyaṭa* n.m. tailor, sewer  
*+xayyaṭta* n.f. seamstress  
*čacmači* n.m. (pl. *čacmačiyə*) bootmaker  
*+raya* n.m. (pl. *+rayə*) shepherd  
*+čoban* n.m. (pl. *+čobanə*) (Azer. *çoban*, Pers. *čopān*) shepherd  
*+ašpaz* n.m. (pl. *+ašpazə*) (Pers. *āšpaz*) cook  
*jabbani* n.f. (pl. *jabbanyata*) cook (woman)  
*payana* n.m. (fs. *payanta*, pl. *payanə*) baker  
*laxmači* n.m. (pl. *laxmačiyə*) baker  
*čoracci* n.m. (pl. *čoracčiyə*) (Azer. *çörəkçi*) baker, bread-seller  
*+banna* n.m. (pl. *+bannə*) (Pers. *bannū* < Arab.) builder  
*+najjar* n.m. (pl. *+najjarə*) (Pers. *najjār* < Arab.) carpenter  
*+naqqāš* n.m. (pl. *+naqqāšə*) (Pers. *naqqāš*) painter, decorator  
*naqaşcar* n.m. (Pers. *naqaşgar*) painter, dyer  
*dallac* n.m. (pl. *dallacə*) (Azer. *dəllək*) barber  
*+farranət dəkna* n.m. (pl. *farranət dəkna*) barber  
*+tajər* n.m. (pl. *+tajirə*) (Pers. *tājer* < Arab.) merchant

- <sup>+</sup>*bazərjan* n.m. (pl. <sup>+</sup>*bazərjanə*) (Pers. bāzārgān) **merchant, petty tradesman**  
*dəccanči, duccanči* n.m. (pl. *dəccančiyə, duccančiyə*) **shopkeeper**  
*taybərrana* n.m. (fs. *taybərranta*, pl. *taybərranə*) **manager, administrator, supervisor**
- sarparaz* n.m. (pl. *sarparazə*) (Pers. sar-parast) **governor, guardian, protector**  
*rīja* n.m. (pl. *rījavatə*) (Pers. rekā) **servant, housekeeper**
- <sup>+</sup>*xulama* n.m. (pl. <sup>+</sup>*xulamə*) (Kurd. xulam < Arab.) **servant, man-servant**
- <sup>+</sup>*karavaš* n.f. (pl. <sup>+</sup>*karavašə*) (Azer. qarabaş) **female servant, handmaid**
- xəlmatcar* n.m./f. (pl. *xəlmatcarə*) (Kurd. xilmətkar) **servant, attendant, employee; minister**
- <sup>+</sup>*kulluxči* n.m. (pl. <sup>+</sup>*kullxčiyə*) (Azer. qulluqçu) **employee, servant**  
*naşət 'aqla* n.pl. **servants**
- jamiči* n.m. (pl. *jamičiyə*) (Azer. gəmi) **boatman**  
*loťçači* n.m. (pl. *loťçačiyə*) (Russ. лодка) **boatman**
- <sup>+</sup>*torči* n.m. (pl. <sup>+</sup>*torčiyə*) (Azer. tor) **fisherman**
- <sup>+</sup>*hammamči* n.m. (pl. <sup>+</sup>*hammamčiyə*) (Azer. hamam, Pers. hammām < Arab.)  
**bath-attendant**
- damurči* n.m. (pl. *damurčiyə*) (Azer. dəmirçi) **blacksmith, locksmith**
- <sup>+</sup>*dussajči* n.m. (pl. <sup>+</sup>*dussağčiyə*) (Azer. dustaq ‘prisoner’) **jailer**
- 'elči* n.m. (pl. *'elčiyə*) (Azer. elçi) **matchmaker, ambassador, consul**
- <sup>+</sup>*kapuči* n.m. (pl. <sup>+</sup>*kapučiyə*) (Azer. qapıcı) **door-keeper, porter**
- <sup>+</sup>*karavul* n.m. (pl. <sup>+</sup>*karavuylə*) (Azer. qarovul) **guard**
- <sup>+</sup>*assasi* n.m. (Arab. 'asāsī) **police, night guard**
- comurči* n.m. (pl. *comurčiyə*) (Azer. kömür) **coal miner, collier**
- masalači* n.m. (pl. *masalačiyə*) **story-teller**
- <sup>+</sup>*muzkanči* n.m. (pl. <sup>+</sup>*muzkančiyə*) **a musician, a bandsman**
- mešači* n.m. (pl. *mešačiyə*) **forester**
- tanapči* n.m. (pl. *tanapčiyə*) (Pers. tanāb) **land surveyor**
- <sup>+</sup>*sabunči* n.m. (pl. <sup>+</sup>*sabunčiyə*) **soap-maker**
- <sup>+</sup>*ruznamači* n.m. (pl. <sup>+</sup>*ruznamačiyə*) (Pers. roznāme) **newspaper-seller**
- xaznači* n.m. (pl. *xaznačiyə*) **treasurer**
- comacči* n.m. (pl. *comacčiyə*) (Azer. kömək, Pers. komak) **assistant, employee**
- pudradči* n.m. (pl. *pudradčiyə*) (Russ. подряд) **contractor**

### 15.2.5 Solid Containers

- <sup>+</sup>*kavva* n.m. (pl. <sup>+</sup>*kavvə*) (Azer. kubok, Pers. kūb) **mug (made of metal or pot)**
- kuruška* n.m. (pl. *kuruškə*) (Russ. кружка) **mug (made of metal or pot)**
- <sup>+</sup>*əstican* n.m. (pl. <sup>+</sup>*əsticanə*) (Pers. istakān, Azer. stəkan) **drinking cup of various shapes (see illustration 1)** (Sal. *pyala*)

*casa* n.m. (pl. *casə*) goblet (for wine) made of copper, gold or glass (see illustration 6)

+*badya* n.f. (pl. +*badyə*) (Pers. bādiya, < Arab.) bowl (see illustration 2) (Sal. and Gav. *badya*)

*kučka* n.m. (pl. *kučkə*) tall pot, intermediate in size between a +*lina* and a *kadala*, used for cheese (see illustration 3)

*kučkta* n.f. (pl. *kučktyatə*) small tall pot (see illustration 4) (Sal. +*zavərta*)

+*čollita* n.f. (pl. +*čəlliyyatə*) small pot (placed in the oven with rods [šišə]) (see illustration 5) (Gaw. *čəlla*, Sal. *jarra*, *jarrəcta*)

+*karəlta* n.f. (pl. +*karəlyay*) storage pot (Canda)

*mənya* n.m. (pl. *mənyə*) pot used for buried cheese (see illustration 7) (Sal., Gav. *jarra*, *jarrəcta*)

*talma* n.m. (pl. *talma*) pot for water with narrow mouth (approx 2 feet in height) (see illustration 8)

*taləmta* n.f. small *talma* pot (see illustration 9) (Sal. +*zavərta*)

+*lina* n.m. (pl. +*linə*) large tall pot (4–6 feet high), lifted with rope tied to its top, used for storing wine (see illustration 10)

+*lənta* n.f. (pl. +*lənyatə*) small earthenware pot (see illustration 11)

*kadala* n.m. (pl. *kadalə*) clay pot (approx. 1.5 feet high) with four handles, wider than *kučka* and +*lina*, used for storing oil (*məšxa*), *kalya* and pickles (+*tursiyya*) (see illustration 12) (Sal. *jarra*)

*kadalta* n.f. (pl. *kadalyatə*) small pot (see illustration 12) (Sal. *jarrəcta*)

*jardəlta* n.f. (pl. *jardəlyatə*) pot for storing wine (approx. 3 feet high), wider than *kučka* and +*lina* (see illustration 14)

+*masarta* n.f. (pl. +*masaryatə*) wine-vat

+*moda* n.m. (pl. +*modə*) large basin or platter; milk-pan (see illustration 15)

+*tabaxta* n.f. (pl. +*tabaxyatə*) basin (with sloping sides, used for holding water or dough)

+*tagar* n.m. (pl. +*tagarə*) (Pers. tagār) large clay container (see illustration 16)

*mzida* n.f. (pl. *mzidə*) leather bag, leather churn; waterskin (made of sheepskin) (see illustration 19)

*cərtvart* n.m. (pl. *cərtvartə*) large bottle

*cubba* n.m. (pl. *cubbə*) clay pot (filled with cheese and buried upside-down) (see illustration 20)

*kuti* n.f. (pl. *kutiyə*) (Pers. qūtī, Azer. qutu) box (Sal. *səndukta*)

*meju* n.f. (pl. *mejuryatə*) bowl used for kneading (see illustration 21) | used especially for crushing dried yoghurt cakes (*kaškə*) (Sal., Gav. *jəpnə*, *jerəcta*)

- cvara* n.m./f. (pl. *cvarə*, *cvaratə*) **large wooden box for storage of wheat**  
 +*kulina* n.f. (pl. +*kulinə*) **wooden box for storing flour (see illustration 22)**  
 (Sal. +*yučalta*)
- jəpnə* n.f. (pl. *jəpnə*) (Arab. *jafna*) **kneading trough; wooden box hung from ceiling to store bread**
- taxta* n.f. (pl. *taxtə*) (Azer./Persian *taxt*) **wooden bed, couch; wooden basin for cultivation (see illustration 53)**
- +*karavat* n.f. (pl. +*karavattə*) (Ottoman Turk. *kerevet*) **bed**
- taxta* n.f. (pl. *taxyatə*) (Azer. *taxta*) **wooden board**
- kappas* n.f. (pl. *kappazə*) (Azer. *qəfəs*, Pers. *qafas*, Kurd. *qefes*) **cage**
- +*meta* n.f. (pl. +*mayatə*, +*meyatə*) **pot used for churning yoghurt**
- cursi* n.m. (pl. *cursiyyə*) **frame of churn (illustration 18)** (Gaw. *sarja*)
- +*tarvada* n.m. (pl. +*tarvadə*) **big cup, ladle (Sal., Gaw. *baxušta*)**
- tunji* n.m. (pl. *tunjıyyə*, *tunja* (pl. *tunjə*) (Sal. *tunja*, Iranian Azer. *tunj*) **pitcher, jug (see illustration 42)**
- davri* n.m. (pl. *davriyyə*) (Kurd. *dewrî* f.) **plate**
- +*baškab* n.m. (pl. +*baškaba*) (Azer. *boşqab*, Pers. *bošqāb*) **saucer**
- +*čaydan* n.f. (pl. +*čaydana*) (Kurd. *çaydan* f., Azer. *çaydan*) **tea kettle (made of metal)**
- +*čaypaz* n.f. (pl. +*čaypazə*) **teapot**
- +*tasa* n.f. (pl. +*tasə*) (Pers. *tās*) **bowl (see illustration 43)**
- majma* n.m. (pl. *majmə*) (Azer. *məcməyi* < Arab.) **tray (see illustration 23)**
- sini* n.f. **tray (Canda, Salamas)**
- xōn* n.m. (pl. *xonə*) (Pers. *xān*) **tray (for carrying food, especially bread) (see illustration 24)**
- marəfla* n.m. (pl. *marəflə*) **large metal saucepan (see illustration 25)** (Sal. +*kučču*)
- marjəlta* n.f. (pl. *marjəlyatə*) **small metal saucepan (see illustration 26)** (Sal. +*kučču*)
- +*tiyan* n.m. (pl. +*tiyanə*) (Pers. *tiyān*) **large cauldron**
- +*simavar* n.f. (pl. +*simavarə*) (Azer. *simavar*, Pers. *simāvar*) **samovar**
- dola* n.m. (pl. *dolsə*) **wooden bucket (for a well)**
- vadra* n.m. (pl. *vadra*) (Russ. *ведро*) **metal bucket**
- jadušta* n.f. (pl. *jadušyatə*) **small bucket (half the size of a vadra), milking pale**
- sayna* n.f. (pl. *saynə*) **metal bath tub**
- pixarə* n.pl. (sing. *pixarta*) **broken pots/jars (used, e.g., for animals to drink from)**
- tašta* n.f. (pl. *taštə*) (Pers. *tašt*) **iron vessel for washing clothes (Sal. *taštən*)**
- +*kuşarta* n.f. **cooking pot (see illustration 27)** (Sal. +*kučču*)

- <sup>+</sup>*kazanča* n.f. (pl. <sup>+</sup>*kazančə*) (Azer. qazan) **copper saucepan, copper kettle**  
 (see illustration 28)
- <sup>+</sup>*tava* n.m. (pl. <sup>+</sup>*tavə*) **frying pan**

#### 15.2.6 *Baskets and Bags*

- <sup>+</sup>*torba* n.f. (pl. <sup>+</sup>*torbatə*) (Azer. torba) **bag**
- <sup>+</sup>*kərtala* n.f. (pl. <sup>+</sup>*kərtalə*) (Kurd. kurtan) **pannier basket carried on the back**  
 (see illustration 29) (Gaw. *sakur*)
- <sup>+</sup>*kərtalta* n.f. (pl. <sup>+</sup>*kərtalyatə*) **small pannier bag (see illustration 30)** (Gaw.  
<sup>+</sup>*kərtala*)
- <sup>+</sup>*sakur* n.m. (pl. <sup>+</sup>*sakuyrə*) **large basket put on back of people (see illustration 31)**
- carta* n.f. (pl. *caratə*) **long load put horizontally on back (see illustration 32)**
- <sup>+</sup>*sapyana* n.m. (pl. <sup>+</sup>*sapyanə*), <sup>+</sup>*maspyəppana* n.m. (pl. <sup>+</sup>*maspyəppanə*)  
**strainer for liquid (made out of basketwork)**
- <sup>+</sup>*janta* n.f. (pl. <sup>+</sup>*janyatə*) (Azer. çanta, Pers. čante) **bag (with handles) (see illustration 33)**
- bukša* n.m. (pl. *bukšə*) (Pers. buqša, Azer. boğça) **knapsack (consisting of stick and bundle)** (Sal., Gaw *buxča*)
- <sup>+</sup>*xurjun* n.f. (pl. <sup>+</sup>*xurjuynə*) (Azer. xurcun, Pers. xurjin) **saddle-bag; haversack (see illustration 34)**
- mecu* n.f., *mešof* (Canda, Sal.) (pl. *mešoʃə*) **measuring bag (see illustration 35)**  
 | *tre mecu* <sup>+</sup>*rəzza* two *mecu* bags of rice
- jvala* n.f. (pl. *jvalə*) (Azer. cuval) **sack**
- xaša* n.f. (pl. *xašə*) **large sack**
- taləs* n.f. (pl. *talisə*) (Kurd. telîs) **sack**
- taləsta* n.f. (pl. *taləsyatə*) **small sack**
- zambul* n.m. (pl. *zambuylə*) (Kurd. zembîl) **metal basket with holes and a wooden handle (used to blanch grapes to make *savzə*) (see illustration 36)**
- mucabba* n.m. (pl. *mucabba*) (Pers. moka”ab) **large overturned basket for storing cheese and yoghurt (see illustration 37)**
- sala* n.m. (pl. *sala*) **basket (see illustration 38)** (Sal. *salla*)
- salta* n.f. (pl. *salyatə*) **small basket (with a handle) (see illustration 39)** (Sal. *salləcta*)
- kuypa* n.m. (pl. *kuypə*) **long woven basket with thick sides, without handle on top (see illustration 40)**
- kalta* n.f. (pl. *kalata*) **shallow basket (for serving cheese, fruit etc.); basket with handle, lady’s handbag (see illustration 41)**
- cəsta* n.f. (pl. *cəsyatə*) **small bag, purse**

*cəstət* +*kattəj* n.f. bag for curds

+*kəptərja*, +*kapturja* n.f. (Middle Mongol *qabturga*) purse, leather pouch

#### 15.2.7 *Parts of Containers*

*cəssaya* n.m. (pl. *cəssayə*) lid (Sal. *csa*)

*cəsseta* n.f. (pl. *cəssayata*) small lid (Sal. *csayya*)

*'ida* n.f. (pl. *'idatə*) handle

*katta* n.f. (pl. *kattatə*) handle

*bambuyla*, *bumbuyla* n.m. (pl. *bambuylə*, *bumbuylə*) spout (Sal. *luğla*)

+*puza* n.m. (pl. +*puzə*) (Kurd. *poz*, Pers. *pūz*) spout | +*puzət* +*čaypaz* spout of a teapot

+*kramta* n.f. (pl. +*kramyata*) stopper for churn pot (+*meta*) made of the skin of an animal's belly

*carpičə* n.pl. stopper put in neck of *linə* sealed with mud so that gas does not escape

#### 15.2.8 *Tools*

+*napusa* n.m. (pl. +*napusə*) tool for beating wool consisting of two prongs and a handle (see illustration 45) (Sal. *yuxa*)

*burğı* n.m. (pl. *burğı*) (Azer. *burğu*) drill, auger (Sal. +*bazuvva*)

+*makkar*, +*mankar* n.m. (Pers. *manqār* < Arab.) chisel, gouge (Gaw. *niķara*, *niķarta*)

*randa* n.f. (pl. *randə*) (Azer. *rəndə*) plane (for smoothing wood) (Sal. *bardana*)

+*xasina* n.f. (pl. +*xasinə*) (Arab. *xaşīn*) axe (see illustration 46)

*xašula* n.m. (pl. *xašulə*) pounder, stone for pounding, pestle

*xaşulta* n.f. (pl. *xaşulyatə*) concave base used for grinding with the *xaşulta*, mortar

*makkas* n.m. (pl. *makkasə*), *makkasta* n.f. (Azer, *maqqas* < Arab.) shears; scissors; snuffers

+*makrəttana* n.m. (pl. +*makrəttanə*) clippers, snippers | +*makrəttanət* +*tupphuryatə* nail clippers

*casxana* n.m. (pl. *casxanə*) pruning scissors (for vine)

+*mayreta* n.f. (pl. *majrayatə*) shaving knife (Sal. *məfrayya*)

*calbatun* n.m. (pl. *calbatuynə*) (Azer. *kəlbətin*) pincers, pliers, forceps (Sal. *calbattən*)

*kiči*, *keči* n.m. (pl. *kičiyə*, *kečiyə*) (Pers. *qēčī*, Azer. *qayçı*) scissors (Sal., Gaw. *makkas*)

+*maša* n.m. (pl. +*mašə*) (Azer. *maşa*) tongs, pincers

*çołça* n.f. (pl. *çołçə*, *çołçatə*) (Russ. *щетка*) paintbrush

- <sup>+</sup>*mira* ~ <sup>+</sup>*mera* n.m. (pl. <sup>+</sup>*mira*) **spade** (Sal., Gaw. <sup>+</sup>*mera*)  
*belča* n.f. (pl. *belča*) (Azer. bel) **small spade** (Gaw. *balča*)  
<sup>+</sup>*səndan* n.m. (pl. <sup>+</sup>*səndanə*) (Pers. *sendān*) **anvil; metal instrument for sharpening tools**
- jarusta* n.f. (pl. *jarusyatə*) **handmill**
- jarupa* n.m. (pl. *jarupə*) **tool for digging paddy fields** | consisting of a spade with a blade set at an angle connected to a rope, operated by two men, one holding the spade and the other pulling the rope (Gaw. <sup>+</sup>*jaruča*)
- manjər* n.m. (pl. *manjirə*) (Pers. *minjar*) **large fork-like instrument for breaking up the soil pulled by oxen; harrow, rake**
- <sup>+</sup>*rušta* n.f. (pl. <sup>+</sup>*rušyatə*) **shovel**
- <sup>+</sup>*mandərrunta* n.f. (pl. <sup>+</sup>*mandərrunyatə*), <sup>+</sup>*mandərranta* (pl. <sup>+</sup>*mandərranyatə*) n.f. **roller**
- <sup>+</sup>*taptəppana* n.m. (pl. <sup>+</sup>*taptəppanə*) **implement for compressing ground**  
*šapna* n.f. (pl. *šapnə*) **wooden harrow dragged on ploughed field to break up the lumps of soil** (see illustration 51); **file** (Sal. *šepranta*)
- cartəx* n.m. (pl. *cartiğə*) **file; tool for digging up weeds**
- <sup>+</sup>*carduvar* n.m. (pl. <sup>+</sup>*carduvarə*) (Pers. *kārduvār*) **digging instrument consisting of a spade held by one man and connected to a chain or rope, which is pulled by another man**
- <sup>+</sup>*karusa* n.m. (pl. <sup>+</sup>*karusə*) **broom made of twigs** | used for sweeping out stables
- zulta* n.f. (pl. *zulyatə*) **long stick for shaking walnut trees to bring down the walnuts**
- <sup>’</sup>*uti* n.f. (pl. <sup>’</sup>*utiyə*) (Azer. ütü, Pers. ūtū, Russ. утюг), **iron (for pressing clothes)** | <sup>+</sup>*sudri mxila* <sup>’</sup>*uti!* Iron my shirt!
- <sup>+</sup>*kasla* n.m. (pl. <sup>+</sup>*kaslə*), *zila* n.m. (pl. *zilə*), *ney* n.f. **straw (for drinking)**
- čamča* n.m. (pl. *čamčə*) (Kurd. çemçik f., Pers. čamče ‘ladle’) **spoon**
- malanj* n.m. (Canda n.f., pl. *malanjə*) (Azer. mala, Pers. māle) **instrument used to smooth plaster**
- cartaj* n.f. (pl. *cartajə*) **small instrument for applying plaster** (Canda)
- čanyal* n.m. (pl. *čanyalə*) (Kurd. çengal f., Azer, çəngəl, Pers. čangāl) **fork**
- <sup>+</sup>*šapra* n.m. (pl. <sup>+</sup>*šaprə*) **knife (for eating)**
- scina* n.m. (pl. *scinə*), *scənta* n.f. (pl. *scənyatə*) **small (folding) knife (carried around)**
- šləpta* n.f. (pl. *šləpyatə*) **blade**
- katta* n.f. (pl. *kattatə*) **handle (of a tool)**
- sepa* n.m. (pl. *sepə*) **sword**
- xəlta* n.f. (pl. *xəlyatə*) **sheath, scabbard**
- şəpsa* n.m. (pl. *şəpsə*) **small pliers (for breaking sugar)**

- <sup>+</sup>*ramuvva* n.m. (pl. <sup>+</sup>*ramuvvə*) **funnel, syringe**
- šiš* n.m. (pl. *šišə*) (Azer. *şış*) **skewer; rod with hook for taking items out of an oven (see illustration 5)**
- mazrak* n.f. (pl. *mazrakə*) (Pers. *mazrāq* ‘javelin’ < Arab.) **cushion on a stick used to place items in an oven and extract them**
- baduvva* n.m. (pl. *baduvvə*) **wooden poker for stirring fire**
- <sup>+</sup>*maxusa* n.m. (pl. <sup>+</sup>*maxusə*) **poker (Gaw. *bəstən*)**
- <sup>+</sup>*maxusta* n.f. (pl. <sup>+</sup>*maxusyatə*) **small poker, instrument with long handle with small pan on the end of it for extracting burning coals from a fire**
- caraxa* n.m. (pl. *caraxə*) **instrument for raking coal and extracting coal (Sal., Gaw. *caraxan*)**
- bəsti* n.m. (pl. *bəstiyyə*) (Pers. *bast* ‘fastening’) **metal rod put over oven to support pans (Sal. *bəstin*)**
- caraxa* n.m. (pl. *caraxə*) **large <sup>+</sup>*maxusta* (instrument for extracting coals from fire)**
- <sup>+</sup>*xmaṭa* n.f. (pl. <sup>+</sup>*xmaṭə*) **needle**
- 'urədxa* n.f. (pl. *'urədxə*) **large metal needle (Sal., Gaw. *'rudxa*)**
- <sup>+</sup>*bəzzət* <sup>+</sup>*xmaṭa* **eye of a needle**
- canušta* n.f. (pl. *canušyatə*) **broom, brush**
- <sup>+</sup>*karusa* n.m. (pl. <sup>+</sup>*karusə*) **broom consisting of coarse sticks, used to sweep animal shed (*paja*), rake**
- məlxava* n.m. (pl. *məlxavə*) **pitchfork used for winnowing, made of wood or metal (Sal. *məlxava*, *duvadar*, *dakra*)**
- <sup>+</sup>*mampər* n.m. (pl. <sup>+</sup>*mampirə*) **large fork used for harvest**
- <sup>+</sup>*rušta* n.f. (pl. <sup>+</sup>*rušyatə*) **wooden spade (used to sweep snow from roof and dirt of animals in shed)**
- buspur* n.m. (pl. *buspuyrə*) **wooden prop in animal shed to hold a pannier basket (+*kərtala*) when it is being filled with dung**
- cuyša* n.m. (pl. *cuyšə*) **spindle (see illustration 44) (Sal. *cugša*)**
- <sup>+</sup>*kaṭva* n.m. (pl. <sup>+</sup>*kaṭvə*) **knitting needle**
- <sup>+</sup>*narra* n.m. (pl. <sup>+</sup>*narrə*) **large axe (see illustration 47)**
- <sup>+</sup>*xasina* n.f. (pl. <sup>+</sup>*xasino*) (Arab. *xaṣīn*) **axe (see illustration 46)**
- <sup>+</sup>*balta* n.f. (pl. <sup>+</sup>*balyatə*) (Azer. *balta*) **axe; chopper**
- <sup>+</sup>*kazma* n.m. (pl. <sup>+</sup>*kazmə*) (Azer. *qazma*) **pickaxe**
- <sup>+</sup>*najəxta* n.f. (pl. <sup>+</sup>*najəxyatə*) **chopper, small axe**
- čacuč* n.m. (pl. *čacuja*), *čacuš* n.m. (pl. *čacužə*) (Kurd. *çakûç*, Azer. *çəkic*, Pers. *čakoš*) **hammer (+Mawana *čacücta*)**
- <sup>+</sup>*toxmaķ* n.m. (pl. <sup>+</sup>*toxmaķə*) (Azer. *toxmaq*) **wooden mallet**
- <sup>+</sup>*čommax*, <sup>+</sup>*čommaxta* n.f. (Azer. *çomaq*, Pers. *čomaq*) **cudgel**

- <sup>+</sup>*mala* n.m. (pl. <sup>+</sup>*malo*) large wooden flat instrument for smoothing mud on roof
- laþatka* n.f. (pl. *laþatkə*) (Russ. лопатка) small spade, small shovel
- cardus* n.f. (pl. *cardusyatə*) trowel
- xapranta* n.f. (pl. *xapranyatə*) trowel
- mankaš*, *makkaš* n.m. (pl. *mankašə*, *makkašə*) instrument (for kindling fire)
- mayla* n.m. (pl. *maylə*) sickle
- majəsta* n.f. (pl. *majəsyatə*) small sickle; reaping-hook
- jalandi* n.m. (pl. *jalandiyə*) (Kurd. kēlindî, Azer. kərənti) scythe (Sal., Gaw. <sup>+</sup>*tərpan*)
- turpun* n.f. scythe
- nisarta* n.f. (pl. *nisaryatə*) saw with single handle (see illustration 48)
- sesa* n.f. (pl. *sesə*) buck saw with an upper handle (see illustration 49)
- <sup>+</sup>*məššar* n.m. (pl. <sup>+</sup>*məššarə*) large saw with two handles (see illustration 50)
- xərxı* n.f. (pl. *xərxıyyə*) small saw with two handles
- casuxta* n.f. (pl. *casuxyatə*) small trimming tool for orchards (Sal. *casxanta*)
- məšna* n.f. (pl. *məšna*) whetstone for sharpening tools
- kalyun* n.f. (pl. *kalyuynə*) (Pers. qalyūn, Azer. qəlyan), bubbly bubbly pipe
- bazəcca* n.m. (pl. *bazəccə*) pipe-stem, tobacco pipe
- <sup>+</sup>*cubbux* n.f. tobacco pipe
- <sup>+</sup>*čarpanta* n.f. tool used to whack or swat
- čərçərra* n.f. (pl. *čərçərrə*) rattle that is sounded in an orchard to scare away birds
- <sup>+</sup>*xatura* n.m. (pl. <sup>+</sup>*xaturlə*) beater (for linen washing, for carpet)
- <sup>+</sup>*koþala* n.f. (pl. <sup>+</sup>*koþalə*) (Kurd. koþal) walking-stick
- <sup>+</sup>*koþalta* n.f. short walking-stick
- <sup>+</sup>*čap̄palta* n.f. short walking-stick; drumstick
- <sup>+</sup>*bazərخan* n.f. (pl. <sup>+</sup>*bazərخanə*) walking frame

### 15.2.9 Vehicles and Machines

- cərša* n.f. (pl. *cəršə*) (Azer. kirşə) sledge (pulled by horses)
- jardun* n.f. (pl. *jarduynə*) (Pers. gardūn) wide open cart without sides, trailer (used in the harvest)
- <sup>+</sup>*arabana* n.f. (pl. <sup>+</sup>*arabanə*) (Azer. araba < Arab.) wagon (with sides)
- jaruma* n.m. (pl. *jarumə*) axle
- janjar, jarjar* n.f. (pl. *janjarə, jarjarə*) threshing machine pulled by oxen (Sal. *jarjar*)
- manjana* n.f. (pl. *manjənə*) wooden press for extracting juice

### 15.2.10 *Fire and Heating*

*nuyra* n.m. fire

*tapə* I (vn. *tpeta*) to be kindled | *nuyra tpilə* The fire is kindled

*tapə* II (vn. *tapeta*) to kindle (tr.)

+*šarə* I (vn. +*šyarta*) to stoke (fire)

*zabək* I (vn. *zbakta*) to arrange wood and fuel (e.g. +*paťuxə*) to make fire

(before lighting it) | *tanuyra zbułłə!* Arrange the fire

*baduvva* n.m. (pl. *baduvvə*) wooden poker

+*maša* n.m. (pl. +*mašə*) (Azer. maşa) tongs (Sal. *maša*)

+*šiš* n.m. (pl. *šišə*) metal poker (see illustration 5)

*yuyla* n.m. grass with long roots used to kindle a fire (Sal, Gaw. *yuğla*)

*mankaš*, *makkas* n.m. (pl. *mankašə*, *makkasə*) instrument for kindling fire

(Gaw. *čačmač*)

+*cakmač* n.m. flint (for kindling fire)

+*lahə* n.m. (pl. +*lahə*) flame

+*balbačə* pl. (sing. +*balbača* n.m.) small flames

*jumrə* n.pl. glowing coals

*jummurta* n.f. glowing coals; core of fire

*zənda* n.m. (pl. *zəndə*) spark

*buxari* n.m. (pl. *buxariyyə*) stove (Sal. *peč*)

*mankal* n.f. (pl. *mankala*) (Pers. manqal < Arab.) grill, brazier

+*truba* n.m. (pl. +*trubə*) (Russ. *труба*), *funja* n.m. (pl. *funjə*) chimney pipe of stove

*kursalta* n.f. elbow of chimney pipe of stove

*coz* n.f. (Azer. *köz*) burning wood, embers

*bəsti* n.m. (pl. *bətiyyə*) (Pers. bast ‘fastening’) metal rod put over oven to

support pans

+*maxusta* n.f. (pl. +*maxusyatə*) instrument with long handle with small pan

on the end of it for extracting burning coals from a fire

*caraxa* n.m. (pl. *caraxə*) large +*maxusta* (instrument for extracting coals from fire)

*camra* n.pl. (sing. *camra* m.) dried animal dung used as fuel for fire,

compressed by stamping down in an area known as *sulta*

*ptəlta* n.f. (pl. *ptəlyatə*) wick

*punda* n.m. (pl. *pundə*) candle

+*šamma* n.f. wax

+*pənnar* n.m. (pl. +*pənnarə*) lamp with handle

+*šraya*, +*šra* n.f. (pl. +*šrayatə*) lamp | +*šrayət* +*nuyta* oil-lamp; +*šrayət* *pułpu* small lamp

**15.2.11 Hunting**

- <sup>+</sup>*seda* n.m. hunt | *bərrəxşəvən* <sup>+</sup>*seda* I am going hunting  
<sup>+</sup>*sayəd* I (vn. <sup>+</sup>*syadta*) to hunt | *bərrəxşəvən* <sup>+</sup>*sedən* *’elə* I am going to hunt deer  
*jira* n.m. (pl. *jirə*) arrow | *jira* *’u-kəšta* bow and arrow  
<sup>+</sup>*zaþpanj* n.f. (pl. <sup>+</sup>*zaþpanjə*) (Azer. sapand) sling  
*kəštət cipa* n.f. (pl. *kəþyatət cipa*) slingshot  
*kulta* n.f. (pl. *kulyatə*), *bra-kulta* n.f. (pl. *bra-kulyata*) trap  
*tala* n.f. (pl. *talə*) (Azer. tələ) trap, snare (for animals)  
*čurətma* n.f. (pl. *čurətma*) trap, mousetrap, snare (for birds)  
*jarda* n.m. (pl. *jarda*) net  
*sapma* n.m. (pl. *sapmə*) (Azer. səpmə) large net for fishing  
*tuppanj* n.f. (pl. *tuppanjə*), *tup* (pl. *tupə*) n.f. (Azer. tüfəng, Pers. tofang) rifle  
<sup>+</sup>*tor* n.m. (pl. *torə*) (Azer. tor) net  
<sup>+</sup>*çupranta* n.f. camouflage behind which hunters of birds hide  
<sup>+</sup>*şariþa* n.m. (pl. <sup>+</sup>*şariþə*) snare to catch birds

**15.2.12 Wool**

- <sup>+</sup>*amra* n.m. wool  
*taþka* n.m. (pl. *taþə*) fold; part of cloth; strand of wool  
*mərrəz* n.m. (Kurd. merez) wool of lambs; wool of Angora goat  
*luvva, luvvə* n.m. (Kurd. liva) fleece, lambs' wool  
*cuyša* n.m. (pl. *cuyšə*) spindle (see illustration 44) (Sal. *cuğša*)  
*dulaba* n.m. (pl. *dulabə*) (Pers. dūlāb < Arab.) spool for winding wool  
*jaməš* I (vn. *jmaþta*) to grab with five fingers; to wring  
*žadə* I (vn. *ždeta*) to tease (wool, cotton)  
*žadaya* n.m. (pl. *žadayə*), *žadyana* n.m. (pl. *žadyanə*) teaser of wool  
<sup>+</sup>*napəs* I (vn. <sup>+</sup>*npasta*) to card or shake wool  
*patpət* QI (vn. *patpatta*) to card (wool), to tease (fibres of wool); to come apart (wool) | <sup>+</sup>*amra patputələ* The wool is coming apart  
<sup>+</sup>*azəl* I (vn. <sup>+</sup>*zalta*, prog. <sup>+</sup>*bəzzalələ*, pst. <sup>+</sup>*zəllə*, rsp. <sup>+</sup>*zila*) to spin (wool)  
<sup>+</sup>*əzla* n.m. yarn  
*jəflə* n.m. (pl. *jəflə*) skein of wool

**15.2.13 Weaving, Sewing and Materials**

- <sup>+</sup>*xyuþta* n.m. sewing, stitch  
<sup>+</sup>*maþinat* <sup>+</sup>*xyuþta* sewing machine  
<sup>+</sup>*karkara* n.f. (pl. <sup>+</sup>*karkarə*) (Azer. qarqara) reel, bobbin  
<sup>+</sup>*fulþola* n.f. (pl. <sup>+</sup>*fulþolə*) bobbin  
<sup>+</sup>*zakara* n.m. (pl. <sup>+</sup>*zakarə*) weaver

- <sup>+</sup>*s̥kura* n.m. (pl. *s̥kurə*) woven product  
<sup>+</sup>*mašinət* <sup>+</sup>*s̥kura* weaving machine  
*hasira* n.f. (pl. *hasirə*) mat (woven with the grass known as *jayan*)  
*š̥etya* n.m. warp (vertical threads on loom) (Gaw. *š̥atla*)  
*maštə* III (vn. *mašteta*) to arrange the warp (Gaw. *šatəl*)  
*macuc* n.m. (pl. *macucə*, *macuyçə*) (Azer. məkik) shuttle, spool (of a sewing machine)  
<sup>+</sup>*xyaṭṭa* n.f. stitch  
*šucluca* n.m. plain straight stitch (without looping back and producing a broken line of stitches on the surface of the cloth)  
*baxyə* n.f. (pl. *baxyə*) stitch formed by looping the needle back and thus producing an unbroken line of stitches on the cloth  
*tartəb* QI (vn. *tartabta*) to tack, to stitch, to baste  
*puzma* n.m. (Azer. pusma?) decorative stitch  
*gabeta* n.f. hem of clothes  
*cuba* n.m. (pl. *cubə*) (Azer. köbə) hem of dress; flounce of a different material from the dress  
*š̥appula* n.m. (pl. *š̥appula*, *š̥appulalə*) end of skirt or robe  
<sup>+</sup>*arə* II (vn. <sup>+</sup>*areta*) to patch, to darn, <sup>+</sup>*marra* QI (vn. <sup>+</sup>*marreta*) to patch  
<sup>+</sup>*areta* n.f. (pl. <sup>+</sup>*areyata*) patch  
*jdala* n.m. (pl. *jdala*) thread  
<sup>+</sup>*sənjał* n.m. (pl. <sup>+</sup>*sənjałə*) (Azer. sancaq, Pers. sanjāq) pin, safety pin; crochet hook  
<sup>+</sup>*xayaṭə* n.m. (pl. <sup>+</sup>*xayaṭə*) tailor  
*darzi* n.m. (pl. *darziyyə*) tailor

#### 15.2.14 Fabrics

- julla* n.m. (pl. *jullə*) cloth  
<sup>+</sup>*parča* n.m. (Azer. parça, Pers. pârče) (pl. <sup>+</sup>*parčə*) large piece of cloth, fabric  
<sup>+</sup>*kərtə* n.m. (pl. <sup>+</sup>*kərtə*) patch of cloth, rag  
*xlepa* n.m., (pl. *xlepə*), *xlepət* <sup>+</sup>*kərtə* quilt  
*lxepə* n.m. (pl. *lxepə*) (Kurd. lihēf < Arab.) quilt  
*lxəpta* nf. (pl. *lxəpyata*) small quilt, small blanket  
*jrīva* n.m. raw linen cloth  
<sup>+</sup>*apeta* n.f. thick cloth for wrapping food (for picnic)  
<sup>+</sup>*supra* n.m. (Pers. sofre, Azer. süfrə) tablecloth  
<sup>+</sup>*adyal* n.m. (pl. <sup>+</sup>*adyalə*) (Russ. одеяло) blanket  
*malapa* n.m. (pl. *malapə*) (Azer. mələfə < Arab.) bed-sheet (for bed)  
<sup>+</sup>*čarčav* n.m. (pl. <sup>+</sup>*čarčava*) (Turk. çarşaf ‘bed sheet’ < Pers.) piece of material for wrapping bedding

- +lək̥ta** n.m. **embroidery**
- jannə** n.f./m. (pl. *janniyə*) **patchwork blanket (put on oven to sit on in winter)**
- pešcər** n.m. (pl. *pešcirə*) (Pers. *pešgir*) **towel, napkin**
- +dasmal** n.f. (pl. *+dasmalə*) (Azer. *dəsmal*, Pers. *dastmāl*) **towel, napkin, handkerchief; baby's nappy**
- rušnuc** n.m. (pl. *rušnujə*/*rušnuʃə*) (Ukrainian *пушник*) **towel** (Canda, Sal., Gaw.)
- +xalla-manə** n.f. (pl. *+xalla-maniyə*) **dish cloth**
- +yaləxtə** n.f. (pl. *+yaləxyatə*) (Azer. *yaylıq*) **handkerchief; towel napkin**
- toriyya** n.f. (pl. *toriyyə*) **loofah (for washing)**
- +top** n.f. (pl. *+topə*) (i) (Azer. top, Pers. tup) **roll (of material)** | *xa +top +parca* a roll of material; *tre +topə +parca* two rolls of material
- barra** n.m. (pl. *barra*) **edge of material**
- hašya** n.m. (Azer. *haşıyə* < Arab.) **woven lace; border, selvedge, edging (especially of lace)**
- parda** n.m. (pl. *pardə*) (Azer. *pərdə*, Pers. *parde*) **curtain**
- juna** n.m. (pl. *junə*) **net curtain; net veil of brides**
- cuyraxa** n.m. (pl. *cuyraxə*) **shroud** (Sal., Gaw. *čuğraxa*)
- ciṭa** n.m. (Kurd. *çît*) **embroidered fabric**
- maxmar** n.m. (Azer. *məxmər*) **velvet**
- brisəm** n.f. **silk**
- +mət̥kal** n.m. (Azer. *mitkal*) **calico, thin calico of pale-yellow colour** | used for *cəstət +kattəj* (bag in which they put *+davvə*)
- şila** n.m. (Azer. *şılə*) **red coarse calico**
- +bambazyə** n.m. (medieval Latin *bambax -acis*, from Greek βάμβαξ -ώκος, βάμβακιον 'cotton') **cotton fabric that is fluffy on the inside and smooth on the outside, used for clothing in winter**
- +kənja** n.m. **type of fabric**
- +təndi** n.m. **type of fabric**
- səlc** n.m. **type of fabric**
- +tafta** n.m. **type of fabric**
- batış** n.m. **type of fabric**
- +sablé** n.m. **type of fabric**
- fırfı́t** n.m. **type of fabric**

#### 15.2.15 Sieves

- məxxəlta** n.f. (pl. *məxxəlyatə*) **fine sieve**
- 'ərbala** n.f. (pl. *'ərbalə*) **sieve for wheat with large holes (larger than those of *məxxəlta* but smaller than those of a *sarida*)**

- sarida, sarada* n.m. (pl. *saridə, saradə*) sieve with large holes for beans  
 +*dašcər* n.m. (pl. +*dašcırə*) (Azer. daş ‘stone’ + derivative suffix ‘keeper’) sieve with large holes
- +*nəxla* n.m. fine grains that fall from sieve (*məxxəltə*) after sieving wheat  
 (+*xəttə*) (Gaw. +*mxalta*)
- parta* n.f. fine dust falling from sieve
- cuzar* n.f. (pl. *cuzarə*) husks and stones remaining in sieve (‘*ərbala*) after sieving; refuse of wheat in the threshing floor when the ear and chaff will not separate
- cuylaş* n.m. (Azer. küləş ‘straw’) thick stems of wheat that remain in sieve

#### 15.2.16 Structures and Enclosures

- beta* n.m. (pl. *bətvatə, batvatə*) house (Sal, Gaw. *biya*, pl. *biyanə*)
- paya* n.m. (pl. *paya*) (Azer. pəyə; Pers. pāgāh) stable, animal shed (Sal, Gaw. *paya*, pl. *pajanə*)
- čulə* n.f. (pl. *čuliyatə*) place where people would wash in *paya* in winter (since it was warm) consisting of a sloping slab
- +*čola* n.m./f. (pl. +*čolatə*) hut
- čardak, čardac* n.f. (pl. *čardaķə, čardacə*) (Azer. çardaq) booth made with branches, shed, attic, awning
- čulluxta* n.f. (pl. *čulluxyatə*) hut made of mud
- ‘*urə* n.f. (pl. ‘*uravatə*) manger
- ninə* n.f. (pl. *niniyyə*) (Azer. nin) chicken coop
- juma* n.m. (pl. *jumanə*) sheepfold
- cuyra* n.f. (pl. *cuyratə*) kiln (Sal., Gaw. *cugra*)
- xoda* n.f. (pl. *xodə*) (Arab. ḥawḍ) basin; water trough for animals
- +*saray* n.f. (pl. +*sarayə*) (Russ. saray ‘shed’ < Azer. saray ‘palace’) shed open on two sides (containing the oven of a household)
- mula* n.f. (pl. *mulə*) barn
- jəšra* n.m. (pl. *jəšrə*) bridge
- dalma* n.m. (pl. *dalmə*) (Azer. dəlmə) aqueduct (carrying water from the mountain to villages)
- +*abarə* n.f. (pl. +*abarə*) (Pers. ābrāh) raised channel that brings water to a watermill
- pandam* n.f. (pl. *pandamə*) (Kurd. bendav) dam; pool of dammed water
- banda* n.m. (Azer. bənd) dam
- čima* n.m. (pl. *čimə*) block of compact earth and grass used to build dams etc. → *čiman* grass, lawn
- mohra* n.m. (pl. *mohrə*) (Azer. möhrə) large block of dried mud (used for building walls)

- havuz* n.f. (pl. *havuyzə*) (Turk. havuz, Azer. hovuz, Pers. howz < Arab.) **pool (man-made)**
- čuxta* n.f. (pl. *čuxyatə*) **windowless storage room, cellar**
- <sup>+</sup>*čadra* n.m. (pl. <sup>+</sup>*čadrə*) (Pers. čādor) **tent**
- xarrac* n.m. (pl. *xarraʃə*) (Azer. xərək, Pers. xarak) **wooden frame for growing tobacco**
- carma* n.m. (pl. *carmanə*) **vineyard; orchard (with fruit trees)** (Sal, Gaw.  
cərma, pl. cərmanə)
- <sup>+</sup>*bustana* n.m. (pl. <sup>+</sup>*bustanənə*) (Azer. bostan, Pers. bostān) **kitchen garden (esp. for melons)** (Sal., Gaw. bəstana, pl. bəstananə)
- baxča* n.f. (pl. *baxčanə*) (Kurd. bexče, Azer. bağça, Pers. bāğče) **kitchen garden for fruits**
- darta* n.f. (pl. *daryatə*) **kitchen garden for fruits**
- janta* n.f. (pl. *janatə*) **garden (for fruit and flowers)**
- xakla* n.f. (pl. *xalkanə*) **field (cultivated)**
- marja* n.m. (pl. *marʃə*) **meadow**
- čiman* n.f. (pl. *čimanə*) **grass, lawn**
- <sup>+</sup>*mariyya* n.m. **pasture**
- <sup>+</sup>*mazraya* n.m. **cultivated land**
- criva* n.m. **ploughed field left fallow**
- <sup>+</sup>*budra*, <sup>+</sup>*bədra* n.f. (pl. <sup>+</sup>*budratə*, <sup>+</sup>*bədratə*) **threshing floor**
- <sup>+</sup>*ojaxta* n.f. (pl. <sup>+</sup>*ojaxyatə*) (Azer. ocaq) **fireplace, hearth**
- künya* n.m. (pl. *kunyə*) (Kurd. kanî, Azer. quyu) **well (for drawing water)**

#### 15.2.17 *Parts of Structures*

- <sup>+</sup>*tarra* n.m. (pl. <sup>+</sup>*tarranə*) **door**
- skupta* n.f. (pl. *skupyatə*) **threshold**
- juyda* n.m. (pl. *juydanə*, *juydanənə*) **wall** (Sal, Gaw. fuğda)
- panjara* n.f. (pl. *panjarə*) (Azer. pəncərə, Pers. panjare, Kurd. pencere)  
**window (with glass)**
- cavə* n.f. (pl. *cavata*) **window (without glass); opening in a roof functioning as a chimney and a window**
- cavət kubba* **window in the middle of a roof**
- lampa* n.m. (pl. *lampə*) (Azer. ləmpə 'ceiling') **ceiling; lamp**
- <sup>+</sup>*karita* n.f. (pl. <sup>+</sup>*kariyyatə*) **main beam in a roof; a crossbeam** (Sal, Gaw.  
<sup>+</sup>*kariyya*)
- parduvva* n.m. (pl. *parduvvə*) **lath (laid on timbers in roof of house and floors of upper rooms)**
- šcurə* n.m. (pl. *šcuravatə*) **ceiling, inside of roof, space between roof beams**
- palla* n.f. (pl. *pallə*) (Pers. pelle, Azer. pillə) **rung (of ladder)**

- <sup>+</sup>*pallacanə* pl. (sing. <sup>+</sup>*pallacanta*) (Pers. pellegān, Azer. pilləkan) stairs  
*čuxta* n.f. basement; storeroom  
<sup>+</sup>*dalapčə* n.m. (pl. *dalapčə*) (Pers. dūlābče) pantry, closet  
<sup>+</sup>*suypa* n.m. porch, ante-room, passage  
*pastuc* n.f. (pl. *pastuyjə*) (Pers. pastū) closet  
<sup>+</sup>*maleta* n.f., <sup>+</sup>*suvvajğ* n.m. layer of mud put on beams of a house  
<sup>+</sup>*mačriyyana* n.m. mud mixed with straw applied to surfaces of a house  
 and between bricks (*carpičə*) (in recent years replaced by *símənt* n.m. cement)  
<sup>+</sup>*šoratan* n.f. (pl. <sup>+</sup>*šoratana*) (Arm. juratan) gutter  
*ķdila* n.m. (pl. *ķdilə*) key  
*dora, bra-dora* n.m. (pl. *dora, bra-dora*) wooden lock  
*kulkulta* n.f. (pl. *kukulyata*) hinge; row of teeth of lock  
*parda* n.m. (pl. *pardə*) (Azer. pərdə, Pers. parde) curtain  
*juna* n.m. (pl. *junə*) (Azer. cuna) net curtain; net veil of brides  
*cərcərrə* n.pl. blinds on window  
<sup>+</sup>*balkun* n.f. (pl. <sup>+</sup>*balkuynə*) balcony  
*tabaka* n.m. (pl. *tabaka*) (Pers. tabaqe < Arab.) shelf, storey  
*bənnavra* n.f. (pl. *bənnavrə*) (Azer. bünövrə) foundation  
*carpač* n.f. (pl. *carpičə*) (Azer. kərpic) mud brick; diamonds at cards | *carpičət*  
 +*tīna* bricks of mud; *carpač neta* unbaked brick; *carpač bşəlta* fired brick  
*'aliza* n.m. (pl. *'alizə*) mud brick (Canda)  
<sup>+</sup>*kaši* n.m. (pl. <sup>+</sup>*kaşıyyə*) (Pers. kāšī) tile  
<sup>+</sup>*ašpaz-*<sup>+</sup>*xana* n.f. (pl. <sup>+</sup>*ašpaz-*<sup>+</sup>*xanə*) (Pers. āšpazxāne) kitchen  
*bət-başalta* n.m. kitchen (literary)  
*jarə* n.m. (pl. *jaravata*) roof | constructed with the following layers from  
 the bottom upwards in this order: <sup>+</sup>*karita* (beam), <sup>+</sup>*pavanə* (branches),  
*parduvva* (large laths), *nuvvə* (small laths), *tuyrə* (twigs), <sup>+</sup>*tīna* (mud)  
*marza* n.m. (pl. *marzanə*) edge; border | *marzət jarə* edge of the roof  
*biva* n.m. (pl. *bivə*) hole in the wall of an orchard or vineyard to allow  
 irrigation water to enter  
*banja* n.m. (pl. *banjə*) bank dividing a field  
*čappar* n.f. (pl. *čapparə*) (Azer. çəpər) fence  
*majjar* n.f. (pl. *majjarə*) (Pers. mahjar < Arab.) handrail, fence, grate; hedge

### 15.2.18 Church

- <sup>+</sup>*umra* n.m. (pl. <sup>+</sup>*umrana*) church (building)  
<sup>+</sup>*ita* n.f. (pl. <sup>+</sup>*idatə*) church (institution)  
<sup>+</sup>*dera* n.m. (pl. <sup>+</sup>*derə*) monastery  
<sup>+</sup>*buraxa* n.m. (pl. <sup>+</sup>*buraxə*) blessing

*kurbana* n.m. communion

+*raza* n.m. (pl. +*razə*) church mass

+*xuṭra* n.m. (pl. +*xuṭrə*) thurible

*casa* n.m. (pl. *casə*) goblet (for wine) made of copper, gold or glass; chalice  
(see illustration 6)

*naḱusa* n.m. (pl. *naḱusə*) wooden bell

+*tāğ* n.m. (pl. +*tagə*) (Pers. tāq, Azer. tağ) arch

*mādābxa* n.m. altar (Gaw. +*maṣṭapta*)

*bīm* n.f. (pl. *bimə*) raised space between the sanctuary wall of a church and  
the nave, platform of the altar

*šxumta* n.f. sanctuary, altar stone of church (transferred from another  
church at time of foundation) (Gaw. šxəmta)

*kancə* n.pl. chancel

+*mirun* n.m. myrrh used as holy anointing oil

#### 15.2.19 Furniture

*nora* n.m. (pl. *nora*) mirror

+*supra* n.m. (pl. +*suprə*) (Pers. sofre, Azer. süfrə) tablecloth

*buri* n.m. (pl. *buriyyə*) tap

+*frand* n.m. (pl. +*franda*) (Azer. kran) tap

šīr n.m. (pl. šīrə) (Pers. šīr) tap

+*bəzzət xoda* n.m. plughole of the sink

*pašaband* n.m. (pl. *pašabandə*) (Pers. paše-band) mosquito net

*cursi* n.m. (pl. *cursiyə*) (Pers. kūrsī, Azer. kürsü < Arab.) chair; seat over oven;  
frame of churn (+*meta*) (illustration 18)

*nəmcat* n.f. (pl. *nəmcattə*) (Pers. nīmkat) sofa

*mīz* n.m. (pl. *mizə*) (Pers. mīz, Azer. miz) table

*došeca* n.f. (pl. *došecə*) (Kurd. doşeg; Azer. döşək) mattress

*taxta* n.f. (pl. *taxtə*) (Azer./Pers. taxt) wooden bed, couch; wooden basin for  
cultivation (see illustration 53)

*darjušta* n.f. (pl. *darjušyatə*) cradle with frame

*banda* n.m. (pl. *bandsə*) (Azer. band, Pers. bānd) band of cradle

*luləffa* n.f. (pl. *luləffə*) (Pers. lule) pipe (on cradle for excrement of baby boy)

*luləjta* n.f. (pl. *luləjyatə*) pipe (on cradle for excrement of baby girl)

+*xasət darjušta, xmarət darjušta* n.m. horizontal upper section of the cradle  
frame

*nannə* n.f. (pl. *nanniyə*) (Azer. nənni) cradle rocked on the legs; hammock

+*kundaxta* n.f. (pl. +*kundaxyatə*) (Azer. qundaq) swaddling bands, swaddling  
clothes

+*xali* n.f. (pl. +*xaliyyə*) (Kurd. xalî, xalîçe, Azer. xalı, Pers. qâlî) carpet

*hasira* n.f. (pl. *hasirə*) (Azer. həsir < Arab.) **mat (woven with the grass known as *jayan*); matting put under a carpet to protect it from the earthen floor**

+*kurrán* n.f. (pl. +*kurranə*) **mat (of threads) put on wall to lean against**  
*švita* n.f. (pl. *šviyyatə*) **mattress**

*jul-maxə* pl. **tantum bedding**

+*adyal* n.m. (pl. +*adyalə*) (Russ. одяло) **blanket**

*malapa* n.m. (pl. *malapə*) (Azer. mələfə < Arab.) **bed-sheet (for bed)**

*lxepa, xlepa* n.m. (pl. *lxepə*) **quilt**

*lxəpta* n.f. (pl. *lxəpyatə*) **small quilt, small blanket**

*spadita* n.f. (pl. *spadiyyatə*) **pillow**

*patət spadita* n.f. **pillow case**

+*čarčav* n.m. (pl. +*čarčava*) (Turk. çarşaf ‘bed sheet’ < Pers.) **piece of material for wrapping bedding**

*punda* n.m. (pl. *punda*) **candle**

*prəsta* n.f. (pl. *prəsyatə*) **thin cloth spread on floor made of wool**

+*lamṭa* n.m. (pl. +*lamṭə*) **mat of compressed wool**

*čambəlta* n.f. **frame for a churn (+*meta*)**

### 15.2.20 Stones and Minerals

+*parša* n.m. (pl. +*paršə*) **large flat wide stone**

+*parušta* n.f. (pl. +*parušyatə*) **small flat stone**

+*šəmra* n.m. **soot**

*baklušə* n.pl. (sing. *baklušta*) **smooth pebbles**

*comur* n.f. (Azer. kömür) **coal; charcoal** | *comur=t cipa* coal, *comur=t kesa* charcoal

*kaya* n.m. (pl. *kayə*) (Azer. qaya) **large rock, crag**

*marmar* n.f. (Azer. mərmər) **marble**

*sila* n.m. **sand**

*zāğ* n.m. (Pers. zāğ, Azer. zəy) **alum**

### 15.2.21 Tethers and Whips

+*xola* n.m. (pl. +*xolə*) **rope**

*jdala* n.m. (pl. *jdalə*) **thread**

*tanap* n.m. (pl. *tanapə*) (Pers. tanāb) **line, cord (used to hang out washing and to measure dimensions)**

+*cətra* n.m. (pl. +*cətrə*) **knot**

+*catər* I (vn. +*ctarta*) **to knot** | +*bəctarévən b-* +*uydalə* I am knotting them together

+*catrən* QI (vn. +*catranta*) **to knot**

*təcta* n.f. (pl. *təcyatə*) trouser tie, threads running in a hem to hold up trousers

<sup>+</sup>*jəllav* n.m. (Azer. cilov, Pers. jalaw) reins of horse; rope for leading animal

*horəc* n.f. (Azer. hörtük) (pl. *horica*) tether (of animal)

*kəmpa* n.m. hemp

*šəsshəlta* n.f. (pl. *šəsshəlyatə*) chain

<sup>+</sup>*kaṭiyya* n.m. (pl. <sup>+</sup>*kaṭiyə*) whip (made of wood)

*xarazan* n.f. (pl. *xarazanə*) (Pers. xarzan) whip (made of rope)

#### 15.2.22 Cultivation and Harvest

*zula* n.m. (pl. *zulə*) (Azer. zol) line, strip, furrow (Gaw. *saravand*)

*ptana* n.m. (pl. *ptanə*) plough (see illustration 52) | *ptana* 'avəd I to plough

<sup>+</sup>*zivana* n.m. (pl. <sup>+</sup>*zivana*) (Pers. zavān) weed

<sup>+</sup>*əddə* n.m. (pl. <sup>+</sup>*əddə*) weed

<sup>+</sup>*ayəd* (vn. <sup>+</sup>*yatta*, prog. <sup>+</sup>*biyadələ*, pst. <sup>+</sup>*ədlə*, rsp. <sup>+</sup>*ida*, imper. <sup>+</sup>*ud*, <sup>+</sup>*udun*) to weed

*losa* n.m. (pl. *losə*) clod of earth

<sup>+</sup>*ændula*, <sup>+</sup>*ænduláy* n.m. (pl. <sup>+</sup>*ændulə*, <sup>+</sup>*ænduláyyə*) clod of earth

*pampəx* QI (vn. *pampaxta*) to break up (ground)

*pandən* QI (vn. *pandanta*) to grow like a candle (*punda*) dripping sap

*jumšə* n.m. (pl. *jumšə*) handful

*jaməš* I (vn. *jmašta*) to grab with five fingers

*čaculta* n.f. (pl. *čaculyatə*) handful (in one hand)

<sup>+</sup>*čanya* (N.), *čanja* (S.) n.m. (pl. <sup>+</sup>*čanyə*, *čanjə*) handful (in two hands)

*xpaķa* n.m. armful (of produce)

<sup>+</sup>*dara* II (vn. <sup>+</sup>*dareta*) to winnow

*davər* I (vn. *dvarta*) to thresh

*xakłət demə*, *xakłət demətə* unirrigated field

*marzət xakla* n.m. boundary of a field (natural)

*priza* n.m. (pl. *prizanə*), <sup>+</sup>*xozan* n.m. (Kurd. xozan) harvested field of stubble

*xakla dməxtə* a field the corn of which is lying flat (having been flattened by rain and wind)

*xakla kməxtə* a field with corn that is compacted by rain and wind

*xakla krəxtə* a field with corn that is dry and brown, ready for harvest

*bara* n.f. (pl. *baravata*, *barə*) sluice in side of large irrigation channel (*šakita*) or irrigation ditch (*koşa*); sluice of dam that is opened to irrigate a field

*xakłət +rəzza* paddy field

*bava* n.f. (pl. *bavata*) (1) mound in an orchard (*carma*) enclosing a small

- basin that was a component of a larger basin known as *taxta*. (2) a large basin in a wheat field(= *taxta*) (see illustration 53)
- <sup>+</sup>*ardav* n.f. (Kurd. ardû ‘fuel’) watery mud
- <sup>+</sup>*yaya* n.m. (pl. <sup>+</sup>*yayə*) wall of basin of paddy field
- taxta* n.f. (pl. *taxtə*) basin for cultivation (created by <sup>+</sup>*yaya* in paddy field and by *bavata* in an orchard) (see illustration 53)
- tira* n.m. (pl. *tirə*) (Azer. tirə) small dividing bank in field or field basin (man-made with earth)
- <sup>+</sup>*yəssura* n.m. connecting channel between basins
- cardi* n.m. (pl. *cardiyə*) (Pers. card ‘sill’) vegetable garden plot with wooden sides
- cardita* n.f. (pl. *cardiyə*) small vegetable garden plot
- səcta* n.f. (pl. *səccacə*) (wooden) stake
- koşa* n.m. (pl. *koşə*) (Azer. qoşa ‘pair, double’) ditch of water bringing water to basins (*taxta*) of a paddy field (see illustration 53)
- pandəm* QI (vn. *pandamta*) to dam | *miyya pundəmmə* dammed water
- ʃdiša* n.m. (pl. *ʃdišə*) pile of leaves
- suyla* n.m. pile of ash used as fertilizer (Sal, Gaw. *suǵla*)
- darza* n.f. (pl. *darzə*) (Azer. dərz) sheaf of corn
- carta* n.f. (pl. *caratə*) load put on back (e.g. of grass) (see illustration 32)
- kuxa* n.m. (pl. *kuxə*) pile, heap
- tayəc* I (vn. *tyacta*) to plant (small branches of trees)
- šatəl* I (vn. *šalta*) to plant (seedlings)
- peyvand* <sup>'avəd</sup> I to graft | *peyvand vədlə* <sup>+'al-</sup>*ilana xina* He grafted it onto another tree; *tuyrət* *peyvand* scion (for grafting)

### 15.2.23 Threshing-floor

- <sup>+</sup>*budra*, <sup>+</sup>*bədra* n.f. (pl. <sup>+</sup>*budratə*, <sup>+</sup>*bədratə*) threshing floor
- xayyan* n.f. (pl. *xayyanə*) pile of unwinnowed threshed corn on a threshing floor
- dāj* n.m. (pl. *dajə*) imprint made on wood indicating ownership of harvested produce in the threshing-floor
- tirət tuyna* n.m. row of stacked hay
- məlxava* n.m. (pl. *məlxavə*) threshing fork
- pərpərrə* n.f. (pl. *pərpərrə*) propeller (indicating direction of wind) (Sal, Gaw. *parra*)
- parra* n.m. (pl. *parrə*) (Pers. par, Kurd. per m.) feather; vane (of a fan); spoke (of a mill wheel)
- torət marza* n.m. ox pulling the threshing machine (*janjar*) on outside of the ring

*torət kubba* n.m. ox pulling the threshing machine (*janjar*) on inside of ring  
*čambara* n.f. (pl. *čambarə*) (Azer. çənbər) heap of harvested corn stalks that

are ready for threshing arranged in a ring around the threshing-floor

*cuyaš* n.m. (Azer. küləş ‘straw’) thick stems of wheat that have not been put  
 in the threshing machine

*tuyna* n.m. straw that is produced by threshing machine

*darza* n.f. (pl. *darzə*) (Azer. dərz) sheaf of corn; bundle

*janjar/jarjar* n.f. (pl. *janjarə/jarjarə*) threshing machine pulled by oxen

*'akla* n.f. ring on threshing floor on which oxen that pull the threshing  
 machine walk

#### 15.2.24 Plough

*cuytan* n.f. (pl. *cuytanə*) (Azer. kotan, Kurd. cot) large plough (made of metal)

*ptana* n.f. (pl. *ptanana*) wooden plough (see illustration 52)

*sacta, sita* n.f. (pl. *sacyata, saccacə*) ploughshare, blade of plough

*dəpna* n.f. (pl. *dəpnatə*) block of wood behind blade of plough, also known  
 as *tana* (Pers. tane)

*'akla* n.f. (pl. *'aklatə*) vertical stick on which plough handle is fixed

*'ida* n.f. ('idatə) handle of plough

*jalla* n.m. (pl. *jalla*) wooden peg, wedge (used to fix height of main pole of  
 the plough)

*cira* n.m. (Kurd. kîr, Pers. kîr ‘penis’) main pole of plough

*bosa* n.m. (pl. *bosə*) wooden ring at top of main pole of plough to which the  
 yoke of oxen is attached

*'əpta* n.f. (pl. *'əpyatə*) leather strap attaching yoke to the main pole of the  
 plough

*clama* n.m. (pl. *clama*) wooden rods descending from yoke beam that fixes  
 the yoke to the neck of oxen

*xaniķa* n.m. (pl. *xaniķə*) rope tied around the neck of oxen

*nira* n.m. (pl. *nirə*) yoke

*+čopan* n.f. (pl. *+čopano*) strap (of leather), thong or a leather band on a  
 wagon or plough

*callət +yaya* n.m. strong buffalo pulling the plough that walks down the  
 ditch (+yaya) when the ploughman is digging the ditch with the plough  
*callət marza* n.m. less strong buffalo pulling the plough while walking on  
 the flat ground

#### 15.2.25 Watermill

*'ərxə* n.f. (pl. *'ərxavata*) watermill

*betət 'ərxə* n.m. building containing watermill

*'ərxac̪i* n.m. owner of watermill

*taxana* (Dizatacya S. *+texana*) n.m. miller

*čakčaka* n.m. (pl. *čakčakə*) component in a watermill consisting of two pieces of wood that knock against each other to make noise in order to indicate that mill-wheel is turning

*tapłapa* n.m. (pl. *tapłapə*) = *čakčaka*

*+abarə* n.f. (pl. *+abarə*) (Pers. ābrāh) raised channel that brings water to the mill

*šiva* n.m. (pl. *šivə*) sloping wooden trough that brings water to the mill from the *+abarə* (raised channel)

*+paya* n.m. (pl. *+payə*) (Pers. pā 'leg') wooden prop that supports the water channel (*šiva*)

*dola* n.m. (pl. *dolə*) (Pers. dohol, Kurd. dehol f. drum) tall bin (for corn above watermill)

*cipət +ullul* n.m. upper millstone

*cipət əltəx* n.m. lower millstone

*+bəzza* n.m. hole (in the millstone)

*cipa dandana* n.m. rough stone (full of small holes) used for the millstone

*čulli* n.f. (pl. *čulliyə*) hole for gathering flour

*'urə* n.f. (pl. *'uravatə*) long round receptacle that catches the flour from the rotating millstones

*pərpərrə* n.f. (pl. *pərpərrə*) propeller

*čarx* n.m. (pl. *čarxə*) (Azer. čarx) shaft (of a mill) to control movement of propeller

*mila* n.m. (pl. *milə*) (Azer. mil) rod that connected propeller to upper grindstone; axle pin

*cyula* n.m. (pl. *cyulə*) measure; large cup for measuring flour

*'aklat ərxə, 'aklat miyya* lever of watermill to stop water or redirect it in order to adjust speed of propeller | *'akla +máslıla!* Put down the lever (to stop the water turning the propeller)

*+čalə* n.f. (pl. *+čalavatə*) (Azer. čala/ Pers. čāle) hole (into which the flour fell)

*turmuz* n.m. (pl. *turmuyzə*) (Azer. tormoz) brake (of watermill)

*+tapan* n.f. (pl. *+tapanə*) butt of upper stone

### 15.2.26 Flowers and Herbs

*varda* n.m. (pl. *vardə*) flower

*čučaya* n.m. (pl. *čučajə*) (Azer. çiçək) blossoming flower

*hababa* n.m. (pl. *habbabə*) blossoming flower (literary)

*xəblu* n.f. ivy

- bebuna* n.f. (pl. *bebunə*) (Kurd. beybûn) **camomile; general term for wild flower**
- juna-+baxan* n.f. (pl. *juna-+baxanə*) (Azer. günəbaxan) **sunflower**
- +halala* n.m. (pl. *+halalə*) (Pers. ālāle) **tulip**
- +roz* n.m. (pl. *+roza*) (Russ. rosa) **rose**
- yasmən* n.f. (pl. *yasminə*) (Azer. jasmin, Pers. yasamīn) **jasmine** (Gaw. *+yalsaman*)
- +bar-miyya* n.m. **small water plant**
- vardət* *+data* n.m. **flower that produces gum**
- narjəs* n.f. (pl. *narjisə*) (Azer. nərgiz, Pers. narges) **narcissus**
- mixac* n.m. (Pers. mīxak) **clove** | *vardət mixac* clove flower
- þəçxət* *+Maryam* n.m. **tuberose**
- þəçxət Davəd* n.m. **daisy**
- +ladan* n.f. (pl. *+ladanə*) (Pers. lādan) **ladanum**
- bazruka* n.m. (pl. *bazrukə*) **marigold**
- xənna* n.m. **henna, garden balsam**
- lişanət tora* n.m. **borage**
- šušanna* n.m. (pl. *šušanno*) **lily**
- xašxaš* n.f. (pl. *xašxašə*) (Pers. xašxāš < Arab.) **poppy, corn-poppy**
- ctana* n.m. **cotton**
- tuttun* n.f. (Kurd. tütin, tiğün, Azer. tüttün) **tobacco**
- +rayət yonə* n.m. **verbena ( vervain )**
- +xlamta* n.f. **marshmallow**
- yonja* n.f. (Azer. yonca) **clover** (Sal., Gaw. *spasta*)
- spasta* n.f. **clover (= yonja)**
- madanuz* n.f. (Turk. maydanoz) **parsley**
- þəbbət* n.f. (Pers. šebet) **dill** | with suffix *þəbbidi* my dill
- +talxun* n.f. **tarragon**
- mazra* n.f. (Pers. marze) **rosemary**
- bəsma* n.m. **rosemary**
- taxla* n.? **garden cress (lepidium sativum)**
- +buslə kinə* n.pl. **chives**
- şəmxa* n.m. **herb similar to chive**
- +bitbar, +buybar* n.f. (Azer. bibər) **pepper** | *+buybar smuķta* red pepper (Sal., Gaw. *+buğbar*)
- şambalila* n.f. (Pers. şambablıle) **fenugreek**
- zira* n.m. (Pers. zīre) **cumin**
- +xəmsa* n.f. **sorrel**
- +tolə* n.pl. **coriander, sing. +tolə piece of coriander**
- jašniš* n.f. **coriander**

- zardačuvva* n.f. (Pers. zardčūbe) turmeric  
 'əryana n.pl. basil  
*jafarī* n.? (Pers. ja'farī) parsley  
<sup>+</sup>sətra n.m. (pl. <sup>+</sup>sətrə) thyme, savoury  
*rexana* n.m. (pl. *rexanə*) wild thyme  
<sup>+</sup>*nana* n.f. (Kurd. nane f., Azer. nanə, Pers. na'nā' < Arab.) mint | <sup>+</sup>*nana* 'əryana  
 mint and basil  
*nənxa* n.f. mint | different type of mint from that of <sup>+</sup>*nana*  
*šuyša* n.m. (pl. šuyšə) liquorice plant | It was spread on beams of houses. The  
 dust of the dried leaves was rubbed on the head to prevent the loss of hair  
 (Sal., Gaw. šugša)  
<sup>+</sup>*nareta* n.f. edible herb  
<sup>+</sup>*pəssa* n.f. herb growing in bogs, like sugar cane  
*jayan* n.f. herb used for weaving mats (*hasirə*)  
<sup>+</sup>*kazi* <sup>+</sup>*ağa* n.m. type of herb  
<sup>+</sup>*xmaṭu* n.f. type of bitter herb  
*kiji* n.m. type of bitter herb  
<sup>+</sup>*šamṭa-manə* n.f. (pl. <sup>+</sup>*šamṭa-manə*) type of herb (literally: breaker of  
 vessels)  
*ful-*<sup>+</sup>*ağa* n.m. type of herb (literally: the lord's flower)  
<sup>+</sup>*kazi-*<sup>+</sup>*ağa* n.f. type of herb (literally: the lord's judge)  
*kətpu* n.f. pigweed  
*耶穌-xaymə* n.pl. dried powdered hot peppers  
*pərxə* n.pl. mixture of spices | consisting of basil ('əryana), rosemary (*mazra*)  
 and tarragon (<sup>+</sup>*ṭalxun*), used in the dish *captə*  
<sup>+</sup>*sərpa* n.m. hot spice  
<sup>+</sup>*advə* n.pl. spices  
<sup>+</sup>*axrət pəkkakə* algae (on pond), moss (Sal., Gaw. <sup>+</sup>*axrət pəkkakə*)

### 15.2.27 Trees

- <sup>+</sup>*xelapa* n.m. (pl. <sup>+</sup>*xelapə*) willow | <sup>+</sup>*xelapət bəxya* weeping willow (Canda)  
<sup>+</sup>*ušana* n.m. (pl. <sup>+</sup>*ušanə*) palm tree  
*calanbur* n.m. (pl. *calanbuyrə*) poplar tree  
*karajaj* n.m. (pl. *karajajə*) (Azer. qara ağac 'black wood') elm  
<sup>+</sup>*čənnar* n.m. (pl. <sup>+</sup>*čənnarə*) (Azer. çınar, Pers. canār) plane tree, black poplar  
*xurta* n.f. (pl. *xuratə*) white poplar  
*xuyra* n.m. (pl. *xuyra*) white poplar  
*kalama* n.m. (pl. *kalamə*) (Azer. qələmə) white poplar  
<sup>+</sup>*ilanət* <sup>+</sup>*pərma* n.m. high tree used for beams  
<sup>+</sup>*ilanət* <sup>+</sup>*apsə* n.m. tree with dry buds known as <sup>+</sup>*apsə*

- <sup>+</sup>*baluṭa* n.f. (pl. <sup>+</sup>*baluṭə*) acorn; oak tree | *'ilanət* <sup>+</sup>*baluṭa* oak tree  
<sup>+</sup>*bəṭma* n.f. (pl. <sup>+</sup>*bəṭmə*) fruit of terebinth; terebinth tree | *'ilanət* <sup>+</sup>*bəṭmə* terebinth tree  
*sənjiyya* n.f. (pl. *sənjiyyə*) silver willow tree; fruit of the silver willow, jujube  
*xabuyša* n.m. (pl. *xabuyšə*) apple; apple tree (Sal., Gaw. *xabuğşa*)  
*xabušta* n.f. (pl. *xabušyata*) apple tree  
<sup>+</sup>*camutra* n.m. (pl. <sup>+</sup>*camutra*) pear; pear tree  
*sparəfla* n.m. (pl. *sparəflə*) quince; quince tree (Sal, Gaw. *sparila*)  
*məšməšša* n.f. (pl. *məšməššə*) apricot; apricot tree  
*tuyta* n.f. (pl. *tuyta*) mulberry; mulberry tree  
*tina* n.f. (pl. *tinə*) fig; fig tree  
*tinita* n.f. small fig tree  
*foza* n.m. (pl. *fozə*) walnut, walnut tree  
*jumlanə* n.m. (pl. *jumlanə*) festive tree at wedding, filled with sweets and gifts for the bride

#### 15.2.28 *Bushes*

- butta* n.f. (pl. *buttata*) bush  
<sup>+</sup>*sussina*, <sup>+</sup>*sursina* n.f. thistle, azarole  
*xexəffa*, *xixəcca* n.f. hawthorn bush or tree (bigger than <sup>+</sup>*sussina*) with yellow and red fruit (Sal. *xexəffa*)

#### 15.2.29 *Parts of Plants and Trees*

- coca* n.m. (pl. *cocə*) (Azer. kök ‘root’) trunk of a tree, stock of a tree  
<sup>+</sup>*pağrət* *'ilana* n.m. trunk of a tree  
*čəlla* n.m. (pl. *čəllalə*) (Pers. čelle ‘bow string, selvage’) root; fine root branching from central root(s)  
*şətla* n.m. (pl. *şətlə*) seedling, sapling  
*jallaxta* n.f. bark of a tree or branch; skin, hide  
*cətva* n.m. (pl. *cətva*) thorn  
*çaltuc* n.m. (Azer. çəltik rice paddy) stalk and head of rice  
*balma* n.m. rice hay; trodden flax stalks | used for roofs; burnt and used as fertilizer  
*bula* n.m. (pl. *bula*, *bulalə*) hairy head (of corn or rice) | *bulət maccə* head of maize  
*şəbla* n.m. (pl. *şəblə*) head of corn on the stalk | *şəbla* <sup>+</sup>*jammuyələ* He is gathering heads (of wheat)  
*pučeča* n.m. (pl. *pučečə*) stalk of maize (Canda)  
<sup>+</sup>*ṭara* n.m. (pl. <sup>+</sup>*ṭarə*, <sup>+</sup>*ṭarana*) head of maize (*maccə*) (Canda)  
<sup>+</sup>*pava* n.m. (pl. <sup>+</sup>*pavə*, <sup>+</sup>*pavana*) branch (large)

*nuvva* n.m. (pl. *nuvvə*) **small shoot**

*čarpuvva* n.m. (pl. *čarpuvvə*) **dried shoot (*nuvva*) with leaves (used as fuel)**

*tuyra* n.m. (pl. *tuyrə*) **fine twig, cane**

*tuyrət peyvand* n.m. **scion (for grafting)**

*parduvva* n.m. (pl. *parduvvə*) **lath (laid on timbers in roof of house and floors of upper rooms)**

*zila* n.m. (pl. *zilə*) **cane, rush (for making mat *hasira* and baskets); straw for drinking**

*ziləcca* n.m. (pl. *ziləccə*) **straw, bit of dried herb**

*+kətiyya* n.m. (pl. *+kətiyyə*) **long flexible shoot (of tree) | longer than *nuvva*, shorter than *tuyra* shoot and *+pava* branch**

*+ṭapta* n.f. **flexible cutting (of plant or tree)**

*+ṭarpa* n.m. (pl. *ṭarpə*) **leaf**

*+ṭarpət varda* n.m. **petal**

*pherexa* n.m. (pl. *pherexə*) **bloom, blossom, head of flower**

*konča* n.m. (pl. *končə*) (Azer. qönçə, Pers. ғонче) **bud**

*+bərtə* n.m. (pl. *+bərtə*) **bud**

*zəcta, zita* n.f. (pl. *zəcyatə*) **bud, pod**

*varda* *zuczəcca* n.pl. **budding flowers**

*nəsrana* adj.ms. (fs. *nəsranta*, pl. *nəsrənə*) **not full of seeds**

*miyyət ilana* n.pl. **sap of a tree**

*şirət ilana* n.m. **sap of a tree**

*miyyət Mát-Maryam* n.pl. **water of St. Mary (name given to sap of certain trees that was thought to have curative properties)**

*+buča* n.m. (pl. *+bučə*) **dried ball of tree sap (used as chewing gum) (Gaw. +datət ilana)**

*'urzaja, 'urzajəja* n.m. (pl. *'urzajəjə*) **pistil of a plant, pith, core; edible pistil of the *hamzə* plant; stick on head of maize**

*katta* n.f. (pl. *kattata*) **stem of plant**

*+kasla* n.m. (pl. *+kasla*) **stem of plant**

*cəlša* n.m. (pl. *cəlšə*) **stem (of wheat, plant)**

*+əkrət maccə* n.m. **stem of maize**

*+bazəcca* n.m. (pl. *+bazəccə*) **stamen of flower**

*tuþrət xabuyša* n.m. **stem of apple**

*tappacta* n.f. (pl. *tappacyatə*) **head of seeds (Gaw. *patacta*)**

*+popaxta* n.f. (pl. *+popaxyatə*) (Azer. *papaq*) **head of seeds that fly away in the wind; hat, cap**

*sumbultət +sarə/+xəttə* n.f. **hair of corn**

### 15.2.30 *Vine and Grapes*

<sup>+</sup>*anvə* pl. (sing. <sup>+</sup>*anvita*) grapes

<sup>+</sup>*mata* n.f. (pl. <sup>+</sup>*mayatə*) single grape

*juja* n.m. (pl. *juja*) trunk of a vine

*kema* n.f. (pl. *kemata*) tendril (of vine) (Gaw. *kayma*, pl. *kaymatə*)

*punda* n.m. (pl. *punda*) shoot of vine

<sup>+</sup>*hača*, <sup>+</sup>*hačča* n.m. (pl. <sup>+</sup>*hačə*, <sup>+</sup>*haččə*) (Azer. haça ‘fork’) forked stick used to support vines and trees

*xərdalus* n.f. small grapes | *xa* <sup>+</sup>*matət xərdalus* a single *xərdalus* grape

*kuyra* n.m. (pl. *kuyrə*) (Azer. qora) young sour (unripe) grape (Sal., Gaw. *kuğra*)

*tabbarza* n.f. large sweet green grape

*xalili* n.f. type of green grape that ripens early

<sup>+</sup>*doz mari* n.f. type of grape that ripens early (green or white) (Gaw. <sup>+</sup>*bəzmari*)

*jabušta* n.f. (pl. *jabušə*) type of large grape (green or red) used for raisins (*caşmışə*)

*malláy* n.f. medium-sized grapes | either white (<sup>+</sup>*xvarta*) or black (*cumta*) in colour

*huseni* n.f. type of long grape

*rišu-*<sup>+</sup>*baba* n.f. large round grape | either white (<sup>+</sup>*xvarta*) or red (*smukta*) in colour

*bəzzazət jaməšta/tavərtə* n.pl. type of green grapes shaped like teats

*šira* n.m. (Pers. šire) grape juice

*šira* <sup>+</sup>*xvara* n.m. grape with little juice used for making wine

*'ascari* n.f., *šira* *'ascari* n.m. juicy white grape

*širət* <sup>+</sup>*xamra* n.m. type of red grape

<sup>+</sup>*fəndəmmu* n.f. type of red grape

<sup>+</sup>*kara-maccə* type of red grape

<sup>+</sup>*curdboğan* n.f. (Azer. kürd boğan ‘choking a Kurd’) type of green grape

<sup>+</sup>*sahibi* n.f. type of red grape

<sup>+</sup>*jazandáy* n.f. type of grape (red or white)

*cəşmişə* n.pl. (sing. *cəşməšta*) raisins

<sup>+</sup>*yamuysa* n.m. (pl. <sup>+</sup>*yamuysə*) young branch of vine

<sup>+</sup>*kunṭepə*, <sup>+</sup>*kunṭopa* n.m. (pl. <sup>+</sup>*kunṭepə*, <sup>+</sup>*kunṭopa*) large bunch of grapes

*zənŷərtə* n.f. (pl. *zənŷəryatə*) (Azer. zəncir ‘chain’) small bunch of grapes

*tluvvə* n.pl. grapes hung in the basement to preserve them

*taleta* n.f. suspended shelf from which *tluvvə* are hung

*jayan* n.f. type of grass used to hang grapes and form *tluvvə*

*pulluš* n.m., *pullu* n.f. (Armenia) (pl. *pulluyşə*) pulp; grape must

*parpašə* n.pl. discarded skins of grape pulp (*pulluš*)

*savzə* n.pl. grapes blanched in boiling water | to the water is added the substance known as *kalya-+dašə*, lit. 'cooker of stones' (Azer. daş)

*+tizab* n.f. (Pers. tez-āb) grapes blanched in boiling water (= *savzə*)

*varazan* n.f. (pl. *varazanə*) (Pers. varz 'a field with a raised border') slope of earth at the end of a field for drying grapes

*balkən* QI (vn. *balkanta*) to become ripe (grapes) | <sup>+</sup>*anvə vena* *bulkənnə* The grapes have become ripe

*balķa* n.m. ripeness | <sup>+</sup>*anvə balķa npilələ biyyé* The grapes are beginning to get ripe

*čaraz* n.m. (pl. *čarazə*) grape press

*kalya-+dašə* n.f. chemical used in production of grapes

### 15.2.31 Fruits and Vegetables

*yeməš* n.f. (Azer. yemiş) fruit

<sup>+</sup>*tunta* n.f. fruit

<sup>+</sup>*armunta* n.f. (pl. <sup>+</sup>*armunyatə*) pomegranate

<sup>+</sup>*ṭamaṭa* n.m. (pl. <sup>+</sup>*ṭamatə*) tomato

<sup>+</sup>*ȝənnanarta* n.f. (pl. <sup>+</sup>*ȝənnanarə*) (Azer. gilənar) sour cherry

<sup>+</sup>*jilasa*, <sup>+</sup>*jilasta* n.f. (pl. <sup>+</sup>*jilasə*) (Azer. gilas, Pers. gīlās) sweet cherry

*balbalukə* n.pl. dark cherries

<sup>+</sup>*baluṭa* n.f. (pl. <sup>+</sup>*baluṭə*) acorn

<sup>+</sup>*bəṭma* n.f. (pl. <sup>+</sup>*bəṭmə*) fruit of terebinth

*sənjiyya*, *sənjiita* n.f. (pl. *sənjiyyə*) fruit of the silver willow, jujube | *sənjiyyətə* xurmə small jujube fruits

*xabuyşa* n.m. (pl. *xabuyşə*) apple

<sup>+</sup>*camutra* n.m. (pl. <sup>+</sup>*camutrə*) pear

*sparəfla* n.m. (pl. *sparəfə*) quince

*məšməššə* n.f. (pl. *məšməšə*) apricot

*jarjarə* n.pl. (sing. *jarjarta*) large apricots (Canda)

<sup>+</sup>*alucta*, <sup>+</sup>*halucta* n.f. (pl. <sup>+</sup>*aluyjə*, <sup>+</sup>*haluyjə*) (Pers. ālū, Kurd. hilū, alū) plum, damson (Sal, Gaw. ḡalūḡca)

<sup>+</sup>*karyluc*, <sup>+</sup>*karylucta* n.f. (pl. <sup>+</sup>*karyluyjə*) (Azer. qara + Pers. ālū) black sour plum

<sup>+</sup>*karylucta* n.f. small black plum

<sup>+</sup>*saryluc*, <sup>+</sup>*sarylucta* n.f. (pl. <sup>+</sup>*saryluyjə*) (Azer. sarı + Pers. ālū) yellow plum

*čančuyrə* n.pl. small wild plums (Canda)

*tamburta* n.f. (pl. *tambuyrə*) large plum; tree of large plums (Canda)

*xoxa*, *xoxita* n.f. (pl. *xoxə*) peach (yellow)

- huli* n.f. (pl. *huliyə*) peach (dark)
- tuyta* n.f. (pl. *tuytə*) mulberry (Sal, Gaw. *tuğta*)
- smukə* n.pl. barberries, sumac
- bašila* n.f. (pl. *bašila*) large musk melon (so-called because it is ripened by  
burying it in warm earth)
- şallak* n.f (pl. *şallakə*) large melon, muskmelon
- cəndurta* n.f. (pl. *cənduyrə*) green small musk melon
- +*şamama* n.f. (pl. +*şamamə*) (Arab. šammām) small wild melon
- +*karrəcca* n.f. (pl. +*karrəccə*) small melon
- şəptiyya*, *şəptita* (Canda) n.f. (pl. *şəptiyyə*) (Kurd. şiftî m.) watermelon
- xona* n.m. (pl. *xonə*) long watermelon
- səlkə* n.m. (pl. *səlkə*) beetroot
- +*busla* n.m. (pl. +*busla*) onion
- tuyma* n.m. (pl. *tuymə*) garlic (Sal, Gaw. *tuğma*)
- zanjapəl* n.m. (Azer. zəncəfil) ginger
- +*cavar*, +*cabar* n.m., +*cavarta*, +*cabarta* n.f. (pl. +*cavarə*, +*cabarə*) (Azer. kəvər,  
kavar) leek (Sal, Gaw. +*cabarta*)
- xasta* n.f. (pl. *xassə*) (Pers. xas < Arab.) lettuce (Sal, Gaw. +*cahə*)
- caravuz* n.f. (Azer. kərəviz, Pers. karafs) celery (Canda, Gaw. *caraz*)
- +*jizara* n.m. (pl. +*jizərə*) carrot
- kərtəpa* n.pl. (sing. *kərtəpta*) (Azer. kartof, Russ. картофель, < Ger. Kartoffel)  
potatoes
- xabuyşət* +*arra* n.m. (pl. *xabuyşət* +*arra*) Jerusalem artichoke
- calama* n.f. (pl. *calamə*) (Azer. kələm, Pers. kalam, Kurd. kelem) cabbage
- lappə* n.pl. (sing.m. *lappa*, *lappita*) split peas
- +*maşə* n.pl. (sing.f. +*maşita*) beans | +*maşə* *balıkə* multicoloured peas
- bakla* n.pl. (sing.m. *bakla*) green beans
- +*xərtmanə* n.pl. (sing.f. +*xərtmanta*) chickpeas
- +*badəmjən*/+*badəmjanta* *smukta*, +*badənjan* (Canda) n.f. tomato
- +*badəmjən*/+*badəmjanta* *cumta*, +*badərjan* (Canda; cf. Georgian badrijani)  
n.f. aubergine
- +*karra* n.m. (pl. +*karrə*) marrow, pumpkin
- xardal* n.f. (Azer. xardal, Pers. xardal) mustard
- +*xyarə* n.pl. (sing.f. +*xyarta*) (Arab. xiyr) cucumbers
- +*spanağ* n.f. (Azer. ispanaq) spinach
- dəxna* n.m. millet
- macca* n.m. (pl. *maccə*) (Azer. məkə) maize
- ķənnora* n.f. type of wild vegetable
- hamzə* n.pl. (sing.m. *hamza*) vegetable with white root, growing in a  
bush

*şəmxa* n.m. wild garlic

*yarkə* n.pl. (sing.m. *yarkə*) green vegetables. The singular *yarkə* is used specifically in the sense of wild garlic (= *şəmxa*) in some villages

*+pulla* n.f. (pl. *+pullə*) radish

*şəlğəmma*, *şərjəmma* n.pl. (sing.f. *şəlğəmtə*, *şərjəmtə*) (Pers. *şalğam*) turnips

*jališə* n.pl. (sing. *jališə*) spring onions

*+lobya* n.f. (pl. *+lobyatə*, *+lobyə*) (Azer. *lobya*, *lubyā*) haricot bean

### 15.2.32 Nuts and Grains

*+bər-+zarra* n.m., *+bər-+zarta* n.f. (pl. *+bər-+zarrə*) seed

*dəndəkyatə* n.pl. small seeds

*joza* n.m. (pl. *jozə*) walnut

*+şada* n.f. (pl. *+şadə*) almond

*+şadita* n.f. (pl. *+şadiyyatə*) almond, small almond

*pəsta* n.pl. (sing.f. *pəstita*) pistachios | *xa dana pəsta* a single pistachio

*pəndəkkə* n.m. (pl. *pəndəkkə*) hazelnut

*pəndəkta* n.f. small hazelnut

*kərkəçčə* pl. sunflower seeds

*+fullə* n.f. (pl. *+fullatə*) (Azer. *güllə* ‘bullet’ < Pers.) stone of fruit

*kanita* n.f. (pl. *kanyatə*) stone of fruit

*+kočə* n.m. (pl. *+kočə*) stone of fruit (Dizatacya S)

*+tləxə* n.pl. (sing.f. *+tluxta*) lentils

*nəsra* n.m. fine groats (*jərsə*) (both *nəsra* and *jərsə* are *pərdə*)

*jərsə* n.pl. cracked wheat

*jlulə* n.pl. grains with their husks removed before cooking

*pərda* n.m. grains boiled in water before their husks are removed

*+xəttitə* n.f. grain of wheat

*+sarita* n.f. grain of barley

*+rəzzitə* n.f. grain of rice

*čat* n.m. unsieved grain

*jarčac, jarčaj* n.f. (Azer. *gənəgərçək*, Pers. *karčak*) castor oil seed (*+bazra*

castor oil)

*+mayana* n.m. fennel seed

*xaruztət* *+şadə* n.f. string of walnuts threaded together

*kalpa* n.m. (pl. *kalpə*) shell (of nut); pod

*+apsa* n.m. (pl. *+apsə*) dry bud on the tree known as *'ilanət* *+apsa*; gall, gall-nut

15.2.33 *Animals*

- suysa* ~ *suysə* n.m. (pl. *suysavatə*) **horse** (Sal., Gaw. *suğsa*)  
*'ela* n.f. (pl. *'elə*) **deer (species); female deer**  
*'arbət vala* n.f. **deer; wild sheep** (Sal., Gaw. *'arbət vala*)  
*neriyya* n.m. (pl. *neriyyə*) (Kurd. *nêr* ‘male’) **male deer**  
*+jeyran* n.f. (pl. *+jeyranə*) (Azer. *ceyran*) **gazelle, roe deer**  
*+čakkal* n.m. (pl. *+čakkalə*) (Azer. *çaqqal*, Pers. *šaḡd*) **jackal**  
*xuvva* n.m. (pl. *xuvvavə*) **snake** | *xuvva sammana* poisonous snake  
*xuvvavita* n.f. **snake** (Sal., Gaw. *xuvvita*)  
*+kaṭa* n.m. (pl. *+kaṭə*) **tomcat**  
*+kaṭu* n.f. (pl. *+kaṭunyatə*) **cat; female cat**  
*+nəmrə* n.m., *+nəmrīta* n.f. (pl. *+nəmrə*) **tiger**  
*diva* n.m. (pl. *divə*) **wolf**  
*divita* n.f. **she-wolf** (Sal. and Gaw. *duxta*)  
*+tala* n.m. (pl. *+talə*) **fox**  
*+talita* n.f. **female fox**  
*ctulta* n.f. (pl. *ctulyatə*) (cf. *cətva* ‘prickle’) **hedgehog** (*cadduda* Canda)  
*+jaruf* n.f. (pl. *+jaruŷə*) **weasel**  
*+haṭṭar* n.f. (pl. *+haṭṭarə*) (Pers./Azer. *kaftar*) **hyena**  
*+tazi* n.m./f. (pl. *+taziyyə*) (Azer. *tazı*) **greyhound**  
*'akubra* n.m. (pl. *'akubra*) **mouse** (Sal., Gaw. *'ikubra*)  
*'abuḳra* → *'akubra*  
*'akubrat miyya* n.m. **water-rat**  
*+mazuzta* n.f. (pl. *+mazuzyatə*) **lizard**  
*tašši* n.f. (pl. *taššiyə*) **porcupine**  
*xzuyra* n.m., *xzurta* n.f. (pl. *xzuyrə*) **pig** (Sal., Gaw. *xzuğra*)  
*+kaban* n.m. (pl. *+kabana*) (Azer. *qaban*) **wild boar**  
*dəbba* n.f. (pl. *dəbbatə*) **bear (general)**  
*dəbbita* n.f. **female bear**  
*jumla* n.m. (pl. *jumlə*) **camel**  
*cərvəš* n.f. (pl. *cərvıšə*) (Kurd. *kêrûşk*) **rabbit, hare**  
*+pursux* n.m. (Azer. *porsuq*) **badger**  
*koja, kuya* n.m. **marten**

## Sheep and Goats

- 'erba* n.m. (pl. *'erba*) **sheep** (Sal., Gaw. *'arba*, pl. *'arbə*)  
*pəška* n.m. (pl. *pəškə*) **herd, flock, small cattle (sheep and goats)**  
*suri* n.f. (pl. *suriyyə*) (Azer. *sürü* ‘flock’) **flock** | *suriyyət* *'erba* flocks of sheep  
*+pira* n.m. (pl. *+pirə*) **lamb**  
*kučča* n.m. (pl. *kuččə*) (Azer. *qoç*) **male sheep, ram**

*barrana* n.m. (pl. *barranə*) (Kurd. beran) **male sheep, ram**

+*vana* n.f. (pl. +*vana*) **ewe**

*tumba* | 'erba *tumba* **sheep without a tail**

'azzə n.pl. **goats**

*kuçxa* n.m. (Azer. qoç) **male goat**

*jeçita* n.f. (Azer. keçi) **female goat**

'azzita n.f. **female goat**

*jaðya* n.m./f. **young goat (male and female)**

### Oxen and Cows

+*bukra* n.m. (pl. +*bukra*) **herd of cattle**

*tora* n.m. (pl. *tora*) **ox**

*tavərta* n.f. (pl. *tavəryatə*) **cow**

*šarxa* n.m. (pl. *šarxə*) **calf up to 2 years old** (Sal, Gaw. *šərxa*)

*šarəxta* n.f. (pl. *šarəxyatə*) **heifer up to 2 years old** (Sal, Gaw. *širəxta*)

*muja* n.m. (pl. *muja*) **calf from 2 to 4/5 years old**

### Asses

*xmara* n.m. (pl. *xmarə*) **ass**

*xmarta* n.f. **female ass**

*curra* n.m. (pl. *curra*) (Pers. kurra) **young ass (up to 2 years old)**

+*jaša* n.m. (pl. +*jašə*) (Arab. jahš) **young ass (3–4 years old)**

### Horses

*suysa* ~ *suysə* n.m. (pl. *suysavatə*) **horse**

*susta* n.f. **mare**

+*zaya* n.m. (pl. +*zayə*) **young horse (up to 2 years old)**

*bərya* (m.), *bəryita* (f.) **young horse (up to 2 years old, after it has been**

**weaned up to the time you can ride it)**

+*bukrət suysavatə* n.m. **stud of horses**

+*katər* n.m. (fs. +*katərtə*, pl. +*katırə*) (Azer. qatır) **mule**

### Buffaloes

*jammışə* n.pl. **buffaloes**

*calla* n.m. (pl. *callə*) (Azer. kəl) **male buffalo**

*jeməšta* n.f. (pl. *jeməşyatə*) **female buffalo**

*jadaya* n.m. **young buffalo (up to 2 years old)**

*calija* n.m. **young buffalo (from 2 years old until adult)**

*yavarta* n.f. **young female buffalo (up to 2 years)**

+*bukrət* +*jammuş* n.m. (Azer. camış) **herd of buffaloes**

## Dogs

- calba* n.m. (pl. *calba*) **dog** (Sal, Gaw. *cəlba*)  
*caləbta* n.f. **female dog** (Sal, Gaw. *cəlibta*)  
*çurçila* n.m. (pl. *çurçila*) (Kurd. *ḳurṭ* ‘short’) **puppy dog**

## Lions

- 'arya* n.m. **lion**  
*'aryita* n.f. **lioness**  
*jurya* n.m. (pl. *jurya*) **lion cub**

## 15.2.34 Birds

- +terə* n.m. (pl. *+terə*) **bird**  
*paraxta* n.f. (pl. *paraxyata*) **flying creature**  
*+repa* n.m. (pl. *+repə*) *+repət +terə* **flock of birds**  
*+rayəp/+rāp* I (vn. *+ryapta*) **to flock** | *+terə +raplun* The birds flocked  
*+zaya* n.m. (pl. *+zayə*) **young bird**  
*+nəšra* n.m. (pl. *+našra*) **eagle**  
*+nəssa* n.m. (pl. *+nəssə*) **sparrow-hawk**  
*+terlan* n.f. (pl. *+terlanə*) (Azer. tərlan) **hawk (used for hunting)**  
*+bazza-kesə* n.f. (pl. *+bazza-kesə*) **woodpecker**  
*+čučana* n.f. (pl. *+čučana*) (cf. čočeta to twitter) **magpie**  
*kukku* n.f. (pl. *kukkuyə*) **cuckoo**  
*+karuvva* n.m. (pl. *+karuvvə*) **cock, rooster**  
*cteta* n.f. (pl. *ctayata*) **chicken, hen** (Sal., Gaw. *ctayya*)  
*hənduška* n.f. (pl. *hənduškə*) (Azer. hinduşka) **turkey**  
*+tavus-kuši* n.m. (pl. *+tavus-kušiyə*) (Azer. tovuz quşu) **peacock**  
*+terət malca Šlimun* n.m. **King Solomon's bird**  
*+urva* n.m. (pl. *urvə*) **crow**  
*bavəcca, babəcca* n.m. (pl. *bavəccə, babəccə*) **male sparrow**  
*+bazza-jozə* n.f. (*+bazza-fozə*) **type of bird that eats nuts**  
*bulbul* n.f. (pl. *bulbuylə*) (Azer. bülbül, Pers. bolbol) **nightingale**  
*buyma* n.f. (pl. *buymə*) **owl**  
*cačrakuš* n.f. (pl. *cačrakušə*) **small coloured bird**  
*čačkurka* n.m. (pl. *čačkurkə*) **a small bird**  
*cəccərtə* n.f. **small type of sparrow**  
*corcor* n.m. **hawk**  
*janva-nuynə* n.f. (pl. *janva-nuynə*) **kingfisher**  
*jaxucət miyya* n.m. **type of water-bird (literally: laugher of the water)**  
*jurjuyma* n.f. (pl. *jurjuymə*) **turtledove; wood pigeon** (Sal, Gaw. *jurjuğma*)  
*karǵa* (N), *+karǵa* (S) n.f. (pl. *karǵə*) (Azer. qarǵa) **crow** (Sal. and Gaw. čərǵa)

- +kazalağ* n.f. (pl. *+kazalağə*) (Pers. گازالاگ) lark  
*+kelankuş* n.m. (*+kelankuşə*) bee-eater bird  
*kəkvana* n.f. (pl. *kəkvana*) partridge  
*kumri* n.f. (pl. *kumriyyə*) (Pers. qumrī) large dove  
*kupşina* n.f. (pl. *kupşinə*) quail  
*laflaj* n.f. (pl. *laflajə*), *+haji-laflaj* n.m. (pl. *+haja-laflajə*) (Azer. leyłek, Pers. laklak) stork  
*laqla-kəssə* n.f. (pl. *laqla-kəssə*, but *laqla-kəssiyə* if in separate groups) wild goose; crane | *labəl +xabra +mamṭi ka-xəzmanan!* Take news to our relatives (said to the wild geese when flying overhead)  
*+sakkav* n.f. (pl. *+sakkavə*) (Pers. saqqā) pelican  
*mandi-+fəztu* n.f. bird that throws its behind upwards  
*milaloc* n.f. blue-bellied roller  
*'ordac* n.f. (pl. *'ordajə*) (Azeri ördək) duck  
*+sona*, *+sonordac* n.m. (pl. *+sonordajə*) (Azer. sona + ördək) drake  
*+vaza* n.f. (pl. *+vazə*) (small) duck  
*+karabattux* n.f. (pl. *+karabattuyxə*) (Azer. qara 'black' + Pers. batak < Arab. 'duckling') small black duck  
*+kaza* n.f. (*+kazə*) (Azer. qaz, Pers. گاز) goose  
*+kazalaxta* n.f. bird with large horn-like growth on head  
*puçpu* n.f. (pl. *puçpuñyata*, *puçpuuya*) (Azer. hop-hop, Armenian hopop) hoopoe  
*səpra* n.m. (pl. *səprə*) sparrow, species of sparrow (Sal. and Gaw. *sipərra*, +Mawana *süpra*)  
*səppərtə* n.f. (pl. *səprə*) female sparrow (Sal. and Gaw. *sipərtə*, +Mawana *süppürta*)  
*smukta* n.f. (pl. *smukyatə*) flamingo  
*snunita* n.f. (pl. *snuniyyatə*) swallow (Gaw. *susuniyya*)  
*yonə* n.f. (pl. *yonatə*) dove  
*šupnina* n.m. (pl. *šupninə*) turtledove (m.)  
*šupnəntə* n.f. (pl. *šupnənyatə*) turtledove (f.)  
*şxurta*, *şuxxurta* n.f. (pl. *şxuryatə*) blackbird  
*xadxiza ~ xaxiza ~ xaziza* n.f. (pl. *xadxiza*, *xaxizə*, *xazizə*) canary  
*+yahuya* n.f. (pl. *+yahuyə*) type of small bird  
*yoşa* n.f. (pl. *yoşə*) bustard  
*kupta* n.f. (pl. *kupyatə*) large owl, eagle owl  
*bujma* n.f. (pl. *bujma*) type of owl

### 15.2.35 Insects

*bajujə* n.pl. insects

*şəcvana* n.m. (pl. *şəcvanə*) ant

- ‘akərvə* n.f. (pl. *‘akərvə*) **scorpion** (Sal., Gaw. *‘ikərvə*)  
*+zakra-jardə* n.f. (pl. *+zakra-jardə*) (lit. ‘weaver of webs’) **spider**  
*+azla-cuyşə* n.f. (pl. *+azla-cuyşə*) (lit. ‘weaver of webs’) **spider** (Sal., Gaw.  
*+azla-cugşə*)  
*jarda* n.m. (pl. *jarda*) **net; spider’s web**  
*jarda-kuti* n.f. (pl. *jarda-kutiyə*) **spider’s web, cobweb** (< *jarda* ‘net’ + *kuti*  
‘spider web’)  
*dədvə* n.m. (pl. *dədvə*) **fly**  
*dədvət jumla* n.m. **firefly**  
*dəbburta, dəbbur* n.f. **gadfly; hornet**  
*bakta* n.f. (pl. *bakyata*) **mosquito**  
*mağmaç* n.f. (pl. *mağmaçə*) (cf. Kurd. mixmixk) **small mosquito, gnat, midge**  
(Sal, Gaw. *məkməç*)  
*+səsra* n.m. (pl. *+səsra*) **cricket; grasshopper**  
*kəmsə, +kəmsə* n.m. (pl. *kəmsə, +kəmsə*) **locust, grasshopper; dragon-fly**  
*parxanita* n.f. (pl. *parxanyatə*) **butterfly**  
*pərpərra* n.f. (pl. *pərpərrə*) **butterfly**  
*pərpərru* n.f. **butterfly**  
*parxa-lelə* n.f. (pl. *parxa-lelə*) **bat; butterfly** | also called *parxa-lelət jəldə*  
*jejaķuşə* n.f. (pl. *jejaķuşə*) (Azer. gecəqusu) **bat**  
*kalma* n.f. (pl. *kalna*) **louse** | *kalmat* *ilanə* green flies; *kalmat taxta* weevil  
*navə* n.pl. **nits**  
*+pərčana* n.m. (pl. *+pərčanə*) **flea**  
*+zarkəttə* n.m. (pl. *+zarkəttə*) **wasp** | *+zarkəttət xmara* black wasp (lit. ‘wasp  
of the ass’); *+zarkəttət suysa* red wasp (lit. ‘wasp of the horse’) (Sal., Gaw.  
*+zərkəttə*)  
*dabaşa* n.m. (pl. *dabaşə*) **bee**  
*pasusa* n.m. (pl. *pasusə*) **beetle; cockroach**  
*mreta* n.f. **moth, moths**  
*‘urxət +xalu* n.f. (pl. *‘urxət +xalu*) **ladybird** (lit. ‘way of the uncle’—children  
were told that if they made it fly their uncle would come)  
*+mamtiyya-məšməşə* n.f. (pl. *+mamtiyya-məšməşə*) **coloured flower beetle**  
(lit. ‘ripener of apricots’—since it shows when apricots are ripe)  
*čaçurça* n.m. (pl. *čaçurçə*) **locust** | *čarçurça kina* praying mantis  
*janna* n.f. (pl. *jannə*) (Azer. gənə) **tick**  
*+təvvəlla, +tuvvulla* n.m. (pl. *+təvvəlla, +tuvvulla*), *+təvvəlta, +tuvvulta* n.f. (pl.  
*+təvvəlyata, +tuvvulyata*) **worm**  
*+tuvvultət +karra* n.f. **short flat tapeworm**  
*+tuvvəllət brisəm* n.m. **silkworm; caterpillar**  
*kurkana* n.m. (pl. *kurkana*) **long stomach-worm**

*'arpi-'aklə* n.f. (pl. *'arpi-'aklə*) (cf. Azer. *kərx-ayax* forty legs) **centipede**  
*'alpa-'aklə* n.f. (pl. *'alpa-'aklə*) **millipede**  
*+karta-'kuyčə* n.f. (lit. 'biter of vulvas') **earwig** | seen in particular on *varazanə*  
 (slope of earth at the end of a field for drying grapes) (Gaw. *+karta-kubiyyə*)  
*+zallu* (N), *zallu* (S) n.f. (pl. *+zallunyata*) (Azer. *zəli*, Pers. *zälü*) **leech** (Sal. and  
 Gaw. *+zallu*)

### 15.2.36 *Fish and Amphibious Creatures*

*nuyna* n.f. (pl. *nuynə*) **fish**  
*+cəxlanta* n.f. (pl. *+cəxlanyata*) n.f. **trout**  
*nuynət səmbuyłalə zarda* n.f. **catfish**  
*nakka* n.f. (Azer. *naqqabaliq*) **sheatfish, shark, beluga (great sturgeon); whale**  
*nuynət pəkkakə* n.pl. **small river fish**  
*saribalx* n.f. (Azer. *sarı* 'yellow' + *baliq* 'fish') **yellow fish**  
*pəkkə* n.f. (pl. *pəkkakə*) **frog**  
*nuynət calba* n.f. (pl. *nuynət calba*) **tadpole**  
*+kraya, +kra* n.m. **turtle; tortoise**  
*kəržala* n.f. (pl. *kəržalə*) (Kurd. *kevjal*, Azer. *xərçəng*) **crab**  
*xərzə* n.pl. **eggs of fish, frogspawn**

### 15.2.37 *Parts of Animals*

*tuþra* n.m. (pl. *tuþrə*) **tail**  
*+þuza* n.m. (pl. *+puzə*) (Pers. *pūze* 'snout'; Kurd. *poz* m. 'nose, snout') **snout (of animal), beak (of bird), sting (of bee or wasp)** | *+þuza čumbəlla*  
 hooked beak  
*+nakruza* n.m. (pl. *+nakruzə*) **beak**  
*+nəpruza* n.m. **beak**  
*'anya* n.m. (pl. *'anyə*) (Pers. *anj*) **jaw (of human and animal)**  
*+xərtum* n.f. (pl. *+xərtuymə*) (Arab. *xurṭūm?*) **gizzard**  
*psurta, pussurta* n.f. **stomach of cow; crop of bird**  
*cətva* n.m. **prickle, thorn, needle, sting** | *cətvət dabaşa* bee-sting, *cətvət*  
*+zarkəttə* wasp-sting  
*+tata* n.f. **crest of flesh or feathers** | *+tatət +karuvva* comb of a cock  
*bəzza* n.m. (pl. *bəzzazə*) **teat; breast**  
*luya* (Ardishay *lucta*, Gulpashan *lučta*, Abdallakande *luxta*, Sal. and Gaw.  
*luxta*) n.f. **udder** (Sal., Gaw. *luğta*)  
*'eləcta, 'elita* n.f. (pl. *'eləcyata*) (1) **fat of sheep's tail.** (2) **udder** (in some S  
 villages, e.g. *+Satluvvə*) | *'eləctət tavərta* udder of cow (*+Satluvvə*) (Sal., Gaw.  
*'elita*)

*čapulta* n.f. paw

*səmma* n.f. (pl. *səmma*, *səmmatə*) hoof

*šubba* n.f. (pl. *šubbə*) sheepskin, fleece

*+yāl* n.m. (pl. *+yalə*) (Azer. *yal*) mane (of horse)

*+sarət suysa* n.m. hair of horse, mane of a horse

*+məsta* n.f. animal hair

*kana* n.f. (pl. *kananə*) horn

*pullaca* n.pl. (sing.f. *pullacta*) scales of fish

*šulluxta* n.f. shed snake's skin

*purčuta* n.f. bone protruding at back of horses' foot

*+p̄čuyrə* pl. (sing. *+p̄čuyra*) ankle bones of sheep used in games (Sal. Gaw.

*+p̄čuğrə*)

*balkə* n.pl. spots (on skin, e.g. of a leopard)

*kalpat +kraya* n.m. shell of a tortoise

*+kuturta* n.f. (pl. *kuturyata*) hump (of camel)

### 15.2.38 Animal Droppings

*čuvvə* pl. animal droppings (general term)

*varvarta* n.f. watery excrement

*purta* n.f. (pl. *p̄uryata*) droppings of sheep

*+pałuxta* n.f., *+pałuxa* n.m. (pl. *+pałuxə* collective, *+pałuxyata* perceptible individual pieces) dried piece of natural solid excrement of animals used as fuel

*camrə* n.pl. (sing. *camra* m.) dried animal dung used as fuel for fire, compressed by stamping down in an area known as *sulta*

*pān* n.m. very fine dried droppings spread on floor as a surface for animals to sleep on

*dəkka* n.f. small dry piece of dung (larger than *pān*) used for fuel

*cərsəlla* n.pl. hard dung of animals (which are excreted hard)

*curta* n.f. pile of *+pałuxə* (cakes of dung)

*sulta* n.f. area in which dried animal dung known as *camrə* is compressed by stamping it down in order to prepare it for fuel

### 15.2.39 Accoutrements of Animals

*sarja* n.m. (pl. *sarjə*) saddle; saddle of horse for carrying goods; wooden frame of churn (+*meta*)

*+palan* n.m. (Azer. *palan*) pack-saddle for ass consisting of pannier bags of tough cloth; blanket on back of ass

*došeca* n.f. (pl. *došecə*) (Kurd. *doşeg*; Azer. *döşək*) small mattress under saddle on *+palan* (Gaw. *doşayča*)

*tasma* n.f. (pl. *tasmatə*) (Pers. tasme) strap for securing cloth; collar of animal

+*nala* n.m. (pl. +*nalə*) horseshoe

+*čulla* n.m. (pl. +*čullə*, +*čullalə*) (Azer. çul) horse-blanket

*zanjulta* n.f. (pl. *zanjulyatə*) (Azer. üzəngi) stirrup

*rica* n.m. (pl. *rica*) spur (Sal. +*bar-zuvva*)

+*jəllav* n.m. (Azer. cilov, Pers. jalaw) reins of horse; harness; rope for leading animal

*jozlaç* n.f. (Azer. gözlük) eye-patch of horse, blinkers

+*məxla* n.m. fodder for animals

#### 15.2.40 Metals

*prəzla* n.m. iron

+*pulad* n.m. (Azer. polad < Arab.) steel

*sima* n.m. silver

*dava* n.m. gold

*juvva* n.m. (Azer. civə, Pers. žīve) mercury, quicksilver

*mīs* n.m. (Azer. mis, Pers. mes) copper

*tanica* n.m. (Kurd. teneke) tin

*kurkuşun* n.m. (Azer. qurğuşun) lead (metal)

#### 15.2.41 Sounds of Animals

+*barbər* QI (vn. +*barbarta*) to roar (lion); to low (oxen)

*navəx* I (vn. *nvaxta*) to bark (dog)

*nañnañk* QI (vn. *nañnakta*) to grunt (pig)

*zoza* QI (vn. *zozeta*) to howl (wolf, jackal)

+*fayyə* I (vn. +*fyeta*, prog. +*bəffaya*) to bell (stag)

+*karkər* QI (vn. +*karkarta*) to caw (crow)

+*katkət* QI (vn. +*katkatta*) to cluck (hen)

*kapkəp* QI (vn. *kapkpta*) to cluck (hen)

*kokə* QI (vn. *koketa*) to croak (frog)

+*kaxkəx* QI (vn. +*kaxkaxta*) to honk (goose); to cackle (partridge, turkey)

+*moma* QI (vn. +*mometa*) to purr, to mew (cat)

+*marmər* QI (vn. +*marmarta*) to whine (cat)

+*narnər* QI (vn. +*narnarta*) to bellow (buffalo)

*þoþə* QI (vn. *þoþeta*) to bleat (sheep); to growl (rabbit)

+*sarsər* QI (vn. +*sarsarta*) to chirp (cricket); to roar (lion)

+*vasvəs* QI (vn. +*vasvasta*) to squeak (mouse)

+*vazvəz* QI (vn. +*vazvazta*) to buzz (bee)

+*zarzər* QI (vn. +*zarzarta*) to bray (donkey, ass); to utter a loud harsh cry

*harhəm* QI (vn. *harhamta*) **to neigh (horse)**  
*čočə* QI (vn. *čočeta*) **to twitter (bird)** (Sal., Gaw. *čavčəv*)  
*jojə* QI (vn. *jojeta*) **to coo (doves); to prattle, to babble (inarticulately)**  
*vajvəj* QI (vn. *vajvajta*) **to coo (turtledove)**  
*jarjəm* QI (vn. *jarjamta*) **to coo (turtledove *furyuyma*); to thunder;**  
*vakvək* QI (vn. *vakvakta*) **to quack (duck)**  
*mašrək* III (vn. *mašrakta*) **to hiss (snake)**  
*čakčək* Q (vn. *čakčakta*) **to chatter; to prattle; sound made by a stork**  
<sup>+</sup>*karə* I (vn. <sup>+</sup>*kreta*) **to call (cock)**

#### 15.2.42 Bees

*dabašə* n.m. (pl. *dabašə*) **bee**  
<sup>šəlxət</sup> *dabašə* n.m. **swarm of bees**  
*šana* n.f. (pl. *šanatə*) (Azer. şan; Pers. şane) **honeycomb** (Gaw. *patacta*)  
*tappactət* *dabašə* n.f. **bees' nest**  
<sup>kuypət</sup> *dabašə* n.m., <sup>+</sup>*kərtəlat* *dabašə* n.f. **beehive**

#### 15.2.43 Dairy Products

<sup>+</sup>*xalva* n.m. **milk**  
<sup>+</sup>*xlota* n.f. **dairy products**  
*zama* n.m. **dairy product**  
*jira* n.m. **top of unboiled milk**  
*kurrušta* n.f. **top of boiled milk (*patət* <sup>+</sup>*xalva*) or yoghurt; cream; sour cream**  
<sup>+</sup>*carra* (N.), *carra* (S.) n.m. (Azer. kərə, Pers. kara) **butter** (Sal., Gaw. <sup>+</sup>*carra*)  
*juptə* n.f. (pl. *jupyatə*) **cheese**  
*masta* n.f. **yoghurt**  
*xmira* n.m. **yeast**  
<sup>+</sup>*xəmsa* n.m. **starter for yoghurt**  
*marrə* III (vn. *marreta*) **to set (tr. and intr.) (yoghurt, boiled milk) | masta**  
<sup>murritəla</sup> The yoghurt has set  
*marreta* n.f. **rennet; yoghurt culture**  
<sup>+</sup>*maya* n.m. **rennet; yoghurt culture**  
*yəmmət jubta* n.f. **cheese culture**  
<sup>+</sup>*kətpə* n.pl. **whey, liquid that drains from churned yoghurt**  
<sup>+</sup>*davvə* n.pl. (Kurd. dew) **buttermilk, liquid of churned yoghurt, which separates from the butter (<sup>+</sup>*carra*) | buşalət <sup>+</sup>*davvə* stew made of buttermilk**  
<sup>+</sup>*kattəj* n.m. (with pron. suffix *kattiği*, *kattgxux*, etc.) **white cheese that is left after draining the liquid (<sup>+</sup>*kətpə*) from buttermilk (<sup>+</sup>*davvə*) (Sal. *štukə*)**  
*cəsta* n.f. (pl. *cəsyatə*) **bag for draining churned yoghurt**

*jajəc, jaji* n.m. (Turk. cacik, Azer. caci) dairy product made by boiling *kattəj* with added water, salt, herbs (e.g. <sup>+</sup>*tolə* coriander, <sup>+</sup>*oryanə* basil), pepper and butter (<sup>+</sup>*carra*)

<sup>+</sup>*baʃuvva* n.m. (pl. <sup>+</sup>*baʃuvvə*) flake of baked bread on floor of oven

<sup>+</sup>*lavaʃə* n.pl. (sing. <sup>+</sup>*lavaʃta*) (Azer. *lavaş*) thin breads baked on hot plate

<sup>+</sup>*sāj* n.m. (pl. <sup>+</sup>*sajə*) (Azer. *saç*) large hot plate for baking <sup>+</sup>*lavaʃə* | <sup>+</sup>*aʃklət* <sup>+</sup>*saj* trivet

*ʃərdəta, ʃərdeya* n.f. (pl. *ʃərdeyə*) (Pers. *gerde*) thick round bread

*čundə* n.pl. large flat breads

*čuyta* n.f. bread made from maize

<sup>+</sup>*paʃira* n.pl. (sing. <sup>+</sup>*paʃira*) large round flat bread baked on coals

<sup>+</sup>*jalla* n.m. (pl. <sup>+</sup>*jallə*) bread filled with kidney beans

*pačućta* n.f. small flat bread, pita

*ceca* n.m. (pl. *ceçə*) cake

*cadə* n.pl. cakes with sweet filling (*mərtuxa*)

*mərtuxa* n.m. filling of cakes (*cadə*) consisting of flour, butter and salt

*šacar* n.m. (Azer. *şəkər*) refined sugar

*kand* n.m. (Azer. *qənd*) loaf sugar

*cunda* n.m. (pl. *cundə*) ball of dough

<sup>+</sup>*lumba* n.m. (pl. <sup>+</sup>*lumbə*) lump | *škulxa* +*lumba mən da cunda* Take a lump from that ball (of dough)

<sup>+</sup>*dorana* n.m. (pl. <sup>+</sup>*doranə*) **rolling pin**

<sup>+</sup>*kərnac* n.m. **rolling pin (Armenia)**

*taleta* n.f. (pl. *talayatə*) **basket hung up for bread (to stop mice getting to it)**

*kərzənka* n.f. (pl. *kərzənķə*) (Russ. карзинка) **wicker basket for bread and fruits**

#### 15.2.45 *Other Foods*

*xurac* n.f. (pl. *xurajə*) **food (Pers. xorāk)**

<sup>+</sup>*spira* n.m. (pl. <sup>+</sup>*spirə*) **omelette (Sal, Gaw. <sup>+</sup>*spera*)**

<sup>+</sup>*xala* n.m. **vinegar**

*zeta* n.m. (pl. *zeta*) **olive; olive oil, vegetable oil**

*zetətjuna*-<sup>+</sup>*baxan* **sunflower oil**

*məšxa* n.m. **oil**

*kalya* n.m. **preserved meat cooked in oil**

*čəzva* n.m. (pl. *čəzvə*) **rendered fat of tail used for cooking**

*yaxni* n.f. **stew of meat and vegetables**

<sup>+</sup>*surva*, <sup>+</sup>*sorva* n.f. (Azer. şorba) **stew | often contains partridges (*kupśinə*)**

includes potatoes (<sup>+</sup>*kərłopə*), split peas (*lappə*), chickpeas (<sup>+</sup>*xərtmənə*) and spices (*pərxə*)

*cəptə* n.f. (pl. *cəptiyə*) **meat-ball, ball of minced meat**

<sup>+</sup>*tuyata* n.pl. (sing. <sup>+</sup>*tuvita*) **roasted meat on skewers**

*harisa* n.f. (Pers. harīse < Arab.) **dish consisting of meat, boiled crushed wheat, butter and spices (more cooked than *haləm*)**

*haləm* n.f. (Pers. halim) **dish of huskless corn and meat (less cooked than *harisa*)**

*catleta* n.f. (pl. *catleta*) **meat cutlet**

*dolmə* n.pl. **stuffed vine-leaves or cabbage-leaves | dolmət ranjə** stuffed peppers

*xurruş* n.f. (Azer. xuruş < Pers.) **stew made of meat and string beans (*lubyə*)**

<sup>+</sup>*rəzza* n.m. **rice | <sup>+</sup>*rəzza smuķa* rice cooked with tomatoes (= <sup>+</sup>*rəzza* <sup>+</sup>*əstambulli*)**

<sup>+</sup>*halva* n.m. **sweet consisting of *məšxa*, *kamxa* and *nipuxta***

*riş-aklə* n.f. **stew containing bones**

*puxun* n.f. (pl. *puxuynə*) **wheat-meal; coarse flour (made of a mixture of seven grains according to what is available, e.g. wheat, rice, beans, chickpeas)**

*rəcta* n.f. **flat noodles (made of eggs and flour)**

<sup>+</sup>*əlləx* adj.invar. (Azer. iliq 'softly' [boiled]) **soft-boiled (egg) | <sup>+</sup>*bijya* <sup>+</sup>*əlləx* soft-boiled eggs (cf. <sup>+</sup>*bijya* <sup>+</sup>*xlisə* hard-boiled eggs)**

- +xl̥isa* adj.m. (fs. *+xl̥esta*) **tight; hard** (egg) | *+biyyə +xl̥isa* hard-boiled eggs  
*zarda* n.m. **yoke** | *zardət +bita* the yoke of an egg  
*+xvarət +bita* **white of an egg**  
*nipuxta* n.f. **cooked molasses**  
*+maxvərrana* n.m. **whitening agent (used in the preparation of *nipuxta*)**  
*šıra* n.m. (Pers. šīre) **grape juice**  
*šila* n.f. (Azer. şılə) **cooked rice or wheat with meat or oil** | *šilət +xalva, šıl-*  
     *+xalva* rice-pudding  
*+data* n.f. **chewing gum** | *vardət +data* flower that produces gum  
*+hasida* n.m. **sweet cake filling**  
*zəlpə* n.pl. **cooked quince**  
*+qaxə* n.pl. (Azer. qax) **dried fruit** (Gaw. zəlpə)  
*+xvisə* n.m. **bread fried in butter; hot bread cut up with butter added; cake made of flour and honey**  
*rijul* n.f. (pl. *rijulya*) (Azer. riçal) **jam** | *rijuylət +karra* pumpkin jam  
*+murabba* n.f. (Azer. mürəbbə, Pers. morabba < Arab.) **jam, preserve**  
*burani* n.f. **dish consisting of pumpkins (or potatoes or tomatoes or beans or beetroot) with garlic, curdled milk and butter**  
*buşala* n.f. **stew**  
*şarva* n.f. **soup**  
*+zād* n.f. **soup**  
*+turşiyə* n.pl. **pickles**  
*+čay* n.m. **tea**  
*kava* n.m. **coffee**  
*+xamra* n.m. **wine**  
*durd* n.f. (Pers. dord) **dregs (liquid, such as wine, food)**  
*xəlt* n.f. (Azer. xilt) **sediment, dregs, lees; dross (separate solid items, such as stones)** | *xəltət +xamra* lees of wine; *xəltət +xala* dregs of vinegar

#### 15.2.46 Meals

- +tamta* n.f. (pl. *+tamyata*) **breakfast**  
*+cavutra* n.f. (pl. *+cavutra, +cavutranə*) **lunch**  
*+şaruta* n.f. (pl. *+şaruyatə*) **light afternoon meal (5pm approx.)**  
*+xa-+ramšə* n.f. (pl. *+xa-+ramşanə*) **dinner, supper**

#### 15.2.47 Clothes

- čacma* n.f. (pl. *čacmə*) (Azer. çəkmə, Pes. čakme) **boot**  
*čaruyxə, čarixə* n.pl. (sing.f. *čaruxta, čarəxtə*) (Kurd. çarox, Azer. çarıq) **light leather sandals**  
*ķalošə* n.pl. (sing.f. *ķalošta*) (Azer. qalos) **snow boots**

- čunniyyə* n.pl. (sing. *čunnita*) **short rubber boots**
- +kapkapa* n.pl. (sing.f. *+kapkapa*) **shoes with wooden soles**
- jivi* n.f. (pl. *jiviyə*) **type of light shoe with laces**
- yamani* n.f. (pl. *yamaniyyə*) **leather flat shoes without laces or heel**
- +solə* pl. (sing. *+savolta*) **modern shoes**
- tasma* n.f. (pl. *tasmata*) (Pers. tasme) **strap (of shoes); belt**
- ʃdalə* n.pl. (sing.m. *ʃdala*) **laces, strands** | *ʃdalət +solə* **shoe laces**
- +kaytanə* pl. (sing. *+kaytan*) (Azer. qaytan) **cotton or silk lace**
- kəmpa* n.m. (Pers. qonnab) **hemp** | used for cloth and cordage, such as laces  
for boots, *ʃdalət kəmpa* hemp laces
- +jərvə* n.pl. (sing. *+jərvita*) **sock**

*mašxuna* n.m. (pl. *mašxunə*), *mašxunta* n.f. (pl. *mašxunyatə*) **foothill, slope**  
(Gaw. +*ṭəllana*)

*kačra* n.m. (pl. *kačrə*) **ridge of a mountain**

+*xasət +ṭuyra* **plateau of mountain**

+*avura* n.m. (pl. +*avurə*) **mountain pass**

*jaduc* n.f. (pl. *jaduyjə*) (Azer. gədik) **mountain pass**

+*ravula* n.m. (pl. +*ravulə*) **valley**

*dara* n.m. (pl. *darə*) (Pers. darre) **valley; gully**

*škipa* n.m. (pl. *škipə*) **canyon**

- dəšta* n.f. (pl. *dəšyatə*) (Kurd. deşt, Pers. dašt) **plain, open ground, level ground, open fields**
- +*mašṭaxa* n.m. **flat area, plain**
- +*arrā duz* n.f. **flat land**
- ječay* n.f. (pl. *ječayə*) (Azer. keçid) **pass, crossing, ford, cross bar (across a river or across a ditch)**
- +*ašita* n.f. (pl. *ašiyatə*) **avalanche** (Sal., Gaw. +*ašiyya*)
- +*ayna* n.f. (pl. *aynatə*) **spring of water**
- nara* n.m. (pl. *naravatə*) **river**
- yama* n.f. (pl. *yamatə*) **sea**
- yamta* n.f. (pl. *yamyatə*) **lake**
- jol* n.f. (pl. *jolavatə*) (Azer. göl) **(natural) pool, pond**
- šakita, šakiyya* n.f. (pl. *šakiyyatə*) **stream, irrigation channel**
- +*šoršora* n.f. (+*šoršorə*) **waterfall**
- partalta* n.f. (pl. *partalyatə*) **whirlpool**
- kubi* n.m. (pl. *kubiyə*) **wetland; moorland**
- jəppa* n.m. (pl. *jəppə*) **cave**
- jəppita* n.f. (pl. *jəppiyatə*) **small cave**
- +*čalə* n.f. (pl. +*čalavatə*) (Azer. çala, Pers. čale) **hole, pit**
- +*čəkkurta* n.f. (pl. +*čəkkuryatə*) (Azer. çukur) **hole, hollow | smaller than +*čala***
- +*rodana* n.m. (pl. +*rodanə*) **earthquake**

#### 15.2.50 *The Night Sky*

- +*sara* n.m. **moon**
- cuxva* n.m. (pl. *cuxvə*) **star**
- šəmši-+*sara* n.f. **moonlight**
- ’urxətjinavə n.f. **the Milky Way (lit. the way of thieves)**
- dəbba* +*furla* n.f. **Ursa Major**
- dəbba surta* n.f. **Ursa Minor**
- cuxvət* +*sliva* n.m. **Crux, the Southern Cross**
- cuxvət* +*jarbiyya* n.m. **the North Star (Pole Star)**
- cuxvət mórişa* n.m. **the morning star | also known as Majnun**
- cuxvət* +*accarə*, *cuxvət* +*bağyanə* n.m. **farmers' star | also known as Leyla**
- cima* n.f. **the Pleiades**
- burja* n.m. (pl. *burjə*) (Pers. borj < Arab.) **zodiac**
- maseta* n.f. **Libra**
- ’əzza n.f. **Capricorn**
- ’akərva n.f. **Scorpio**
- jamma* n.pl., *jamməccə* n.pl. **Gemini**

*cuxva* *+majrəttana* n.m., *cuxvət* *+susyanə* n.m. comet

*cuxva* *+jaryana* n.m. meteor

### 15.2.51 *The Weather*

*+muṭra* n.f. (pl. *+muṭratə*) rain

*+muṭra* *+naxlanta* n.f. light rain

*+muṭra* *+śaršərranta* n.f. torrential rain

*sēl* n.f. (Pers. *sēl* < Arab.) flood, spate, heavy rain

*+muṭra* *+haravaš* n.f. spring rain

*+muṭra sivatta* (< *sivadta* < Azer. *sivad*) late rain

*tantasta* n.f. drizzle | *dula tantusə* it is drizzling

## A1      The Bald Man and the King (Yulia Davudi, +Hassar +Baba-čanja, N)

(1) I shall tell you this story. It is (as follows): There was a bald man in a town. There were many bald men. There were nearly ten bald men. They had a wooden horse beneath them. They used to strike it (while) they ran from this side to that side, from this side to that side, and (while) they used to shout<sup>1</sup> '*nu bubəška! nu bubəška!*' as if they were riding a (real) horse. (2) Now, they used to go and take protection money from people. They used to gather protection money from shops. They used to live by this. Now, the elder of the bald men, the elder of the bald men, that is he was the head of their gang, he was higher (in rank) than the others. He went to a merchant. The merchant used to like this bald man very much. He liked him very much. You know what a merchant is, right. He used to like this bald man very much. He went to him to take money. In the early morning they used to get up, before people went to work, to take their money from them, the people used to give them protection money. They used to take money, go off and live by it. (3) On that day the bald man went to the merchant. He said to him, the merchant said to the bald man, 'I am going to Mecca.' Do you know what Mecca is? The Muslims go to Mecca, Medina, Mecca, pilgrimage. He said 'I am going to Mecca for two months, and the money of two months I shall give to you, and more too, but keep your eye on my belongings, my livelihood. When I come back and return, I shall give you a great deal.' (4) He said 'Very well' and left him with (a greeting of) peace. They kissed each other. The bald man went (on his way) and the merchant went home. The merchant had a very beautiful wife. He thought about where he could he put this wife of his so his thoughts could be at peace. He thought a lot. He said 'I have a friend. He is a pilgrim. He too has gone to Mecca and Medina, he has gone on the pilgrimage. He is a very pious man. Everybody knows him. I will take her and place her with him.' (5) He takes his wife and he goes to the pilgrim. He says 'Pilgrim, my friend. I did not find any place to leave my wife in trust. I have brought her to you. These are a load<sup>2</sup> of gold coins for you, which, if you spend them on my wife, if they are insufficient, I shall come and pay them (back).' The pilgrim says 'Oh, very good! Your wife is like a sister of mine. I shall be very careful with her, vigilant.' He places his wife there. The merchant goes to Mecca for two months and the bald man goes to his house. They place the wife with the pilgrim.

(6) One, two, three weeks pass. The woman goes to the bathroom. The pilgrim also goes to the bathroom. He sees the woman, beautiful in her body, and he desires her. He wants to go near her. The woman does not allow it. The pilgrim became very upset and wants to force her. The woman screams. (7) She screams. Now, the pilgrim had a servant. That servant was very good. He was very faithful to the pilgrim. He goes and runs inside. He sees that the pilgrim is naked and the woman is naked. The pilgrim knows what the situation<sup>3</sup> is and says to the servant 'You can see that this woman is in a mad passion, in a mad passion, that is, she is hot (with passion), that is, she is wicked. Such women should be killed. Seize her and tie her hands. Take her outside the city into the forest and kill her.' (8) The servant is forced (to do so). He is forced to take the woman away. He ties her hands and takes her to kill her. But the woman begs very much 'Please. I plead with you don't kill me,' crying very much, falling kissing his feet (saying) 'Don't kill me. I shall give you everything you want—these clothes of mine, everything you want, my gold, I have a lot of gold, gold earrings, a golden necklace, a gold ring, take everything you want. Just don't kill me! I don't want to die.' (9) The servant feels sorry for her.<sup>4</sup> He does not kill her. He strips her clothes off, since the pilgrim had said to his servant 'Bring her bloody clothes to me.' The woman says 'I shall give you a lot of money, this ornament of mine, my ornament'—meaning 'my gold.' 'Take them away and sell them. Take a sheep, kill it, put its blood on my clothes and take it to your master.' The servant does this. He leaves the woman naked there in the forest, outside of the town. He leaves her there. The servant goes. He takes a bird and kills it. He puts the blood on her clothes and brings them to the pilgrim. He says 'I have killed her.' The pilgrim is content.

(10) The woman becomes cold there. She enters under shrubs and bark in order not to get cold. Very slowly she comes near to the town. Near the city there was a cemetery. You know what cemeteries are? They bury people in them. She goes there and huddles up. (11) The bald man is awake in the early morning. '*nu bubuška*', he is galloping with his piece of wood, the horse. He sees that it is still early. It is five o'clock. Where will he go now? He says 'I shall go ...'—pardon, 'to pass water,'—that is urinate. He went there to urinate. He saw a head going up and down, going up and down. He went a little nearer and saw that it was a person. Then, he went a little further forward. She said to him 'Please, do not come near, I am naked.' (12) He goes forward and as soon as he looks, he recognizes her. He knows that she is the wife of the merchant. He says 'Oh dear! What

has happened to her?' He says 'My sister, wait for me. I am coming back.' He sits on his horse of wood and gallops straight home. (13) He says to his mother 'Wherever you have beautiful clothes give them to me quickly!' 'May I ask<sup>5</sup> what are they for?' He says 'Don't speak, just give them. Give (me) your most beautiful dress.' She says 'What order is this? Is it the order of the king? What is it? You have taken many clothes, now, do you want to take these too from me?' He says 'Don't speak, just give them (to me).' He takes the clothes of his mother. He takes them (with him) and throws them to her. He says 'My sister, take them and put them on, (then) come after me.' (14) The woman takes the clothes and puts them on. She comes and he says 'Don't be upset. Your brother has not died. I am alive for you. Sit on my horse and I shall take you away.' She puts her leg this side and that side of the wood, they strike (the horse) and he goes home, he takes her home. He says to his mother 'Mother, get up quickly, make breakfast quickly for this lady, because my sister<sup>6</sup> has not eaten anything. Let her eat. If somebody asks you who this is, say "She is my sister." If you say that she is not, I shall cut out your tongue.' Now, the bald man—his mother knew that if he said something, he would do it. (15) She got up and prepared breakfast for her, she put on her clothes and the bald man went out. He delivered her into the care of his mother and he went out to work. He went to this shop, to that shop, to that shop. Once some time had passed, he heard that the merchant had come back. The merchant comes back and arrives at the town. He sends gifts<sup>7</sup> to the pilgrim. He sends him a very expensive present. He sends it to the pilgrim so that he will return his wife. (16) The pilgrim takes them ... the present, but there is no word about the woman. The merchant says 'Perhaps I myself should go and take something by my own hand and bring my wife back. Perhaps the custom of these people is like this.' He takes a load of beautiful things, which he has brought from Mecca, and takes them to the pilgrim. They embrace each other around the neck<sup>8</sup> and kiss one another. They sit down, drink tea and he gives the present to the pilgrim. Then he says—at that time young people did not talk much with the older people. For example, when an old person entered, you would have to get up on your feet, for your father-in-law, for your mother-in-law, for your grandfather. So he (the merchant) did not manage to talk to the pilgrim. (17) He said 'Pilgrim, I beg your pardon, I am very ashamed to say that I have come to take what I left in trust.' His trust was his wife. He said, the pilgrim began crying like this and so forth, (saying) 'What can I tell you? Your wife—I

<sup>5</sup> Literally: May I be your substitute.

<sup>6</sup> I.e. the lady.

<sup>7</sup> Literally: These—they say gifts.

<sup>8</sup> Literally: They wind themselves around each other's neck.

cannot say (it), but I must tell you that what you left in trust died.' The merchant beat his head, weeping. He kills himself (in anguish). 'What do you mean she died!?' He said 'She died. Without our permission, she went to the forest and a wolf ate her.' He weeps and weeps 'But do you not have a sign? Can you give me a sign as to how she died?' He said 'No, I have nothing of hers. She just died and I buried her. A wolf ate her.' (18) The merchant has no choice.<sup>9</sup> He goes to the king, the king. He tells the king the story. He tells his story to the king (saying) that 'I placed my wife with the pilgrim. Now I have come back to take her and he says "She has died." How could this be?' (19) The king sends for the pilgrim. He summons him and asks him about the wife of the merchant. He says 'With respect,<sup>10</sup> this is true. He placed his wife with me in trust and I looked after her like my sister, but, without my permission she went to the wood and a wolf ate her. How can I give her back?! After she has died, she has died.' The king says 'Do you have witnesses?' He says 'Yes, with respect.'<sup>11</sup> 'Who are they?' (20) He said 'There is my servant, my servant, and the judge, who works as judge for the whole town and sorts things out, and there is the mullah, and there is a butcher, a butcher, he is the head of the quarter, the street. All know that she is dead' The king says 'So, what do you want from him? After she has died, she has died. Look they are all bearing testimony.' The king called all of them there. He said 'Yes, she is dead.' They say to the lad, to the merchant 'So, (if) your wife is dead, she is dead. What do you want from him?'

(21) Here, the bald man is hearing all these things. The girl is in his house. Well, he sees what the pilgrim is doing. He sees how the country is being run. He sees how the king holds a court. He sees all these things. He hears all of them. He goes (on his way), very sad on account of the fact that there is nothing in the land that you can rely on.<sup>12</sup> (22) He goes and says to the woman, and says, he says 'I am very sorry, my sister'. He is going and saying to the wife. He says 'I very much regret my sister, your husband has come back but they have said that you have died and the king has accepted it. The pilgrim and everybody has accepted that you have died'. The woman weeps and says 'Oh please, take me to my husband.' He says 'My sister, how can I take you to your husband? Everybody knows that you are dead. If they now know that you are living with me, they will kill you, me and your husband so that their word does not turn out to be a lie. But wait, let me see what I can do.' (23) He waits and thinks a lot. Night and day he does not sleep. In the end he calls the other bald men. He

calls all the other bald men. He tells them the story of, the story of the pilgrim and the merchant and his wife. They all say 'We shall help you.' The bald men say 'We shall help you. (24) What on earth shall we do?'<sup>13</sup> He says 'Get up let's play a game.' The bald man becomes a king. The bald man, the bald man who has brought the girl becomes a king, in place of the (real) king. He makes one of the bald men a vizier. He makes one a merchant. He makes one a judge. He makes one a mullah. He makes one a butcher. He makes one a girl. He makes one a merchant whose wife is lost. He fixes all their names. He makes the name of his vizier Allah-Vardi-Khan, because the vizier of the original king is Allah-Vardi-Khan. The king is (called) king. (25) Now they play the game, according to what they have to do. They now all know what this game is, since he fixes all their names. He says to the bald men 'Be aware, take note that the king every once in a while, every so often, once every two or three months, goes out and tours around, to visit and look at his land, to tour with his vizier.' Eventually the bald men come—they look around like spies—they come to the head bald man and say 'This week the king, on such-and-such a day, at such-and-such a time, at such-and-such an hour, is going out on this journey.'<sup>14</sup> He says 'Very good. Have you all learnt your lesson?' They say 'Yes.' They all know what to do, all of them. (26) When the king sets off, they also set off. There was a house there, but it was a ruin, in which people could not live. You see (such ruins) outside, in the desert, in the wilderness there are houses that have collapsed. The bald men all go there and sit down. They wait for the king to come. He (the head of the gang) has there two bald men who act as spies (to see) at what time the king puts his foot on the roof. (27) The real king with his vizier see from afar that in that ruined house there are lanterns burning. The king says 'Who is living in that house over there, the one that is collapsed? There is nothing in it. Let's go and see what it is.' They go and reach it. These (bald men) here have all prepared themselves. These ones here all have prepared themselves. There is a window above. The king comes and places his foot there in order to look, and they begin. (28) The person who is really a bald man<sup>15</sup> is the king. He gives his vizier the name Allah-Vardi-Khan. The name of the vizier who is with the king is also Allah-Vardi-Khan. The bald man all of a sudden says 'Allah-Vardi-Khan, Allah-Vardi-Khan!' He said 'Yes, I am at your service.'<sup>16</sup> The (real) vizier above wanted to speak but the king held his mouth. He said 'Don't make a sound!'

<sup>13</sup> Literally: What shall we do? What shall we not do?

<sup>14</sup> Literally: road.

<sup>15</sup> Literally: the real bald man.

<sup>16</sup> Literally: Sacrifice, may I be your substitute.

Damn it!<sup>17</sup> Do you want them to kill us here? Look, what is happening? But is there another king in this country of mine whom I do not know? What is going on, what is happening?" (29) They look from there, but they all know that the king is above. The bald man who is the king—you know, you understand what the story is, the elder bald man has now become the king—shouts to one of his bald men who is the vizier, he shouts 'Allah-Vardi-Khan! Allah-Vardi-Khan!' The bald man comes to him, to meet him, and says 'Yes, at your service,<sup>18</sup> what do you want?' He said 'Do you remember there was a story, there was a merchant? He had placed his wife with a pilgrim. There was something like this. They came to me. They said that his wife died, but I the king, the king of this country, what an ass I was! What an ass I was! I did not ask with what (type of) death she died, how she died. I want to open this case afresh. I want to know'. (30) He says 'Yes, sir,<sup>19</sup> there was such a thing—but rather he said<sup>20</sup> 'Yes, my lord, there was.'<sup>21</sup> The bald man sends (a messenger) saying 'Go and fetch<sup>22</sup> the merchant'. One of the bald men is the merchant. You have understood, I told you previously. They are all there. They bring a bald man who is named as the merchant.<sup>23</sup> He (the king) says 'My son, forgive me, I acted weakly. You had a complaint against the pilgrim that your wife was missing, that she had died. Forgive me, pardon me. I now want to resolve the matter. What was the story?' (31) The merchant tells this again to the king. He says 'Go and sit over there.' You know how he told it, that his wife had died. The bald man puts the merchant over there. He says 'Send for the mullah.' The pilgrim, the mullah, the butcher, he brings them all there. He says 'Pilgrim, the merchant placed his wife with you. How did she die?' He said 'My lord,<sup>24</sup> she died. A wolf ate her, she died.' He said 'Go and sit over there.' The mullah comes. He (the bald man) says 'Mullah, do you know that the woman is dead?' 'Yes, my lord,<sup>25</sup> of course I know! I saw it. I have buried her myself.' 'By what kind of death did she die?' He said 'She fell from the roof and died at the bottom.' He said 'You also go over there.' (32) The butcher comes. He also says 'Yes, my lord,<sup>26</sup> I saw that she died, but I saw that she fell into the

pool and drowned.' The other one, the mullah, says—he (the bald man) says 'What do you (have to say)?' He says 'I saw that the woman had a great fever. She had a great fever and died.' He puts them all over there and says 'You sit over there.' (33) He says 'There is here another man, who is better (qualified) to give us a report. He is the servant of the pilgrim. Bring the servant here. Bring the servant here'. One of the bald men was the servant. The servant comes and says 'Yes, my lord, at your service,<sup>27</sup> what do you want?' He says '(If) you say (the truth), you say (the truth). (If) you do not say the truth, I shall flay your skin and fill it with straw. I shall fill it with straw. You have to tell the truth.' (34) Do you know the story of the wife of the merchant with the pilgrim?' He says 'Yes, my lord,<sup>28</sup> I know it.' He said 'What was it?' He said 'My lord,<sup>29</sup> the pilgrim said to me that I should take her and kill her.' The king hears all of them. They are all actors. He says 'The pilgrim said to me—he wanted to rape her<sup>30</sup> in the bathroom. I ran and went there and the pilgrim said to me that this woman is a bad woman. "She will ruin my (good) name, my (good) name among the people will be lost and she will ridicule me. You must take her and kill her." (35) I tied her hands to take the woman and kill her. I took her into the forest, but the woman wept so much, she pleaded with me so much, she kissed my hands and feet so much, that, in truth, I felt sorry for her.<sup>31</sup> I did not kill her. I left her.' Here he says 'Is this woman alive?' He says 'I do not know. God have mercy on her that wolves have not eaten her, since I left her there in the dark.' (36) He says 'Put him also over there.' They put him there. He says 'Do you know what?' They say 'No.' He says 'There is here a bald man—in the place of himself he has put another bald man, he has made himself the king—he says 'The bald man here, this bald man has a report about this woman. Go and look for the bald man.' Some of the bald men go off. They bring another bald man before him. He says 'You are the elder of the bald men. I want to ask you something. Do you have any news of the woman who has disappeared or died, the woman of the pilgrim, (taken) from the merchant?' (37) He says 'Yes, my lord,<sup>32</sup> I have news. The woman is alive. I have found her. Now she is living in my house.' They say to the bald man 'Good, go and bring the woman.' He has made one of the bald men the wife of the merchant. They go and bring a woman, they have dressed her like a woman. They bring her. Just as she enters there, the other bald man

whom he had made the merchant—they have played the game (well)—gets up and says ‘Oh alas! Oh ash be on my head! This is my wife. She is alive, she is not dead. Where was she?’ Weeping, they embraced one another. (38) He says to the woman ‘Is this your husband?’ She says ‘May I be your substitute! My I be your offering! King of kings! This is my husband.’ He says ‘Good. You embrace one another. Put her in a carriage of horses and take her home.’ They go home, but they are there.<sup>33</sup> ‘Seize the others and tie them up! Tie them up! Round them up.’ He says ‘Tie them up! Throw them into prison! Put them there. I do not want such a thing to be in my land. I do not know why I was confused that day and I was not thinking clearly.<sup>34</sup> Has such a mighty matter as this taken place in this land of mine and I do not know about it? Good, now go in peace.’

(39) The king above says to his vizier ‘Get up, let’s go, before they bundle us into prison, kick us into prison, bind our hands and kill us. Get up—may his house be sealed!’ He says to his vizier ‘Just look what is happening in our land! They slowly come down and go on their way. The bald man knows that the king has gone. The bald man knows that the king has gone. The bald man knows that the king has gone, but he knows that early in the morning the king will send for him. (40) All the bald men have prepared themselves. The king gets up early in the morning, during the whole night he has not slept. He has not slept due to his being upset. He sends policemen, we say ‘policemen,’ after the bald man. Wherever there are bald men they seize them and bring them in. They bring them there. He says to the bald man ‘The game that you played last night—if you played it, you played it.<sup>35</sup> If you did not play it, I shall issue a decree to kill you, to strike off your head with a sword.’ There was an executioner there. He said ‘He will strike off your head.’ (41) The bald man said to the king ‘King, be well, it is not this easy.<sup>36</sup> I shall set conditions with you. I shall do this on one condition.’ He said ‘What is your condition?’ He says ‘Give me your kingdom for two hours. Give me your kingdom for two hours.’ The king gets up, takes off his clothes and gives them to him. All the bald men put them on, the vizier, the deputy, the accountant, they all put them on and they are there. He says ‘They want you to make an announcement, to tell all the land to come. Say that the king wants to hold a large court and everybody must be there’. (42) He makes an announcement, all the people gather and come. They all enter and look (and see) that the king is sitting there, but he is a new king. They say ‘When did this man become king (while) we had no word of it?’ He sends for the

33 I.e. the actors remain in the place of the play.

real merchant, the judge, the butcher, the mullah, the servant. They bring them all. He sends for the merchant, pilgrim, but the real ones, (he sends) for them to come. Now there is the pilgrim, the merchant, the mullah, the butcher—he gathered there all who had given testimony and brought them there. (43) He brought them there. When they saw (what was happening), the legs of the pilgrim began to tremble and his body (began) to tremble. His heart burst (with fear). The bald man who had now become the king spoke and said 'You know what is happening in this land? I do not want to adduce blame against the real king, but a certain event has taken place, a certain thing has happened here, whereby a merchant brings his wife and places her with a pilgrim, the pilgrim then assaults her,<sup>37</sup> then gives her to his servant to take away and kill. The servant has mercy on her and does not kill her. Do you accept this?' Everybody with one voice said 'No!' (44) He said, he said to the fellow (the merchant) 'Did you have a complaint concerning the pilgrim?' Yes, my lord,<sup>38</sup> as I said to you, king be well, I was going to Mecca and I brought my wife and placed her with the pilgrim, because he was very pious, I loved him, he was my friend. I knew that he had gone to Mecca, he had gone on the pilgrimage, he had become like a caliph, like a bishop, like a patriarch, he had no sin or mistake. I placed my wife with him. (45) But when I came to fetch her, he said that she was dead. I came to the king and the king said "Now, if she has died, she has died. What do you want from a dead person?" All his witnesses gave their testimony that she had died.' The king called the pilgrim. He said 'I want to ask about the wife of the merchant, how has it come about?' The pilgrim—the real one—began to weep, he began to weep, he said that a wolf ate his<sup>39</sup> wife. He said 'Put him over there.' (46) They put him there, just as I said before, and the butcher came, the mullah came, the judge came, they all came. One of them said 'A wolf has eaten her.' One of them said 'She fell into a pool.' One of them said 'She got a fever and died.' One of them (said) 'She fell from the roof and died.' (To) all of these he said 'Sit over there.' They sat over there. (47) He had said to the woman, he said 'If I send for you, do not fear, you should come.' The king says to his own bald men 'Two or three policemen should come with you so that they do not kill her on the way.' They go and bring the woman. (48) The lad, the merchant, as soon as he sees his wife, he yells. He beats his head. 'Oh, my lord,<sup>40</sup> this is my wife, but he had said that she was dead.' Now, the crowd are all watching, all being moved and weeping. The woman runs to her husband and embraces him

37 Literally: rises against her soul.

'Oh joy! This is my husband!' They embrace one another. He says 'Put these in a horse-drawn carriage and take them home.' They go off. (49) The pilgrim comes, the mullah, the butcher and the judge. They bring them all and he says 'Seize them all and tie their hands and feet.' Pardon (I forgot to say) here: They all signed. The pilgrim signed, yes, (he says) 'I sign (and certify) that a wolf ate her.' The butcher signs that 'yes, the woman fell into the pool and died.' The mullah says 'I saw the woman fall from the roof.' They all sign. They take a signature from them, previously. They take their signatures and bind their hands. He says 'Take them and put them in jail until their death, until they die.' (50) He gets up onto his feet. He says to the king 'Thank you very much for giving me this opportunity, here are your clothes, but when you want to do something, do it properly.<sup>41</sup> Here are your clothes, and your kingdom is your responsibility.<sup>42</sup> I do not want it anymore.' The king gets onto his feet. The bald man is afraid and thinks that now he will strike off his head. He said 'No, no, you together with your other bald men will be in my court, court, that is the royal household. You will be in place of my vizier. They will be in (place of) the deputy and vizier. I am very pleased that I have found such a thing in the nation. Many thanks.' He embraces him. He insists on making them (members of) the royal household. Many thanks for listening.

## A2 Women are Stronger than Men (Yulia Davudi, +Hassar +Baba-čanja, N)

(1) There was once a king. There was once a king. He gave an order to the vizier. He said 'I do not want any lantern to be in the village, in the town. I want to go out, I want to go out and see how my land is, see how my land is.' (2) The vizier goes out and makes an announcement, an announcement. At that time there were no telephones or the like. So, he makes an announcement. He speaks saying 'No lantern should be lit in the houses. The king wants to go out and tour around. If anybody lights a lantern, there will be a fine.' (3) He gives an order and at night the vizier and the king go out, they go with horsemen, touring around, so he (the king) could see what is happening.<sup>43</sup> (4) He sees from afar a lantern burning in a house. He (the king) says 'Vizier, I told you, what is that lantern burning there?' He said 'King, be well, I have said (what you ordered me to say)

and so I do not know what that is. Perhaps they have not heard. Let us go and see.' (5) He goes and enters there. He sees a woman with twelve men. They are speaking, telling stories, laughing, eating, drinking. (6) They ask saying 'Pardon, we have (just) come to this land. We are foreigners. We do not know anything. We saw only one lantern burning here. We want to know where we are, where we can find (somewhere to stay). Only one lantern is burning.' (7) Then they ask—they sit and drink tea and so forth—they ask where the husband of the woman is. They say 'The husband of this woman has gone to foreign lands.' They say 'But what are these here, these men and so forth?' They say 'These are his friends.' (8) The king becomes very upset. He says to the vizier 'Let's get up and be off,' that is 'Let's go.' They get up and come back. He says to the vizier, the king says to the vizier 'Put a sign on this house. Early tomorrow morning I want to see this woman. Put a sign (on it).' (9) The vizier puts a sign (on it). In the morning the vizier goes looking for the woman. He looks and sees that the whole street is (marked with) the same sign, but he does not know which one it (i.e. the house of the woman) was. (10) He comes to the king. The king says 'Have you brought her?' He says 'No, king, be well. I went in the morning and saw that the same sign that I had placed was in the entire street. I did not know which was the house.' (11) The king becomes very upset. He says 'Vizier, I shall go away for a month. Before I return and come back, do not leave female kind<sup>44</sup> (alive). Seize all female kind, first my wife, then your wife, cows, cats, dogs, whatever has female kind you must take away from the face of the earth.' (12) The vizier says 'King, be well, what kind of task is that?! How can I perform this task?!' (The king responds) 'I am telling you, if not, I shall cut off your head. I will not permit this thing (i.e. womankind) to exist in my country!' (13) The king goes away. He goes away for a month. He gives a command to the vizier to perform this task. The vizier comes back (home) very upset, he does not eat or drink. (14) This vizier had a father. His father was formerly vizier to the father of the king. But he was so aged that they had placed him in a basket, in cotton, so that his body is not harmed. He was very old, but he used to be the vizier to the father of the king. (15) He says 'My son, what news is there? Why are you so upset? You are not eating, you are not drinking, you have completely changed. What has happened?' (16) He says 'Drop it, father, do not ask, do not ask.' He goes and comes back, and in the end (his father) says 'But my son, I am your father. Whatever the case may be, I have lived a little more than you. Tell me, perhaps I can help you.' (17) He says 'Father, it is not hidden from God, how can it be hidden from you? This is what has happened. The king has given a

command that I should eradicate everybody, even my own wife, also the wife of the king, that I should remove from the face of the earth all females.' (18) He says 'My son, there is a lot of time until then. When the king has comes back, tell me when, tell me ten days beforehand.' (19) The time comes when the king intends to come home. He says 'Father, now is the time of his coming home. Do you want him to kill me, to cut off my head?' (20) He says 'Give an order to all the land that all women—whatever has fine clothes should take them, whoever does not have any should buy them, should sell his cows, should sell everything he has, and take fine clothes and come out before the king.' (21) 'Oh father, with respect,<sup>45</sup> what kind of task is that? When the king arrives he will cut off my head.' He said 'Do that task and you will have no problem.' (22) They come and the vizier makes an announcement that all women should wear fine clothing. The time of the (return of the) king is getting close. Now the women are all ready, from young girls to older women. They go out before the king. (23) The king says 'I shall blot out the house of your father. What has he (the vizier) done? Will he now not kill also me? He has preserved all the women and killed the men. I had said to him that he should kill the women, but he has killed the men. Now, when I arrive, he will kill me also. What a shameful thing he has done!'<sup>46</sup> (24) He comes and says 'Vizier, what have you done?' He says 'King, be well, I have a father. He is very aged. He was vizier to your father. He has requested to speak with you just for ten minutes. Then cut off everybody's head, if you want to do so.' (25) He said 'Go and bring him to me.' They take the father of the vizier together with that basket, they take him to the king. He says 'What have you to tell me?' He says 'King, be well, I was the vizier of your father. I was the vizier of your father. I used to strike my sword on a stone and split it. I was such a man and now today I have become old. I have a couple of things to tell you. Then cut off my head before all others.' (26) He says 'Very well, speak!' He says 'I was sitting in my house, when I was young, and somebody banged on my door. Somebody banged on my door, somebody knocked, and I went out. I only heard somebody saying "Come quickly, I need you (to do something for me). I want you to come to me." (27) Before I got to him, he disappeared. I returned home. The next day the same thing happened. He knocked on the door. By the time I got up and sat on my horse and put on my clothes, he went. (28) On the third day I put on my clothes, sat ready on the horse, my sword in my hand. At that time I was very angry and said "Now I shall kill him," since wherever I struck my sword I cut (the victim) in two. I had no fear of anybody.'

I was sitting ready behind the door. (29) When there was a knock, I opened the door after him. He went off and I was behind him (as fast) as smoke, and I could have reached him. I drew my sword and he turned round to me and said "It is not a time for joking. Come after me." (30) We go. I went.' He says 'My body trembled. I went and arrived under a mountain. He said to me "You stay here under the mountain. If you hear the sound of laughter, go. I do not have need of you. If you hear the sound of weeping, wait.'" (31) He says 'King, be well, I waited there. He went up by a ladder—you know what a ladder is?—yes a ladder. He went up into the mountain.' He says 'I saw that the sound of weeping came, I waited.' (32) He says 'I saw that he came down and sat on the horse in front of me. We arrived at a place. He said to me "You will kill me."' He says 'When he took off his clothes, I saw that it was a woman.' (33) 'King, be well,' he says 'all my body trembled. All my body trembled. She was holding<sup>47</sup> the head of her husband. Brigands had taken her husband and wanted to kill him. She had been seeking me in order to go and help him. But I arrived late. (34) The head of her husband was in her arms. She said "You must kill me and put me here in the grave with my husband, bury me, then go."' (35) He says 'I said "I cannot do this task. I cannot do this task."' He says 'King, be well, she put the sword like this and thrust herself upon it. She made me promise that I would bury her. She took the sword like this, she held her husband to her breast and threw herself onto the sword, and met her end. (36) I buried the woman. I struck my sword with all my might there and made a promise to her (to make known) that a woman is stronger than a man. Now I am telling you this. Now it is up to you if you want to slaughter women or slaughter men,<sup>48</sup> whatever you want to do.' (37) The king got up and kissed him on his forehead. He said 'I have forgiven everything. I am grateful to you that you have told me this.' Thank you for listening to this.

### A3 Axiqar (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) In times of old, there was, the story goes, there was there was not, there was a king, Sanxiro the king of the Assyrians, and Axiqar, the wise man, as they called him, the wise man, that is learned man. Just as you are a professor, he also was very learned. All the world knew him. (2) Axiqar had worked also with the father of the king. With his father he had held the office of vizier, (he was)

vizier. But he had no children. Axiqar had no children. He had sixty wives. He had sixty wives. He had many palaces, palaces, very beautiful houses, but he had no children.

(3) One day he summoned many learned men, such as geomancers, magicians. He summoned many people to do something, fortune-tellers were reading fortunes to him, in order for him to have a child. No word (of a child) was forthcoming from them. (4) Afterwards, after no word was forthcoming from them, he appealed to his god. He appealed to his god. He appealed to God. He said to him 'Oh God, I implore you,<sup>49</sup> give me a son.' (5) God gave him an answer. He said 'You will not have a son, because formerly you went to people who were made by hand (i.e. idols), not to God. You went to other people, who could not do this for you. You will not have a son. (6) Make the son of your sister—Natan, his name was Natan—your own son. Teach him. Take care of him. Make him your own son. He will be for your old age when you have become old, he will be a son for you. When you die, he will close your eyes.'

(7) He goes to Natan, the son of his sister, and makes him his son. He teaches him many things, so that he can be in the royal court, not in the streets, and so forth. He teaches him so he can live, work, move, eat, drink and do everything in the household of the king, only in the house of the king, not outside. He teaches him. He teaches many things. (8) The boy grows up. He gives him many things: beautiful clothes, fine food. He tells him many things. He teaches him. He gives his son many pieces of advice. (9) Some of this advice, for example, was that he said 'My son, do not be too hot and do not be too cold. My son, do not laugh at people who are your friends, because they may grow up and later laugh at you. Do not eat forbidden food. Eat proper, good food.' (10) He teaches him many of these things. 'Do not be with a woman whose husband has died, do not marry her, because she will always be saying "my husband, my husband". (11) Do not go after beauty. Beauty will not last for you. Do not go after great wealth. Be a learned man. Be a soft man. The softer the ground is, the more water sinks into it. But if the ground is hard, when water is poured out, it flows away. Be like the ground. (12) Be like a mulberry. Do not be like an almond. An almond tree first produces leaves and then produces its fruit. But you be like the mulberry. Be like the mulberry. First it gives all the fruit to people and afterwards (produces) leaves. (13) Be soft. Be loving. Be merry. Be a good man.' He tells him many of these things. He teaches him perhaps four hundred, five hundred such things.

---

(14) One day—I shall shorten it a little—one day the king says to Axiqar ‘Axiqar, you have become very old. Have you somebody you can put in your place, because there is nobody like you?’ His heart was seeking somebody who would be like him. (15) Axiqar says to the king ‘Oh king, be well, I have raised Natan, my son, I have brought him up, I have taught him only for this purpose, only so that he would be in your service,<sup>50</sup> for your royal court.’ (16) He says ‘Very well.’ One day Axiqar takes his son, when he has become a mature young man, he takes him to Nebuchadnezzar. King Nebuchadnezzar tells him everything, he sees that he is suitable to be a minister for him in the royal court. He appoints him there. Axiqar goes home.

(17) Natan had a brother. Axiqar showed love to this brother, the other brother that he had. When these two were children, he showed love to one and the other becomes discontented. When Axiqar shows love to that younger brother, his son Natan whom he had brought up and was (now) in the royal court became discontented. He became jealous. (18) Axiqar made an arrangement for this child<sup>51</sup> that they would give him money, give him a house, because Natan was in the household of the king. Natan became very discontented that Axiqar made a distinction, made a distinction between this son and himself.

(19) What did he do? He wrote a letter on behalf of Axiqar to the king of Egypt saying ‘I, Axiqar—come to Nineveh and I shall give it to you without a battle. I want to see you.’ But Axiqar has no word of this. (20) Natan, his son, does this. He writes to the king ‘King, be well, on such-and-such a day, such-and-such a date, the king of Egypt, Pharaoh, will make an attack on you, an attack, a war. He has brought the army in order to come to fight with you.’ (21) The letter is in two parts. He sends one to Pharaoh on behalf of Axiqar and one he sends to the king saying ‘King, be well, Pharaoh wants to fight with you.’ He says to Pharaoh ‘Come, I shall see you at a certain place, in order to give the land to you, without a fight.’ (22) Natan gives this letter to king Nebuchadnezzar. Then, afterwards, Natan says to the king ‘Do you see what my father is doing against you? For how many years has he eaten and drunk in your presence! He has grown up in your house but now he has become treacherous to you. (23) He has turned out to be treacherous to you. He wants to cause you to be smitten by Pharaoh. If you do not believe, come with me, let’s go to such-and-such a place.’ (24) To Axiqar he writes a letter on behalf of the king. He writes a letter to Axiqar ‘To Axiqar, Pharaoh is making an attack against us. He has an army. Muster a stronger army so that I can see it (stand) before Pharaoh.’ (25) Axiqar does not

<sup>50</sup> Literally: in your hands.

<sup>51</sup> Literally: He gave something to this child.

know. He musters all the army when he receives this letter. He musters the army. On the other side Pharaoh approaches. He (Natan) says to the king 'Now do you believe? Pharaoh has come here to make an attack and Axiqar has mustered the army.' (26) The king becomes unhappy. He says to Natan 'Bring him to me.' He says 'No, you have no business with him. Give him into my hands. I know what I shall do to him.' 'But, brother, son'—the king says to Natan—'bring him so that I can see why he has done this.' (27) They bring Axiqar into the presence of the king. The king says to him 'Axiqar, what evil had I done to you that you did this against me? You have gathered the army against me. Pharaoh is approaching from the other side against me. You want to let the country be ruined?' (28) Axiqar is tongue-tied. He is embarrassed and tongue-tied, he is unable to talk. [interruption]

(29) We reached the place where the king says to him 'Axiqar, what have you done to me? What have I done to you that you have done this? You have been in my house for years.' (30) But Axiqar becomes so embarrassed that he has nothing to say, he has been insulted. He kept quiet. He is unable to talk. However much he wants to talk, he cannot do so. (31) He (the king) gives him to a man and says 'Take Axiqar and kill him. Take him and kill him.' They bring him to kill him. He sends word to his wife—I have forgotten the name of his wife, she has a name. He sends word to his wife (saying) 'I am coming home. Prepare dinner and drink, everything.' (32) The wife knows what is happening. It is said that she was very clever. She knows what is happening. They come home and she offers food and drink. (33) (As) the executioner is drinking, he (Axiqar) says to him—he has a name but I have forgotten the name, the executioner has a name—he says to him, Axiqar says to him, he says 'I am not guilty. Do not kill me. (34) Once they wanted to kill your father, but I did not kill him. The king became sad, he became sad (and wondered) why they killed him, but I had not killed him. I took him away and gave him to the king. The king was very glad. He gave me gifts, rewards. I am not guilty, do not kill me.' (35) He (the executioner) says 'But what should I do? The king said that I should take your head to him there.' He said 'There is a man in prison who resembles me.' All the soldiers who were with him are all drunk and inebriated. None of them knows about it. 'Kill him and take him (to the king).' (36) He takes that man and kills him. He takes him to the king (saying) 'I have killed Axiqar.' For Axiqar outside ... outside his house they dig a hole, two metres, three metres deep. They put Axiqar there. They leave a hole so that his breathing would not be cut off. They put there water, bread, they put there everything for him. (37) He takes the head of the man to Nebuchadnezzar (saying) 'I have killed Axiqar' and gives it to him. Natan, his son—the king says to Natan his son 'Go and take the body of your father, Axiqar, and bury him.' Natan comes but does nothing

to his father. He just throws him down. (38) He comes to the house of his father, he eats, he drinks, he sings, he dances, he leaps around. He wants to be with his mother, who has nurtured him, the wife of Axiqar, as a husband. But Axiqar, as we said, sees (everything). He (Natan) wants to beat all the housekeepers and servants. He beats them and harasses them. You know what I am saying. He harasses them a lot. (39) Time passes in this way. One day Pharaoh writes a letter to Nebuchadnezzar and says—he knows that Axiqar died—after Axiqar dies, Pharaoh writes a letter to Nebuchadnezzar saying ‘I want your learned men from your land, to give me a response to four or five things, to solve for me a puzzle, a puzzle, I don’t know, a thing, a problem. (40) If your people solve it for me, I shall give you thirty years of the income of my land—income, that is what comes from my land, wheat, gold, silver, everything, thirty years, I shall give you the produce of my land from every place for thirty years.’ (41) Do you understand? That is ‘I shall give you the produce from my land for thirty years.’ That is, wheat, grapes, wine, gold, silver, cattle, buffaloes, everything. This is what ‘income’ is. ‘I shall bring everything out of my land, I shall bring out wealth, and give it to you for thirty years. If not, you must give me my expenditure for thirty years.’

(42) King Nebuchadnezzar summons many learned people, viziers, stewards, every kind of people, magicians, he summons every kind of people in order to give him a response concerning the puzzle, to give a response to Pharaoh regarding this matter. (43) Everybody who comes says ‘With respect, king, we do not know, perhaps Natan knows, Natan was brought up by Axiqar.’ They summon Natan. Natan says ‘I do not know. I cannot give you the answers.’ (44) Pharaoh asks Nebuchadnezzar to construct a house in the air. Pharaoh asks Nebuchadnezzar for ... a house suspended in the air, and many other things. ‘If your men can do this, I shall give to you all the expenditure of my land for thirty years. If not, you must return to me the expenditure of thirty years.’ (45) Indeed, there is nobody who can do this. At that moment Nebuchadnezzar weeps. He beats his head, saying ‘Oh Axiqar! Oh flower of my house! If you could come, you could respond to all these requests. Oh what have I done to myself? Without asking, speaking or saying anything, I had you killed. You were the administrator of my land.’ (46) He wept bitterly. He knelt down on his knees and says ‘Oh God, if only I could see Axiqar even just once again, if only he could meet me again. If only my face could touch his face, that would be enough.’ He says this, he constantly speaks in such a way. (47) The executioner—I used to know his name but have forgotten, he has a very difficult name—said ‘King, be well, I want to tell you something.’ He says ‘What is it? Speak!’ The executioner comes, the servant, the servant of the king, the executioner. (48) He says to him ‘King, be well, I want to tell my sin, to confess it to you. A man who does treachery

against his own king, who commits a fault, he commits the fault also against God. There is no difference, against the king or against God. I have committed a fault. If apart from this fault of mine, you find something else against me, kill me. But I want to tell you this thing.' (49) He says 'What is it? Speak!' He says 'Axiqar is alive. I have not killed him.' The king is tongue-tied 'Are you telling lies? Speak! Speak! Speak!' He says 'Yes, oh king, be well, I have not killed Axiqar.' (50) 'Where is he?' He said 'He is alive in such-and-such a place. I have buried him outside his house, but he is alive. So, if you want to kill him, kill him.' He says 'Why should I kill him? If he is alive, I shall give you half of my kingdom. Only let my face touch the face of Axiqar.' (51) The king sits down in the thing, what do they say, that kings sit in? They bring him there. He sees that Axiqar is there. He brings him out (and sees that) Axiqar's beard is long, he has lost his colour, he has become yellow and all his teeth are ruined. (52) He embraces him and says 'Oh Axiqar! Oh my life! You are my soul! What has come upon me? Why was I treated treacherously by Natan your son? I did not ask you anything, I did not give you time. Please, forgive me.' (53) He takes Axiqar out (of the hole) and makes his royal house available for Axiqar. He says 'I need you (for a certain task). I am waiting for you, that is I want to see you (to talk to you about it).' Axiqar says 'Give me time.' He gives the time to Axiqar, for forty days. He says 'For forty days eat, drink, wash. Return to yourself a bit, then come to me. I want to talk to you.'

(54) After forty days he goes to the king. He (the king) asks forgiveness from him. He says 'You are my home. You are my kingdom. You are my life. What should I say? What can I do so that you will forgive me?' He says 'Forget it! What has been has been.' He said 'Natan your son has done this.' He said 'I know.' (55) He says 'Pharaoh the king has sent us such-and-such a task. He has demanded of me four or five things. If we do them, we do them (and that's fine). If we do not do them, I have to give thirty years income of my land to Pharaoh, if I cannot (do them). If I can, he will give it to me.' (56) Axiqar says 'Do not think about it. Only give me forty days. I'll deal with them. What are they?' He says 'One of them is that I must erect a house for Pharaoh in the air, which stands in the air.' There is another one which requires him to make threads of sand. Many such things. (57) Axiqar says to Pharaoh 'Give me time, do not worry.' He sends word to his wife—I have said that his wife was very clever—he sends word to his wife asking her to teach two young eagles, to nurture them, raise them and teach them, teach them thus 'Give bricks, mud, water, give, quickly give, do not stop!' (58) They also put young children in a basket and the eagles pick them up and take them up into the air. They learn all these things. Everything is done correctly. After forty days Axiqar says to the king 'Come and see.' (59) He comes and sees there, he sees that the basket has gone upwards, and there

they are crying out ‘Give stones, give bricks, those tiles, bricks, mud and water. Why are you stopping? Give!’ The king is astonished. His tongue-tied. (60) He says ‘I am in your debt,<sup>52</sup> Axiqar.’ He sends word to Pharaoh (saying) ‘My people are coming.’ Axiqar takes an army together with his servants and they march. (61) Pharaoh has prepared a hotel for Axiqar in order for him to lodge there. He says first of all to Axiqar ‘If I were the moon, what would the people under my command be?’ He says ‘You are the moon and you give the light of the night. They are your workers.’ (62) He says—he puts on a yellow garment—he says ‘What do you compare me to?’ He says ‘I compare you to the sun, the giver of light.’ The next time he wears other clothes. He says—these are white in colour—he says ‘What do you compare these to?’ He says ‘I compare them to stars that shine in the sky.’ (63) He asks him many things. Then he says ‘I pledge you with an oath saying “your master—what does he resemble? Your master.”’ He says to Axiqar ‘What does your master resemble? What do you compare him to?’ (64) He says ‘Listen,<sup>53</sup> my master does not need me to speak about him like this. Listen,<sup>54</sup> I’ll speak about him.’ Then he speaks about his master, of Nineveh, Nebuchadnezzar. He says ‘If he says to the sun “stop”, it will stop. If he says “rain”, it will rain. If he says “Stop world”, it will stop.’ (65) He says many things about his king. He says ‘I pledge you with an oath on the head of your master, tell me who you are.’ He says ‘Who are you whom the king has sent?’ (66) He says ‘I am one of the ants, one of the ants under the foot of the king. I have come to you.’ They speak together about many things. He says ‘Were there no other people that he sent you, an ant, to a king of Egypt?’ (67) Then he pledges him with an oath, he says ‘Tell me, who are you? I pledge you with an oath on the head of your master. Tell me. Who are you?’ He says ‘I am Axiqar.’ When he hears his name Axiqar, Pharaoh dries up on the spot. He knows that he has arranged everything, that everything has turned out well. (68) He says ‘But I had heard that they killed you.’ He said ‘Yes, a man—if it does not please God that something comes about, it does not come about. If something pleases God, it will be.’ (69) It pleased God to protect me, since Natan my son turned out to be treacherous to me and they wanted to kill me, but God did not permit this, so that I could come here and give you your answer.’ (70) He says ‘Good, go and sleep in your hotel and come tomorrow.’ The next day he comes again. He says ‘What do you want?’ He says ‘I want a building that is in the air.’ He says ‘Fine. Tell your people to prepare mud, tiles, bricks, water, everything. I shall

<sup>52</sup> Literally: Would that I were your substitute.

<sup>53</sup> Literally: Stand on your feet (i.e. stop and listen).

<sup>54</sup> Literally: Stand on your feet, stop.

come tomorrow and build a house above.' (71) Everybody is gathered (saying) that 'He will build a house above in the air' He gives the word to the eagles and says that they should put food and the children into the basket. They go up, until (when) they go up for some time, they are perhaps 1,000 metres above (the ground). (72) From there the children begin to shout 'Give stones, give water, give clay.' Axiqar takes (things) from his soldiers and beats them. He says 'Why have you stopped? Give clay, give water, give stones.' They say 'How can we give? How can we give here clay, stones, water? How can we give? How can we give here clay, stones, water? How can we give?' 'How do you want me to build here a house for you if you cannot give stones and water?' They go down and they come (to him). He says 'Go to your hotel. Tomorrow I want to see you.' (73) The next day he comes again and says 'I want a rope, a rope that is this thick. (I want you) to weave for me a rope, weave it for me with sand.' He thinks and thinks (wondering) what he should do. He makes a casement, a window, and a sun-ray, the sun, what they call a sun-ray comes from there. The sun-ray strikes there. He sprinkles sand. (74) He sprinkles sand there in holes. He twists the sand like this. He says 'Tell your people to weave it. I have prepared its threads, twisting (them) together. Tell your people to weave it.' However much they wanted to, they could not. He goes to the hotel. He says 'Tomorrow I shall see you.' (75) The next day he comes and says to him 'I want you to tell me something that nobody in the world has heard but is new.' Axiqar goes back to his hotel and thinks what he could do. (76) He writes in a book 'You, Pharaoh, are in debt to the king. Is that true?' He says 'He wants to collect your debt from you. Have you heard this?' He says 'No, I have not heard.' He says 'You are in debt to king Nebuchadnezzar, the king of Nineveh.' He says 'No.' He says 'But this is new. You are hearing it (now).' (77) Again also in that he wins, but he tells it rather more elegantly, do you understand? Then he returns to his hotel. He (Pharaoh) says 'Go and sleep.' (78) He comes the next day. He says to Axiqar 'Why did your horses in Nineveh neigh? Our horses here aborted, that is they aborted their young.' Axiqar goes out. He says to the people with him 'Take a cat.' (79) They take the cat. He beats the cat hard and harries it in the street, and it whines. Do you know how a cat whines? People come to the king, they say to Pharaoh 'Axiqar is laughing at us. He has caught a cat in the street and is beating it.' (80) He sends for him. He comes and enters. He says 'What has this cat, this animal, done to you? What has it done to you that you beat it so much?' He said 'This is a criminal.' 'What is its crime?' (81) He says 'This king was a rooster to me, who had such a beautiful voice. When he sang, I used to listen. I knew that the king had work for me. I used to go to him. But this cat of yours, he got up from here and went this night and has snapped his neck, then has come back. So I must beat it.' (82) Pharaoh says to Axiqar 'What are you saying? Have you gone

mad? Have you gone crazy? What are you? How is it that the cat went there on a journey of four hundred or five hundred kilometres in one night, snapped off the neck of your rooster and came back, returned and came back?' (83) He said 'But if (the distance) is five hundred or six hundred kilometres, how is it that the horses of my master neighed there and your horses here aborted?' Pharaoh understood. He (Axiqar) gave him the (necessary) answer. The answer was that. He gave (the answer) to him. (84) He said 'Go, God bless you, for God has given you such an intelligence and such a mind.' He brought to him large amounts of gold, silver, clothes and gave everything to him. He gave to Axiqar the income of the land for thirty years, he loaded it on horses and sent it to the king in Nineveh. (85) They gave word that Axiqar was coming. They came out to meet him. The king came out to meet him. He hugged him round his neck. He kissed him. He was very pleased with him (saying) 'I shall give you everything you want.' (86) He said 'I do not want anything. I have everything. I have everything. I have brought you the income of the land of Pharaoh of Egypt for thirty years. These clothes, this gold, this thing (i.e. silver), everything is for you.' (87) He said 'Whatever you want I shall give you.' 'I do not want anything from you, but hand over my son Natan into my hands. I don't think he has learnt well the lesson that I gave him some time ago. Hand him over into my hands. I shall give him another lesson.' (88) He says 'Take this Natan into your hands. Do whatever you like to him. Nobody will speak.' Natan sees that his father is alive and his heart splits (with fear). He is afraid, he sees he is alive. Yes. He takes Natan and brings him home. (89) The things that he had previously told him 'Be good, be loving, be merry, be like this'—he had brought him up like this and spent a lot of money on him—he had taught him a lot, he had loved him, as a father (loves) a son—this time he said to him (90) 'I taught you to be good, but you were bad to me. I made you a man, but you trampled on me. I put you in the royal household, but you put me in the ground. (91) I brought you into money, into a position, that is a (high) rank, a rank whereby you came into the royal household, but you put me in the rank of execution, of death. Your mother brought you up, but you wanted to be with her like a husband. You beat all the servants.' (92) He says many, many things to him. That is, he says to him (that he did) the opposite of what he had said to him previously. Natan says to him 'Please, you are merciful, you are loving, you have been a father to me. Be the same father to me again.' (93) He says 'Not again. That father has gone. Now another father has come, whose son you are like. God will hold a court (and judge) between me and you.' A court. Do you know what a court is? (94) He seizes Natan and binds him. He gives him bread and water in rations. Hardly had three days past, when Natan begins to swell, he swells, he swells boom! He explodes. Natan dies. That is (the story) of Axiqar.

**A4 Is there a Man with No Worries? (Yulia Davudi, <sup>+</sup>Hassar  
+Baba-čanja, N)**

(1) One day a man said ‘I must go and travel throughout the whole world to seek and find whether a man has no “ah!”’ ‘Ah!’ like that, we say ‘ah!', who has no ‘ah!’, that is he has no sorrow, he has no worry. Do you know what I am saying? They call this ‘ah!’, ‘Oh dear,’ ‘Oh dear,’ ‘Oh my pains,’ ‘Oh my illnesses,’ ‘Oh dear,’ I don't know what. He said ‘I must go and find a man in the world who does not have this. I shall look for a man who does not have “ah!,” who does not have sorrow, who does not have worry.’ (2) This man gets up and (puts on his) boots—čaruxə [woven boots], do you know what they are, čaruxə [boots]. čaruxə are like this, like this, but here, here, here and here there are laces. Previously people used to wear these čaruxə, there were no shoes. They used to call them čaruxə [woven boots]. He put his boots on his feet and went off. He took supplies with him, supplies, that is bread, water, pastries, cakes, such things as that. He took them and went off. He went one day wandering in a town, one day in a street—street, street. This town finished, another town, another town finished, another one, he was wandering constantly. He was wandering for months, for years, in order to find a man, a woman, who did not have sorrow, who did not have distress, who was happy, who says ‘I am happy, I have no sorrow.’ (3) He goes and goes, but when he comes and approaches, he saw that no, he does not find anything. (When) he wanted to go back, he saw a shop, a store, very big. He goes there and enters there. He looks (and sees) that the owner of the shop is a comely handsome youth, he is always laughing, ‘he-he-he’, laughing and laughing. People go there and buy something, he takes money with this hand and takes money with that hand, he laughs, he himself is handsome, and there are workers in the shop. (4) He said ‘This must be the man I want, who does not have “ah!,” who does not have sorrow, does not have worry, he himself being so handsome, (having) so much money, this big shop, workers under his authority.<sup>55</sup> Indeed, he does not have sorrow. I shall wait to see what happens.’ (5) The people, from morning until night, were going in and out, and making purchases. But he was just sitting there. They come to him and say ‘Can we help you? What do you want?’ He says ‘No, nothing.’ They come at five o'clock in the afternoon in order to close. The owner of the shop, the handsome youth, goes and says to him ‘My bro, my bro’—that is my brother—‘My bro, you have been sitting here from the morning, hungry and thirsty. You have not bought anything. We now want to close. What do you want? What is

your illness?' (6) He says 'Nothing, my brother. If you want to close, I shall go.' He says 'No, well you have a reason to be here, what is it? You have been here since the morning.' He said 'Believe me, it is not hidden from God, why should I hide it from you? The story is this. For several months I have been searching, going to towns and lands, in order to find a man who has no "ah!," has no sorrow. Today I met you. I see that you are handsome. I see that you take money with this hand and with that hand. I see that you have workers. You are laughing and giggling. You do not know at all where the world has come from.<sup>56</sup> I thought that you are definitely<sup>57</sup> that man.' (7) He said 'Ah, now, tonight, you shall be a guest of mine.' He says 'No, please,<sup>58</sup> no, no, no. Forgive me. Forget what I said!' He says 'No, no. You shall stay here with me.' However much he wants to get up (and go), he (the shopkeeper) gives an instruction to his workers (saying) 'Do not allow him to go.' He says 'Tonight you are my guest. Tomorrow go wherever you want to go.' (8) He gets up, he sits and puts him (his guest) in a car, and he goes off. They arrive before the door. He sees that the whole door is gold, servants and housekeepers in his house are all bowing their heads to him. He said 'What a mistake I have made. A mistake, that is I have made a mistake by speaking with this man. He wants to kill me.' (9) He wants to flee, but he (the shopkeeper) seizes him. He says 'No, no, no. Tonight you are my guest. Are you not looking for this thing? Well, tonight you are my guest so you can see.' In short,<sup>59</sup> they sit down, they eat dinner, he goes and has a shower, he comes and takes his boots to flee, but the lad seizes him and says 'No, sit.' (10) They sit. He comes and weeps to himself. He says 'Oh God, help me! What mistake was this that I made? What mistake did I make? Why did I speak? Tonight he will finish me off, he will kill me. He has a plan against me.' Indeed,<sup>60</sup> in the evening they eat dinner and finish, then go in order to sleep. He takes him with him into a room. He says 'Oh woe,<sup>61</sup> what does he want to do to me?' He says 'That is your bed and this is my bed. Both of us will sleep in one room tonight.' (11) Again he bends down to take his shoes and flee, his eyes (looking) this way and that way. He (the shopkeeper) says 'No, sit down.' He sits down. An hour goes by. In the room there was a window. He draws the curtain and says 'What do you see over there?' He looks and says 'What do I see? I see that there is a lad together with a woman over there (both) naked. They are over there. So you have invited me

56 I.e. you do not have a care in the world.

57 Literally: one hundred percent.

58 Literally: May I be your substitute.

59 Literally: I shall not cause your head to be in pain.

60 Literally: by God.

61 Literally: Ash on my head!

to see *them*? He says 'No.' (12) 'I was in my shop just as today you saw me in the shop, happy and merry. This is my wife. This is my wife. I must suffer, suffer, that is have pain, and see my wife—every evening I must give a man money to come to my wife so that my wife does not go out of the house. I love my wife a lot. One day I was in the shop, like you who came and saw me, so a man came and said to me "Come quickly, your wife is dead." (13) At that very moment there—how mad I was! What an ass I was! I did not return home, but, pardon, I beg your pardon, I cut off my thing and threw it into the street so I would no longer be a man. I cut it off and threw it into the street, so that I would not bring another wife in place of my wife. I came home, all bloody, covered in blood. (14) I came home, I arrived home. By chance that day my wife opened the door for me. Always the servants used to open the door for me. On that day my wife opened the door. Oh woe! Oh how terrible,<sup>62</sup> they said to me that you had died, what is the matter?' She said 'May all you have and do not have die.'<sup>63</sup> May they die. Why should *I* die? He says 'Ah! I have done this against myself, that is I am no longer a man.' (15) She said to me 'What do you mean you are no longer a man? I want a man.' He says 'From that day onwards, every time she wants a man, I must bring him to her and she must do this before my eyes, because I have made a mistake.' 'Oh woe' he said 'All my sorrows are my sorrows', that man said. 'All my sorrows are my sorrows. All my sorrows are my sorrows, but your sorrows are white and yellow.'<sup>64</sup> 'I shall not stay here anymore.' (16) He gets up and takes all his clothes and belongings<sup>65</sup> and goes out of the house. He says 'Well, there is not a man in this world who does not have "ah!"' When somebody says 'I am like this, I am like that',<sup>66</sup> I tell them this (anecdote).

#### A5      Women Do Things Best (Yulia Davudi, +Hassar +Baba-čanja, N)

(1) One day, there was a mullah, a mullah. In the village people were sitting talking a lot together. One was talking with the other, men. Those Muslims—the men are by themselves and the women are by themselves. The men were saying 'What a woman—a female—can do, no man, buffaloes or ploughs can do.' Buffaloes are so strong. Ploughs—those things that cleave the ground, plough. Do you understand? Yes, they cannot do it. 'A female is stronger than

62 Literally: Oh ash (be on my head).

63 I.e. may all your family die.

64 I.e. your sorrows pale in comparison.

65 Literally: his clothes his rags.

66 I.e. I am suffering.

anything, when she wants to do something.' (2) The mullah having eaten in (his) house, having had a drink, having had a shower, having scrubbed his back—they loved him very much—says 'What is this talk? A woman is weak. They call women weak, that is she is inferior. What is a woman that she can do something for a man?'<sup>67</sup> They say 'No, what a woman can do a man cannot do.' (3) The mullah takes notice of the other mullahs, the other people. He comes home and confronts<sup>68</sup> his wife, saying 'You, a woman, what could you do for me?' She says 'Nothing, what shall I do for you?' He says 'They say that what a woman can do no man can do, nor can buffaloes or ploughs do it. So, what are you? What are you? What will you do for me? For example, if you want to do it, what would you do?' (4) She says 'Man, with respect,<sup>69</sup> do not take any notice of the opinion of people. We have a beautiful life. They want to destroy our life. Why have you taken notice of the opinion of people?' 'No, come on,'<sup>70</sup> let me see what you want to do. Come on, what do you want to do?' He starts to beat her and shake her. 'Come on, let me see what you will do.' She says 'God, the mullah has lost his mind.' He says 'Let all your family'<sup>71</sup> lose their mind! Why should I lose my mind? Come on, I want to see what you will do.' She says 'Do you want this? Do you really want this?' He says 'Yes, I want to see what you want to do.' (5) The mullah used to go and plough, plough, in the countryside, in the field, he would plough, with two oxen. The woman went and bought from the market two very large, white fish. She took them and put them in the ground, there, in the place where the mullah would plough. (6) The mullah goes in the morning, he (ploughs and) goes one furrow, the second furrow, the third furrow, the fourth furrow, suddenly he sees—oh!—fish have come out! He is very happy with them. He takes them, cleans the soil off them and puts them aside. The wife brings him lunch, to him, to the field. (This is) because women would cook food and take lunch to the men who were working outside. (If) she had a child, she would also carry the child on her back and take him (with her). She had to take (things) with this hand and that hand, and with the child on her back she would take food to her husband, to the people. (7) She brought bread there. The mullah said 'Do you know what?' She said 'No.' He said 'Two fish—I was ploughing and two fish came out of the soil. These are the fish. You should take them, wash them, clean them, and cook and fry them. I shall come in the evening to eat them.'

(8) She takes the fish and laughs. The mullah comes back in the evening, exhausted and tired. The entire day he has been driving the plough behind animals. He has a shower and come to sit to eat (his) food. He sees that there is a bowl, a big bowl of yoghurt water—yoghurt water, they would beat yoghurt, they make it into milk, they call it yoghurt water, (they put) salt in it and water. This is yoghurt milk. She put out for him a large bowl of yoghurt together with bread. (9) He drank a little of the yoghurt water and said 'But how have you done the fish?' She said 'What fish?' He said 'The fish, the fish.' She said 'What fish? Surely you had not gone to catch fish, you had gone to plough in the field. Fish are in the river.' He said 'Wife, please,<sup>72</sup> this morning (when) I was ploughing, I caught two fish and gave them so that you would cook and fry them and I would come to eat them.' 'By God, this mullah has lost his mind.' (10) He got up to beat the woman. The woman got up and ran to the people in the village. 'Oh help' she shouts. All the men and women came out. They all knew one another, you see. 'What is it? What is it?' She said 'The mullah has gone mad. He has gone mad.' 'Hey, mullah, excuse me,<sup>73</sup> what has happened? Why are you beating this wife of yours? That son of a dog! That son of a dog! That son of a dog!' 'I brought fish to her and she says "Fish from where?"' They say 'What fish mullah?' The woman says 'He says to me "I brought fish from the field, fry them!" so that I fry them for him to eat. But I do not have fish. He then set about beating me.' (11) All those friends of his say 'Oh God! God have mercy on the mullah, he has gone mad.' 'Oh mullah, you have gone mad. You have lost your mind. It is not possible at all for a fish to be in the field, in the soil!' 'Oh woe!' He hits his head. He says 'Oh woe (for what I have suffered) from the hand of a woman. You were speaking the truth.' (12) He goes out running and going (on his way). He goes to a miller—a miller, he makes wheat and flour, he has a watermill, a watermill. He goes and knocks on the door. His wife opens the door. His wife knows (the situation). He says 'I shall not enter. I shall not enter a place in which there is a woman.' She says 'Come in. (If) you enter, you enter. (If) you do not enter, I shall right now cry for help (saying) that you came upon me—you know, (she means) in order to rape me.' (13) He is obliged (to do so) and enters the house. He is the friend of her husband. The miller comes back from the watermill. They embrace one another 'Oh hello, hello, what a surprise to see you!<sup>74</sup> Sit down. I am very happy to see you.' They eat and drink. The miller went to wash his hands and so forth. (14) The wife of the miller said to the mullah 'In the

evening I shall lay my (sleeping) place here and the place of my husband over there. I shall lay also your place over there. When I kick (you), get up and come to me. If not, I shall scream and the miller will get up and kill you. I shall say that you mounted me.<sup>75</sup> (15) The mullah was very distressed and says 'I have fallen from a pit into a well, I have fallen into another fire. What has come upon me?<sup>76</sup> Why have I ruined my life?' It becomes dark and they go to sleep. The woman slowly stretches out her leg (indicating) that the mullah should get up. When the mullah gets up, she changes her place. She changes her place and her husband ends up in the hands of the mullah. (16) The miller sees that he has mounted him<sup>77</sup>—excuse me, excuse me—and seizes him. He screams and says 'Light a lamp! Light a lamp! It is dark. Light a lamp so that I can see why this son of a dog has mounted me.' The woman says 'I forgot to tell you, we do not have a lamp. We do not have oil. Give him into my hands and you go and bring a lamp from the neighbours.' The miller goes and brings a lamp from the neighbours. The woman says to him 'Go and sleep.' (17) She goes and brings a calf from below, from the stable. She brings it upstairs and grips it. When he lights the lamp, he sees that the guest is asleep, the mullah. The heart of the miller bursts (with fear). He says 'Oh woe, I hope he has not heard.' (18) She said 'This calf desires you so much that he is used to you and it came to lick you, to lick you, but you thought that *he* mounted you.' He says 'Go and put it back in its place. I am going now, I do not want (anything). I am ashamed that this guest of mine will get up when I have thought such a thing about him, perhaps he has heard. I am going, you know how to put him on the road.'<sup>78</sup> (19) The miller goes off. She gets him up saying 'Get up, go and tell your wife "I made a mistake. Forgive me, pardon me. I did not know. I did not understand," then she will bring the fish and place them in front of you.' He goes and say to the wife 'Forgive me. I don't think I knew what a woman is.' She said 'Yes, you think that a woman is nothing. But a woman is a human being in her own right, she has a mind and she has understanding.' He says 'I beg forgiveness.' She says 'Now sit in your place.' Afterwards she fries the fish and brings them and puts them before him, he eats (them).

75 I.e. raped me.

76 Literally: what ash has come upon my head.

77 I.e. to rape him.

78 I.e. get rid of him.

### A6      The Dead Rise and Return (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) There was once a woman. A pitcher—you know what a pitcher is? They put water in it. A pitcher has a handle of rope. Women would put it on their shoulders and go to draw water from the stream for drinking. She put a pitcher on her back and went to the stream to fetch water. (2) On the way to the stream a deacon did this to her, did this, he winked, yes, he did this to her. On the next day she went and a priest did the same. The woman becomes very uncomfortable. On the third day she saw that a large bishop winked at her, because she was very beautiful. (3) She comes to her husband and says, she says ‘The story is like this. I went to fetch water and a deacon winked at me, a priest winked at me and a bishop winked at me. What kind of village is this? What kind of land is it? I am uncomfortable.’ Her husband says ‘No, no. Do not be uncomfortable. Give them an appointment to come to the house.’ She says ‘How is it possible for me to bring them home?’ He says ‘Bring them home and you will not have any trouble.’ (4) Tell the deacon to come at six o’clock, early, not to come late. At six o’clock he should come and be in the house. Tell the priest half past six. Tell the bishop seven o’clock. Give them a time (to come). Do not give them more time. Tell the deacon ‘At six o’clock I shall be ready for you to come.’ (5) She says ‘Very good.’ She goes. The deacon winks at her. She says ‘Well, very good. Do you want me?’ He says ‘I am dying for you.’ She says ‘Good, come at six o’clock. My house is in such-and-such a place.’ The deacon comes (and makes to) embrace her neck and kiss her, but she says ‘No, no, do not rush! Why are you in a hurry? I have cooked, I have prepared (food), I have decorated the table for you so we can eat and drink a little. Then afterwards I am yours. My husband is not here.’ (6) They sit and eat. The deacon is happy. Suddenly it is half past six and the priest knocks on the door. She says ‘Oh woe!<sup>79</sup> My husband has come.’ ‘What should I do? What should I do?’ Her husband had said ‘Put them in an oil barrel, a barrel.’ Barrels, do you know what a barrel is? Barrels, in which there is oil and they are large. He said ‘Put him there.’ She said ‘I have no place (to put you). I have no place, oh woe! Now he will kill you. Get into a barrel.’ He gets into a barrel. (7) The priest comes. The priest is worse (than the deacon), comes (and makes) to ... she says ‘No, no. I have laid this meal for you. Let us sit, eat and drink, then, well, it is (just) you and me, there is nobody. You know my husband has gone abroad.’ He says ‘Very good.’ They sit, eat and drink. It becomes seven o’clock. (8) It becomes seven o’clock. There is a knock at the

door.<sup>80</sup> The bishop comes. She says 'Oh woe, my husband has come. I did not know he would come back.' She puts also him there. The bishop enters. The bishop is worse than the others. She says to him 'Wait a little, make a little (wait).' Before he could speak,<sup>81</sup> there is a knock at the door. When there is a knock on the door, she says 'Oh woe! My husband has entered. Now he will kill you.' (9) 'What should I do?! What should I do?! I am a bishop, my reputation will be lost! Everybody knows me.' She says 'Come on, get into this barrel.' He gets into the barrel and sees that the deacon and priest are there. They put on the lid. Her husband enters. Her husband enters and gestures with his eye. He says 'Are there here?' She says 'Yes.' (10) He speaks very loudly with his wife so that they can hear. He says 'Wife, do you know what the story is?' She says 'No.' He says 'Oil has become very very expensive. Tonight I must sleep sitting on the barrel of oil so that people do not come and steal it.' He sits on the barrel of oil. Well, they all die. The bishop dies. The priest dies. The deacon dies. Now what could they do? The three of them are dead, there in the barrel. (11) He says 'Let's call people to come to bury our dead.' They weep. They lament in anguish<sup>82</sup> (saying), for example, 'my grandmother has died,' 'my grandfather has died.' They weep. They put him long like this, like this in his coffin. People come to take him away and bury him. They say 'Look, this dead of ours rises and comes back. Put him very deep (in the grave). (If) it is two metres that you normally place the dead body, make it three metres, otherwise this dead man will come back again.' (12) They take that man and put him two metres deep. They put earth on him and bury him. They come back to take (their) money. They see that they have laid out the priest there. They say 'We told you that he would come back. Here he is here.' (13) They take him off again and put him four metres deep. They dig and dig and put him four metres deep. They cover him and come back to take (their) money. They see that the third one is there. The relative<sup>83</sup> of the dead man becomes very upset and says 'I told you, I told you once (and for all). You have come only for money. I told you that our dead rise and come back. Look he has come back.' (14) They ponder what on earth they could do<sup>84</sup> so that they do not have to bury him anymore. They would take him away and take him high up a mountain, onto a very high mountain. From there they would throw him down. They do not want to bury him. They take him away and take him up a mountain, which was very high. They take

<sup>80</sup> Literally: They knock at the door.

<sup>81</sup> Literally: He is not yet speaking.

<sup>82</sup> Literally: They kill themselves.

<sup>83</sup> Literally: owner.

<sup>84</sup> Literally: what they could do, what they could not do.

him up and up and up. They are so exhausted. From there they want to throw him down. (15) A Muslim was performing ablutions there. He was washing his hands and feet under the mountain with water. Do you know what ablution is? They wash their hands, they wash their legs, saying *bismillāh, bisimillāh*. He was washing his hands and feet there and sees that something is coming on top of him. He gets up and flees. He gets up and flees. ‘We do not want this. Let them rot.<sup>85</sup> We do not want either their money or they themselves, let’s go.’ Before he (the dead man) touches the ground, he (the Muslim) flees. ‘We do not want him.’ That man got up and flees. He sees something coming on him and flees. They think that he is a dead man. They say ‘Before he touches the ground, look he is rising.’ He fled and went on his way. ‘We do not want them. We do not want their money nor shall we bury their dead.’ They leave (the scene) and go on their way.

#### A7      A Pound of Flesh (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) Long ago there was a man who went to a pilgrim and took money from him. He said ‘Pilgrim, I have a need, a need, I need, one thousand dinars of money. When I have finished (with them), I shall give them back to you and give you as much interest has you want per year.’ He said ‘No, I do not want interest. I only want one gram, a gram, (something) very small, I want to cut one gram from your buttocks.’ (2) The man, the lad, thought that the pilgrim was joking. He said ‘OK.’ He takes money, one thousand dinars, and goes and spends them. He makes a big profit with them, because the loan<sup>86</sup> of the pilgrim turned out to be profitable for him. He comes and puts money on the table and says ‘Mr pilgrim, here is your money. Many thanks. I made a good profit with it. Take whatever interest you want.’ (3) He says ‘No. I want what I have said.’<sup>87</sup> He said ‘What?’ He said ‘I shall cut one gram from your buttocks.’ He says ‘How can this be?!’ He says ‘I have said, we have made a bond. You have signed that you are happy for me to cut a gram from your buttocks.’ ‘How can it be?!’ In the end the pilgrim comes and brings a knife. He says ‘Take off your trousers.’ (4) He sees that no, it is not a joke, and flees. He flees and flees. He sees a donkey in the mud, buried in the mud. The owner of the donkey comes and says ‘I shall arrest you. Get my donkey out. If not, the one who is coming (after you) will reach you. Help me, get my

donkey out.' (5) He comes to take the donkey out, the tail of the donkey stays in his hand. He runs and runs, with the owner of the donkey behind him. With the owner of the donkey behind, he runs and runs. He goes through a house and goes up three floors from there, he himself, and they are coming after him to cut meat from his buttocks, the pilgrim and the owner of the donkey. (6) He sees that no (he cannot stay there), they have come. He throws himself, from three floors up he throws himself. When he threw himself, there was there a man, he had been laid in the sun, to sleep in the sun. He was ill. They had put him there in the courtyard. He threw himself onto the stomach of the other and he (the latter) died. Now also the master of this man was (chasing) after him! (7) He runs after him, after him, after him, he ran in the street. A colonel, a guard, with his wife—she was pregnant and was going to the hospital. He knocked into her and the child came out. He seized him. The guard seized him. Now they take him to a jurist. They take him to a jurist. They have put him in front of them so that he does not run away. Now there is the pilgrim, there is the owner of the donkey, there is the master of the dead man, and there is this great colonel. The four of them have seized him and take him. (8) They take him and he opens the door first to go into the presence of the jurist. When he opens the door, he sees that the jurist is with a woman. He says 'Wait, wait, the jurist is saying a prayer.' He closes the door. The jurist finishes. The woman goes from the other door. The jurist wipes his mouth and comes out. (9) He said 'Who said that the jurist is saying a prayer?' He said 'Sir, it was me.' The lad said 'Sir, it was me.' He said 'OK, come in.' They come in and sit down. He (the jurist) says 'So, what is the story?' (10) First of all the pilgrim says, he says 'Have I done wrong to have given this man one thousand dinars of money? I said to him "I do not want interest, I do not want interest, I only (want) to cut a gram from your buttocks." He does not allow this.' He (the jurist) said 'Well, this is a very bad situation.' (11) He says to the servants—there are many servants in the jurist's house—'Bring a knife and scales.' He says to the lad 'Take off your trousers.' He quickly takes his trousers off. He (the jurist) gives the knife to the pilgrim and says 'This is the knife. Those are the buttocks of the lad. Cut! If it is more than a gram, I shall cut it from your buttocks. (If) it is less, I shall cut it from your buttocks. Only a gram.' (12) He says 'How can I do this? How can I cut it? I am not a pair of scales!' He said 'But you son of a dog, what do you want from this man? Do you want to take (all) his buttocks at once for one gram? Put down five hundred dinars here.' The pilgrim goes. (13) The owner of the donkey comes. He says 'What (happened to) you?' He says 'Sir, with respect,<sup>88</sup> my donkey was in the

mud and I said to this man “Help me get my donkey out.” He came and pulled off the tail of my donkey and my donkey remained without a tail.’ He (the jurist) says ‘This is very difficult.’ (14) The jurist said ‘He has done a very bad thing. Your donkey has remained without a tail.’ He said to the servants ‘Bring out donkeys into the courtyard.’ The jurist has many servants. They brought donkeys out into the courtyard and he says to the owner of the donkey ‘Pull off a tail.’ He began to pull at a tail and the donkey went ‘hee haw’ and they hit him in the stomach, and he fell onto the ground. He said ‘I cannot (do it).’ He (the jurist) said ‘But what do you want? Perhaps the tail of your donkey was already cut. Put down five hundred dinars.’ (15) (The jurist) comes and says to the owner of the dead man, he says to him ‘What (happened to) you?’ He says ‘Sir, with respect, my brother was ill and the doctors gave instruction that I should put him under a wall to take some sun. This accursed man<sup>89</sup> threw himself from the third floor onto the stomach of my brother, and my brother died.’ (16) He says ‘Well, this is a killing for a killing. Tie the hands of this son of a dog. Put him under a wall. Go up. My house is not three floors high, it is two floors high. Throw yourself and kill him.’ He goes up and has a look down. ‘No, I cannot.’ He says ‘But what would you have done to this man, to this unfortunate man, because he hurled himself down from the third floor? Before you came to talk (to him), perhaps your brother had already died there before. Five hundred dinars.’ (17) He comes to the colonel. He says ‘Well, what (happened to) you?’ He says ‘With respect, I was married for these seven years, but I did not have children. I went so much to churches, I went so much to doctors, I had recourse so much to medicines, this one, that one, I implored God, and my wife became pregnant. Now it was seven minutes for me to take her to the hospital for my son to be born. This accursed man hit my wife’s stomach and my wife’s baby was born in the street.’ (18) He says ‘You must give your wife to him. Give your wife to him for him to put the baby in her stomach and in nine months and nine minutes he will bring her and give her to you.’ He says ‘I shall never do this, give my wife to him. How can I give my wife to him?’ He says ‘Well, put down there five hundred *tumans*, five hundred.’ He also puts down five hundred. They all go.

(19) He says ‘Just tell me, tell me, I am fascinated by you. Where did you learn this skill, this skill of language. I want to know this skill—you said the jurist is saying a prayer, where did you learn this skill?’ He said ‘From my parents. I have learnt this skill from my father and mother.’ He said ‘Here, these thousand dinars are for you, these two thousand dinars are for me. Go from here quickly before I change my mind.’

### A8      The Loan of a Cooking Pot (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) One day mullah Nasradin goes and takes a cooking pot as a loan from his neighbour. He says 'Give me a pot, I want to cook stew in it. I do not have a big pot.' He takes the pot and brings it back, cooks stew, takes it and gives it back to the neighbour, but he puts two pots in it. (2) The neighbour says 'This is two pots, why have you brought them?' He said 'Your pot has given birth, to two others.' He gives this to him 'Thank you' and comes back. (3) The next week mullah Nasradin goes again. He say 'Excuse me, I want a bigger pot.' The eye of mullah Nasradin had fallen on one of the pots of the neighbour. He had made a plan, since he wanted to bring back that one. For that (reason) he gave his pot as well as two others with it. He went and said 'I want a bigger pot to cook food in—I have guests.' (4) He gives the biggest and most beautiful pot to mullah Nasradin. Mullah Nasradin brings it back and puts it in the house. The neighbour sees that one day, two days, one week, two weeks, one month, two months (pass) but there is no pot. 'But what has become of the pot? What has become of the pot?' (5) He goes to the door of the mullah and says 'Mullah, if you please, I want a pot that you took some time ago.' 'What pot?' He said 'A pot that you took from me to use to cook food in.' He said 'Ah, the pot, the pot has died.' He said 'How could it have died?!' He said 'How could a pot give birth?!"

### A9      Much Ado About Nothing (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) One day mullah Nasradin goes to the market, the town. He says to his wife 'What do you want me to bring you?' The wife says '*həč, həč, həč*' meaning 'nothing' they say *həč*, that is 'nothing.' Mullah Nasradin immediately he began to go out of the door of the house, started to say '*həč, həč, həč, həč*' so that he would not forget it. (2) He went and arrived at a place and saw a very large river and people catching fish. They have broken the ice and are fishing. They have broken the ice and are catching fish. The mullah passes by them saying '*həč, həč, həč, həč*' and these lads are angry. They are tired and thirsty. They confronted the mullah, beating and shaking him. (3) One said 'Why are you saying *həč*? Since the morning we have broken this ice and are struggling to catch fish and you say *həč, həč*?' He said 'But what should I say?' He said 'Say: *irilärdän xərdalardan*, small, big, small, big. That is: catch small fish, catch large ones, lots of them.' (4) The mullah thought that his wife had asked for small and big. He began to go (on his way) and started to say '*irilärdän xərdalardan*, small, big, small, big.' This time he sees a dead man whom people were taking out to bury, but he is singing and saying 'small, big, small, big.' They are weeping and

beating their heads, (since) the lad is dead but he is saying ‘small, big, small, big.’ The people who are the family of the dead person come and shake and shake him, they beat him soundly. (5) He says ‘But what shall I say?’ They say ‘Say *musulmandør, alla rahmat alasin.*’ That means: He is a Muslim, may God grant him rest. He is a Muslim, God grant him rest. He started shouting ‘He is a Muslim, may God grant him rest,’ but he was thinking that his wife had asked for ‘He is a Muslim, may God grant him rest.’ (6) He goes, he goes a long way, he goes and sees a dog which is dead and some people have taken hold of its leg and were dragging it and taking it to throw it into a pit to bury it, but he is saying ‘*musulmandør, alla rahmat alasin,* he is a Muslim, may God grant him rest.’ He came and they beat him soundly, beat him thoroughly and made him all bloody. (One of them) said ‘How can you possibly say to a dog “He is a Muslim, may God grant him rest?”’ They gave him a sound beating. (7) He got up. The mullah could not move. He could not move. He starting saying again to the dog who had died, he said ‘*musulmandør, alla rahmat alasin.*’ (They say) ‘Say nothing (*hač*) again.’ To the dog he said *hač*. He went back to that (word) *hač*. He came along slowly (saying) *hač, hač, hač, hač.* (8) Suddenly he was very tired. He wanted to jump over a stream—there were small streams in the streets. He forgot (the word) *hač*. He returned home all covered in blood. He said to his wife ‘(When) you do not want, you do not want, you do not want anything, but when you want (something) I have to suffer the beating of the world, but I still do not find it.’ (9) His wife said ‘You are an ass. Do you not know (what I meant), what can I do? I said *hač*, that means “nothing”. You have made problems<sup>90</sup> for yourself and have suffered beating. It is not my fault.’<sup>91</sup>

#### A10      A Visit from Harun ar-Rashid (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) One day Harun ar-Rashid set off to go around the town to see the people, (to see) what their situation is<sup>92</sup> and how they are living. He went off walking around, walking around a lot, having put a basket of dates on his shoulder, a big basket. He wandered around and saw that one, saw that one, saw this one, he saw everybody. (2) After evening came, he went back to go to his home and saw a shop with the door open. He went inside (and saw) a certain<sup>93</sup> man who was

90 Literally: a thing.

Why are you so sad?’ He said ‘Ah, did you not have anything better to do than to come?’<sup>94</sup> Have you come to give me a lesson? What will you do for me?’ (3) He said ‘Ah, well perhaps I might help you.’ He does not know that he is Harun ar-Rashid. Harun ar-Rashid, that is the head of all the town. He said ‘No, do not bother about me. My own trouble is enough for me.’ He said ‘No, (if) I do not help you, I shall give this basket of dates to you. Tell me so I can see what the matter is.’ (4) He pressed<sup>95</sup> him a lot. After he had pressed him a lot, the lad, the owner of the shop, said ‘It is not hidden from God, why should it be hidden from you? I shall not hide things from you. This is what happened to me. Three people who came to me gave me three hundred gold coins. They gave to me. My job is this, to take money from people, to give money to people, to take gold from people, to give gold to people. I do business in this. (5) But these three people came to me and gave three hundred gold coins. They said “Look after them for me.” So I looked after them. They signed (an agreement) that nobody has a right to come to take these gold coins. “The three of us must come together. There is nobody who should come to take them.” They signed and went. (6) They signed and went.’ He said ‘Not long passed and I saw that one of them came back. One of the friends came back. He said to me “Excuse me, we think we have given you too few gold coins, not three hundred, but two hundred.” I said “No, it is not possible.” “No” he said “We friends were just now talking together. One of them said: Look, look, this one’s mind was not composed,<sup>96</sup> I gave two hundred and he thought they were three hundred. Come, bring them so I can count them.”’ (7) He said ‘I gave them for him to count. (When) he was counting them, at that time there was a knock at the door. I went to open the door and saw that those two other friends had come. I said ‘Ah, what do you want?’ They said ‘We have come to check<sup>97</sup> and tell you that (if) our friend has come and entered, do not give him the money, the gold coins.’ I said ‘He is counting them!’ (8) We went in to see why he was counting them, but he was not there. Neither were the gold coins there, nor was the man there. He had taken them through the window and run off. The two said to me that I must give them the three hundred gold coins. Now where can I give them?! How can I give them?! After he has taken and stolen them, how can I give them?!’ (9) He says to Harun ar-Rashid ‘Tomorrow they have summoned me to court’—the word dādgāh means court. He says ‘They have summoned me to court, I have

to go tomorrow to the court. If not, they will put me in jail.' He said 'You be there and I shall see you there.' In the morning that man goes to the court, they have summoned him to court. He sees that Harun ar-Rashid is sitting there. He is the judge. (10) Afterwards those two people came in, the owners of the gold coins came in. The judge said to them 'Well, you have a complaint concerning this man. You have deposited three hundred gold coins with him and have signed (an agreement) that he would not give (them) to anybody, that the three of you must be present. The three of you deposited them together and the three of you will take it (the deposit).' They said 'Yes, that is true.' He said 'OK, go and bring that friend of yours, your money is ready, come and take it.' (11) They said 'We do not know where he is.' He said 'No, you know where he is. You signed (an agreement) here that the three of you must take it together. Go and find him and bring him, then I'll give (you) the three hundred gold coins.' (12) They put them in jail. They grant the lad permission to leave and he goes to his shop. He himself descends from the room, from the place of the judge. He descends in order to go, while all the people lower their heads, they lower their heads like this. The lad says 'Who was that?' They said 'It is Harun ar-Rashid, my dear. He is the greatest man in the whole of Baghdad. How did you not know him?' Then he knew that it was Harun ar-Rashid who had been sitting in his shop.

#### A11      The Cat's Dinner (Yulia Davudi, <sup>†</sup>Hassar <sup>†</sup>Baba-čanja, N)

(1) One day mullah Nasradin had brought a *batman* of meat. A *batman* is Turkish, it means two or three kilos, four kilos. He had brought meat home. He said to his wife 'I would like you to make this meat into kebabs. Cook it in the evening, I shall have guests.' The mullah goes about his business. (2) The wife, the wife of the mullah, quickly cooks the meat, invites her friends and they eat it. In the evening the mullah comes and says 'But where is the meat? Have you cooked it or not?' She says 'No, before I could light the grill, that cat ate all the meat.' (3) The mullah brings scales. He brings them and says 'Bring the cat here, I shall weigh it.' He brings the cat and weighs it. He says that no, the cat is less. If she is four kilos and has eaten five kilos of meat, she must now be ten kilos. (4) He gets up and gives his wife a thorough beating.<sup>98</sup> He says 'You are lying to me. You have eaten the meat yourself. If the cat had eaten, she would now be huge, fat.'

**A12 Ice for Dinner (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)**

(1) One day again mullah Nasradin brings liver with kidneys, we call it *jərjiyatə, jərjiyay*. He brings it home. His wife is sitting by the pool washing dishes. A cat has come in and is sitting there looking. He says to his wife ‘Wife, I have brought a bag of ice for you to cook, clean and prepare for the evening.’ (2) The mullah goes off. The woman says ‘Ah! Curse him!<sup>99</sup> Instead of going to bring meat, he has gone and brought me liver, kidney, heart and kidney.’ She goes about her work. The cat goes and eats it all and finishes it off. (3) In the evening the mullah comes back. He says ‘I had brought heart and kidney to you. What has become of them?’ She says ‘You said to me that you have brought ice.’ He said ‘Fool! Idiot! I said this so that the cat would not hear, so that it would not understand and eat it!’

**A13 Am I dead? (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)**

(1) Again, mullah Nasradin goes and says to his wife ‘If I die, what would happen to my body?’ She says ‘What would happen to your body? It would only be cold. You will know nothing about it. You will be cold like ice.’ (2) Mullah Nasradin goes to the forest to fetch wood for the winter, (in) the snow. In the middle of the way as he gathers wood he sees that his hands have become cold (as) ice. He becomes cold. He said ‘Oh, but I am dying, because my wife said a body is cold (when dead). I am dying.’ (3) Slowly he lay down on the snow. He lay down on the snow and from the other side wolves came. They came and tore his donkey to pieces, and began to eat it. Mullah Nasradin said ‘Go and be the substitutes of this soul of mine because I am not alive. If I were alive, I know what I would do to you.’

**A14 A Thousand Dinars (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)**

(1) One day mullah Nasradin was sitting at home and saying a prayer to God, saying ‘God, give me a thousand dinars of money, a thousand dinars. Only do not let it be nine hundred and ninety-nine. I want one thousand dinars from you.’ He said a prayer thus. He prayed every day. (2) He had a neighbour. He was

a young lad, a lad, twenty years old or so. He wanted to outsmart the mullah.<sup>100</sup> He said 'I shall test him.' This lad also likes money a lot. He wanted to annoy the mullah. He puts nine hundred and ninety-nine dinars in a bag, a bag. He puts nine hundred and ninety-nine dinars in a bag and gives them and sends them through a hole<sup>101</sup> of a fireplace. He sends them from there and they arrive. (3) (While) the mullah was praying, he saw the bag arrive. Then he took it. The lad wanted only to test the mullah, because the mullah was saying 'If they are nine hundred and ninety-nine, I do not want them, I shall not take them. I am telling this to you, I say to you, only one thousand dinars. (If) one dinar is missing, I do not want them.' The lad wanted to see whether the mullah was speaking the truth or not. (4) He offered (to him) the bag, in which he had put nine hundred and ninety-nine dinars. He opened the bag and saw that one dinar was missing. The man who is above is watching to see what the mullah will do. He looks at them and says 'Well, very good, it does not matter. This once I shall keep this money with me until you send the other dinar.' (5) He takes the coins and hides them in a box. That man comes down from the roof and runs to the mullah. He says 'Mullah, the bag that I sent you now—you had said nine hundred and ninety-nine and I put (in it) nine hundred and ninety-nine. You have made a promise to God (that you would accept) only a thousand, a thousand dinars. But I have put these nine hundred and ninety-nine (in the bag) in order to give you a test, to test you. They are mine. Give them (to me).' (6) He said 'Go away, mate, God will give you from another place. Why have you come here about money? What money? What thing?' He said 'With respect, just now I have sent you the bag. They are mine. Give them (to me)!' 'I will not give them.' (7) Now they started fighting and shouting. He said 'I shall take you to court, to the judge.' He said 'I shall come to the judge.' He came so he would take him. He said 'I cannot sit like this—come like this. Can a mullah like me come on foot? I must have a jenny for me to sit on and come (to the judge).' (8) The young man runs and brings a jenny for him so that he can sit (on it). He says 'No, I want fine clothes.' The mullah says 'I want to wear fine clothes and sit on it. How can I come like this to the judge?' The lad brings the most beautiful suit to the mullah. He dresses him in it and puts him on the donkey. They go to the judge. (9) They come into the presence of the judge and say 'Judge, the story is like this. This man, the mullah, was all the time praying (saying) "I want a thousand dinars, a thousand dinars from God. If they are nine hundred and ninety-nine, I shall not accept them." What did I do? I said "I shall test him." (10) Now by way

of the fireplace I sent it to him but he says "No." He says "They are mine." He says "I shall not give them (to you)." He (the judge) says to the mullah 'Is this man speaking the truth?' He says 'No. Such a thing has not happened.' He said 'If you ask him now and say "Where are the clothes of the mullah from?" he will say "They are mine."—You understand what happened?—(If) you say "Where are the clothes of the mullah from?", he will say "They are mine."' (11) Well, the fellow says 'They are mine!' 'Do you see, do you see judge?!" He said 'If you go and indulge him further,<sup>102</sup> he will say "Also the donkey is mine."' He said 'The donkey is mine!' He said 'You see, did not I say? Did I not tell you? The donkey is his. The clothes are his. The money is his. But what do I have, nothing?' (12) The lad becomes very upset. He gets up in order to hit the mullah. The judge does not allow this and sends police to arrest the lad. They arrest the lad and put him in prison. The judge takes a dinar from his pocket to give to the mullah. (13) He says 'Take this one dinar for yourself. I am grateful that you find such bad people in the town.' The mullah says 'Thank you God for paying your debt so quickly, for giving a dinar.'

#### A15      Kindness to a Donkey (Yulia Davudi, <sup>†</sup>Hassar <sup>†</sup>Baba-čanja, N)

(1) One day the mullah had loaded a lot of pieces of wood on the back of a donkey. Like this, he had loaded on a donkey many pieces of wood. But he saw that the donkey could not go along the road. He got up and stood on his feet and said 'Are you uncomfortable? Are you tired? Wait I shall take some of your load.' He gets up and stands on his feet. (2) The people who were friends of the mullah say 'Mullah, why are you not sitting on the donkey, so that both the donkey will be comfortable and also you?' He says 'I am not so unjust that I become a bad man. I want to help my donkey to go more comfortably.'

#### A16      The Stupid Carpenter (Yulia Davudi, <sup>†</sup>Hassar <sup>†</sup>Baba-čanja, N)

(1) People ask the mullah saying 'Have you seen a man more stupid than yourself?' They say to the mullah, saying 'Apart from yourself, is there a person who is a yet more stupid man?' They ask the mullah saying 'Have you seen apart from yourself another stupid man? You are stupid, but have you seen a more stupid person than you?' (2) The mullah said 'Yes, I have.' He says 'I brought

a carpenter here, into my house, in order for him to make a door for me. But he had not brought a tape measure with him. Nevertheless he went and took the measurement with his hands, the measurement, with his hands, the same method (as a tape measure). (3) He got up and went with his hands open so that he would not forget the measurement. Because he was going like this and was not looking, he went and fell into a well. But he had luck, the well was not full of much water. There was little of it there. People came to get that man out from there. They said "Give (us) your hand so we can take you out." He said "I cannot give my hand. If I give my hand, I shall forget the measurement, which I made for the door." He is more foolish than me.'

#### A17     A Close Shave (Yulia Davudi, +Hassar +Baba-čanja, N)

(1) One day the mullah went to have his hair cut at the barber's. That man, the barber, took the hair of the mullah to cut it, but he took also all of his skin. Then the mullah saw that his head was all covered in blood. He (the barber) began to put cotton on them (the injuries), put cotton on them. The mullah looked in the mirror and (saw) that half his head had become cotton. (2) He said to the man 'No, no, enough. Don't do it. I shall make this other side of me wool, I shall sow it with wool. You have made it cotton, I shall go and sow wool in it. On this side you have sown cotton, on this other side I shall myself sew wool.'

#### A18     A Sweater to Pay Off a Debt (Yulia Davudi, +Hassar +Baba-čanja, N)

(1) One day the mullah was in debt, he was in debt to a man. This man one day came to the door. The mullah saw him coming from a distance and closed the door against him. He said 'If he comes,' the mullah said to his wife 'say that the mullah is not here.' (2) The wife went to open the door. He (the creditor) said 'The mullah is in debt. I want to take money from him.' She said 'The mullah is not at home, but he said to me that I should stand in front of the door and that I should take the hair that has fallen on the ground of as many sheep that pass by, gather it together, make it into threads and knit it into a sweater, then sell it in order to bring in your money to give it to you. I apologize that we are in debt, but I shall try to pay your debt.' The man goes away.

**A19      No Bread Today (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)**

(1) One day the wife of the mullah says to her husband, she says 'Go and bring some bread. Since I am busy with cooking, go and bring some fresh bread.' (2) The mullah goes to bring bread. He sees a queue, people are standing in a queue, which consists of more than one hundred people.<sup>103</sup> He said 'Before I go and arrive there, the bread will run out. Before my turn arrives, it will be dark.' He thought and thought what he should do. He went forward and whispered to one of them, he whispered softly like this. (3) He said 'Do know that that man has gone on the pilgrimage, Abdul-Hassan has gone on the pilgrimage? He has come back from the pilgrimage, the pilgrimage, and went to Mecca, the pilgrimage. He has come back and now [he?] is distributing bread to everybody completely free. Have you not heard?' He said 'No, I have not heard.' He said 'I also have just now heard. I want to go there.' (4) The other people told (this) to each other and all went. They all went and only the mullah remained. He went forward to take bread. He took two loaves of bread. He (the seller) said 'Fifty dinars.' He said 'Oh, who (do you think) you are? Such-and-such a person in such-and-such a place is giving bread away free. He has come back from the pilgrimage. You here are selling two loaves of bread for such a price!' (5) He said 'Fine, go and take from there. I also shall now go and take from there, if he is giving it away.' He runs and goes there. He looks and sees people standing there. The people who were in the queue and went there come up against the mullah in order beat him. One said 'This man has not yet returned from the pilgrimage, from Mecca. Why did you say that the bread was finished? We are now left without bread.' The mullah runs and goes home, and cannot buy bread.

**A20      An Orphan Duckling (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)**

(1) One day mullah Nasradin did not show up. People were coming and going a lot and saying 'What has become of you, mullah? Where have you gone mullah Nasradin?' They came and knocked on his door and said 'Mullah Nasradin, we are very worried. Where are you? You do not make an appearance.' (2) He said 'Do you see this duck? Its mother is dead. This is a duckling' (They see) that he has put a string on the leg of the duck and put it in the pool. He pulls it back and forth, back and forth.<sup>104</sup> They say 'What are you doing?' He says 'I am afraid it

may drown because it is small and its mother had died. I am teaching it to swim so that it does not drown and die.'

#### A21 Mistaken Identity (Yulia Davudi, <sup>†</sup>Hassar <sup>†</sup>Baba-čanja, N)

(1) One day the mullah was wandering around in the street. A very large man, a Hercules, a Hercules came and gave the mullah a punch. The mullah fell. He got up onto his legs. The Hercules came to punch him again, but saw, no, he had hit him by mistake. He is not the man that he wants to hit. This was another man. (2) He says 'Forgive, please, forgive me. I did not know. I thought you were that (other) man.' He said 'No, what forgiveness? I shall go and take you to the judge.' He takes him to the judge. The judge says 'Well, give him a punch for the one he gave you.'<sup>105</sup> He said 'No, I shall not punch him.' He says (to the Hercules) 'But give him some money.' (3) He says 'There is no money in my pocket. Keep him here and I shall go to bring money to give to him for the fine.' The mullah waits and waits, but the man is still not there. The mullah gets up and punches the judge. He says 'There, instead of him, who has hit me, I have hit you. (If) he brings the money, you take it. I do not want it.'

#### A22 Trickster (Yulia Davudi, <sup>†</sup>Hassar <sup>†</sup>Baba-čanja, N)

(1) One day a man, who was very learned, said 'Nobody can trick me. There is nobody in the world who could trick me.' Mullah Nasradin says 'Wherever this man is, I shall trick him.' He comes to the judge. At that time there was no king, there was no police, but there was a judge. All matters were in the hand of the judge. (2) He goes to the judge and says 'I shall trick you.' He says 'How will you trick me?' He says 'Yes, I shall trick you.' 'But on condition (of a deposit), put down a deposit.' He puts down one thousand dinars with the judge. He says 'The thousand dinars—if I trick you, these thousand dinars are mine. If I do not trick you, they are yours.' They sign. The mullah says to that man 'You sit here and I shall go and come back to trick you. I shall go and return to trick you.' (3) The judge sits there, waiting for the man to come back, for the mullah to come back and trick him. (After) one hour, he is not there. (After) two hours, he is not there. (After) three hours, he is not there. (After) five hours, he is not there. The judge says to the pilgrim 'I think the mullah has lost and I have won.' (4)

The pilgrim says 'No, pardon me, you are wrong. *He* has won. He has put you here these four hours in order to trick you. This is a trick. He has tricked you. For these four hours, five hours, you have sat here waiting for him. *He* has won.' They take the thousand dinars and give them to the mullah.

#### A23 Problems Lighting a Fire (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) One day mullah Nasradin is very hungry. He says 'Every day my wife kindles the fire, this time, I myself want to kindle the fire and cook a pot (of food) for myself' His wife had gone out. He comes but however much he wants to light the fire, the fire does not light. He says 'Now I know why you do not light. (It is) because *my wife* used to light you, fire. Now *I* am lighting you and you do not accept it.' (2) He goes and puts on the clothes of a woman. He puts a scarf on his head and makes himself into (the image of) a woman. He comes and lights the fire. He strikes matches and the fire lights. The fire lights and the wife of the mullah comes back. She says 'Mullah, with respect,<sup>106</sup> what are you doing? Why have you made yourself like this? You have made yourself look like a woman!' (3) He said 'Do not speak like that. The fire will know and will go out. It was not lighting. I made myself into (the image of) a woman and it thought that it was you. If it knew (it was) me again, it would not light. The fire thought it was you and kindled.' At that moment a spark comes out of the fire and sticks to the body of the mullah. The mullah burns. The mullah burns and said 'You see what you have done to me! You have made known who I am and the fire was not pleased. It almost took my life.'

#### A24 The Angel of Death (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) One day the mullah was very badly ill. He was very badly ill. He was approaching death. He says to his wife 'Dear wife, dear wife,' that means 'sweet wife,' 'dear wife [ayāl-jān]' is Persian. He says 'Go and put on all your beautiful clothes, put on lipstick, and make yourself beautiful. Come and sit by me, I am dying.' (2) She says 'Why are you saying this, so that people will despise me? They will say, for example, so-and-so's husband is dying but she has gone and beautified herself. Do you want people to laugh at me? What is this all about?'<sup>107</sup>

(3) He says 'No, my dear wife, my life, I am saying this so that you will be beautiful, so that when Isrāyīl the angel comes<sup>108</sup> to take my soul, he will see that you are very beautiful and will take you instead of me.'

#### A25 Stomach Trouble (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) One day the mullah was sitting at home, he had not gone to work. His wife came and said 'Why have you remained in the house and not gone to work?' His stomach was aching and he had 'working of the leg' (i.e. diarrhoea). We say he had 'working of the leg.' His stomach was working. He said 'For so many years have *I* worked and my stomach has eaten. Today let my stomach work and let *me* eat.'

#### A26 A Lost Donkey (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) One day the mullah is walking in the market and he loses his donkey. His donkey disappears. There is no donkey. He shouts 'Oh woe! My donkey has disappeared. I shall give a dinar to whoever finds it.' The donkey disappears and he goes along. The mullah says 'Thanks be to God, thanks be to God, praise be to God, praise be to God—thanks be to God [xōdā šucr],' that is may the name of God be glorified, may the name of God be glorified, praise be to God. (2) The people say 'Why is it that your donkey has disappeared but you send up praise to God?' He says 'I send up praise that I myself was not on the donkey. If I myself had been on the donkey, they would have taken me also.'

#### A27 A Lost Ring (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) One day mullah Nasradin loses his ring in the house. He looks for it but does not find it. He goes out into the yard, in the yard and there looks for the ring. His wife says 'Mullah, you lost your ring in the house. Why have you gone to look for it in the yard?' He says 'Wife, it is dark in the house. I must go out into the yard (where) it is light and look for it.'

---

<sup>108</sup> Presumably Isrāfīl the angel of death is intended.

**A28     The Purchase of a Donkey (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)**

(1) One day the donkey of the mullah died. He went to the market to buy a donkey. He gathered together money and went and bought a donkey. Thieving men saw the donkey of the mullah and came behind him to take the donkey. One of them, a kind of lad, took the chain, put it on his neck and went behind the mullah, instead of the donkey. The other one, his friend, took the donkey, took it to the market to sell it. (2) The mullah with him going behind him arrives home. He turns round, looks and (sees) a man. He shouts 'God help me! God help me! God help me! God help me!', that is 'Oh God! Oh God! What is this? What has happened? I bought a donkey. It has become a man!' He says 'Where have you come from? If you please,<sup>109</sup> how has this happened? I bought a donkey, you are a man! What has happened?' (3) He said 'I was very wicked to my mother. My mother cursed me and I became a donkey. When I became a donkey, they sold me. At that moment, you came and bought me. By the decree of God I have again returned and become a man.' (4) Mullah Nasradin says 'If you please, I did not want you, go away! But pay attention to your mother heh, be good to your mother heh. Do not make her angry so that she curses you again.' He says 'No, Sir, I shall not do this again.' (5) He comes back to his other friend, who has sold the donkey of the mullah—he went behind the man and took away the donkey. He went there and they divided the money. (6) The next day the mullah goes to buy a donkey. He sees that the donkey which he had bought yesterday is there. He goes and whispers in its ear, saying 'Have you again been wicked to your mother and become a donkey?'

**A29     Lost Money (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)**

(1) One day mullah Nasradin was searching in the mountains. He was searching and getting cold. When people came and said to him 'What are you doing here?' He said 'Believe me, I have buried coins here. Now, however much I search for them, they are not here (to be found).' He (= one of them) said 'Didn't you put down a sign so you could find it?' He said 'When I put the money here, there was a cloud, which was standing over our head. But now it is not here, the cloud has gone and I do not know where the money is.'

---

109 Literally: May I be your substitute.

### A30 The Wife's Condition (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) One day the wife of mullah Nasradin says to him 'If you do not bring back twenty dinars, you will not enter this house. You will not enter.' The mullah goes off. However much he goes this way and that in order to work to bring in twenty dinars and for his wife to allow him in, he does not bring it in, he does not bring it in. (2) He goes and sits in a ruin—a ruin is (a place with) dilapidated houses, there is nothing there—he sits there. He sees a man coming, one of those pilgrims and the like. He takes out various things from his box. (3) He makes (an image of) Eve, he says 'Eve, you were born and from you people issued. Afterwards you ate an apple and gave everybody a headache.' He strikes her head and destroys her again. Again he makes something else, another woman, he says 'You were created to go on the straight path, but you went and ate the wheat and did damage.' He kills also her. He hits her and destroys her. (4) He comes and makes one of those pilgrims (saying) 'You were a very good man, but afterwards you did bad things.' He came to destroy it, but the mullah screamed. The mullah screamed saying 'No, do not kill him, do not kill him, because he was in debt to me. He was in debt to me, do not kill him. Wait, I shall take it (the money) from him, afterwards kill him.' (5) The pilgrim saw that another man was sitting there. He shouted in fear 'Ah!' and fled. He left everything. He fled. He fled. The mullah gets up and looks in his purse to see who this man was, what he was. He made these things by himself. He looks and (sees) five hundred dinars in his purse. (6) He takes them and runs to his wife. He says 'Wife, open the door!' She says 'Do you have twenty dinars?' He says 'Open the door. Instead of twenty dinars I have five hundred dinars.' He tells her the story of what happened. Then she says 'Now I know that God will not leave us hungry.'

### A31 A Donkey Knows Best (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) One day the mullah goes to the home of a certain man. The man sees that the mullah is playing with gold coins, playing with them like this. The man comes and says 'He is a mullah, he is an ass. He does not know what gold is, what silver is, what rice is. He does not know. I shall go and take from him the gold coins.' (2) He says 'Mullah, if you give me those three gold coins, I shall give you one hundred dinars of money.' He asks the donkey saying 'If you bray three times, I shall know that you are speaking the truth, not him.' (3) The donkey brays three times. He returns to the man and says 'The donkey in its asinine state knows what gold is and what rice is. But don't you with your asinine skull know what

### A32 When Shall I Die? (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) One day mullah Nasradin is sitting on a branch of wood. A person was entering and said 'Mullah, you are cutting that wood, you will fall.' He said 'Go away, mate, it is not your business to come and harass me. Leave me alone and go about your own business. This is my business. If I fall, I fall.' (2) Before the man had gone a (distance) of ten steps, the mullah falls<sup>110</sup> bump—on the ground. He gets up and runs after him. He says 'Excuse me; you knew that I would fall from the tree. But tell me so that I know when I shall die.' The man saw that the mullah's brain was rather lacking. He said to him—excuse me, excuse me—he said 'When your jenny farts three times, on that day you will die. On the day that your jenny farts three times, on that day you will die.' (3) The mullah had put a heavy load on the jenny. He had put a load, many things, on the jenny and the jenny wanted to climb upwards, and then wind came out of her, brrr, she farted. The mullah said 'That is it, I am approaching death.' (4) She went up a little more (and farted) another (fart). He lay himself down on the ground. He said 'Well, it is the time of my death.' At the third (fart), the mullah died. Some people, his friends, came and said 'Oh, what are you doing? Why are you there?' He said 'Well, I am dead. Surely you see that I am dead!' 'No' they said 'You are alive! You are speaking.' They leave him there and say 'He is an ass, he does not understand.'

### A33 I Have Died (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) One day the mullah, mullah Nasradin, comes along the road. The donkey kicks out and the mullah falls from the donkey. He remains there and does not get up. He says 'I have now died, but there is nobody to come and get me up from the ground. There is nobody to think about me.' He says 'I shall get up and run and tell my wife.' (2) He gets up from there, runs and comes and says to his wife 'Wife, oh woe,<sup>111</sup> your husband has died. Have you not had news?' 'Where has he died?' 'In such-and-such a place. Come yourself, I'll show where he is.' (3)

The mullah goes and lies down again there. The wife comes, weeps and shouts. She says 'The mullah has nobody. The mullah my husband has died.' He says 'From where have you learnt that your husband has died?' She says 'He himself, such a poor wretch, came and told me that he has died and that he has nobody to go and take him and bury him.'

#### A34 The Fisherman and the Princess (Nancy George, Babari, S)

(1) A boy—his father dies. He has an old mother. She says to him 'Now you have grown up. You can go and work.' The lad goes and works until evening, in a place where they build houses, I don't know, jobs like that. He says 'Mother, I cannot do this job. I want to work for myself.' She says 'What do you want to do?' He says 'I want to go and bring fish, sell fish. (I want) to catch fish. In the morning (I want) to go to catch fish and bring them back and sell them.' (2) He goes and catches fish. He brings them to the town and sells them, and the like. Gradually, later, he goes to a place and sees, he wanders around a little, he sees a building that is very big and high, and so forth. He asks 'What is this here?' They say 'This is the house of the king.' He thinks to himself and says 'How about I take them here into the house of the king and sell them? They will give me something more (for them).' The next day he goes and catches beautiful big fish and brings them. There he cries 'T—at that time when people sold something in the street they had to cry out—'We are selling fish.' (3) He goes to the door. He stands and says 'I have fish for sale. They are fresh. I have just caught them from the water. They are very nice and tasty,' and so forth. A worker, a servant, opens the door. She opens and goes inside, saying 'A lad is selling fish.' The daughter of the king says 'Invite him to come inside and bring them.' She sees the fish. She sees that he is a very handsome lad. She says 'Let him bring us fish every day.' He brings fish to them every day. (4) The girl says to her brother 'Tell my father that I love this lad. Perhaps my father will give me to him.' He says to his father 'Father, my sister loves the lad who sells fish.' 'Well,' he says 'Let's see what kind of boy he is.' They invite him home one day. They speak with him 'What do you do? What is your work?' He says 'Well, I catch fish and take them to sell them.' (5) He says 'We shall give you money. Go and open a shop. Then employ workers to go to catch fish, then bring them to the shop, so that people will buy them from there. Do not go any more to sell them in the streets.' He says 'Many thanks. Why not?' He expresses his great gratitude. The lad knows that the girl loves him. He comes and goes a lot, and so forth. (6) The king gives him money. The girl gives him money and says 'Go and build yourself a house, big like this, like the house of my father.' He goes and builds a house, and so

forth. His mother is an old woman. He puts her in it, and so forth. Everybody says how much the lad has been successful, and so forth. He has opened shops, four or five shops, and has established them all there. He sells fish and he also sells meat. Gradually his business takes hold well. Afterwards, the girl speaks with him, they speak. He says 'I love you.' He says it himself. They love each other. The king gives his daughter to him. They get married, a wedding, a big occasion, from here to there. He takes her into the house, his house. (7) Before anything else,<sup>112</sup> he jumps on her to kiss her. But she says to him 'This is not a plate of fish on your head where ... you can do whatever you like. This is the daughter of a ruler.' 'What are you saying? I am married to you. You are my wife.' 'Yes, but it is not proper for you to behave like this.' He says 'Fine, but I shall not stick with you. You are the daughter of a king, but I am a seller of fish. I shall not stick with you any longer.' He goes away. (8) He goes away. He leaves the house and goes away. The girl remains by herself. She comes to her father and says that such-and-such has happened. Her father says 'You were at fault. Why did you say this?' She says 'I shall go and find him.' The girl goes and looks around the town to find him, but she does not find him. But he does not talk any longer. Whatever they ask him he does not speak. He says 'I am mute.' She sits in a boat; she goes in a boat to cross to the other side of the land. (9) She goes and alights at a place where there is a hotel. She goes to the hotel in order to eat dinner. They bring her a fish. She eats the fish and says 'It is a very tasty fish.' They say 'A lad here catches them and cooks them. But this lad is mute.' She sees him and says 'He is not mute.' (10) They say 'No, he has been working for several years, he has been working here for two or three years, the lad is mute.' She says 'No, he is not mute.' They say 'We shall make a bet with you on such-and-such an amount of gold coins. He is mute.' She says to him 'Speak! They have made a bet on such-and-such an amount of gold coins.' He says 'No, I am mute, I shall not speak.' Then the gold coins run out. She says 'On my boat—she has come by boat—on my boat I bet that this lad is not mute.' (11) She says again to him 'Speak! They will take the boat.' He says 'No, I am mute, I cannot speak.' Then she says 'I promise on my head, if he does not talk, cut off my head.' They call a thing ... They do not know that she is the daughter of the king. They want ... an executioner comes to cut off her head. She says 'They want to cut off my head. Will you speak or not?' He does not make a sound. (But then) he takes the sword (of the executioner) in his hand and says 'This is not ... she is not a tray of fish. This is the head of the daughter of the king. You cannot cut it off.' When he speaks again, they give him all the things he had lost. She puts him

### A35 The Wife who Learns How to Work

#### *Version 1: Nancy George (Babari, S)*

(1) One day, again a lad—his father dies. He has a mother. He did not have a brother and sister. He says 'Mother, my father has taught me how to take the oxen to plough the field, and what they do to it and so forth. So I can work.' But his mother says 'I am afraid that you will not be able and something will happen, and these oxen will strike and rip your stomach.' He says 'No, don't worry. I shall do it.' (2) He goes and works. He gradually grows. The boy becomes an adult. One day his mother says—it is winter—she says 'My son, we have nothing to eat. How about we slaughter one of those oxen, and cook it and make *kalya*?'<sup>113</sup> At that time in winter they used to slaughter cattle, cook the meat in oil and put it in big jars like this. In winter they would eat this. He says 'Mother, I then shall not be able to work with one ox.' She says 'God is merciful.' He says 'If God is not merciful, what should we do? I cannot work with one ox. I shall tie you by the side of this ox and you must work in place of the other one.' She says 'I shall work.' 'Well,' he said 'We shall slaughter the ox.' (3) They slaughter the ox. They cook and eat good grilled meat. They invite their neighbours and their relatives, they cook and eat. Spring comes. It is the time of work. He says 'Mother, I am now tying up the ox. You also must come to work.' She said 'I have said I must do it.' He ties her onto it and works (in the field). At that time, during the reign of Shah Abbas, he often used to travel around the town to see what was happening.<sup>114</sup> He would travel around on a horse, in some old clothes, so that people would not recognize him. (4) He sees, passes on the road and sees that a young man has tied together an old woman and an ox and he is working. He dismounts and says 'My son, what is this business with this old woman?' He tells him and says 'This is the story. She had promised to do this and I said 'You have given your word'<sup>115</sup> and you must do this job.' He said 'No, this is not good, this situation.' He gives some gold coins to him and says 'Go and buy an

<sup>113</sup> preserved roasted meat.

<sup>114</sup> Literally: what there is what there is not.

<sup>115</sup> Literally: You have promised by your word.

ox and bring it back. Do not make this woman work anymore.' 'Well, goodbye and thank you.' He goes off. (5) After that he thinks. The king had a daughter who did nothing. She ate and slept. She did not work. The king said 'This lad is a clever lad. I think we shall give our daughter to him. He will bring the girl to her senses.'<sup>116</sup> He goes and says one day 'Are you not yet married?' He says 'No.' He says 'I have a daughter. I shall give her to you. I shall arrange the wedding for her.' He says 'I do not have so much money that I can get married.' He says 'I shall help you. I shall arrange the wedding, I shall do everything. I shall give my daughter to you.' He says 'Very good.' He takes and brings her. He sees her. He says 'Well, she is good.' (6) He marries her and they hold a wedding. He takes her and brings her back. He brings her back, but they have nothing in the house. He says 'Mother, I have brought this girl and married her. Now, if she does a job, give her something to eat. If she does not do it, do not give her anything to eat until I come back.' She says 'Really, how can I do this?' He says 'No, I have said that it is like this. This is my command.' She says 'Very good.' (7) He again goes to work. The king has given him money and his work is good. He has gone to the field to work and comes back. He asks 'Mother, has this girl done a job or not?' She said 'I'll tell you the truth, she has slept until now. She has not done anything.' He says to her 'So long as you do not work, you cannot eat anything in the house.' They lay food and eat, but do not give to her. She goes to sleep hungry. The next day he comes back and says 'Mother, has the girl worked or not?' She says 'Yes, I had lit the oven and she threw a few of these logs into the oven.' He said 'Bring a little bread for us to give to her.' (When) they have laid for her a tiny amount<sup>117</sup> of food and a tiny piece of bread, (he said) 'You will eat only this, no more.' (8) Gradually she learns. She does the housework. She does everything. After some time,<sup>118</sup> the king says to his wife 'We gave away that daughter of ours and she went away, but we have not had word from her. One day let's go and see how she is.' So, the mother and father of the girl come in some old clothes so they do not know that he is the king. They are very pleased. They have given them the news that the mother and father of the girl are coming to see her. (9) They bring a load of gifts for her, and take things. They have prepared for them dinner, so they can serve it (to them). He has also invited some of his friends and they have come and are sitting eating dinner. In order that they (the parents) can eat, the girl, the daughter of the king, comes to her father and says 'Father, this is a pestle, like this one<sup>119</sup> pound this garlic.' She has put it out there. 'You must

<sup>116</sup> Literally: to the road.

<sup>117</sup> Literally: a crumb.

<sup>118</sup> Literally: It has become from here to there.

<sup>119</sup> The speaker points to an object in front of her.

do like this to pound the garlic.' He said 'What kind of job is this for me to do?!" She says 'You must do this. There is no way out.' For her mother she brings a few dry flat-breads. She says 'Sprinkle some water over these and cover them so that they become soft, so that we can eat them for dinner.' (10) They said 'Why should we do this work?' She says 'This is not the same house (as I grew up in). Here if a man does not work, he will not be able to eat. (You must work) otherwise they will not give you food to eat.' The king pounds that (garlic) and his wife softens the bread. They lay dinner and eat. The king says to the young man 'Well done! Well done! We have not managed for many years to teach her. Now look at all this, this beautiful house, everything very good.' He (the king) is very happy and takes out a lot of money and gives gold coins to him. He says 'Do whatever you want to do.'

***Version 2: Yulia Davudi (+ Hassar + Baba-canja, N)***

(11) One day (some people) go and ask for the hand of a school-girl, perhaps sixteen years old, for their son. The mother and father of the girl say 'She knows nothing, nothing, she does not cook, she does not wash clothes, (she does not know anything about) bathing, washing laundry, sweeping. Our daughter knows nothing. How can we give her in marriage?' They say 'Our son wants her and we also want her. We shall look after her like a daughter. Give her (to us) and you need not worry.' (12) In the end, they (the parents of the suitor) go back and forth, back and forth, and they (the parents of the girl) agree to give their daughter (in marriage). They say 'Whatever happens is your responsibility.'<sup>120</sup> We say that our daughter knows nothing. She is still a school-girl. She only knows reading and writing.' (13) They take her home. One day she sees that they have got up, eaten and drunk, but she has remained hungry. The second day the same, the third day the same. By the time she gets up (she sees) that they have all eaten and drunk. Her husband, the young man, says to her 'Why has your colour become so pale?' She says 'I am hungry.' 'Why are you hungry? There are so many things in the house!' She says 'I am hungry. I am not used to eating by myself, but before I get up to eat everybody has eaten. There is no food for me.' (14) The young man, her husband, says 'When you get up in tomorrow morning, go and put some little pellets of dung (*dəkkā*) in the oven—those small pieces of dung, of droppings, are called *dəkkā*. Put pellets of dung in the oven, then you shall eat breakfast. When lunchtime comes, go and sweep, clear up, and you shall eat lunch. When evening comes, wash some dishes, and you shall eat dinner. Here in this house everybody must work. When you do not work, you

do not eat.' (15) The girl gets up early in the morning. She puts some pellets of dung in the oven. She sees that they gave her breakfast. The next day she gets up early. Before they get up, she gets up and she washes herself and water is left for her. Previously water was not left for her. At lunchtime, she gets up, she cleans, she sweeps, she clears up. At dinnertime she washes the dishes and spoons. The girl gradually learnt about the jobs that she had to do with them, all the jobs that she also had to do. She ate, she drank and became very content. (16) Forty days pass. The wife says to her husband 'Let's go and see what has become of that daughter of ours. Let's go and see what has happened to that daughter of ours. She went away forty days ago. Perhaps she has died, or is alive, or they have killed her. We do not know what has happened to her. Let's go.' (17) They go and enter the house. As soon as they enter the house, the girl brings some garlic and puts it in front of her father and mother. She says 'Take this and peel it. If not, you will not eat any food. They will not give you food. Peel it! Peel it!' They say to one another 'They have taught her.'<sup>121</sup> They have taught her. Whoever does not work does not eat.'

### A36 A Cure for a Husband's Madness (Nancy George, Babari, S)

(1) A boy—his mother dies, but he has become a very handsome boy. His mother dies, his father remains alive. The father of this boy says 'I must teach you so you can work. You do not have anybody.' He takes him with him to every place, and so forth, and makes him work. He works (doing) farming jobs, they plough the land, they plant wheat and they grow and they harvest it—such things as these. (2) One day he grows up. Also his father dies. This boy has some neighbours. They have a daughter whose name is Suriyya. They help this boy a little—every time they cook something, they bring it to him. They say 'Make the dough, come here and I shall bake it in the oven for you'—they help this boy. He is alone, he is a neighbour. (3) One day he sees Suriyya. He says 'Suriyya, you know that I am very lonely. I want to marry. What do you think? Can you find for me a girl from among your friends?' 'Oh,' she says 'with pleasure. We shall arrange such a wedding for you. In short, you tell me which girl and I shall introduce her to you, from among my friends.' He said 'I shall tell you.' (4) Afterwards she sees him again. They see each other. They are neighbours in a road. She says 'What has happened? What has happened with regard to your marriage?' He said 'Well I have thought, you have helped me a lot. You are good

neighbours. If you marry me, I shall be very happy.' She says 'I do not know.' He says 'No, tell me, will you marry me or not?' She says 'I cannot tell you. You must come one day to the house and speak with my mother, speak with my father. Let me see what they say. I cannot tell you yes or no.' He says 'Very well, I shall come.' (5) One day he goes (to their home). 'Ah, how are you?'—His name is Iliyya—'Iliyya, how are you? How are things with you?' He says 'To be honest,<sup>122</sup> I have come to speak with you to see whether you will accept me to be a servant for you.' They say 'No, how can you be a servant! You yourself have a good job. You have a house and livelihood. What do you mean "servant!"' He says 'Accept me to be a servant for you.' The people are perplexed as to what the story is. But then they understand what the story is. He says 'I love your daughter. I am on my own. I have nobody. I want to marry her.' They say 'Very well. We must talk a little with our family and relatives and so forth. We shall let you know. Come here on Sunday and we shall tell you.' (6) On Sunday he goes. They have gathered all their family and they have come there. They agree that they can give the girl to him. In short, they hold a wedding and go. The young man is very good to the girl and loves her a lot, and the girl (loves him) too. When he comes back from work, she brings water for him to wash his hands and face and to wash his feet, and some food is ready. He catches fish and brings them home. At that time they used to eat such things. He brings them and, oh, they have a baby, a son. The young man notices that Suriyya is not (behaving) towards him as before. She is constantly carrying the child in her bosom and is no longer caring<sup>123</sup> much for the husband. He becomes angry about this (saying) 'You have not done this job. Why have you not done that?' things such as this. (7) He has brought fish and has said 'In the evening cook these and tomorrow cook these, I have brought them.' In the morning she gets up and cooks them. He takes them and throws them away 'What fish are these that you have cooked?! They are inedible.' He beats her and hurts her. She does not complain. The next day he again goes (and says) 'I have brought eight fish. Cook them. Cook them like this, make them, I don't know what, grilled kebabs.' She takes two of them and cooks them in water and puts them aside. She grills two of them. She fries two in oil. She leaves two raw. She says '(If) suddenly he says "I myself shall cook them," I shall say "Well here they are."' (8) First she brings those that she has cooked in water and gives them to him. He throws them away. He says 'Fish that one cooks in water are not tasty. Why have you not grilled them?' She brings them and says 'I have grilled these.' He eats them and says 'These are burnt! You

should have fried them in oil.' She brings the others saying 'I have fried these in oil. Eat some of these.' 'Oh, why did you cook them at all? I myself would have cooked them. You are not able to cook.' She said 'These are raw. If you want yourself to cook them, here take them and cook them.' (9) She says 'If you want to cook them, take them and cook them.' 'Why are you nagging me so much?<sup>124</sup> Eat this! Eat that! It is not this, it is that. Maybe I did not want to eat fish.' 'Then what do you want to eat?' At this time the baby defecates a little. She covers it with a basket. She says 'Well, now I am still speaking with my husband. I shall clean this later.' He says 'Perhaps I wanted to eat shit.' She says 'Oh, very well. Here it is, take and eat.' At that point he gets up and beats her soundly and almost kills her. (10) She says to him 'Do not do this. We are married. We have a son. We shall have children again. You were a very good man until now. What has happened now that you are doing this? Whatever you say I shall do. But be sensible. Otherwise do not think that I will not speak out whatever you do. One day I shall show you up such that everybody comes and says "This man is mad." I will drive you mad.' 'You will drive me mad?' He beats her again. She says 'Well, it is all the same.<sup>125</sup> I shall keep quiet.' In short, when evening comes, he says to her 'I am going to sleep. I am very tired and moreover there was nothing to eat.' 'Why was there not? I cooked you so many fish, but you said "No, you are unable to do anything."' (11) 'In the morning I shall go to work. Bring breakfast to me there. I shall eat breakfast in the field.' She says 'With pleasure. Where will you work?' There at that time there were no numbers that they put on houses or properties, there was no sign, numbers, address. They would say 'father's vineyard,' for example (when) a vineyard has remained from their father, it (its name) is that, or grandmother's vineyard, or the vineyard behind the bank of the river, the vineyard by the side of I do not know where. They would give names in this way. He says 'The field by the river bank, I am going to plough it and work there.' She says 'No problem.<sup>126</sup> In the morning I shall bring breakfast to you.' (12) In the morning she gets up and sees that he is sound asleep, in a slumber. Oh yes, he brought fish. He said 'Do not cook these fish, I myself will come and cook them.' 'Yes, very good.' In the evening he brought the fish. She took the fish and put them in a basket. Early in the morning she went to that place. She took something and dug (the place). She put two fish here, two there and there, like that. She put soil on them and they could not be seen. He went to work. In the morning she got up and prepared the breakfast. She put *jajøc*

and butter in it, she chopped the herbs beautifully and put them in a kerchief. She went there and said 'Here I have brought the breakfast for you. Let's sit and eat together.' They ate and finished. (13) He said 'Do you know what, when I was ploughing this place, some fish came out from here. I had never in my life seen fish come out of the ground.' She says 'Why? Why have you not seen this? My father, my father, God grant him rest, when—I don't know—my grandfather, when he used to go and plough, fish used to come out of the ground and he would bring them home.' 'Are you serious?' She says 'Yes, believe me.' He says 'But I had not heard of such a thing, I have not seen it.' 'Well (if) you have not seen it, I have seen it.' (14) He said 'Take these fish, take them and cook them. You should cook them before I come back.' 'But you said "I myself shall cook them."' 'Well, today you cook them.' 'Very well.' She took the fish, she took them and threw them into the stream and they went away. Now the husband came back. He said 'Where are the fish?' 'What fish?' 'The ones I had taken out of the field.' 'Which field?' 'The field by the bank of the river. But you said that when there is a flood, the flood brings the small fish, the water brings them to the bank. Then they go into the soil, they grow up in the mud and become fish. You said yourself. The fish had now grown up and I brought them.' 'I have not said such a thing. Nor have I seen fish. Such a thing does not exist.' He beats her. She goes onto the roof and shouts 'Help!' She says 'Come. My husband has gone mad.' (15) People, neighbours gather, they come from the village. They say 'Why are you beating this girl? What do you want from her?' He says 'This is what happened. I went to plough. I have a field behind the bank of the river, I was ploughing it, out of the ground came some ten fish. I brought them home and said to her to cook them tomorrow. She said, she says that she has not cooked them.' The people said 'Did fish come out of the ground?' 'Yes.' They said 'Fish do not come out of the ground. You have lost your mind.' 'No. She herself said "When my grandfather used to go to dig the field, fish used to come out of it."' She said 'I did not say this. I did not say this.' (16) 'You said it.' 'No, I have not said it. You can see he has gone mad.' They seized him and tied his hands. In a house there is a pillar. The winter house, where the oven is, they place there<sup>127</sup> a piece of wood, thick like this, so that (other) pieces of wood do not fall and the roof holds. They tied him to the pillar. They said 'Do not move from here. In the morning we shall take you to church. We shall slaughter an offering there and you will be healed.' 'I have not gone mad. She herself has said this to me.' He said 'So be it.'<sup>128</sup> They said to the other people 'Tomorrow all of you come.'

They took out a calf. They said 'This is our custom. One takes a head of cattle and slaughters it before the door of the church. They make it a sacrifice.' They said 'We shall do this. You must sleep one night in the church and you will be cured.' (17) The people dispersed and went away. She said 'You see what I said? Come to your senses.<sup>129</sup> Do not do these things. I, the small child and you must live in this house with love. Do not do such things. You see how your hands and legs are tied. Moreover tomorrow they will take you and (to spend) a night in the church ... you must sleep alone in the darkness because I have placed on you the reputation of being a madman. I said to you that I shall bring you to a day in which you go mad.' He said 'Well I have made a mistake. I have now changed.' He begged and pleaded with her 'Just release my hands and feet. I have finished with this behaviour.<sup>130</sup> I am the man of former times.' She said 'Very good.' She released his feet, she released his hands and he slept. In the morning the people came. She said 'Believe me, this night I sat until the morning and prayed. My husband has been cured. He has come to his senses.'

### A37     The Bald Child and the Monsters (Yosəp bet Yosəp, Zumallan, N)

(1) Once up on a time, there was a lad who did not have much hair on his head. They used to call him Baldy. He was very shy and very timid. He never used to go outside of the house. (2) One day, his father and mother notice that their son is growing up, but he is afraid and does not at all want to go outside, that is go into the field and play with friends.<sup>131</sup> He very much used to like round loaves, round loaves or cakes, things that his mother used to cook at that time. (3) One day, the mother together with her husband, with the father, think together as to what they could do to make him go outside. The father says, he says 'Bake him cakes, lay them out together, that is lay out the round loaves in a line in the courtyard like this, then two or three outside of the courtyard, which he will eat, then will go along and go outside.' (4) The mother does just that. He eats them one by one. He eats the cakes. She has left the door of the courtyard open. He sees that there are some at the courtyard door. Every so often he places his foot (outside of the gate) and looks (outside). He is afraid and comes back inside. But again he is tempted,<sup>132</sup> (he sees) there is still a cake remaining there. (5) By any means (he can) he quickly snatches one, and comes back inside. Then he

<sup>129</sup> Literally: Gather your mind in your head.

<sup>130</sup> Literally: I no longer have any of these things.

<sup>131</sup> Literally: girl-friends and boy-friends.

<sup>132</sup> Literally: his feeling comes.

snatches the other one. By the last one, the mother had hidden herself behind the door and she shuts the door. He screams 'A fox has come to eat me! A wolf will eat me!' She says 'No! I will not allow you to enter.' Well, he has grown up, the lad has now grown up. He has become eighteen, nineteen years old, when the mother does this to him. (6) He says 'Now that you do not allow me to enter, at least throw that staff of mine together with the knife of mine to this side of the wall, so that those coming after me ... if a fox comes after me I shall hit it with this staff or with the knife.' She throws these to him. He takes his knife and the staff of his and goes on his way. He goes along and at a certain place becomes very tired. He sees a spring of water, a spring. So he drinks a little from that spring. He falls asleep at the side of that spring, because he was very tired, and he sleeps. (7) There were there seven monsters. They were seven brothers. Once a week one of them would come and fill up a big waterskin with water from that spring, and would take it for them to drink. That is, that waterskin would suffice them for a whole week.<sup>133</sup> One of the brothers has come to take some water, all of a sudden he sees that there is a man asleep by the side of the spring. (8) O sorry, beforehand when he was bored by the spring he carves, he carves with his knife, with his staff, he carves some things for his amusement to pass the time. He carves saying 'My name is so-and-so ... such-and-such a person,' that is he carves his name 'With one staff I can kill forty monsters, with one blow of this staff.' He had written that there. It was a like a poem. He had become tired and fallen asleep, and that was beside him. (9) When this monster comes to see what man this is, he wants to eat him or to take him so his brothers would eat him together. His eye falls on that writing and suddenly sees that this man says that with one staff he would kill forty monsters. 'But we are (only) seven, so we are nothing (compared) to him.' (10) He gently wakes him saying 'O human, I beg you not to kill us. We are seven brothers. Here we will grant you whatever you wish. You come and be the eighth brother for us.' Of course when he wakes he is startled at first, but when he sees the monster begging him not to kill him, he says 'What does it matter? I will not kill you,' because he knows that he has read that writing. (11) Then he tells him saying 'We are seven brothers. We come and take water from this spring. We fill this waterskin for us for one week.' He says 'Get up, let us go home.' 'Then let us go, take me to your home, show your brothers to me.' The monster fills the waterskin and lifts it onto his back. The two of them go home, they go to the monsters. (12) When they enter the cave, that is the cave, in the mountain, all the other monsters are sharpening their teeth thinking that 'our brother has brought a prey for us to

eat.' He says 'No my brothers, no. This is a human. We should show him great respect. I have brought an eighth brother for us. If we upset him, he will totally destroy us, he will totally shatter us. He can strike forty monsters with just his one staff.' (13) All in all, they all believe this and he stays with them for one week, two weeks, three weeks. The monsters go and hunt for themselves, having left him at home. Then they notice that sometimes they come back but no fire is lit, there are no logs of wood ... they must, when winter has come, there is snow and everywhere is cold, and there are no logs of wood, they must then go and bring logs of wood. (14) They say 'When you are alone, so that you also do not become bored, go, for example, and bring logs from that forest—the forest is over there nearby. You should go and bring us some logs so that when we come back from hunting, we can quickly cook our prey and eat together, or when we are not at home, having gone out to hunt, and our water is running out, you should go and bring us some water.' He says 'Very well.' That is they want him to work as it were in turns. (15) One day he takes that waterskin and goes to the spring in order to fill it with water. He fills it but when he pulls it, *it* pulls him, because he is not able to pull it, he has no strength. He thinks what he could do. They are asking for water, he must now take water for them. He empties the water because he is not able to pull it, it is heavy. He empties it and fills it with wind. He fills it with wind, lifts it onto his shoulder, and he returns home. The monsters are thirsty. He says 'No! I am still tired, I must drink first.' He is indeed the eldest brother in relation to them, that is they have made him the eighth brother. (16) He opens the mouth (of the bag of) wind a little, and that air, its wind, all empties out. They see that he has drunk the whole waterskin. They say 'That used to be sufficient for one week for us, for a week, but he has drunk it all at once, with just one breath. Surely he will eat us.' They are terrified.<sup>134</sup> They then send another one to go and get some water for them. They say 'Don't worry. You sit down and rest.' (17) On another day he had gone to bring logs, he said 'Give me ropes I will go and bring logs.' They gave some ropes to him. They said 'Why (do you want) so many?' He said 'Don't worry.' (18) They noticed that he took a long time. They went along his path and said 'Let us see why has he has taken so long.' They went and saw that he has tied the rope to a branch<sup>135</sup> and is going all around the forest. He keeps on tying the ropes like this as he goes. 'Oh dear, why have you delayed so much, what are you up to?' He said 'Why should we come every day and bring logs. I want to carry all this forest on my back and bring it there in one go. Whenever we want to use some of it, we

can use it.' They said 'It doesn't work like that. Don't you touch anything. We no longer want you to work for us. Come, let us carry logs and gather them by ourselves.' (19) Anyway, they realized that it does not work like this. They came back and said—they held a meeting together—'This one would be a problem for us one day. Come, let us kill him.' When they were holding this meeting, he (the bald man) he hears their words from another place—they did not know that he is awake and he is not asleep. 'How should we kill him? We have a huge cauldron. We should make it boil with water, we should boil water in it, and pour boiling water on him when he is asleep.' They say 'Very well.' (20) They boil water. They prepare it when he is asleep. He has hidden himself and has left a piece of wood in his place, (or) he has put something else, he has placed clothes or the like, and arranged them as if he is asleep. The others pour the water out over on him and run away. They hide and do not show themselves at all. (21) After an hour or two, they come to see if he has been boiled and cooked by now, but they see that no, he is rubbing his eyes and is just now waking up. Alas, he is not yet dead. 'What was wrong with you?' He said 'I sweated a lot. It was hot.' They see that they have poured so much boiling water, while this one just says 'I have sweated,' as if this water has come from sweat. (22) On another day they make a decision, saying that we will throw a huge rock on him. He again hides and he is saved from that rock also. They realize that it would not work like this. They had a lot of gold coins, which they had gathered from ..., they had taken from other places. They bring them and give them to him. They say 'Please go now to your own folk. Take all this gold and go. We cannot live with you. We are afraid.' They give him the gold coins, they set him on the road and he comes home to the house of his father and mother. Again<sup>136</sup> three apples fell from heaven. He (the story-teller) gave one to that bald man, one to the father, he gave another one to the mother. So then none remains for us of those apples.

### A38    The Wise Young Daughter (Yosəp bet Yosəp, Zumallan, N)

(1) There was, there was not, there was a man, who had two sons. This man, at the time of his death, came and divided all is property. He gave most of his property to the eldest son. To the younger son he gave only a mare and gave a field, a small place that had a field, so he could farm. (2) The years passed. The eldest brother who has many fields comes and asks his brother

for help, to go to help him for harvesting, for transporting things. He employed him for everything. He employed both his brother and the wife of his brother. This brother, moreover, had a small daughter, seven years old. (3) The mare of this younger brother has a foal<sup>137</sup> in her womb.<sup>138</sup> One night, when they had transported things with the mare of the brother—that is the brother had requested the mare, had borrowed it so he could go and transport his goods—they have become tired and are asleep in the shade. In the morning ... That is the whole day passes and the mare does not work. Night comes and they sleep. When they get up in the morning (they see) the mare and her foal, she has given birth to her foal. When she has given birth to her foal, she has dragged it under the cart. The cart is the eldest brother's. (4) The younger brother, due to all he has worked, is very tired and asleep. He is helping his older brother. The elder brother, when he wakes from sleep, comes from home and sees that his younger brother is still asleep. He sees that under the cart there is a young animal, the offspring of a horse, that is a horse's foal. He comes and wakes his younger brother and says 'Get up my brother, my cart has given birth to a horse, has given birth to a foal.' The younger brother wakes up 'Oh, my horse has given birth!' He very joyfully goes (to see). He (the elder brother) says 'No, the foal is mine. My cart has given birth to it.' An argument starts between them. They go to a judge. (5) After the judge hears what their story is, he realizes that cannot decide between them. That one is the elder brother and he has taken the majority of the property, that is most of the property. Not much property has reached the younger brother, only a mare and a field. (He thinks to himself) 'They will argue together if I make a judgement to give the horse, give the foal, to the younger brother, although I know it is (the foal) of the mare. The elder brother may later hurt the younger brother. (6) But I shall set some riddles for them (requiring) that they go and bring the answer to these riddles by the next day, so that it is by very just means, just, that is so that the scales would be correct, my judgement would be correct.' (7) He says 'Come to me by tomorrow. You must solve some riddles, that is discern them ... find (the answer to) them. What is the strongest thing in the world? What is the fastest thing in the world? What is the softest thing in the world? I want you to come tomorrow and tell me these three things. Then I shall tell you. Whoever finds them out, the foal is his.' (8) The elder brother comes to his wife and says 'The judge has said such-and-such.' She says 'No problem. I have a neighbour here. She will now solve these problems for you.' They invite and bring the neighbour (saying) 'The

judge has said: What is the strongest thing in the world?" She paused and said 'My husband is very strong. My husband is very strong, nobody can beat him. He does many great things.' (9) He says 'What is the fastest thing?' She says 'the horse of my husband. The horse of my husband goes so fast that a bullet cannot catch it, the wind cannot catch it.' He says 'What is the softest thing in the world?' She says 'We have pillows that are made of birds' feathers. They are very soft. I don't think there is anything in the world softer than our pillows.' (10) The younger brother comes home sad that they are taking his foal from him by force. Now the judge has given them riddles, that is he has given them problems to solve. Who will solve them for him? He himself does not have much learning. His wife is poor. He does not have neighbours. He is very stressed and sits at home upset. His young daughter who was seven years old (says) 'Father, daddy, why are you so deeply<sup>139</sup> sad?' He says 'My daughter, we had a foal, which I had wanted, I would have been happy for you to play with, but they want to take it from us and the judge has presented those riddles (asking) what is the strongest thing in the world?' (11) She said 'Father, why are you so upset? Water is the strongest thing. Nothing can stand before water.' Suddenly he realized that his young daughter of seven years is saying true words. He said 'This is plausible, but what is the fastest thing in the world?' She said 'The thought of a man. When you say, for example, "sun," immediately your thought goes to the sun. When you say "America," your thought goes to America. That is, it is very very fast.' He realizes that this also is true. He says 'What is the softest thing in the world?' She says 'Father, a hand of man himself, a hand. However soft your pillow is, if you put your hand under ... under your head, when you sleep you put your hand, then this is softer.' (12) In the morning they get up. Each one goes to the judge. Each one gives his answer. When the judge sees that the younger brother produces these answers, he says 'You have not found these out yourself. Tell me so I can see who told these to you. If you do not tell me, I shall give the foal to him and will kill you.' He had the (prerogative of the) death sentence. (13) He says 'Great judge, I have a seven-year-old daughter. Do not kill me. *She* told them, I have nobody. I am bringing her answers to you.' He said 'Ah! Well, now that daughter of yours must come to me. Tomorrow morning I want her to come to me. She must be both naked—because she is seven years old—and also must be dressed. She must both be mounted, riding on something, and also must be on her feet. That is, when she comes, I should both see her coming (on foot) on the road and I should also see her sitting on something. She should both be naked and also must be dressed. She should bring me a gift

such that the gift cannot reach me. She should give it to me, but I should not be able hold it.' Now these puzzles have got worse! (14) He comes back stressed. He says to his daughter 'Do you see what you have done to us?! You said this, you said this, now the judge is yet more angry. He also wants to kill me and tomorrow he is going to fetch you. You have to go to him in this way. So, if not, he will both kill you and also take the foal, and also kill me.' She said 'Father, do not be worried at all.' (15) Go and catch me a rabbit and catch me a small bird, a pigeon, a partridge. So the father sees (what she is saying) and has now gone into a river and his clothes are wet. He goes and catches her a rabbit. He catches a bird. The next day in the morning—ah, then she says 'Fetch me a goat. Get me a goat from the neighbours or wherever.' (16) He brings her a goat, he brings her a bird and he brings her a rabbit. She takes off her clothes. She puts a fishing net over her. She sits on the goat and her feet reach the ground. She holds the rabbit under her armpit and holds the bird in her hand. So, she is sitting on a goat. She is walking on the road and the goat is also walking. She is naked and also a net is on her, she is also dressed. Under her armpit there is a rabbit and in one of her hands there is a bird. (17) The judge has realized that the person who had answered those questions is smart, and so would solve these too. So now he waits (knowing) that if she comes, she would come with the answers he is expecting. He sees from afar, he sees with binoculars that she or something is coming. He had dogs, he releases his hunting dogs against her, because he knows that if she comes, she would win the case and he wants to test her. He knows that she will solve also the problem of the dogs. (18) The dogs run to attack the little thing that is coming, a goat and a shadow. When the dogs approach, she releases the rabbit. The rabbit runs away, the dogs run after it, and she together with the goat comes very calmly. The judge rises before her 'Well done, my girl! What have you brought me?' (19) She wants to give him the bird, she opens her hand for him to take it, but the bird flies away. Again this time the judge says 'Well done!' He gives the foal of the horse to the younger brother and gives him a lot of wealth, money, gold, fields so that the younger brother would be like the older brother and would have property. This is the story. Then (as happens) at such a time as this, three apples fall from the sky, one apple for the girl, one apple for you who have listened, and one apple for me.

**A39     The Adventures of Ashur (Yonan Petrus, Mushawa, N)**

(1) There was, there was not, there was a king. This king had three sons. The name of the youngest son was Ashur. The king had a very beautiful garden, in which there was an apple tree. It used to bear one single apple a year. Whoever ate that apple, from that apple, if he was old, he became young. He would return again to the life of his youth, youth. (2) The king became old. He became old. As I said, he had three sons. To the older son he said 'My son, go and guard that apple until it ripens so that I can eat it and become young.' That son of his—an animal would always come, it would come from the air, eat the apple and go away; it would not allow it to remain. That older son of his went—(the animal) used to come at night—his elder son went—it used to come at night—his elder son went at the time that the apple became ripe, he lay down his head and slept. The animal came, ate the apple and went away. (3) It ate the apple and went away. His son got up and went back home, very sad. He told his father, he said 'Well I went to sleep. That animal came at night, it ate the apple and went away.' A year passed. After a year he sent his second son. His second son went. He also at night, at the time that the apple matured, put down his head—I am shortening (the story) slightly, it is long. He also goes to sleep, the animal comes, it eats the apple and goes away. (4) The year after, when an apple, it had again borne an apple, his youngest son says 'Father,' Ashur says 'Father, *I* would like to go.' He says 'But what did your older brothers achieve? What will *you* achieve? Why should *you* go?' He said 'May I, let me also go.' He said 'Go.' He had a bow and arrow. He took his bow and arrow and went off. He went. When it became the time of the ripening of the apple and he felt like sleeping, he cut his finger and put salt on it. He put salt on it and it smarted. He was uncomfortable and did not sleep. (5) At night, at midnight, he looked (and saw) a very large black animal come to sit on the apple, eat it and go, and he shot it with the bow and arrow. He shot it, though the animal did not fall, but, with its blood dripping and dripping, it went away. He came back in the morning, bringing back the apple for his father. He gave it to his father. He said to his brothers. I have shot that animal. (6) They said 'Where have you shot him?' He said 'Believe me I have shot him.' They came and looked in the garden. There is a lot of blood that has dripped like this and gone away. Then in Turkish they narrate 'They went a little. They went a long way. They went straight over vale and hill' and arrived at a well, over which there was a very large stone, over a well. The blood was flowing there into the well and stopped there. So they knew that the animal had descended into the well. (7) There was a very large stone over it. They take away the stone. They send for and bring very long ropes. The elder brother says 'Send *me* (down there).' But they stretch their heads like this into the well and heat

comes out of the well. The well was very hot. The elder brother says 'When you send me down, as soon as I say "I am burning, I am cooking", take me out. Do not let me stay there.' (8) They send him down. He descends a little and says 'I am burning, I am cooking, take me out.' They send the other down, the second one. He goes (and says) 'I am burning, I am cooking,' and they take him out. The third one says 'However much I say "I am burning, I am cooking" do not take me out,' send me further down. They send Ashur down. He goes and goes and hits the bottom of the well very hard. (9) His sword is by his side. He takes his sword and holds it like this in front, in front so that his head does not bang somewhere. He holds his sword like this and goes along with his sword like that, after his sword. He reaches a place and scratches and look, he reaches a wall, (something) like a wall. He scratches with his sword and so forth, he sees a slight light and he sees a door. He opens the door and enters. (10) He goes in and sees that there is a garden, which is so beautiful, with roses on this side and that side, with paths in the garden, from this side and that side. A path goes to a very beautiful apartment. He goes there. He goes and arrives at the door of the apartment and opens it. He goes in and sees that a nymph, a very beautiful woman, is sitting there. But a monster, one of those monsters, has put his head on her knee, a huge monster. (11) He goes forward and the woman say to him 'Please,<sup>140</sup> my brother, do not stand here. He will right now get up and eat you. Quickly return to wherever you have come from.' He says 'No, I have come to take his life. I have come to kill him.' In short he pierces him with his sword, he jumps. He is a monster. He jumps and looks, he says 'Oh, this tooth of mine, my tooth was aching. Now that you have come I shall eat you and my tooth will heal.' He said 'Yes, I have come to take your life.' (12) He gets up and says 'Show your strength.' To the lad, to Ashur he says 'Show your strength.' Ashur says 'I always give the opportunity to my enemy, for my enemy first to show his strength, then I show my strength.' His enemy comes and takes one of these millstones—at that time in the villages there were watermills, in which they used to grind wheat and so forth for flour, for people to eat, to eat food. (13) He gets up and ties two of them, one on this eyelash of his, one of them on that eyelash of his. He swings them round like this in the air, he strikes them, he throws them at him in order for him to be between them. Ashur jumps in the air and comes down. He says 'Ah, man, are you still alive?' He says 'Yes, I am alive. I have come here to take your life.' He says 'Very well, you strike your blow.' He raises his sword, he strikes a straight blow from here in the middle of his head and slices it into two parts. His sword descends from ??? to the bottom. (14) He says 'Ah, human, how good your sword

is. Strike again.' If he were to strike again, he would live. He says 'No, I shall not strike at once. Dance a little. After you have danced and come back, I shall strike again.' As soon as he wants to dance, one half of him falls on one side and the other on the other side. He dies—I used to tell these (stories) to my children, I used to tell them all of them. He falls down and dies. He dies, the nymph, the beautiful woman, says 'That is enough, no more. Come, let us go. But from here to the other side there are two other monsters. They have taken my two sisters. They are more beautiful even than me. They have also great riches.' He says 'No, I shall go, I must rescue them too.' (15) He goes and kills the other one and he kills also the third one. I do not want to prolong it (the story) too much—now they all gather up their belongings and so forth and come to the well where he had descended. He calls his brothers saying 'Send your rope!' They send him a rope. First he sends the one whom he had reached first. She was the eldest among the girls. He says to his elder brother 'Brother, send your rope!' He sends his rope saying 'Brother, this is for you.' (16) He raises her up and sees she is very beautiful, a nymph. He is very happy, but does not realise that those that are coming after her are more beautiful than her. He sends his belongings and says to the second brother 'Brother, send your rope.' He sends them and sends the other nymph. As for the third, he says 'Send (the rope).' They send it and she ascends. They see that indeed she is very beautiful. She is more beautiful than the others. They become angry saying 'Why has he not given us the most beautiful one and kept her for himself?' (17) They bring her up. They send down the rope for him to come up. They see it is him, they cut the rope and he falls to the bottom of the well. He falls to the bottom of the well. In short, he goes and searches with the rope and with his sword again in the dark, here and there. A way opens up. He goes and enters it. He ends up in a desert. He ends up in a desert and reaches a place, he reaches a place (and sees) something that is like a village, full of people, and everybody is weeping, the people are weeping. (18) He asks 'Why are you weeping?' A girl says to him 'We have here a dragon. There is a dragon that blocks access to the river. It always drinks all the water of the river and the water does not reach us. Every time it blocks the river, we must go and throw one or two children onto the river bank. He comes out to eat them then the water flows and comes from beneath him and we drink the water. Now he has blocked it. It is like that.' (19) 'Where is that dragon?' She says 'In such-and-such a place.' He gets up, takes his sword and so forth and goes. He goes against the dragon. He says (to) that girl, he says 'You yourself come and sit there'—(he says) to the girl who is telling him these things—'You sit there and I shall stand beside you.' They put her there. The snake comes out of there. When he comes to eat her, he strikes the snake with the sword, from its mouth, from here and kills it. (20) He kills the snake and takes the girl. He cuts it up for

a week. For a week blood is flowing in the river, so big is the snake. After he kills the snake, water flows again. After he has killed it and chopped it into pieces, water flows and carries it away. The people drink water and live. (21) He comes back. Afterwards he says 'I have come from another world. I have come from the world above.' They say 'Whatever you want'—the inhabitants of the village (say)—'whatever you want, we shall do for you.' He says 'Believe me, I do not intend to stay here. I have only one wish (to ask) from you (namely) that there is a way that you can return me to the world above.' They say 'We cannot do this thing here. But there is here a *+simaxur* bird.' They say 'There is a *+simaxur* bird here. The *+simaxur* every year lays some eggs. It wants to produce young, but a snake comes and eats its young, its eggs. The *+simaxur* bird has now begun to age from its sorrow and distress. It gets very distressed. It is not able to raise a single offspring.' (22) He says 'Very well, take me to the *+simaxur* bird for me to see what it is.' He goes there. He sleeps under the nest of the *+simaxur* bird. The *+simaxur* bird thinks he is the monster, or the thing, the man who is coming to break and eat her eggs. It wants to raise its wing to strike him. He says 'No, no, do not strike. I have come to rescue you.' In short, it does not strike him. It does not strike him. He stands and says 'I have come to rescue you so that this year you will have young.' (23) He sits for a little under her nest and sees that a snake is coming, very long and big, and it wants to move from off the trees and go up to the nest of the *+simaxur* bird to eat her eggs again. He strikes and kills the snake. He kills the snake. The *+simaxur* bird has young, young issue from her eggs. They grow up. It is very happy and says 'What do you want now? I, who after so many years have been trying to have young, have not been able to have young. Now I shall do for you whatever you want.' He says 'I only want to go out into the world above.' (24) It stops and thinks, then says 'I have grown very old, but still we shall try.' It says 'But to do this task you must go seven (stages)—from here to your world there are seven stages. At each stage we have to stop and rest a little, (going) to the next, to the next, until we reach your world. But before we reach these seven stages, each stage, I (suggest) you give a sheep for them to prepare, slaughter, cook and fry well, a large jar of wine and a kneading tray of bread. (25) Whenever I say "Throw," you must first throw the bread, then throw a sheep, which you have fried, throw it. After that goes and I say "Throw," pour a jar of wine into my throat. I shall gain strength and go up.' He does this task. He goes and tells the people of the village. He says 'It is like this, the course (of events) is like this. You took me to the *+simaxur* bird. The *+simaxur* now has its young. I have done something and she has young. And she wants to take me out to the world of light, but has asked me for these things.' (26) They said 'Do not worry. We shall prepare all these things for you.' They immediately prepared these things. He went and they took them to the *+simaxur*. He said 'I am ready.'

It said 'Very good. Bring ropes and so forth, tie them all onto my back. You sit among them.' At every stage that they reached, it said 'Throw one of each of them.' He throws them. In short, it ascends until it reached ... it brought him into the light. (27) It brought him into the world of light. He went back and reached the house of his father. He reached the house of his father and looked (and saw) that the house of his father was completely broken up. There was nobody remaining in the house. But he went to a corner and found one of his brothers. He found one of his brothers and said 'Where are the others?' He said 'That sister of mine,' he said 'We had a sister, do you remember? They used to call her "the eater of the town of her father." That sister of mine,' he said 'has eaten them all. All the inhabitants of this town, its people, its cattle, its horses, its monsters, she has eaten them all. Only I am left. I am constantly running away from her clutches.<sup>141</sup> As soon as she comes here, I go there, from there. I am running away from her from this place to that place.' He said 'Where is she?' He said 'I shall stand with you.' He said 'She will come now, do not worry, she will now come.' (28) She comes. He has come on a horse and has put his horse in the stable. She comes to him, each time, and says 'Brother, did your horse have three legs when you came?' She has eaten one of its legs. Then she goes and comes back saying 'Two of its legs are left.' She eats also the third one, she eats also the fourth one. He knows that now she will eat his horse and attack him. He gets up and flees. He flees. He leaves the town and flees. He goes a long way. He has with him a big bag of razors, a big bag of salt and a big bag of nails. (29) He runs and she runs after him. She comes close to reaching him and he throws down the nails. Some stick into her feet. She is rather uncomfortable. He goes forward a little, but she runs after him. She runs after him again. He throws down the razors. He throws down the razors and all the fields become (covered with) razors. They slice up all her feet, but she again runs after him. He throws down the salt, and it turns into a sea of salt. She enters the sea, her feet sting and she becomes uncomfortable. But again she also comes out of that and runs after him. She runs after him and he climbs up a tree in the forest. He climbs up a tree and she comes. Just as she climbs after him to kill him, to eat him, he strikes with his sword from above onto her head. In short, he kills her. (30) He comes down and rips open her stomach. He looks (and sees) that there is a worm in her stomach. It is this worm that is eating all these things, it is so huge. He kills that also. He kills it. He is very far from his brother's home, from his father's home. In one place he sees a house on a corner. He goes. He goes to the house. He looks in the house (and sees) that there is woman who is old,

(though) not very (old), an old woman is sitting there in the house. She says 'My son, why have you come to this house? Now the blind giant will come and eat you.' The blind giant is her husband. He is a monster. 'The blind giant will come and eat you. (31) He will come and eat you.' He says 'No, I shall say that I am his son.' She said 'No, alas, he will eat you. He does not know such a thing.' He says 'It does not matter. I shall say I am his son. In the end we shall fix this thing.' The blind giant comes back in the evening, 'ho, ho, ho, ho.' He has gone to graze sheep. He has sheep. He brings back his many sheep and so forth and puts them in the thing. He comes. As soon as he opens the door and comes inside, he says to his wife 'Wife there is a smell of a human.' She says 'Why, did you not know that we have a son?' He says 'No, I did not have a son.' She says 'But yes, we did have a son.' He says 'If I had a son, very good. Now I shall go up upon the roof and urinate on him. I shall urinate upon him from the roof. If he does not melt, he is my son. If he melts, he is not my son.' He goes up and urinates. He does not melt. He comes back and says 'He is my son.' He is very happy. (32) Now his son comes to him and says 'Daddy, well I am your son and you are my father. You are an old man.' He was also blind, blind, the blind monster. 'How do you deal with these sheep? You are so stressed. Even if they get lost now, you would indeed not know. *I shall go and graze them.*' He says 'Very good, you go and graze them. But there is that mountain over there, on this side, it is rather high, and many trees are on it—do not go to that mountain. There is a demon monster. She blinded my eyes. Do not go there. She is a very ... monster, frightening.' (33) He says 'Very well, I shall not go (there).' He goes and grazes them, for a few days he grazes the sheep, then brings them back and comes back. Then he says 'Well, let me go and climb onto that mountain and see what on earth there is there, and what she says.' He goes and arrives at the mountain. He is grazing his sheep there and is sitting. After a while, suddenly he notices that a woman with tangled hair, the demon monster, her hair tangled, ugly, has come. (34) 'Heh, my son, welcome<sup>142</sup> to this mountain of ours. This mountain is yours,' and I don't know what. He says 'Thank you, ma'am.<sup>143</sup> How are you? You are very beautiful, you are very comely.' She is a monster, but he praises her in order to see what she would do. She comes and sits by his side. She puts her head on his knee and goes to sleep. She puts her head on his side. After a while—he had sandals. You know what 'sandals' are? He had sandals. He notices that she is gradually taking his sandals off in order to begin to eat him. With the same sword that he had he strikes on her head and she becomes rather faint. She wakes up. She wakes

up and she says 'Let's gamble. If you win against me, however many sheep you have, I shall give you half as many sheep. If I win, you will give me half of your sheep.' He says 'Very well.' (35) They gamble and he wins. He wins half his sheep. Consider he had one hundred, he wins fifty. He mixes them with his sheep and goes down. He comes back and arrives. The blind giant comes out in front of the house. The blind giant comes out and says 'Let me count my sheep lest you have lost any of them.'<sup>144</sup> He says 'This one is mine, this one is mine, this one is not mine.' Well, half of them. 'This one is mine, this one is mine, this one is not mine. This one is mine, this one is mine, this one is not mine.' He notices that there are fifty extra among the sheep. (36) He says 'Have I not told you not to go up to that mountain? Why have you gone up there? She comes up with these games, but in the end she will make you blind and she will eat you.' He says 'All right,'<sup>145</sup> father, I shall not go again.' Again, the next day he again drives (the sheep) and goes there. Again she says 'Let us play for fifty.' They play and he wins also those. Now he has won from her as many sheep as (the original number of) his sheep. In the evening he comes back. The blind giant again says 'I shall count them.' He says 'This is mine, this is not mine. This is mine, this is not mine. This is mine, this is not mine.' They are equivalent (in number). (37) 'Now, again, my son, I beg you, I implore you, It is a shame for you (to be in danger), do not go there, she will do this (to you).' He goes again. He goes the next day. She says again 'Let us play for half of your sheep,' that is a hundred more. He plays and again wins them. In the evening he comes back. The blind giant counts them and says 'This is mine, this is not mine, this is not mine. This is mine, this is not mine, this is not mine.' That is he has won them twofold. He says 'Do not go my son! Do not go!' The next day he goes. He goes and says 'This time I shall take my father's eyes from her.' (38) He goes, he arrives there, plays with her and wins. She flees. She flees and he runs after her. He runs after her, he catches her and kills her. He goes and notices that she has three daughters like herself. They are all demon monsters. No, excuse me, he does not kill her. He sees her three daughters. He says 'I shall kill these daughters of yours if you do not give me the eyes of my father. I shall kill the three daughters of yours if you do not give me the eyes of my father.' (39) She says 'I have not seen the eyes of your father. Your father is lying. Your father's eyes are not with me.' He says 'No, they are with you. You must speak.' She says 'No, they are not with me.' He says 'Look, I shall put these three daughters of yours in cauldrons and

boil them in hot water. It is up to you.' Well,<sup>146</sup> her daughters know where the eyes of the blind giant are. She herself does not know. She has brought them and given them to them. They have taken them and put them in a thing. (40) Then he brings—she does not give them, they do not give his eyes. He brings water and boils it. He puts one of them in the water. He puts gum in her mouth. (While) she is boiling and gum is in her mouth, the others say 'We too want gum.' He says 'You too sit there.' He puts them (there), he strips the three of them and cooks them. 'Now,' he says 'you must tell me where the eyes of my father are.' She says 'The eyes of your father are in such-and-such a place.' She brings the eyes of his father and gives them to him. He kills her also. He takes them, goes down and comes back (home). He says to his father 'Father, come here.' His father comes. His father comes near him. He puts his eyes (into their sockets), gives them a knock, and his eyes go into their place. His father sees. He says 'My son, thank you very much.' He says 'You have finished.' 'I now have to return to save my brother also.' 'Oh woe!' (41) He goes to his brother. He reaches his brother but the other brothers are present. They come and say 'This (is the one) who took the girl who was beautiful out of the thing—what is it?—who was (intended) for himself' They are making a wedding in order for one of them to marry her. He arrives and says 'Oh well' and goes. As soon as he gets close, his brothers recognize him. They are the sons of the king and have an army. They say to their army 'Follow him and kill him! He is our enemy.' (42) They follow him. He goes to a goldsmith. He enters a goldsmith's house. He enters there and tells him the whole story saying what had happened saying 'I am the son of a king. These are my brothers. (The story of) them is like this. That girl that they want to marry is my betrothed.' 'What should we do?' He says 'Every day and every evening I shall go out with a different horse. I shall go out with a different colour horse. I shall kill a part of the troops, who are coming to kill me. I shall flee and leave the town at night. I shall return to you and come back. But at night we should gather walnuts, you should bring many walnuts and we should break them, so that they will say that the goldsmith is working. We shall bang and bang so that they (would say) that the goldsmith is working. We shall eat walnuts at night.' He does this every night. In short on the third night he holds the shirt front of one of his brothers and says 'Well, you know that I am so-and-so. I do not want to kill you. Why are you doing this?' In the end, they give the girl to him. He holds a wedding for seven days and seven nights.

**A40      A Dragon in the Well (Frederic Ayyubkhan, <sup>†</sup>Spurgān, N)**

(1) Once in the village of <sup>†</sup>Spurgān there was a man who used to work hard. He wanted to marry. He searches and searches and marries a woman whose name is Mahə. (2) This Mahə annoys this man so much. She does not work, she moans, she even throws stones at the man. When he comes home, she does not give him food. In the end he gets fed up, he is fed up with his life. (3) One day in the middle of the night he wakes Mahə and says 'Mahə, there is a pearl, it is in a well, big, it is so big, which I think you would like. Come and see what it is.' She says 'Let's go.' (4) He goes and ties a rope to Mahə. The moon is casting its light in the well and appears like a huge pearl. He ties a rope to Mahə and sends her into the well in order for her to take out the pearl. (5) Mahə goes until she reaches the bottom. He says 'Has your hand touched (it)?' She says 'Yes.' He throws down the rope. He puts a large stone on the hole. He leaves Mahə there. He goes and breathes a sigh of relief concerning his life. He says 'Forget about the wife from now on.' (6) Several years go by. Several years have gone by and a shepherd is grazing sheep there. He sits exactly by that stone, by the stone of the hole where Mahə is. (7) As he is sitting in this way, the stone moves. He pushes it a little. Suddenly a dragon rises upwards from the hole. It goes upwards (into the air) and immediately puts the stone back into its place. (8) He says 'Thank you. You have saved my life for me.' 'What has happened?' He says 'Several years ago they sent from there a woman whose name was Mahə. She has made me so fed up, that you cannot understand. Now I'll give you anything you want in this world, since you have saved my life.' (9) He says 'I do not know what to say, what I want.' He says 'I know what I shall do for you. There is a girl in another land. She is the daughter of a king. I shall go and wrap myself around that girl. I shall eat and burn anybody who comes. (10) But when you come, I shall release myself and free her, so that they will give the girl to you and you will become the son of the king.' (11) He says 'Very good.' He does this very thing. He goes and wraps himself around the girl. An army marches (there) from other countries, strong men go (there), but they cannot remove the dragon. (12) The shepherd slowly walks along the road. He reaches that town. He goes and says to the king 'I shall save your daughter.' He says 'If you save my daughter, I am a king, I shall give you my kingdom.' (13) He says 'Very good.' The shepherd goes up. As soon as the dragon notices the shepherd, he releases the girl. He says to the shepherd, he says 'If once more—I shall do this for you only once, since you saved my life once. But if you come once more to another town on similar business and want to save other people, I shall eat you. Do not come after me. Do not come after me. Come only once.' (14) He says 'Very good.' The shepherd releases the girl. He goes and the king gives the kingdom to the shepherd. He becomes the son of the king.

(15) He becomes the king. Again several years pass by. Several years pass by and they bring word to the king saying ‘King, may you be well. In another town the dragon that wrapped himself around your daughter has gone and wrapped himself around another girl. We need help.’ (16) The king says ‘Well, my son-in-law is a champion of a man. I shall send him there in order to save your daughter.’ He says ‘Very good.’ (17) He comes and says to his son-in-law, he tells the story. He says ‘Go to the other town. A dragon has wrapped himself around another daughter of a king. Save her. I am asking you because they are very good friends of mine. It is a town that is close to us.’ He says ‘Very good.’ (18) The shepherd sets off on the road. He goes with several horsemen. They go there. They arrive at the town. He goes and ascends to the place where the dragon has wrapped himself around the girl. (19) As soon as the dragon notices the shepherd, he releases the girl and comes to eat the shepherd. He twists himself around the shepherd. (20) The shepherd (says) ‘Dragon, stop, stop so that I can speak before you eat me, so that I can speak to you. You have saved my life, you have made me king. I am not mad enough to come to you, and so forth, for you to eat me.’ (21) ‘But’ he says ‘why have you come? Did I not tell you that I shall to do this for you only once and the second time I would eat you?’ He says ‘Yes, I know you have said so, but I have come to save you.’ (22) He says ‘What do you mean “save me”?’ He says ‘I have heard—do you remember that stone?’ He says ‘Yes.’ He says ‘Another man has pushed it back. Mahə is on the way, she is coming for you.’ While the shepherd was standing there, the dragon releases the girl and goes away.

#### A41      A Painting of the King Of Iran (Frederic Ayyubkhan, <sup>†</sup>Spurğān, N)

(1) There was once a very young lad whose name was Elijah. This is a true story. He was my grandfather. My grandfather’s name was Elijah. He was very young. Before the First World War young lads in Urmī and <sup>†</sup>Spurğān do not find work. There is a ship. He has friends. They come and board<sup>147</sup> the ship. They come, years, months go by, they come to America, directly to Chicago. They arrive in Chicago. (2) There he begins to work and study. Some thirty years, perhaps twenty-five years, thirty years go by. This young lad studies, his name was Elijah, Elijah Daniel. He sends money to his father. He is working from Chicago. He says ‘I used to live on one single egg. I did not eat. I used to collect money to send to my father in the homeland.’ He used to

call Urmi the homeland. He used to send money. (3) Some twenty-five years go by. He knows that he wants to get married. He says 'I shall not get married here.' In that land, meaning <sup>+</sup>Spurğān in Urmi, there was a girl whose name was Helen. She was very beautiful for her time ... she becomes my grandmother. This girl was very beautiful. Elijah had fallen in love with her in his childhood. (4) He boards the ship again and returns to <sup>+</sup>Spurğān. He says 'When we were returning we heard the sound of cannons.' The First World War had started. He heard the sound of cannons. He comes here,<sup>148</sup> he comes and arrives in Urmi. My grandfather was a very ... man, my grandfather Elijah Daniel was a very tall man with blue eyes. (5) He buys a white horse. He had bought the wedding dress of my grandmother from Chicago. He had bought the wedding dress, he had bought the bridal dress. He comes to Urmi. He goes to see my grandmother. (6) My grandmother had many suitors, many suitors. My grandfather was very handsome and good-looking. His pockets were full of golden automatic pencils, for example, say he had ten automatic (pencils) and a watch too, one of those large American watches. It was in his pocket. As soon as my grandmother sees my grandfather, she is attracted by these automatic (pencils) and this watch. She does not see my grandfather and become attracted (to him by his appearance alone). (7) They get married. They get married to one another. (Now) it is Christmas day. A week goes by. Then the sound of yelling comes in the middle of the night. On Christmas day they scream, they are Armenians, they run (and say) 'Elijah, get up and flee!' He says 'What has happened?' They say 'They are killing us. There is looting. They are killing us.' (8) Elijah comes. He puts my grandmother Helen on a horse, after they have been married for only a week. The story goes that they journey for two months, or three months in the snow until they arrive in Armenia, Armenia, they arrive in Armenia. They arrive in one of the villages of Armenia. (9) They say 'On the journey that we made in the snow many people put down their children and we helped them. We took the children, because they did not manage to carry their children, or there were many elderly women who fell and we helped and carried them.' (10) Anyway they arrive in Armenia, it is in a village of Armenia and stay there for two years. But work is scarce, work is very scarce there. My grandfather goes together with my grandmother to Leningrad the capital there, of Russia. Because my grandfather knew English, and there is something, a workshop of concert artists. (11) They establish a workshop and they make my grandfather the man in charge of the workshop, a foreman, because he is able to read designs. Also there my grandfather is successful. He opens food and drink shops there in Russia. Well, their situation improves. Just

as their situation improves, the revolution occurs in Russia, that is communism comes. (12) My grandfather's name is on the first list of the names (of the proscribed). What does my grandfather do? He sells all of his things. They had furniture. They had beds. They had a sewing machine. He breaks everything up.<sup>149</sup> He melts down everything that he has bought and which is coated with gold. (13) He fills the furniture, the arms of chairs, the sewing machine with gold. He says 'We are going to Europe.' But they make a mistake and go to Iran. Iran is not Europe. From the shore of the Caspian sea they board a ship, from the sea shore, and he comes together with my grandmother. (14) They had four children at that time. The children had grown up, they had studied in Russia. They go in a ship to Iran. Again they flee so that they (in Russia) do not kill them, that is (because) they are wealthy. They come to Iran, in Iran to Sultan-Abad. They scattered many Assyrians and Armenians in Sultan-Abad, Urmia, Kermanshah and Hamadan. (15) At that time the king of Iran was Reza Shah. The king was a very malicious king.<sup>150</sup> He was very malicious. They stay there for years like prisoners, Assyrians and Armenians were in captivity, because the Iranians think that they are communists. (They call) them communists. They did not give them work, although all of them were educated. But they did not give them work. (16) They spent the money that they had brought. They spent the money. Anyway, my father, who was Rabi Darius, comes. What does he do? He draws a picture of that king, a picture of Reza Shah, who (in the picture) is standing on a dragon, is killing a dragon. The meaning is that the dragon is the enemy of the country. This was my father's meaning. Reza Shah is killing, he is killing the enemy. (17) It was a very large picture. He drew it in pastel, with black pencil. Nobody dares to show this picture to the king, who is Reza Shah, because they are afraid that he would kill the painter if he does not like it. They come to the king's son, who is heir to the throne, Mohammad Reza Shah, who is the king's son and show it to him, by the way of the friends of the father—he had many military friends. One of them was Alam. (18) He takes the picture and shows it to Mohammad Reza Shah, who is the king's son, the heir to the throne. He likes it very much. He likes it very much. He meets<sup>151</sup> my father. He says 'What do you want?' My father was a painter. At the time that I am talking about in Iran a painter was not valued; an artist was not valued in Iran. He was very poor and had no money. (19) He could have said 'Give me a house. Give me money.' He could have asked for many things from the king, because he was

in need. But because he was an artist, he was thinking about his own people, he was thinking about the Assyrian people. Concerning the people who are prisoners he was considering 'What should I do? What should I not do?' (20) He says to the king 'King, may you be well. The story is this. We, who have come from afar, our people who have come here from the land of Russia are prisoners here. They are Iranians but they are prisoners. They do not give them jobs ... for example when they want to go to Tehran they must have a passport, they have their passport stamped and they go to Tehran, then, for example, after three months they return again to their country, be it <sup>+</sup>Spurğān or Urmi, they come back.' (21) The king said he had no knowledge of this.<sup>152</sup> At that very moment he writes a document for that Alam, the minister of the royal court, he seals it. It is on account of this<sup>153</sup> that the Armenian and the Assyrian people become free, that they accept them as Iranians. They go and find jobs, and from then on they travel freely in the land. This was one of the stories that I wanted to tell.

#### A42     The Adventures of Two Brothers (Manya Givoyev, Guylasar, Armenia)

(1) I shall tell you a story. I shall tell you a story. I know many. I shall tell you a story. (2) There was, there was not, there was nothing greater than God, (there was) a king and a queen. This king and queen did not have children. They did not have children. Well, the husband and wife sat thinking to themselves. The husband said to the wife 'Wife, to whom shall we leave this wealth of ours? Well, what should we do?', he says, '(We have) this wealth of ours but we have no child.' Having risen in the early morning, they eat breakfast. Having risen in the early morning, they eat breakfast, bread. Then they looked, a door opened and a very tall youth came and entered through it. (3) He said 'Do you know what there is (in my pocket)?' He took out of his pocket a red apple. He cut it down the middle in this way. He gave a half of it to the king and a half of it to the queen. He said 'You will have two sons. Name one of them <sup>+</sup>Almas and one of them <sup>+</sup>Bahar. <sup>+</sup>Almas is for you and <sup>+</sup>Bahar is for me. When the boy becomes eighteen years old, I shall come to take him.' The husband and wife stood looking at one another. They said 'What should we do? We do not have (any option). At least one child will remain for us, one son.' (4) He went away. As for the children—well he was a king and she a queen—they gave them a good education. They were so

beautiful, from a single apple, handsome (youths like this) would not come through this door (here), youths who were a picture of handsomeness. They became fifteen years old and the husband and wife thought. He (the husband) said 'Let us inform him that he will come and take +Bahar, this man will come and take him. Let us inform him.' He said 'Come and sit down. Such misfortune has come upon us.' He said. +Bahar said 'Not a problem, I shall go.' (5) He eventually turned eighteen. They saw that the door opened. In the morning when it was still early the door opened and the man came in. How tall he is! He said '+Bahar, you are mine.' He said 'As you please. I shall come. I am standing ready.' 'Brother' +Almas said, he said 'No, wait. I shall just go to the market and come back.' He went and bought a bouquet of flowers like this. He brought them and put them down. +Bahar went. +Bahar went and brought them and put them in the window. He said to Almas 'As soon as you have seen these flowers wither, come after me and find me.' He said 'Good.' (6) He took the boy away. The young man went first and the boy behind him, going away from his brother, from his father, his mother. They said goodbye and went away. They went and went, they went a lot, they went little, they arrived at a stream. They observed an old man sitting by the side of the stream, with a white beard. (7) +Bahar said 'Greetings to you, my uncle.' He said 'You are very welcome, +Bahar, my son.' 'Oh' he said 'Uncle, how do you know that my name is +Bahar?' He said 'It is written in the Torah that you will go on this journey. Well' he (the old man) said 'That person is not a lad, he is a Jew. He is a demon, a demon. He is taking you to eat you.' He says 'I say to you, he will take you away, he will take you away. Take heed!' (8) In a place beyond seven mountains there is a huge thing, a forest. There is a huge building there in which there are forty rooms. He will hand you thirty-nine keys. You should open them. At the fortieth say "I am tired." Give the key to him. Give the key to him. As soon as you have given him the key, when the door opens, when he opens the door, give him a kick on his back, so that he goes and falls into a huge pan of boiling water. He would throw you there and eat you. He is a demon. Do this. Throw him into boiling water.' (9) 'Oh, uncle, thank you for this advice that you have given me.' So, they went, they went, they went, they went, they went a lot, they went a little, beyond seven mountains they arrived at a forest, in the middle of which was a huge, a large building, like a big house. The Jew took out the keys and handed them to the boy, to +Bahar. He said 'Open these doors.' He opened them, he opened them, he reached thirty-nine, at the fortieth he said 'Well I am tired.' When that healthy, tall and handsome youth opened the door, he (the boy) gave him a kick on his back and he fell into boiling water, bubble-bubble. He cooked. (10) He (the boy) stood and stared, he stared like this. He looked. He said 'I'll go into these rooms a little and to see what there is in the rooms.' He entered one room. It was full of gold. In another room

is a pool, but it was all plated with gold. He went into it and swam, he swam, he had a good swim and became more handsome than he was before. He went and took something like a carpet bag and filled it with gold. (11) He went over to the other side, he opened the room and there were some horses, each more beautiful than the other. One horse, a beautiful horse, flies in the air. He took it and he mounted the horse. He put these (pieces of gold) in his bag on his back. He ascends and he comes directly to a house. He went a lot, he went a little, he went a lot, the way was very long. (12) He came to something like a house. A lantern is burning. He went inside. They call this a 'tea-house.' All those who travel on the roads gather there and drink tea. He entered and stayed there. In the morning he got up and went off.<sup>154</sup> He came, he came, he came a lot, he came a little, he came and reached a town. (13) He came and reached a town. He looked (and saw) that it is getting dark. He sees that there is a small house. He said 'Let me enter. Tonight I shall stay here as a guest. In the morning I shall get up and go.' He went and an old woman came in. He said 'Oh auntie, let me stay with you tonight. In the morning I shall get up and go.' She said 'My son, I come in and my cat goes out. My cat comes in and I go out, because I have no room.' (14) He stood and looked at this old woman. He put down his bag. He filled two hands with gold and gave them to her. Oh, she was so pleased, she was so pleased. She said 'Come—may I be your substitute, may I be your vowed offering. Come, all my place is free for you.' He stayed the night at her home. Now, the boy used to get up early in the morning and do physical exercise. He looked and opposite (he saw) that there was a big building. (15) Three girls are standing on the balcony. He said 'Hey auntie, hey grannie, come here. Who are those (girls) there?' She said 'They are the daughters of the king.' He stood and thought. The boy fell in love with the youngest girl. He fell in love with her. He said 'Can I go and swim in that pool outside the house?' She said 'What can I say?' He went and swam of his own accord, he went in and swam. Those girls laughed at him out loud. He came back. (16) He said 'Hey mother, hey grannie, hey auntie, please go to that king and see whether he wants a servant, so I can go and do service for them.' Now, this boy is a picture (of beauty). She goes and tells the king's wife. The king's wife says 'Let him come. We have geese. Let him go and take them to feed.' (17) With a struggle he puts the geese out in front of him in the morning and goes and lets them feed. In the evening he twists the neck of five geese like this, he puts them on his shoulders, five by five, and comes back. He brings them. (18) He said 'Hey grannie, do these, cook them nicely, like this with a little water, so that we can eat.' 'May the house of your

father not be destroyed, what have you done?' She says 'What will the king do to us?' He says 'Don't say anything.' Yes, on the next day, he went and again he brought back (geese). 'No' she said 'That will not do.' He said 'Auntie, I shall not remain here long. Go and tell the king in the capacity of a matchmaker and see whether he will give that young daughter of his to me.' She went and said this. He said 'No, would I give a daughter to a servant? I will not give (a daughter) to him.' (19) He made an agreement with the girl and spoke with her. The name of the girl is Šacar Nūš +Xanəm.<sup>155</sup> Šacar +Nūš +Xanəm. He said 'I love you. If you love me, come. We shall live with that old woman. If you do not want, it is up to you.' He was an intelligent and educated boy. She said 'I shall come to the home of the old woman.' With a bowed head she came to the home of the old woman. Her father (said) 'Where have you taken her? Where have you put her?' He became ill. He became bedridden. He became bedridden out of his grief. As for her mother, she does not know what to do. She beats her head. He is ill. However many doctors they brought for the king and whatever they did,<sup>156</sup> the king does not get better. (20) They said 'Then what does your heart desire?' His wife said 'What does your heart desire?' He said 'I do not want anything. (But) I want the milk of a lion, in a churn-bag of a lion, for a sick king.' His (other) daughters are married. He has two sons-in-law, and this (boy made) three. He said 'Do you know whether these exist?' He calls his sons-in-law and says 'Go and bring for me the milk of a lion, in a churn-bag of a lion for a sick king. If you do not bring them, I shall cut off your heads.' (21) May God destroy your disciples. The sons-in-law are perplexed as to what to do. They mount horses and go. Šacar +Nūš +Xanəm, his youngest daughter, the wife of +Bahar, goes and says 'Mother, tell Jaju (Dad)—formerly they called a father Jaju—tell Jaju "Let +Bahar go also." She says 'Will he agree?' She says 'Go and tell him.' She goes and tells him. He says 'We have a female mule there, but it is a little lower than a horse. Give it to him, to that filthy man, and let him go.' (22) The mule comes. He holds its head like this and she throws him. They give the mule to him. 'Hm' he says 'That father of yours! Is it appropriate for me to sit on that mule?' He enters the stable. He sits on the horse that he brought with him, the one that I say flies in the air. He puts on some clothes. He puts on some clothes when the horse flies in the air. He goes and goes. He goes a lot and goes a little. He looks (and sees) again an old man sitting, the same old man before the stream. (23) The boy says 'May God bless this (meeting), greetings to you, uncle.' He says 'And greetings to you, +Bahar, my son.' He says 'But where are you going

<sup>155</sup> The name means 'Lady pleasant as sugar.'

<sup>156</sup> Literally: What could you say they did not do.

on these roads? Do you know where you are going?" He says 'What should I do? My father-in-law is the king. He has said thus: I must go and bring the milk of a lion, in a churn-bag of a lion, for a sick king.' He says 'Wait a minute, I'll tell you. (24) You must go, go, you must go a lot, you must go a little, you must go so far and there is forest. In it a lioness is reclining, the chest of which is swollen. It is roaring. It cannot walk. You should go and cut a long cane. Then make its end fine like this. Do not show yourself. She will pull you apart. You should stand at a distance like this. Slowly extend it and burst her chest. It is blocked with pus. When you pierce it, it will all come out cleanly there. She will say "Oh, I am relieved". (25) Do not make a noise. She will say "Who are you? Whether you are bad or good, make a sound." Do not make a sound. She will cry out three times. Do not make a sound. She will say "By the oaths of old, by the oaths of old, I shall not lay a hand on you." She does this three times. In the end she says 'By the oaths of old, I shall not lay a hand on you,' and he says 'What should I say to you. This is the report of the situation. I have come looking for the milk of a lion, for a churn-bag of a lion, for a sick king.' 'Alas' she said 'May God not seal your father's home, all I have is one son. There he is asleep in the den. (26) You must take it beyond seven mountains and flay off his skin in such a way that I do not hear his cry. If I hear it, if I hear it, I shall put you under one of my teeth. He will roar. You should take him far enough away that I do not hear his cry, otherwise I shall put you under one of my teeth.' He takes him and puts him on his bosom and went off on his horse. He went and went, beyond seven, seven mountains. He flays off his skin in that way. He brings it to her. She gives milk, the good milk into the churn-bag. He ties up the legs, and the dirt and so forth with the legs. He says 'Thank you.' He comes to the lion. He sits on his horse and comes. (27) He comes, and comes and comes, he looks (and sees) again the same tea-house, where they drink tea, and he stays the night there. He looks (and sees) the husbands of his wife's sisters, his wife's sisters, no? They have come there and drink tea, but they do not find, they do not find milk for their father-in-law. One says 'Why have you come?' The other says 'Why have you come? Why have you come?' He is dressed in such a way that they do not recognize him. They say 'We have come looking for the milk of a lion for a sick king, but we do not find it.' He (the boy) stands up and says 'I have it. I am selling it.' They say 'for what are you selling it?' He says 'A large silver coin.' They (such coins) used to exist in the old days. 'For this shall I give you milk.' (28) They look at each other in the face and say 'This is much better than that<sup>157</sup> the king beheads us.' They agree. He takes out the feet and the bad milk. He gives

them to them. He mounts, he mounts on his horse. He comes back and says 'Let them now feed him and let's see what will happen to the king.' They come and feed him. The king becomes worse because it is not good milk. He says to his wife 'Go and see (how) your father (is)'—what they have cooked with grains, grains of the village. They call it pudding. They have cooked it with grains and fed him, but he has become worse. He says 'Go and see how your father is.' She goes and looks. Her father has become worse. (29) She comes and says '+Bahar, my father has got worse.' He says 'Put on a cooking pot with this good milk. Put on a pot to cook.' She puts it on and cooks. He says 'Fill the old lady's plate first. She is an old woman.' She fills her plate for her and says 'Eat!'<sup>158</sup> In the old days they used to call such earthenware vessels bowls, bowls. There were vessels like that. 'Fill it and take it to that father of yours.' She fills it and takes it. As soon as she enters the door, she takes it, her father smells it and he sits up. Its smell is so good. He eats. He says 'Do you know what?' he says. 'Well, from today he is my son-in-law. Bring him to the house.' He says to his wife. They fetch him and bring him to the house. They bring him to the house in order for them to prepare to hold a wedding. (30) Well, this lad is an educated lad, a smart lad, a handsome lad. He gets up early and does physical exercises in the courtyard in a vest like this. He looks and sees that again a gazelle has come. It knocked him on his armpit and moved away. It said 'I am going, come after me.' The gazelle said 'I am going, come after me.' He went (after it). The man said 'Let me see what gazelle that is.' Well, he has not told his wife. He went after it. He went, he went, much, a little. It went a long way and entered into something small like a house, which they call a hut. (31) It entered. It put out a carafe of arak and a table. It became a girl. The gazelle became a girl. She put the carafe on the table. She laid two glasses. She said 'Let's drink arak.' He drank. He drinks its. She puts it in front of him and pours it. She got the lad drunk. She took out a whip. She struck the lad across his back and made him into stone and threw him aside. The lad became stone.

(32) Let us now talk about +Almas. He comes<sup>159</sup> and looks in the window. He saw that the flowers had withered. 'Oh' he says to his father and mother, he says 'What has happened to my brother? I am mounting a horse, I am going.' He puts a large sword like this on his side. He comes a lot, he comes a little. He comes a lot, he comes a little. 'By God' he says 'Wherever my horse stops I (shall stop) there, I (shall stop) there.' He looked and all was well. It became night. He came and reached a town. He asked, he asked. They said 'Here you are, this

is the house of the king.' Who is he? Who is he not? He just then realized that his brother had lived there. These brothers could not be distinguished from one another. When you see <sup>+</sup>Bahar or <sup>+</sup>Amas, you do not know whether it is <sup>+</sup>Bahar or <sup>+</sup>Almas. (33) He comes there. He enters with a bowed head. He understands that his brother is not there. He does not, however, say 'He is my brother' or who he (himself) is.<sup>160</sup> She comes and serves food. She thinks he is her husband. Šacar Nūš <sup>+</sup>Xanəm serves food. He does not say a word. He does not utter a sound. He takes out his sword. She lays the bed. They sleep in the same place, since she thinks he is her husband. He puts it (the sword) in between, he puts it in between. He turns his back on her and goes to sleep. He sleeps and gets up in the morning. He goes into the yard and does physical exercises. (34) The gazelle came. The gazelle came and said 'I am going, follow me.' He followed after her. He said 'No matter what, this (gazelle) has brought my brother to light.'<sup>161</sup> He followed her. When she had brought him into the small house, she served arak. He says 'Drink.' She does not drink. She pours it and throws it away. 'I say to you drink.' 'You have poured the poison.' He took the whip. He took the whip and said 'Revive my brother. If not, then I shall make you into stone right now.' She has already become a girl. He already knew.—Oh, I am telling it very quickly, I am not telling it well.—He said 'I shall make you into stone.' He struck the whip and his brother rose up. He brother rose up. His brother rose up and he said 'My brother.' He said 'Yes, my dear.' He said 'My brother.' He said 'Why have you woken me up? It was such a sweet and pleasant sleep.' He said 'Yes, it was a very sweet and good sleep.' They took the gazelle with them. It is such a beautiful girl, beyond any description, this girl. (35) The two horses go along on the road. They went, they went. <sup>+</sup>Almas tells how he has come to the house and slept. The other says 'My wife did not know.' But he is a human being and thinks to himself 'He has come to our house and slept, oh.' The horses stop, they are thirsty. It is a huge well. They say 'Which of us should go down?' <sup>+</sup>Almas says 'I shall go down. There are stairs. I shall fetch water and you make the horses drink.' He goes down and he gives the water to them. <sup>+</sup>Bahar cuts the rope, the lad <sup>+</sup>Almas was left in the well. He comes home with the horses. He takes the gazelle and comes home. (36) He comes home. His wife thinks he is her husband. She does not know. Well, he is her husband. She cannot distinguish her brother-in-law and her husband. He comes and says 'What has happened here?' She says 'Nothing.' 'What has happened? Have not people come and slept?' She says 'You were here, but why did you put your

sword in between? Why did you turn your back on me?' She tells him how her brother-in-law had slept there. He bites his finger. He says 'I am inhuman. My brother is innocent.' He immediately runs. He immediately runs to the well. (37) He says '+Almas!' He says 'Yes, my dear.' 'I have thrown down a rope, come out!' He came out. He brought him back and they came back. They sent for his father and mother from there, they came. They held a wedding for seven days. They held it for seven days also at their father's house. They took him to his father's house. They held it for seven days at the girl's home. Then they held it for seven days at the lad's home. He also took his wife, Šacar Nūš +Xanəm, also Šacar Nūš +Xanəm for +Bahar. They took also the gazelle for so-and-so—she was a girl. They took her for +Almas. They held a wedding there for seven days. They tell it like this, from the time of our forefathers: seven apples have fallen, one of them, the first, for you, one of them for +Maryana, one of them for Eddy, one of them for me. They say this to them.

#### A43 The Adventures of a Princess (Manya Givoyev, Guylasar, Armenia)

(1) I shall tell you another one. There was once a king. A king and a queen again. They had a daughter. Every year they would go to the summer pasture. What is the summer pasture? They took the cattle to (a place) like a mountain, in summer. By the time they returned, their store rooms had all been ..., had been plundered, their gold had been taken. The daughter was very ... she was a tough girl. Their daughter was tough. She said 'Oh, daddy, go. You all go. I shall stay at home.' 'Why, my daughter? I feel sorry for you. How will you protect these storerooms with so much gold?' She says 'I shall protect them.' (2) They went. She got up in the night. She dressed like this, in sports clothes or the like. She placed the ladder and stood on one side. She looked. She is in the storeroom. She saw that they threw a ladder from above. Forty master thieves came. There are forty of those thieves. Whoever came, she beheaded him with her sword. Whoever came she beheaded. She beheaded thirty-nine, the fortieth she scratched on his forehead. One escaped—that leader of theirs. That leader of theirs escaped. He was like this, he was wounded and went away. Yes, he went away. Her father and the family came back after two months and all the gold is still there. He kissed the forehead of his daughter 'Thank you, my daughter, for protecting (our property).' She said 'Daddy, I have an enemy.' 'What is it?' She said 'The situation is as follows. The thief leader was injured and went away.' He said 'Do not be afraid. My servants are numerous and I shall station them with you.' (3) She—all the time the servants are going to the pool, the water. They have jars, they go to fetch water. Her shoe—the thief leader is searching for her.

He is watching where he could capture her. Her shoe is made of gold. It falls in the ... the pool. She says 'Well, what should I do? Surely I cannot take it out and the servants also cannot take it out.' She comes home. Well, the king is not there. She dresses again. The thief looks and sees what, her shoe. He says 'Come what may, she will come there.' He lies in ambush there. The next day she goes. He seizes her, puts her on a horse and takes her away. However much she screams and the servants and the girls and so forth, it does not help, he took her away. (4) He took her away, he took her away, he took her away, he took her up the mountain slope. He tied her up. He tied her all up with a rope like this. He tied her up from her nails, her hands, until the crown of her head. He placed her on the mountain slope. He says 'Stay here. I shall take off your flesh piece by piece with a ... a fine reed, a reed, well a fine piece of wood. Just as you have killed so many people, I shall avenge the blood of all of your enemies.' He tied her up. She said 'God, I implore you,<sup>162</sup> save me! I beg you.'<sup>163</sup> She tumbles, tumbles, tumbles from the mountain slope, slowly rolls and falls down. There is a road there, on which there are wayfarers. A caravan comes. They call it a caravan, like those who go with their pack-saddles (of goods) and exchange them all for gold and so forth, caravan. Do you know what a caravan is? Something with camels and so forth, which come and go and do ... business. (5) He looks—there ... it is the son of the king, their leader is the son of the king. The lad looks, but look it is a ..., something. He takes her immediately and says 'If it is a (bad) thing, it is for you. If it is a good thing, it is for me'—this son of a king. They take her and put her in a pack-saddle, and off they go,<sup>164</sup> they carry her off. They take her away. At that time the thief leader comes, the ... thief comes and looks but she is not there. He comes with his horse and cuts in front of the caravan. He says 'Did anything fall? Have you taken anything?' They say ... they surround him with automatic weapons. They say 'Go away or we will crush your head.' He is afraid and flees. (6) He comes to the house and opens it and what (does he see?) it is a human being. It is a beautiful girl, no more than eighteen years old, twenty years old, with long hair, fair, a picture (of beauty). He says 'Whose daughter are you? Whose are you?' He asks her. He is the son of the king. 'Whose are you?' She says 'This is the situation. Such-and-such has happened to me.' He said 'I shall marry you.' She says 'But why will you marry me? They want to have my blood.' She says. 'I have an enemy.' 'Well, I shall protect you. Do not worry about it. I shall build a house with three storeys. I shall put a lion in front of one gate

and a tiger in front of another gate.'—Have you heard of these?—'Do not have a thought (about it).' (7) He comes and builds a house, huge, three storeys, before one door he puts a lion on the steps, before the other a tiger. He goes to work. He goes to work and comes back at lunchtime. His wife becomes pregnant with a child. One lunchtime she sits, well he is her husband, she strokes his hair, she rubs it like this and he falls asleep. She likes him, she loves him. He has saved her life. (8) Then she sees the door open and the leader of thieves enters. He says 'Don't make a sound. Come out! Otherwise I will kill you and I will kill your husband. Come out,' he says. Slowly she puts her husband's head aside, on the pillow. She says 'You go in front, so that my husband does not see you.' He is smart. He has brought an ox and slaughtered it. He has thrown half of it before the lion and half before the tiger, so that he has been able to come up. She says 'Go in front of me.' She says 'Oh God! Oh Lord! Whatever child I may have, if I am freed, it will be an offering to you. Save me from this enemy.' Just as he puts his foot on the steps, she gives him a kick and he rolls down. She says to the lion and tiger 'Pull him apart!' They seize him and pull him apart. (9) She comes to her husband, she says, she says 'Get up!' He says 'Sleep is sweet. You don't say that the enemy has already come and such-and-such has happened? But why did you not tell me?' She says 'I did not tell you myself.' 'But are you not saying "Whatever child I bear, I have promised it to God as an offering?"' He says 'You have done well.' It happens that she has a daughter, a picture (of beauty), more beautiful than herself. (10) When the girl becomes fifteen, her mother tells (the story). She says 'It is inevitable,<sup>165</sup> I have promised this offering.' She says 'I have become a substitute for God, my daughter. Such-and-such a situation has come upon me, this is what has happened. I have not yet seen my father and mother. I have promised you as an offering. I do not know how God will accept this offering, how it will be.' She says 'I am happy, mother, provided that you are well. Whatever you do, that is your business.' Her mother goes out. I do not know where she goes, perhaps to the market and her father (goes out) to work. She sees that an old man came in and opened the door. He opened the door, (he was) a bearded man. (11) He said 'Greetings to you, my daughter.' She said 'You are welcome.' He said 'I have come for you.' She said 'I am happy. My mother has told me. Now it is best for you to take me.' He looks at her like this. He says 'Do you know what?' He has already accepted the offering. 'I would like to see you with bunches of flowers pouring from your mouth, roses, beautiful white ones, red ones, different types.' As for her plaits, each plait that she had, when she walked, gold coins fell down from all of her hair. Whenever you comb it, gold

coins poured down. He left. The old man left. The old man left and her mother returned. (12) Her mother comes. The girl is so happy, she runs, runs up to her mother. She is laughing. Those bunches of roses are coming out of her mouth. Her mother suddenly stops. She almost loses her mind. 'My daughter, what is that?' 'Mother,' she said. Yes, I forgot, (the old man said) 'Tell your mother to take a lamb and slaughter it, and the offering will be accepted, share it out.' She says 'Mother, when you went, an old man came. He said this. Yes (I said) "I am coming" and he replied thus. "Say to your mother that she should take a lamb and share it out, then the offering will be accepted. I want to see roses flowing from your mouth and gold coins falling from your plaits.'" Her mother is astonished. Her father comes. 'By God, what treasure is this? What game is this? The girl has become more beautiful, a picture (of beauty).'

(13) The girl turned nineteen years old. Let us talk about a young man (who was the son) of the king of China, or thereabouts, a young man. The old folk told these stories. I heard them all (whilst sitting) on the oven. I was a young girl like this. I remember them. His father says—the king of China or thereabouts had a single son—he says 'My son, I want to marry you off, so that our thoughts and vision be comforted, so we can rejoice and have grandchildren.' He says 'Father, I must find a girl. I will find her and love her. Let the vizier come with me and we will go and search, wherever, at whatever thing my horse stops, before whatever door, I shall enter into that house.' He says 'Fine.' He sends the vizier with him. (14) The vizier comes with the young man. They search, they search, they search, they go around many towns. They enter one town and the horse stops at one door, well in front of the door of the girl. He says 'I shall not go anywhere (else). It is my promise.' There are servants there. He says 'Go and speak to your master. Do they accept guests?' They say 'By all means, you are welcome. A guest is the guest of God. Our doors are open. Come in.' They go in. The girl comes in. She sees them and laughs. A bunch of flowers pours out. She goes along, tinkle tinkle, gold pours from her plaits. He does such-and-such to the vizier, he steps on his foot. He says 'We have found her. I shall not go anywhere else.' He stays there one week. (15) He says 'I shall not go anywhere else.' He remains there a week. He says, explaining the situation to her father and mother, he says 'I have come to marry. I have become fond of your daughter. I am the son of a king. I am not a lost child. Are you pleased for me to send for my father and mother to come?' They stand and look. The young man is handsome, tall, a picture (of beauty), clever, the son of a king. They say 'Give word that your father and mother should come.' (16) They come and her father's family hold a wedding for seven days and seven nights. Then they wanted to take her to the home of the young man and celebrate the wedding there also. Who will go with the girl? They send only the aunt of the

girl, the aunt of the girl, together with her daughter. What can I say about the aunt of the girl? She bakes cakes. She bakes them with roots and salt, roots and salt, because she is not pleased that this (girl) will marry that young man, the daughter of her brother. She wants to send her own daughter. She wants to get rid of this girl. She bakes cakes with roots and salt. (17) They send her off, they put her in a carriage and the young men in another carriage. Well, it is an army. It has no beginning and no end. They go off. Who will sit with the bride?—her aunt, together with the daughter of her aunt, and the driver, the carriage-driver. Three people are sitting at the back. They go along, they go along, they go along. They go along a lot and night falls. She says very quietly 'Auntie, I am hungry.' She says 'Here you are, I shall give you a cake.' She gives her cakes. She says 'Why are they so salty?' She says 'Your mother baked them. What can I do?' She eats and says 'Auntie, I am thirsty.' She says 'Take out one of your eyes. They give water for eyes.' She takes out one of her eyes and gives it to her. She cannot (tolerate it), the girl is burning. She takes it and puts it in her pocket. 'Auntie, oh I am burning. Auntie I am burning, I am burning.' She says 'Take out your other eye.' She puts the other eye in her pocket. She becomes blind. Slowly, at night, she takes her clothes, she strips them off and puts them on her daughter. With a kick she throws her from ... the carriage into the stream. She puts the bunch of flowers in the lap of her daughter. They take only the (new) bride. Do you understand me? They took her away, they took her away, they took her away, they took her away. (18) Let us talk about the girl, who was sobbing in the stream. There is a poor man, who has six blind daughters. He comes every day in the morning to gather wood, to take away to sell, in order to take food to his daughters, bread. He looks (and sees) that there is somebody making a sound 'Ah, ah, ah.' He says 'What is it? What has happened to you?' She says 'Who are you?' He says 'I am a man like this.' She says 'You are an uncle, well you are a man, take me away, you will see good from me.' 'My daughter, why (are you) like this?' She says 'They took my eyes out like this.' 'My daughter, I have six blind daughters. If I take you, it would be seven. How can I provide for you?' 'Uncle' she says 'Just look how much gold I have under my head. I shall bring you good. I will love you very much. You can take these bunches of flowers and sell them. You can sell this gold. I will be able to provide for your daughters.' The man says 'Indeed, I should take her away (with me).' (19) He took her away (with him). He took her away, he took her away. He puts her in the house. She says 'Go to the market and sell these flowers. Take any basket.' She laughs. He takes flowers to the market to sell. She combs her hair three times a day and he sells the gold. She says 'Uncle, I beg you, take these flowers to the door of so-and-so the son of the king. Sell them there. It is that aunt of mine who has taken my eye out. It is with her. Perhaps you will be able to bring back those eyes of

mine.' But this son of the king, they have taken her and he is looking at her, but she does not resemble that (other) girl. Also the flowers have withered. (20) He looks, well she is not the one he liked. He says 'What is going on?' The son of the king was dumbfounded. His colour is not brightening even a little. He (the poor man) takes the basket and fills it with flowers, and goes and stands before their window. He says in the language of the Muslims 'I am selling flowers. I am selling flowers.' She says 'For what?' He says 'For eyes. For eyes. For eyes.' Don't you know the language of the Muslims? Don't you know? He says 'I am selling flowers. What are you selling them for. He says I am selling for eyes.' 'Ah' She says 'The wolves and beasts have eaten her. She is surely not still alive.' She says 'I have eyes, I have an eye. I shall give it to you now.' She takes out an eye and gives it to him and she takes a basket (of flowers). (21) She says 'Give me my basket.' She takes the flowers. She changes the bunch of flowers and puts it in front of her daughter, so that her husband would come and love her. He (poor man) comes back. He brings back the eye. She says 'Well done, father,' she says, 'You are a father to me.' After a week (she says) 'They (the flowers) are now withered. Take another basket, take it and bring back the other eye.' He goes off and again stands under the window. 'I am selling flowers. I am selling flowers.' She says 'What for? What are you selling them for?' 'I am selling flowers. What are you selling them for?' He says 'For eyes. For eyes.' He takes the other eye and comes back. She is lying down and thinking how she can put the eyes back. So, she does not sleep at night. She looks (and sees) that three pigeons have come. (22) 'Hey, girl' they say 'The left eye is in the right and the right is in the left. Don't make a mistake. Put them in correctly so you will not be squint-eyed.' She takes them and puts them in, she puts her eyes in. She becomes a girl, the picture of beauty. She is an intelligent, smart girl. She says 'Do you know what?' She says to the old man 'Do not (go and) stand there again. Build houses of seven storeys.' If she combs her head three times a day, she laughs ten times, she laughs a hundred times, he could take it to the market. She builds houses of seven storeys, with servants, cooks, carpets, from bottom to top. All of her spoons were golden. All the kings were astounded as to what this old man had done. From where was this wealth? She says 'Do you know what? Do you know what?' He says 'What?' She says 'Invite all the kings, as many kings as there are.' Well, her father and mother are royalty. 'Invite as many kings as there are.' She wants to see her husband. 'Invite them.' He says 'Of course, my daughter.' (23) She has some servants and she has dressed them up in impressive clothing. She has dressed up her maid-servants in impressive clothing. She has dressed up the cooks in impressive clothing. There are geese, there are butterflies, there are those doves—they are all fluttering around in the courtyards. They have made the courtyards a picture of beauty, seven storeys, all with flowers and blossoms.

All the kings come. There is a bit of a queue, without an end, for them to receive all the guests. They are all seated. She dresses beautifully. She takes a tray in her hand. She only says 'Fruit.' (24) When she takes a tray in her hand, as soon as she enters, her husband is also sitting there, just as she enters, she laughs and the bunches of flowers come pouring out in a twirl. Her husband loses his consciousness. He falls headlong from here to there. Yes, her mother, her sister, his mother, the mother of the girl, the father of the girl, also the grandfather has come, the mother of her mother, everybody has come. Everybody has come and gathered. Everybody (says that) an amazing thing happened there. They regain their equanimity. They say 'What is happening? What is happening?'<sup>166</sup> What is going on?' 'Auntie has done this thing, auntie.' Well, what do they say? 'Put them behind horses.' They tie up the mother and daughter and put them behind horses (and they gallop away) beyond seven mountains. They come and say 'We will take her.' The old man says 'I will not give her. How can I give her.' They say 'Well, what should we do?' 'From here until your house, you will take everybody by carriage and hold a wedding. You will hold a wedding there again for seven days and seven nights. You will hold a wedding again, you will take her.' He holds a wedding again for seven days and seven nights. They found their heart's desire.

Again apples have fallen in piles, for +Maryana, for you, for Edo, for all of us.

#### A44 Two Wicked Daughters-in-law (Manya Givoyev, Guylasar, Armenia)

(1) There was once upon a time a mother, who had a son. They say this son of hers used to go, for example, he used to go for business. He would take things and exchange them for gold. He would not come back home for a month. He says 'Oh mother, take good care of yourself, I am going away and shall not come back for a month.' She says 'My son, do you know what? Everybody is married. Everybody has grandchildren whom they put on their knees. You also' she says 'Get married so I can have a daughter-in-law. It would be companionship. I would have grandchildren. Yes, I would see them and be happy. You would come back and there would be a family at home.' (2) He says 'Mother, I am afraid.' 'Why my son?' He says 'I am afraid that she would not look after you well.' She says 'Do not be afraid. Why, she is surely not a beast, she would surely not eat me.'—Yes, my mother told this (story). My uncle told it.—He goes and gets married. He brings back a beautiful wife. He settles her with her (the mother).

He says 'Take good care of my mother. If anything happens to my mother, God forbid, I shall cut you to pieces, I shall throw you out.' She says 'Well, of course! I shall take good care of your mother.' (3) He takes his ..., how shall I say? His caravan set off. He went to carry out his business and would not return for a month. He goes off and she looks after her for a week. After a week she brings a large basket. She fills it with eggs and puts her (the mother) on the eggs. She says 'You must produce chickens.' The woman is dumbfounded. (4) Every ten days she brings out some crockery and so forth and gives it to her. The woman becomes (thin) like this. She is not even giving her food. The neighbours do not see her, nothing. What is the matter? She comes when some three or four days remain (before the son's return) and gets her up, washes her, launders her (clothes), dresses her, and puts her there. (5) He comes back and says 'Mother' he says 'What is the matter? This mother of mine, the lady my mother, why has she become like this?' 'Well, if only you had not asked! She was ill. I was exhausted bringing ambulances. I was exhausted bringing doctors, she was so ill.' He asks the neighbours saying 'Something' he says 'There is something (wrong). What has happened to this mother of mine?' They say 'We have not seen her at all.' 'Mother' he says 'What has happened to you? Tell me so I can know.'<sup>167</sup> She says 'Nothing.' 'What do you mean "nothing"?' But why have you suddenly become like this?' Here he takes hold of something and beats her so much, he beats her and she speaks 'This is what I have done.' 'You have done this?' He cuts her to pieces and puts her in the forest. He takes her and throws her away. 'Mother' he says 'Do not ... There is no marriage. It is not for me. They will kill you.' After one year, two years, three years she says 'My son, I cannot (go on like this). That (wife) was like that, but another one will surely not be the same. Marry again. She was not good, another will be good.' 'Oh, mother' he says 'but I am afraid for you, I am afraid.' (6) He comes and marries. He says 'Look, I have cut one to pieces. May God forbend, may he Messiah not decree, but if I see a mark on my mother, I will tear you apart.' Well, they say such things. He again took his caravan and went away. He went away. She, the bride, sees that monkey-buyers have come to the door, monkey-buyers. (7) They say 'Who is selling a monkey?' She says 'I have one.' She sells her mother-in-law as a monkey, instead of a monkey. Oh dear,<sup>168</sup> she gives her and says 'Go, I have no need of you.' They take her away. They took her away and the man returns with his caravan. The month has come to an end and he comes back. He sees in a village a great many people gathered

together, a great many people gathered together. The young man says 'What game is this? Let me go and see.' That man was a very knowledgeable and astute man. He travels and sells, he carries out (business), with great knowledge. 'Let me see what it is.' (8) The young man sees a woman who has become very skinny, but she is nevertheless singing. They hit her with a whip and she sings. They collect money. Well, it is business. They collect money. The people hit her. She sings and he listens. She says, again in the Muslim language, she says: 'The first time the woman ... under myself I produced a chick.' She says 'She put an egg, I produced a chick. Afterwards the woman made me a monkey.' (9) She has made me a monkey. The first woman' she says 'put eggs under me and says "Produce chicks." The other one came and made me into a monkey and sold me.' She goes on singing and he stands there and says 'Oh dear me, the first one did such-and-such to my mother. Is it possible that the other has made my mother into a monkey and sold her?' He says 'Such things are not possible.' (10) He says 'Hold your flute for a minute, stop.' His mother had a mole on her forehead, a mole like this. He moves aside her hair and sees that the mole of his mother is there. He says 'I shall buy this monkey of yours.' He says 'What should I give for this monkey of yours?' The daughter-in-law has turned his mother into a monkey. 'What should I give for this monkey?' (11) They say 'Gold in accordance with her weight. Let us put her onto the scales.' They put her on the scales and weigh her. He pays gold in accordance with her weight and takes his mother. He brings her back and takes her to the bathroom. They wash her. Having laundered her (clothes) and dressed her in clean clothes, she is beautiful. He brings his mother and hides her. (12) He comes and enters. He says 'Where is my mother?' She says 'Your mother—may your father's house not be ruined—the neighbours will tell you, your mother became so ill, became so ill and died. I have taken her away and buried her. What should I do? I was not able to keep her (alive).' He stands and looks like this. 'If I were to go and bring my mother, what would you say?' 'May your father's house not be sealed! May you have good fortune! Where is your mother? Your mother is dead. All the neighbours are there, let them tell.' Slowly he takes his mother and brings her. He sits her down and says 'Look, here is my mother. Do you see this mother of mine?' She dries up. She does not utter a sound or an 'alas.' He cuts her too into pieces and brings her to the woods. He takes her and throws her away. He says to his mother 'Marriage is not for me until you die and I bury you. I shall bury you and then I shall get married. I have the custom of going away once a month.' He carries out business, he takes things and sells them, exchanges them for gold and so forth. So, he kills the daughter-in-law. What can I do? The story is like this. He looked after his mother. He did not get married. He did not see any grandchildren. I have told you this in a short version.

## A45 A Dutiful Son (Manya Givoyev, Guylasar, Armenia)

### A45     A Dutiful Son (Manya Givoyev, Guylasar, Armenia)

(1) Once upon a time there was a husband and wife. They had three sons. They had three sons. The wife becomes ill. The wife becomes ill ‘Oh’ the husband says ‘How can I look after these children?’ He took the woman to hospital. He stayed there and he brought her home. He brought her home, but he was not able to save her. The woman died and he put her in her grave.<sup>169</sup> (2) As for his children, this man was clever, he said to his youngest son—he was bald, do you know what ‘bald’ is? He has no hair—he said to his son ‘You will cook the food, wash the clothes, sweep the yards, feed the chickens, feed the cats, the horses. In short, you are the overseer of the house.’ As for his two (other) sons, they go to work. Thus all is in order in their house. (3) He launders, cooks, does maintenance,<sup>170</sup> tidies up, whereas they go off, the father and the two boys, the two brothers. The young bald child is at home. They worked and worked, and it happened that the father became ill. It happened that the father became ill. They took him to the hospital and they brought him back. The father already said ‘Come, I am making a will for you. (4) I shall die, but for three days, you are three sons, every night one of you will come to guard over me. You will come to my grave and stand guard.’ They say ‘Well, we shall come. (Why) would we not come?’ They took him and buried him. The young bald man was a very clever lad. There is no sound or utterance. He says ‘Brothers, what did father say? Did not father say that you should go and stand guard. Who will go?’ The elder son said ‘Tonight I shall go.’ (5) He went and lay down his head—far be it from here—upon the grave. He put down his head and slept, snoring until morning. He came to the house in the morning. ‘Brother’ said the young bald lad, ‘Brother, what did you see?’ He said ‘I have not seen anything.’ The next night the middle brother goes and stands guard. He says ‘My brother,’ when he came back in the morning ‘What did you see?’ He said ‘Nothing.’ ‘Well’ he said ‘this time, tonight it is my turn. I shall go,’ the young brother (said). (6) The young brother went off. He cut his little finger and tied it up tightly, and so cannot sleep. At some time in the night he sees that a wind has come, a very bad wind, and it threw down three hairs. It threw down the three hairs and said ‘Take them,’ a voice came, ‘Take them away and hide them. Do not tell your secret to anybody. You will need these. You will need these. These are important for you. Do not tell anybody. Take them and hide them.’ (7) He came back very quietly. He brought the hairs and put them all in the stable, on a beam. He put

them there and hid them. After a week, two weeks, the brothers came and said 'Well, what have you seen?' The bald lad said 'Nothing.' A week (went by), two weeks, a month, two months, he looked, but (look) what is the announcement, which they have put up in ... the centre saying 'People are coming against a certain king, they are coming from another kingdom, he has two daughters, they are coming to take his daughters.' The elder brother came and said 'If only we were strong, we would go and strike them and kill them, and ensure that the kingdom remains ours.' (8) 'Oh,' he said 'Well what should we do?' 'We do not have the strength' the bald lad said 'We do not have the strength, we shall not go.' He said 'Well then you, Baldy, stay at home. We shall go.' The two brothers got up and prepared their horses. Early in the morning they ate their food, they sat on their horses and went off. He got up and sprinkled, swept, cooked food and did all his work very quickly. He went into the stable and he prayed his prayer saying 'Oh mighty Lord. What did father say? Perhaps father has said something.' He pulled out a hair. He took it and left the two others. (9) He said 'Oh God.' He lit a match. He saw a horse come, neighing, black, with a black sword, black apparel and a black cover. The horse stood. 'My master, what do you want? Should I destroy the world or save it?' He said 'An enemy is coming to attack a princess. They are taking away the elder princess.' It said 'Now, right now, mount.' The horse flew through the air. He flies on it, they call it a sumur bird, a black one. He sees from above his brothers galloping on a horse. He says 'Go down a little.' (10) He goes down. He whips each one, because he had said 'Take me too,' but they had said 'You stay, Baldy. You are not going anywhere.' He went, with his sword and shield, black sword, he went and cut them all to pieces. He entered at once into the house of the king. He attacked and battered them, and took the elder princess. He brought her back and put her in the stable. He drew the curtain. He said 'Do not make a sound. If you make a sound, I shall cut your lips.' He went and served out a plate of food and placed it before her. He placed a bowl of water before her. 'Do not make a sound, I'll cut you up.' 'No, no, no, I shall not.' He sat down. (11) His brothers came in the evening, exhausted, tired, their tongues sticking (with thirst). 'My brothers, what did you do?' 'Oh, may your father's house not be sealed, a youth came, cut them all to pieces and took away the elder daughter.' He said 'Sit down, sit down. Eat your food. God is merciful.' In the morning they get up. They again go galloping off. They eat their food, the two brothers. They say 'At least let us go and bring the middle girl.' He said 'God. Will you not take me?' 'No, no. May your house not be destroyed, Baldy, where would you go?' He did all his work then went and pulled out the middle hair. He prayed his prayer, as it is proper. He remembered God, lit a match and took out the hair. He lit a match and a red horse came, with red apparel, a red sword, red apparel, a red hat, a red horse. 'My Lord, what do you

want? I will destroy them all.' He said 'We are going to attack the enemy, take a [the] middle daughter and bring her back.' (12) When he set off into the air like an aeroplane, when he struck and went and cut them all to pieces, he chopped them to pieces, he took the middle daughter and came back. His brothers are only just arriving. He whipped each one of them with a whip. He said 'It is their fault. They do not pay attention. They did not pay attention to father.' He came back. He sat down and said, he said to the middle sister 'Look, sit next to your sister. If you make a noise, I shall cut your lips. Are you hungry? Here is a plate of food and here is water, eat. You two do not make a sound.' He drew the curtain. So that was that. (13) Then his brothers came back. His brothers came back, exhausted and tired, like this 'Oh' they said 'Baldy, it is good you are sitting. No, sit, sit, sit, sit. You are not needed.' He said 'Sleep, God is merciful, God is merciful.' They think and say 'Fine,' they say 'At least we shall bring back the youngest daughter to you, Baldy.' He said 'Go!' (14) He got up and again cooked the food, gave (food) to the chickens, he swept and put in order all his house and went off. When he entered the stable, when he took the hair, when he lit the match, a white horse came, with white apparel, a white sword, everything on the horse was white from his toenails to his skull, a dagger too on its side. He set off into the air, puuu, he went off. He attacked them all and battered them. (15) He took the youngest daughter. He left his sword there. He put it into the wall and left it. He left it and brought the girl back. He said 'Sit next to your sisters. One word and I'll cut your lips. Do not make a sound. If you are hungry, eat.' He gave them food and so forth and went back. The bald lad is so content, he feels good. He giggles to himself. They came back, their backs broken (with fatigue), their faces black. They came back and sat down. They said 'We could not bring any girl back to you. Enough! It is all over, we are in such a state. What will become of us?' He said 'God is merciful. Sleep, sleep.' Several days passed. Then they put up an announcement. (16) 'Whoever took the daughters of the king, the king, whoever took the daughters of the king'—he said—'my daughters, let him come and take the sword, then my house, my kingdom is all his. All my house and kingdom, it is all his'—whatever he has. Then he goes, he says 'My brother,' the elder brother comes and says 'How fortunate for him who has done this. How fortunate for him. In his whole life he will not experience sorrow.' (17) He says 'If I go and fetch the daughters of the king, what would you say?' 'How fortunate we would be!' they say 'From where (will you fetch) the daughters of the king?' He slowly goes and brings the three of them together. He says 'Come and see.' 'Who has brought them?' 'Well, I say what did father say? Did not father say that you should stand guard? You went, put your head down and slept. Well, how should a watchman behave? Surely he should not go and sleep! A guard should

stand at his post and see what is happening.<sup>171</sup> Does he put down his head and sleep? Do you see, look, my finger is cut off, I do not have my finger.' (18) Then the three brothers go there, to the king. They give them all great wealth. He makes one vizier. He makes one the overseer. The daughters themselves (give) them all wealth and install them in posts. They live a good life. They marry them (to the daughters) and their marriage celebrations (take place). May God give them and may God give us good fortune. May God give you also good fortune.

#### A46    The Little Prince and the Snake (Nadia Aloverdova, Guylasar, Armenia)

(1) Once upon a time there was a king. The king has a son. His son when he was young used to cry a lot. They cannot stop him making a noise. He keeps many servants to look after his son,<sup>172</sup> but none of the servants could stop him making a noise. One day they go into the house where the child is lying and see that a snake is sitting on the cradle, he is moving its head back and forth, the child is playing with it. (2) They come to the king and say 'King, we have seen something. 'What has happened?' 'Well, a snake is sitting on the cradle of your son.' He runs and comes to see his son, but (the snake) has not bitten (him). If this snake has not bitten my son up until now, let him be like a friend for him, he will stop him making a noise. The snake lives in the palace of the king. He grows up together with his son. His son becomes six years old. (3) One day, whilst he was playing with the snake, he sees a sword on the wall. On the wall a sword is hanging, the sword of the king. He takes it. While he is playing with the sword with the snake, it happens that he strikes part of his tail. The snake looks at his tail. On account of the pain of his tail, he takes a ... he bites him. The child swells up, staggers and falls down in the middle of the palace. (4) They all run and come to look. The snake is not there. Its tail is left behind. The king says 'So, my son has cut off its tail and it has bitten him.' Years go by. He says 'The child, my son, has died. We were used to that snake. I shall bring him and look after him in the place of my son. At least I shall remember my son in this way.' One day he meets a snake, the tail of which has been cut off. He approaches and says 'Do you know me?' The snake says 'Yes.' He says 'Well follow me back. Let us forget everything that has happened. I shall look after

---

#### A47     The Snake's Dilemma (Arsen Mikhaylov, Arzni, Armenia)

(1) A wayfarer, a man, is walking along the road. Having entered a forest, he notices that a fire is blazing and the forest is burning. He notices a high tree on which a snake had encircled itself. The snake has escaped from the fire. It has escaped from below, wound itself around the tree, and remained on its top. The tree is burning from below. (2) He stretches out his stick. In his hand there is a wooden stick, in the hand of the man. He stretches to the snake and says 'Come, come down, I'll rescue you.' The snake comes down on the stick from the arm of the man and encircles his neck. It encircles his neck and says 'Now I shall bite you.' He says 'Why do you want to bite me? Did I not rescue you from the conflagration? I have rescued you from the fire,' says the man to the snake. (3) It says 'They have said to us, we know, and I as a snake know, that man is the worst thing of all. Wherever you see him, you must bite him. Man is a very evil and bad creature in this world, in this creation.' Then the man says 'My boy, may I be your substitute, but this is not the custom of the world. After all, I saved your life from the fire.' (4) He pleads with the snake not to bite him. It says 'Fine, if you do not believe me' the snake says 'Come let us ask one of three people, three ... people, one person, two people, let us ask, either people or whatever meets us, an animal, whatever he may do. Let us ask and see if it is still the case that I am truly wrong, or am I right to want to bite you,' (i.e. bite) the man. He says 'Let's go.' With the snake wrapped around the man's neck, they set off on the road. (5) They meet an ox. It says 'Greetings, my brother ox.' The snake offers greetings. They have transmitted it (the story telling) of how the snake asks the ox. It says 'I want to bite this man. What do you say? Should I bite him or not bite him? Should I paralyse him? If I bite him, he will die.' He says 'Finish (the job), bite him quickly, while he has not thought of doing something against you. As quickly as you can, bite the man!' (6) He says 'But why?' The man says. 'Ox, but why are you saying this? Why should it bite me? I have saved it from the fire, the snake, I have saved it so that it would not burn. I say: "Go on your way." It wants to bite me.' It says 'Because you are very evil. A human is a very evil thing. A human being makes me work until the evening, from first light until the setting of the sun, in the dark and I plough the earth. He gives me a bucket of water. He gives me a little water. He gives me also a little food and I eat. For this reason

you, a human being, must not live.' It says 'He must be bitten. Bite him wherever you can. Do evil to him. Snake, bite him' it says. (7) The snake says to the man 'Did you hear, my brother, what this ox said? Now I shall bite you.' He says 'May I be your substitute. Let us ask another one.' It says 'Let us ask.' They go. They go a little, they go a lot along the road. They meet a spring of water. They meet a spring of water. (8) It says 'Greetings to you, my sister spring.' The snake greets the spring. It says 'Welcome my brother snake. What is the matter? Where are you coming from?' It says 'I want to bite this man. What do you say? Am I right or not?' It says 'Bite him quickly. Finish (the job) as quickly as possible. Do not let him live.' (9) He says 'Why?' The man says 'But why? What have I done to you?'—he says to the spring. It says 'At dawn, at dawn, early in the morning, when no animal, nothing has moved, the human comes and washes his face and hands in the spring, the spring of water, and he drinks the water' it says. 'When he has finished, he spits in the water and goes away. Therefore' it says 'You are not something worthy of living. Bite him quickly. Let that man die, do not leave him alive.' (10) It says 'Did you hear?' the snake says to the man 'Did you hear my brother what it said? Now I shall bite you so that you die.' He says 'May I be your substitute. Let us ask another person, then bite me quickly, the hell with it, so be it after that. Let us ask a third then bite me.' It says 'Fine, let us go.' (11) They go along the road again. They come along the road and suddenly see on one side a fox. It runs and runs, it flees. It (the snake) says 'My brother fox, stop, stop!' the snake shouts. It says 'What do you want from me?' It says 'Wait. I want to bite this person. What do you say? Should I bite him or not?' It says 'I am in a hurry. Bite him quickly and let him die quickly. Do not leave him alive.' (12) The man says 'Why?' Well, the fox is not a little wicked. The fox turns to the snake and says 'But what has happened? Why are you biting him? Where did you catch him and bring him from? How have you put poison in him and encircled his neck?' It says 'My brother, fire had broken out and the forest was burning. I also was burning and I had climbed up a tree. This man put out his staff, put out his stick and saved me. Now I have encircled his neck and I want to bite him.' (13) It says 'My brother, bite him quickly, as quickly as possible, before he does something against you. But how can it be true?' it says 'You are tricking me,' the fox says to the snake. 'I do not believe that fire broke out in the tree and that you could come down by the stick onto the neck of that man.' The snake says 'What do you mean you do not believe (me)? I can come down from a tree by a stick onto the hand of a man.' (14) It (the fox) says 'How can that be true! You are telling lies. I am in a hurry' it says 'I am in a hurry. I am going. People are coming after me to kill me. I am fleeing. But I do not believe that you have done this thing, that you are able to go down from a tree by a stick onto the hand of a man.' It (the snake) says 'If you do not believe, I can quickly show you,' the

snake says to the fox. It (the fox) says 'Come down! Let me see whether you can still do that. When I see, then I shall tell you whether to bite him or not.' (15) The snake comes down and is about to climb on a tree. The fox says to the man 'Go, you bad man, quickly stamp on his head! Stamp on the head of the snake. While he has come down from your neck onto the ground, stamp on his head. You can kill him. Why have you let him (go)?' (16) The man at once strikes the snake and paralyzes it. He says 'My brother, oh may I be your substitute,' he says to the fox 'How<sup>173</sup> did it happen that you came to this place? How did it come about that you met us? What good deed can I do for you so I can return<sup>174</sup> the favour that you have done to me? You saved me from death. The snake was about to bite me, (although) I had done it a good deed.' (17) It says 'A good deed is not necessary. Hunters are chasing me with horses, with greyhounds, with dogs. They want to catch me and strangle me. Look they are coming! These two roads are bending like this,' it says 'I shall hide myself here under ... If they ask you, stand on this road and show them (the road) and let them go (on it).' He says 'Of course,<sup>175</sup> of course. Well, this is a good deed. Of course<sup>176</sup> I shall do this for you.' (18) Then he says 'I shall go down there and hide myself. As soon as they come, tell them that it (the fox) has gone.' He says 'Of course.' It goes down and enters the hollow, the hole. The fox hides itself. From the other side horses come, on which there are hunters with guns, with the greyhound dogs. They say 'Greetings, my fellow man!' 'Greetings!' They say 'Have you seen a fox running away around here? Do you know which way it went?' (19) He should have said 'The fox went this way.' But the man says 'It has hidden itself over there. It has hidden itself under there.' The dogs attach themselves to his head and seize him, they strangle him and bring him out. They then tear him apart and eat him. The fox says to the man 'My brother, why did you do this to me? Did I not save your life for you?' He says 'My brother, forgive me, but this is my nature. I am accustomed to it, it is in my blood, I had to betray you.'<sup>177</sup> This is the story of the fox and the man, which I have heard from our forebears, our father and grandfather.

(20) So, I want to say that the man betrays the fox in this way, the fox, which is the most wicked of all (animals), which knows well how to go about things. The man, whose life the fox had saved, the life of the man, the man betrays

<sup>173</sup> Literally: from where?

<sup>174</sup> Literally: finish from under.

<sup>175</sup> Literally: on my eyes.

<sup>176</sup> Literally: on my eyelids.

<sup>177</sup> Literally: sell you.

the fox. He causes it to be killed by the dogs, by the hunters, the hunters. I do not know how many examples have been adduced about mankind. These, the fox, the spring, the snake, the ox, these are all examples, I adduced examples about the way of life of mankind, whereby in the course of the life of a man, he does as many good deeds as he can and (I show) how many bad deeds there are in man himself. (21) I cannot now explain everything together relating to this tale which, as I say, I heard from my forebears, my father and grandfather, that which they related in this story. In the end, when the dogs and the hunters begin to eat, tear apart the fox, tear it to pieces, the fox says to the man 'Hey, my brother, it is true that man is a mammal, he has sucked (milk).' Now I do not know what the significance is of this mammal and sucking. You know what milk is? The milk of a mother. So, the fox says to the man 'Oh, my brother, you have betrayed me.' They spoke the truth—that man is a mammal that has sucked (milk) and one has to be cautious of him. That is how I can explain it, but you could find another explanation of its meaning.

#### A48    The Wise Brother (Arsen Mikhaylov, Arzni, Armenia)

(1) The story of this tale is thus, as I have heard it from my grandmother, my mother and my grandfather. It is about two people, two brothers. One of them is very lovable,<sup>178</sup> an intelligent man, a clever man. The other is a little more aggressive and he is a little less clever—'less' means 'not much'—and he is jealous of his brother. He is jealous of the intelligence of his own brother, also because his brother—he himself is a king of a kingdom, but he knows that his brother is cleverer than him, more intelligent, more able to establish his thought among the people. He is able to answer<sup>179</sup> questions and solve big problems. (2) Because of this he does something against his brother, in that he presents his brother in his kingdom as if he were mad, a tiresome fool, a man who has lost his mind, and all the people of the kingdom of the king hate the brother of the king. They say 'He is mad.' All after the king said 'My brother is mad.' All have to shout in one voice, all have to shout that the brother of the king has lost his mind, he is mad. (3) But the vizier of the king, the first vizier, knows who the brother of the king really is, how intelligent a man he is, this Dahlun Dewanda (as he was called). One day early in the morning the king, together with his vizier, his overseer, his greyhound, his dogs, goes out hunting,

goes out of the royal city gates. (4) When they go out of the city, the vizier of the king sees that the brother of the king is sitting, early that morning, when dawn was breaking, sitting in front of the city gates, and that he has made three large piles of ash. They all go off together, the horses of the king, they go off with dogs, but the first vizier goes back. He says 'Dahlun Dewanda, I know, brother of the king, that in those piles of yours there is a meaning. Why have you made these piles? What was the meaning of them? You have made these piles early this morning in our way, as we have gone out to hunt.' (5) Dahlun Dewanda, the brother of the king, says to the vizier 'Every pile has a value. Every pile is worth a gold coin. Come, give (this) to me and I shall tell you what the meaning of this pile is.' The vizier takes out three gold coins and gives them to the brother of the king. He says 'Tell me the meaning of the piles.' (6) He says 'May this pile of ash be on the head of the man who relies on the king,<sup>180</sup> on the government, who puts his hope in the government, relies on the government. May this second pile be on the head of the man who tells his secrets to a wife, to his wife. May the third pile be upon the head of the man who disowns his own family, his own relatives, those of his community, rejects his own people, hates them and helps the family of the wife and strangers. These are the three piles.' (7) He rides off, the vizier rides off on his horse. He goes after the king. He arrives and goes out to the hunt. The vizier comes home in the evening and thinks a lot on the three points that Dahlun Dewanda told him. He says 'Let me see whether this man is telling the truth about them. He is an intelligent man. These things have to be tested. This cannot be.' (8) He begins to work and thinks how he could test the three points that the son of the king told him. 'Do these exist in real life, or not?' First he comes back one day, at night he pretends to drink one or two glasses of wine and says 'Wife, come out, come out,' he says to his wife. He wakes his wife. He says 'Get up, straight away.'<sup>181</sup> 'What has happened?', she says. 'Man, why are you like this?' He says 'Get up, I have killed somebody. I have killed somebody. Look I have wrapped him in these cloths. I do not know what to do. We must do something. If the kings knew about it, he would hang me.' (9) At that time they used to collect people in the square, hang them and throttle them, whoever killed a person, by the law of that time. He says 'We must do something quickly.' Then she says 'Oh, man, what should we do?' His wife says. 'We must bury him somewhere so people do not see.' She says 'We should dig and bury him somewhere, so that people do not see.' He says 'Oh, wife, where should we bury him? Tell me.' (10) She says 'In the stable. Bring him and we'll take him in there,

we'll bury him in our stable, so people do not see us digging.' She says 'Quickly, get up.' The husband and wife get up, straight away take a shovel, a spade and a pickaxe. They dig and bury him in the stable very neatly, and nobody knows. They go to bed. (11) The next day the vizier drinks heartily again and pretends to be somebody who is drunk. When he is as if drunk, he comes home and begins to beat the wife, his own wife. He beats her and says 'You are not a good wife.' The wife says 'Now I'll show you. Now I'll show you. In the morning I shall go straight to the king and tell him what you have done, that you have killed a man, that you are a murderer and you have come and beaten me also.' He beats her, then puts his head down and sleeps. (12) Early next morning his wife goes straight to the king. She says 'King, be well, you do not know what kind of man your<sup>182</sup> vizier is. Your vizier has killed a man. Your vizier is the murderer of a man. You have kept him as a vizier. Last night he came and beat me too. He beat me and wanted to kill me. You must hang him, do not spare him.' (13) As soon as it became light, she went to the king. Two hours have not passed, the king does not speak with his vizier, he summons a crowd to the square. He brings them there and says 'The vizier must be hanged. The vizier has killed a man.' (14) Then they seize the vizier. The army of the king comes to the house. They seize him and take him to the square, and tie him to the post where they must hang him, under which they put firewood in order to burn him. What will they do to him? Then, when they have bound him to the post, where they must hang him and burn him, he looks, the vizier himself, he looks at the king, the king himself—they have worked together, he is the second (in command). He does not ask him 'Which man have you killed? Where have you killed him? Why have you killed him? How have you killed him?' They say 'Finish the job.' (15) Then he looks at all those whom he has put in positions of high rank, the relatives of his wife and foreigners. One of them brings a rope. Another brings soap. Another brings firewood. Another says 'Finish the job, king, may you be well, finish the job, let's hang him and finish. Why are you taking so long? You are taking a very long time. Let's hang him quickly and finish.' (16) Then the vizier looks and sees his own relatives, whom he has disowned, whom he has not helped, ever, some ten people like this on the edge (of the crowd), he was surprised to see that they are sitting and weeping for him, people whom he has not greeted in his life, when he was in his position of vizier, when he was in a high position. Now that they are throttling him, these ten people or so, fifteen people, his relatives, they are weeping for him. (17) The others whom he has put in high positions all say 'Finish the job, king, may you be well.' They say 'Finish the job quickly, let's

hang him. Let's hang him and finish. This son of a dog'—and so forth—'he has killed people. He has also beaten his wife. Finish the job!' (18) He sees that the king does not utter a sound. The vizier sees that now they will hang him. They want to light the fire under his legs. He says 'King, may you be well, permit me to say something. I am your vizier. Am I not your right arm, the second man (in command)? Are you hanging without asking (questions), without asking anything? Are you not allowing me a final word? You are hanging me like this, without saying anything.' He says 'Give me permission to say something.' (19) He says 'Speak, say one word. It is time to end the matter.' He says 'Ask these people, I want these people who have gathered in this square, this crowd of people, to ask whom I have killed, who is the killer, who is the one whom I have killed, why have I killed him? Go on, why do you not ask? Ask my wife.' He says 'Tell me wife, why have I killed him?' 'How should I know whom you have killed?' He says 'Just check whether I have truly killed a man or not.' He (the king) says to his wife 'Which man has he killed? Where has he killed him?' She says 'We have buried him in our stable. I have buried the man together with him.' (20) He sends an army. He says 'Go quickly. They take him (the putative murdered man) out from the stable, while his wife is with him, and bring him back. Wrapped in a cloth, they put him in the square.' He says 'Untie it, open it so I can see who this person is, why you have killed him.' (21) They open it. They see a lamb, a sheep, made into a nice roast dish, wrapped in bread, very pleasing. When they open it, it makes a lovely, pleasant smell. The king sees this and says 'What has happened? I do not understand. What is this that has happened? Why have you done this, this thing?' (22) He says 'King, may you be well, I listened to your brother, Dahlun Dewanda. He told me a very clever thing, saying "The piles—may this pile be upon the head of the man who puts his trust in the king." I put my trust in you, that you would support me, that you would help me, when I fell into a tight spot. But you were the first to abandon<sup>183</sup> me, how could you, king? Was I not the second man in command in this kingdom? You did not even ask whom I killed? You were going to hang me without asking. (23) The second pile was the one concerning that which he said "May it be on the head of the man who tells his secrets to his wife." I told lies to my wife and said that I have killed a man. I had not killed a man. I had grilled a lamb, I had made it into a roast, filled it with onions and put it in bread. My wife tricked me in the presence of everybody before everybody else tricked me. My wife betrayed me. She came and tricked me before everybody anybody else betrayed me. You too would have hanged me. (24) The third pile, concerning which he said "May it be

on the head of a man who rejects his relatives, people of his own community, and takes on foreigners." As for this pile, I see that some of my relatives, poor people, to whom I have never offered a helping hand, they were there. These fifteen people, twenty people, wept for me. (25) All those whom I had put into a lofty position, who eat, drink and enjoy life, they all want to hang me quickly, in the presence of everybody else they want to hang me. Your brother is a more intelligent man than anybody else in this kingdom. King, may you be well, from today' he says 'I shall not work with you as a vizier. Farewell. I am leaving and going away from this kingdom.'

(26) He leaves and goes away from the kingdom. He disappears. He leaves his wife. The vizier goes. A year goes by. In the second year a drought afflicts that land, that kingdom. The king does not know what to do. The people are hungry, famine afflicts them. He does not know what to do to look after the people. 'What should we do' he says 'to get out of this problem, to get out of this difficulty?' (27) He calls his brother. His brother knows that the vizier has gone away. He says to his brother—he knows he is a clever man—'Brother, tell me something that we can do. We must find the vizier. However much I search for him, I do not find him. He used to administer all this land. Now the vizier has gone away, no brains are left. All the problems come one after the other. What should we do to cope with this matter and go about dealing with it? How can I find the vizier to plead with him and beg forgiveness from him, so that he will come back?' (28) He says 'Do you know what you should do? Call all the craftsmen in your city, in your country, those who are blacksmiths, who are shoemakers, craftsmen. Summon them all and give each one a lamb, a sheep. Give them the following challenge:<sup>184</sup> I give you a period of one month. I am weighing this lamb on the scales. The lamb is twenty kilos. After a month you should bring it back here weighing exactly twenty kilos,<sup>185</sup> no more and no less. If it is not this weight,<sup>186</sup> I shall behead you all with an axe, I shall kill you.' (29) The vizier has gone to work with a blacksmith, like an apprentice, in order to live, hiding himself away there, working. When he comes there, he sees his boss coming, with a lamb in his hands, bringing it home saying 'The king has given us a challenge,<sup>187</sup> we have a problem, for how can we keep the lamb for a month without it becoming more or less than twenty kilos?' (30) He said 'Give it to me. I shall look after it. It is not your problem,' the vizier says. During the period of

<sup>184</sup> Literally: thought.

<sup>185</sup> Literally: standing in the place twenty kilos.

<sup>186</sup> Literally: It does not stand on its place.

<sup>187</sup> Literally: question.

a month he feeds the lamb and gives it drink. Every evening he wears the skin of a wolf, he comes in with the mouth of a wolf and frightens it, after eating and drinking at the time it slept. After a month, when he puts it on the scales, it is the same. (31) Then he says to the blacksmith 'You can go safely, you can go at ease to the king. This is twenty kilos, no more, no less.' He says 'Oh, how have you managed to keep it like this?' He says 'I have kept it so.' The king weighs them all. One hundred people have taken a sheep, among all of them, some have increased (in weight) and some have diminished. They see that one lamb has remained twenty kilos. (32) He says to the blacksmith 'Whose is this?' They say 'It belongs to the blacksmith, the hammerer of iron, blacksmith'—you know don't you what it is?—He says 'My brother, how have you kept it?' He says 'I have kept it, but to be accurate I have not kept it, my apprentice has kept it. I have an apprentice worker at home. He has kept it. I do not know how he has kept it, but it has remained like this.' (33) He says 'Quick, go and bring him.' He sends an army and at once the police bring him. They bring him and they see that he is his vizier. He says 'I beg forgiveness of you,' the king says to him. 'Go and work again in your place, I have been in error.' (34) He says 'I shall not work with you again, king, may you be well. If you agree that your brother should be king and that I should be his vizier, I shall work. If you do not agree, then farewell again, I am going.' He says 'I give you this kingdom. The kingdom is all full of problems, many problems. Why is it still so? It has enemies. If they attack the kingdom across the border, they will destroy it.' He says 'I give this kingdom to my brother and to you and I am going away.' 'Don't go. Come and sit down. Come and sit down here.' (35) This story has its own meaning. I do not know what the origin of this story is, but I know that our forebears told this story.

#### A49    The Man who Wanted to Complain to God (Sophia Danielova, Arzni, Armenia)

(1) Once upon a time there was a man who had four children. Whatever he did, he was not able to make ends meet.<sup>188</sup> He says 'I shall set off to go and make a complaint to the Lord God Almighty. Yes, I shall go and complain,' he said. He goes a little, he goes a lot. The ancestors have said 'Where the sun sets, stay there, do not go further. You should get up in the morning and go.' (2) He goes and sees a man. He has fine clothes. He threw them onto a bed. They are baking bread there. He keeps saying 'Help, God, I am dying. I am hungry. I am finished.'

---

But he is afraid to lay his hand on the bread to eat it. He gathers the crumbs and eats. He says 'This man has such an illness (far be it from here).' He (the ill man) said 'My brother, where are you going?' He said 'I am going to make a complaint to God. I cannot live.' (3) He goes a little, he goes a lot and arrives at a tree. It is a tree of paradise. Whoever does not have children picks (fruit) from it and eats, then he has children. Also whoever is ill, he picks from the apple tree and eats, then his illness goes away and is eliminated—it is from God. Then he goes from there. (4) But not one (apple) was remaining on the tree. He lifted it up and it fell on the ground, but not one apple falls from it. A voice comes from it saying 'Hey, man, where are you going?' 'I am going to complain to God.' 'Tell about me also. Tell about me also. For so many years people came and picked (fruit) and not one remained. Now I have become bitter, I have become bitter.' (5) Then from there he goes a little, he goes a lot and meets a wolf, a wolf, but all of his bones are sticking out. He is asleep. Then a voice comes from God and the wolf speaks, saying 'Man, where are you going?' He said 'To God in order to complain to him.' 'Tell God also about me.' (6) He sets off from there. He goes a little. He goes to one side and sees a boy, who is so beautiful. He is (stuck) in a stone up to here on him. He is weeping. He is begging 'Lord God, either take me, take me to die, or save me so I do not suffer torment like this. Where are you going?' 'To God' 'Tell him also about me.' (7) He goes off. Lord God Almighty sends his disciple from there and told him what he<sup>189</sup> should say to this man. He sends his disciple. He comes and says 'I am God. What do you say?' 'I cannot live like this.' 'You should go from here. Under the apple-tree of paradise there is a pot of gold. There has been a theft and the apple-tree has become bitter. You should take it out and take away its life.' (8) To the man who is in the stone you should say that until the world reaches Judgement Day he must stay in the stone. He has very much disrespected<sup>190</sup> his father and mother. He has disrespected his father and mother in such a way that it cannot be spoken about. He will remain like that. (9) You will go from here,' he said 'to the man who has stripped off his clothes and is unable to stretch out his hand to bread. This is the work of the devil. Give him a slap, I don't know what, on his mouth, the accursed devil will come out of his mouth. He will get up and put on his clothes, he will eat bread. That man will be saved.' (10) He comes and reaches the wolf. Then he takes the gold coins, he takes them out and places them by the man. He says 'I am going to give an answer to the wolf.' 'Oh, my dear, why will you give an answer to the wolf? He is a wolf.' 'The mind of every man is not perfect.' (11) Then he comes

from there to the wolf. It says 'My brother, what did the Lord God Almighty say regarding me?' He says 'Come a little closer, I do not hear.' He then says 'I am your substitute, what has he said?' He says 'Come closer, I do not hear.' It goes closer. He releases his hand from his stomach. 'The Lord God Almighty has said "You should go and say to the wolf: a stupid man will meet you. You should eat him. You should get up and do that."' (12) On account of his hunger he is unable to rise from there. Then the man comes. He said to him, he went to the wolf and says 'Come closer, come closer.' He released his hand from his stomach and he (the wolf) tore it open. He ate the man. He said 'There was never a man more stupid than you. Good fortune had come into your hands. You should have left well alone and gone home to look after your family. But does one bring an answer to a wolf?' He attacked his belly and ate him. The gold coins remained for the man from whose mouth the accursed devil came out. This is a story. This is one.

#### A50     The Giant One-Eyed Demon (Sophia Danielova, Arzni, Armenia)

(1) Now, the story goes: there was once upon a time, there was nothing greater than God, there was a great demon in a cave. He has five hundred sheep. He is so strong. He brings the sheep, o čo čo čo čo čo, and puts them in the cave. He pushes a stone (over the entrance) so that the sheep do not escape. He takes to his home as many sheep as there are in this land of wretched paupers, brings them and mixes them together. The story goes he brings them back. (2) He said 'A girl is going out.' (She says) 'Oh, they have taken the sheep, they have taken them. The great demon has taken the sheep.' He takes the girl. He brings the girl forcefully and squeezes her into the cave. She sits in the cave. She delouses his beard. She speaks with him. He brings (food), he puts it down and eats. She remained there. (3) A fine young man, who was not lacking brains, said, he said 'I shall come and save you.' He said 'He (the demon) had three sons. The three of them have died.' They said to him 'After he takes the knapsack of his elder son, he could go to save her.' But they said to him 'Look, you will not save her from his hand.' He strikes a ram on the ground. He puts on the skin of the ram and puts a bell on the ram.<sup>191</sup> (4) He (the demon) keeps a close eye on the sheep and brings them in (to the cave) so that people cannot enter. He has brought the young girl,<sup>192</sup> he has kidnapped her and brought her. (Saying)

'hu-ču' he brings her in. Then he enters here (into the cave). But they said to him (the young man) 'He is a demon, a huge demon the size of three men.' Three sons (of his) have died. (5) He (the demon) comes and says 'Oh, there is a smell of a man here.' She says 'How do you know it is the smell of a man?' He says 'Yes, it is the smell of a man.' He (the young man) has hidden himself in the skin of a ram. He (the demon) says 'You will indeed not escape from my hands.' He gets up at night. When he puts a ewe on the fire for them to cook and eat, he gets up at night, he heats a skewer, and presses it into his eye, so that he can escape from there and take the girl bride away. (6) Then he (the demon) said 'You will not escape from my hands.' When he came and pushed the stone aside, he let out his sheep, one by one. He (the young man) had a bell on his neck, well he was (dressed up like) a ram. He has placed a bell on the neck of his ram. The one that is his ram comes and goes out before all the others, then when he (the young man) comes, he put himself first. Then he goes out from there before all the others. He (the demon) says 'You have ruined my house.' He has gone out. 'You will not escape from my hands, as God lives.' (7) The bride gave three sets of clothes of his (the demon), of his children, to that man, who came to rescue her, rescue her. She said 'First of all lay out the big set of clothes, and you should go and flee. He will sit and weep and weep over that, until he comes back and puts it in the house, then he will come again and reach you.' (8) She said 'Then lay out the set of clothes of his middle son. Then he will weep and weep, and tarry a long time over it. He will come back,' she said 'he will increase (the gap) a little so that he can pass in between, pass in between.' From there, the set of clothes over which he sits and weeps, he returns and comes back again there to the girl. (9) 'Then after that,' she said 'Lay out the clothes of his youngest son. He will weep a lot over that, so that you can go in between and save me and take me away, so that he cannot go through to the other side of the gap anymore.' When she lays out the clothes of the young son before him, he wept bitterly, more than I can tell. Then he (the young man) takes the girl, he comes through the gap. He (the demon) falls in the gap, he is strangled. He falls and is strangled, with the result that the community is saved from the hands of the great demon.

#### A51      The Cow and The Poor Girl (Maryam Gwirgis, Canda, Georgia)

(1) The yellow cow belonged to a poor girl. Now, she had a stepmother. She was going after that yellow cow, went after it. She (the stepmother) pretended to be ill. The stepmother said to her husband 'Whether you want to or not, slaughter this yellow cow so that I will be cured.' What could he do? 'Yes, I shall eat

the flesh and shall be cured.' But that man did not want to slaughter the cow. One way or another, however, he slaughtered it. He slaughtered it. Now, the yellow cow had said to the girl that if she slaughters me, you should gather the bones and put them in a pit, hide them. You will need them (one day). (2) Well then, they slaughtered the cow and ate it. The girl gathered the bones and threw them in a pit. Later, a time came, one way or another, in which a king, the son of a king, was searching for a bride, a bride, in order to marry a girl. Now, he searched and searched, then he came, saw this girl and he liked her. He liked her, but the other woman, her stepmother, had two other daughters, herself and two others. Now, after he came, they made merry, they held a feast. (3) Where the nobles, the noble people went, the wedding, now when they went to the wedding, the stepmother took grains of wheat and rice and I don't know what, and threw them on the ground, she scattered them, threw them before her stepdaughter. She said 'Before I come back, you must pick up each one of these by itself, this one by itself, that one by itself. If (you have not done) thus when I come back, I shall indeed give you hell.'<sup>193</sup> She, the poor creature, sat down and started crying, wailing and crying. 'How shall I gather them? What can I do about these?' (4) Then came her good fortune, so caring was she, so good was that girl, that ... came, doves came, they all gathered and said 'Do not fear, do not fear.' They said 'You go and dress, make yourself beautiful and go to the feasting, go to the party. We shall gather these.' So, she did exactly that. She remembered, she remembered that the yellow cow said they should throw its bones there, yes? She went and when she opened them up, she saw that a red horse came out, a carriage came, a fine carriage which had been made beautiful came. She sat in the carriage and went off. (5) She went off. Now, when the stepmother saw that stepdaughter of hers, and also her stepsisters (saw her), they said 'This is ..., our daughter.' She said 'No, where (could) she (get) such clothes from? Where (could) her clothes (have come) from?' She says 'She is sitting at home. She could hardly manage to gather up the wheat.' Oh, fine. She went in. (6) The son of the king went around everybody. He did not dance with anybody, but he went and danced with that girl, he went to that poor girl. He went and danced with her. He liked her. (This was) once. The second time, on the day of the second time, on that occasion he came and sees that a black horse has come, again together with a carriage. (7) Then the third day came and a white horse came, a fine white carriage came. It (the horse) took (her) and rode off. That girl, that poor girl. Her stepmother and her sisters kept saying 'Is this her?' She says 'No.' 'Is this her?' 'No.' Then they already wanted to get up

and go. The girl fled. She went out, fled, went away. (8) Yes, she went out. She managed to leave. She was in such a great hurry, that her shoe came off and fell on the stairs, on the stairs. She drove off. When the son of the king went after her, went out after her, he came and took the shoe. He took the shoe, went off and ran after her. But he did not find her. She flew away and disappeared. Yes. Then some time later, the son of the king searched the whole world, all the villages, and he said 'I shall marry whoever this shoe fits.' He went around many villages. He went around many towns. It fitted nobody. (9) At the very end he went to that poor girl. He went there. She had those two stepsisters. They—when (one) tried to force the shoe on, it did not fit. It did not fit the other. Then the neighbours said 'Where is the girl? Where is your stepsister? Bring her.' Now she, poor creature, had gone into a hut. (10) She had gone into a hut, into a cabin, but one way or another, the neighbours brought her out. They brought her out, she went and they dressed her. The shoe fitted her exactly, it fitted the poor girl. 'It fits you.' She took out the other shoe and showed it. She said 'This is mine.' (11) The son of the king took her, mounted her on his horse, in his carriage and took her home. He took her home to his father and mother. Then there was a wedding party for seven days and seven nights. This is it, the story has ended.

#### A52 A Frog Wants a Husband (Maryam Gwirgis, Canda, Georgia)

(1) Once upon a time there was a frog. The frog was ready for marriage. Every day she used to dress herself beautifully and used to go leaping, leaping, in order to find herself a husband. Then, when one day the frog dressed up beautifully and went out wandering about, a cattle-herder met her. He said 'Hey, sister frog, where are you going?' 'I am going, dancing and leaping, I am going in order to find a husband to marry.' Then he said 'Come with me, I shall marry you,' the cattle-herder said. The she said 'If you get angry, what would you beat me with?' He said 'I would beat you with this stick, OK?' 'Oh dear, what do you mean with this stick! Ashes be on your head! Manure be on your head!' She said 'I shall not marry you.' The frog went off. (2) She went off. The next day she again went out. The frog again went leaping. This time a shepherd, a shepherd met her. Then the shepherd asked, he said 'Where are you going sister frog? You are dressed so beautifully.' She said 'I am going in order to get married, leaping, leaping. I must find myself a husband to marry.' 'Oh good' he then said 'I shall marry you, sister frog.' Then she said to him 'If you marry me, shepherd, what would you hit me with?' 'What would I hit you with?' He said 'I would hit you with this stick of mine.' 'Go away! Ash be on your head,' she said 'I shall not marry you.'

\* In the original recording of the story the speaker used the word *camra* 'animal droppings' here, but subsequently corrected this to *calla*.

(3) The frog went off again. She went off again and on the third day again went out. She again went leaping, leaping. Sister frog went off and a mouse met her. The mouse said 'Sister frog, where are you going?' She said 'I am going leaping, leaping, in order to marry. I must marry, find myself a husband to marry.' 'Yes,' it said 'then I shall marry you.' Then she said 'If you marry me, what would you beat me with?' It said 'Frog, I would put this tail of mine in flour and shake it on your back.' 'Yes,' she said 'I shall marry you! I have found a husband, I shall marry you.' (4) Yes, sister frog came together with the mouse and they got married. They held a wedding, with singing, dancing, leaping, the frog and the mouse got married. They got married. Yes, time passed and the frog and the mouse had children. (They had) children, then one day it was the wedding of the son of the king. Now, New Year is approaching. Now they have nothing. What do the frog and the mouse have? What should they cook for those children? What (food) can they prepare? What can they feed them? (5) Then he said 'Don't be afraid, wife. You sit at home. It is now the wedding of the king. I shall go and gather a few little pieces and so forth and bring them back. We shall make a snack for the children and spend New Year (like that).' Yes, he went off, the mouse went off, the mouse went off. There he ate, he drank and got drunk. The accursed mouse came, stayed and went to sleep there. The frog has her eye on the road and is waiting for the mouse, but there is no sign of the mouse. She searches here, she searches there. She asks this one and asks that one, but there is no sign of the mouse. Nobody has seen him. (6) Then she goes and looks, she sees that the mouse is at the wedding of the son of the king. Then she takes the mouse and in one way or another she brought him home. Then (she said) 'Come on, get up mouse.' When he was going home, the mouse was drunk, when the frog was bringing him back, she fell into the hoof print of a buffalo, the frog fell into the hoof print of a buffalo. She fell in the mud, she fell like that there. However much she struggles, however much she struggles, the frog is unable to get out. (7) Then the mouse says to her 'Come give me your hand so I can pull it.' She says 'Go away, I am upset with you.' He keeps saying 'Come, give me your hand here and I shall pull it, sister frog.' She says 'Go away, I am upset with you.' 'If you are upset, then stay upset.' He gave a kick and buried her more in the ground. He left (the scene). The mouse came back. He came back to his children. He left the frog in the hoof print of a buffalo. Yes, the story has ended like that.

**A53 The Bird and the Fox (Maryam Gwirgis, Canda, Georgia)**

(1) Once upon a time there was a bird. Yes, the bird had young. She had made a nest, a home for herself. The young—she laid eggs and young were born. Every day, every year, every day something used to come and eat the young of the bird and go away. The poor bird would come back and see that the young were not in her home. (2) Again the next year she again laid eggs and she had young again. She came back again, again it ate (the young). She sees that the young are not there, it ate them. Oh dear, what was it? What was it that was eating them? Again in the third year the bird laid eggs and had young again. Then it still wanted to come and eat those young of hers. What do you know, it was a fox.<sup>194</sup> The fox is used to (eating) them. He comes and eats the eggs of the young of bird, poor creature. (3) Then a hunter was going after his prey. He sees that the fox is going up the tree. It is going up the tree, then the hunter hunted the fox. He said 'Let me see what he is doing.' He saw that the young are yelling and whining, the poor creatures are crying and screaming. (4) The hunter heard their voice. He went to look whether it is eating them. He takes the rifle and shoots it. He brought down the fox. He shot him and killed him. He killed the fox. Then the mother returned and sees that her young have survived that year. (5) She was so pleased with this hunter and offered him her warmest gratitude.<sup>195</sup> The bird was happy and joyful. She took her young and put them on her back. She drove them (onto her back) and flew off. She went to another kingdom. So, it turned out that she was relieved of the fox. Well, that is it. The story finished like that. But wait I'll tell you. Chaff there, wheat here. Our illness and suffering there, love and joy here. The story ends like that.

**A54 The Old Man and the Fish (Maryam Gwirgis, Canda, Georgia)**

(1) Once upon a time there was an old man. He had a hut. He had a son. He and his wife and also his son used to live in that hut. They had a cabin, a small house. Now, the old man always used to go to the sea. He used to catch fish. In this way he sustained them and they used to eat some food. Now, he went off once. He went off the second time. Then one day it happened, it happened in some way, God had mercy on him. (2) He came and he caught the red fish, then it suddenly started to speak, it started speaking a language. It said 'May I

<sup>194</sup> Literally: Do not say.

<sup>195</sup> Literally: She offered him many prayers.

be your substitute. May I be your offering,' it said to the old man, 'Do not take me. Leave me. If you are in any difficulties, come and make a request from me. Whatever you ask, I shall give you, I shall do it for you.' (3) Yes, the man felt sorry for it. He took the fish and threw it into the sea and it went off. It went off. Then he went and told his wife. He said 'This was the story about it.' His wife became angry. She starting cursing, she started jumping up and sitting down. 'Oh, why did you throw it away? Ash be on your head, manure be on your head, why did you throw it away? You should have brought it!' He said 'Well I threw it away.' 'Where can I go and find it and bring it back?' Then he says 'It said to me such-and-such.' 'Then,' she said 'Go, go. If it told you that, it will give you something.' (4) The old man went off again to there where he caught the fish. He went there. Yes, he said to it 'Fish, oh red fish, come here. I have something to say to you.' It said 'What do you want? Tell me, man, old man, good man, what do you want?' (5) He said 'This is what my wife is doing to me. She is throwing me out of the house. She is arguing. If you want or not, make this small house of mine big.' Yes. It said 'Do not fear. Go home. Your house will be huge.' Indeed the man went off and sees that his small house had become huge, it had become like the house of kings. (6) Yes, that was very good. But then his wife became discontented with that house. She said 'Well, I want a house bigger than this one. I want a house bigger than this one. I want a nice garden, full of trees, flowers and blossoms.' Oh dear, the man became again upset and sad 'What should I do? Where I should I go?' The man is already ashamed to go every day to the fish, to trouble the fish every time (and he said) 'How can I go and again make a request from it?' (7) Well, one way or another, the old man went. He went and called the fish. The fish came. He said 'I am again dying at the hands of my wife. She keeps making demands, she is not satisfied with the house. She again wants a bigger house.' 'Yes, fine. Do not be afraid,' it says 'Go, you go home. By the time you get home, your house will be already ten times bigger.' (8) Yes, the old man went and looks and indeed the house had been one (size) and the house (was now) ten times bigger (than this). The fish had done it for him. Yes, his wife was happy and joyful. She took on maidservants. She dressed beautifully and went around in a carriage, making quite a hullabaloo. Then again, again she became dissatisfied with that. 'I want that, I want this.' The man again was dying in her hands. Again, in one way or another he went. For the third time he said 'I shall go and test it.' (9) He went and said 'My wife says such-and-such.' It said 'Don't be afraid. Go. Everything will be fulfilled.' Then the old man went and sees that his house that was like (that of) a king had gone. Only that hut appeared to him, that small cabin, appeared to him, with his wife sitting there in the hut. 'Oh' he said 'Is this what you wanted? Well, you see, you were not satisfied with those palaces. Now sit again in this small hut' (10) The old man and woman

remained with the child. They again ended up in that hut and he began to live poorly. The old man again in the same way as before went to catch fish, and he came back and sustained them with those fish. Their life went by like that. This is how that husband and wife spent (their life). So, what do they say? Chaff there, flour here. Our illness and suffering there, our love and joy here for us, for you and for us.

#### A55 Two Birds Fall in Love (Maryam Gwirgis, Canda, Georgia)

(1) Once upon a time there were some birds, there was a flock of birds. Just like people the birds also used to speak and talk. There were poor ones, there were some rich ones. Now, between two birds there was a fight, their father and mother used to be always fighting. They were always fighting. They were not good together. They were always indignant with each other, those big people. (2) Now, one of them, a king, had a son, and another had a daughter. After their daughter and son grew up, the girl became big, she became a young woman, and their son became a big young man, then the time came when they met. The boy and the girl fell in love with each other. They fell in love with each other, then, when their father and mother knew that they loved each other—they were mutual enemies, those two clans—yes, they were not pleased. (3) They were not pleased, they say 'How (can it be), we are enemies for many generations, from the time of our forebears. You will not marry him.' He says 'I shall not bring his daughter into the house.' What could they do? They continued to fight, but that boy and girl loved each other, in such a way that nobody was aware of them.<sup>196</sup> They loved each other like that, they loved each like that. The boy, the son of the king, said 'If you do not become my wife, I shall kill myself.' She says 'I also will kill myself after you, if we do not marry each other.' (4) Well, what should they do now? This talk reached the ear of their father and mother. They said 'This is what they are saying.' They said 'Fine. This is what they are saying.' In one way or another they made peace. They set the date for the wedding. They said 'On such-and-such a day, on such-and-such (a date) in the month, such-and-such a month, we shall hold the wedding.' (5) Then the time of the wedding came and they held the wedding. In short<sup>197</sup> the wedding took place. When the wedding was being held 'Come, get up bride,' for the other one, his father, felt animosity towards her. Because he felt animosity,

he said 'This bride must not be the wife of my son. Kidnap her! Take her away!' (6) Yes, when the bride and groom continued with the dance, with the jig and with the drum and accordion 'Come, get up bride,' they kidnapped her. They kidnapped the bride. She went away, she disappeared, she went off. There was a great commotion, cannons were fired, horses were made to gallop, doing whatever. They ran after the kidnapper. 'Who has kidnapped the bride? Oh they have kidnapped the bride! They have kidnapped the bride. Who has kidnapped her?' What do you know, it was the enemy (accomplice) of the father of the groom. (7) In one way or another, they did such-and-such here, they struck there, fights broke out, and the like.<sup>198</sup> In one way or another, they rescued the bride. They rescued her and brought her back again. The groom brought her back. So what could the father of the groom do? He could do nothing. He said to his father and mother 'I love this bride. This is my wife. If you want it, fine. If not, I shall leave (everything) and go.' (8) They only had that single beloved son. Well his mother and father did not allow it. They say 'No, my son. We shall not let you (go) anywhere. Where will you go? What should we do? Whoever she is,<sup>199</sup> marry her and bring her.' He brought her. The in-laws made peace with one another. The father and mother of the bride, father and mother of groom made peace. Then the wedding was held with leaping, seven days and seven nights. The wedding went on for a long time. Yes, they made peace. They became pleasant and sweet with each other.

#### A56 Star-Crossed Lovers (Maryam Gwirgis, Canda, Georgia)

(1) Once upon a time there was a king. That king had a son. Yes, that son of his very much liked to go hunting. The son of the king sat on a horse, took servants with him and went off hunting. When they had gone hunting, they saw sitting on a tree a beautiful girl shining like a lantern. She was the daughter of poor folk. (2) Then the son of the king took a great fancy to the girl, who was sitting on the tree. He took a fancy to her, then she went off, the girl disappeared. Then 'No' he said to her, he said 'Come, I shall marry you.' 'No, you are the king's son and I am the child<sup>200</sup> of paupers. How can I marry you?' She said 'No, no.' (3) Since she was the daughter of paupers and he was the son of a king, they did not allow her near him. His father and mother were not pleased with her. They

said 'You are rich but she is poor.' Then the son of the king fell ill. He fell ill and he said 'Tell that girl to come, the one I love, then I will get better.' His servants went off, he sent them to the girl, the one who was poor. (4) Well, she came, she came. She was on this side of him, on that side of him, raising him up, putting him down, settling him to sleep, administering medicines for him. Nevertheless he was still ill and bed-ridden. Anyhow, in the end, the son of the king died from his grief, from his being upset that his father and his mother were not pleased with the poor girl. He died and also the girl, when he died, killed herself. She took poison and killed herself. They placed the two of them together, they buried the son of the king and the bride together. (5) Then they said 'From now on such mistakes will not be made. If a girl and a boy love each other, or do not love each other, whether they are poor or rich, or the son of a king, nobody must come between them. They must let them marry each other and be happy together.' From then onwards these things did not happen again. No father, no mother, nobody interfered again in the affairs of a girl and boy. (6) They let them get married. So this was a lesson for them, it was a lesson for that village. Then it went out to all the towns that a girl and boy who love each other must always be together and marry each other.

## B1      The Assyrians of Urmi (Yosəp bet Yosəp, Zumallan, N)

(1) They say that Tiglath Pileser brought people and settled them in Urmi. At the time that the Persians come, that group of Assyrians is still remaining, at the time that Cyrus comes, at that time they come. Years pass and we do not have any information about them. (2) Now let us come to the time of Christianity. They say that the Magi came and met Christ. They say that two of them were from Urmi. One of them was from Maraga. At that time there were Assyrians there and they say that they were Assyrians. It seems that there were still Assyrians remaining in Urmi at the time of Christ. (3) Then we come to the time when Christianity is growing. St. Thomas, when he comes to Edessa, from there he comes to Urmi. He comes to <sup>+</sup>Mušava. He comes to the lake of Urmi. They call it the ‘swarm of the seas.<sup>1</sup> If St. Thomas came to Urmi, he would not have dared to come to preach to the Zoroastrians. It is true that Christ said ‘Go and preach,’ but if there were not Assyrians in Urmi and there were only Iranians, he would have had to come and enter among the Zoroastrians to preach about Christ. But we see that he comes to Urmi and everybody welcomes him. Now those who welcomed him were Assyrians. This shows that there were Assyrians at the time of Christ in Iran, in Urmi. This is because St. Thomas—the people of Edessa, who seemed to have knowledge about the Assyrians and say to him ‘Go to Urmi, we have people (there). Do not fear. Go and preach among them.’ (4) The Assyrians of Urmi—the church of St. Mary in Urmi was a place of worship of the Zoroastrians and they take it and make it into a church. It is one of the oldest churches of Christianity. Why do they build a church there? Why do they not build one in a ... in the village of <sup>+</sup>Spurğān or in a village? Because they had a belief that the place of the church had to be clean, that for many years a fox should not have left its filth on it or that cattle must not have died there, so they could establish a church, because it is the house of God. (5) So, they came and said ‘The Zoroastrians who used to worship (in) this house before us, in the age before us—perhaps for five hundred, six hundred years there was a place for the worship of the Zoroastrians. Now the Zoroastrians have abandoned it and gone from here. We know that this is cleaner than other places, so let us establish our church here.’ Right on that place of worship of the Zoroastrians, the church of St. Mary—the first to be built in Iran was the church of St. Mary, in

which there are very ancient graves. This also is a proof that there were people in Urmi at the time of (the rise of) Christianity.

(6) We come (to the period) a thousand years later. We see that in <sup>+</sup>Spurğān, in some of the villages, there are tombstones one thousand one hundred years old. In some churches we see that they know the stone, they know that it was erected at such-and-such a time. So one thousand and one hundred years after Christ, a thousand or nine hundred years after Christ we see that there is an indication that there were Assyrian Christians in Urmi. (7) They make (people) Christians, they convert them from (being) Zoroastrians. But we see on those churches a sign of the script of the Assyrians. It is not the script of the Zoroastrians, Pahlavi. So, if it is that of the Assyrians, then an Assyrian wrote it, an ancient script. So we see in general that the Assyrian was in Urmi down to the time of the Ottoman Empire. (8) The Ottoman Empire gains control over Urmi and extends as far as Egypt. It takes possession of everything and takes control of it. It comes and does not allow the minorities to speak their own language or give their own names (to their children). The majority of Jacobites have Turkish names. They did not allow the majority of Jacobites to speak the Assyrian language, or the dialect we call *suryoyo*. They spoke in Turkish. Also in Iran they did not allow the Assyrians (to use their language). With regard to names, they changed the names of all their villages. (9) They could not speak in their language much. In their weddings they could not sing in their own language, in the Assyrian language. The majority of the wedding songs were in Turkish. So, this has a (great) effect (on their lives). The oppression (of the Assyrians) took place mostly at the time of the Ottoman Empire. During a certain period there was oppression of the Assyrians in the region of Persia, at the time of the early kings, Shapur the Second and a little later. Then the oppression stopped, because in the time of Harun al-Rashid and his son who was from ... one of his wives was from Iran. In the royal household of Harunids, the caliphs, we had doctors, we had learned men. That is, we had a very close relationship. (10) At the time of the Shapur dynasty there was oppression and again at the time of the Ottoman Empire there was oppression. But in that interval, for seven hundred, eight hundred, nine hundred years, we lived very peacefully in Iran. We lived with the Zoroastrians, but as Christians, but not always Zoroastrians. Iran became Muslim. We lived very well.

(11) When the First World War begins, the Assyrians of Urmi are afraid. Germany was allied with Turkey for it wanted to prevent the Americans, the French and the Russians gaining power. They put great pressure on the king of Iran, Reza-shah, in order that Iran also would become allied with them. Why? So that they would not allow the Russians and the Americans to manoeuvre there. (12) They knew, they came previously and saw that Iran was the place from

which help must not reach Russia. They came and immediately seized Iran and captured it. Iran was the place of the bridge by which they wanted to convey help to Russia. (13) So, it was at that time that they came and they helped the Assyrians fight. But the enemies of the Assyrians were numerous, because they were Christians, and around them all the people were Muslim. When Russia retreated, when the English were obliged to say 'We have finished with this place, we have no business (here), now let's go,' they said 'Let's go, now that Turkey has lost'—All the plain of Nineveh etc. was in the hands of the Turks—they said 'Let's go and clean up that place. We shall not allow the tribes to revolt on their own, the Arab tribes.' (14) At that time they left our nation alone. Our nation was obliged to follow the English and it went to Hamadan. Some of them remained there. Some on the way remained at Kermanshah. There were English with them who said 'We shall take you to Baquba,' and a large proportion of them entered Baquba. (15) On this journey a large number of the Assyrians perished (before reaching their destination). When they arrive in Iraq they have an argument. After they disperse, a number of the Assyrians of Hakkari do not want to hand over their weapons. Some of the Assyrians of Hakkari were with (i.e. felt allegiance to) Faisal, that is with Iraq, with the new government of Iraq, let's say they submitted to it. (16) The Assyrians of Iran remained by themselves. The Assyrians of Iran said 'We shall return.' When they returned, they came to Urmi and began slowly to rebuild it. They came and rebuilt Urmi, until the time when the Russians, who had become communist, came, sometime around the Second World War, and entered Iran. There was a movement there, let's say of the Reds, of the Russians. (17) The population of Urmi, which was mainly Turkish, said '(It belongs to) Turkey. We shall take this part of Azerbaijan from Iran. Perhaps we shall take all of Iran.' They wanted to fight with the king of Iran. The Assyrians, who were living with them in the plain of Urmi, were forced to ally with them. (18) When this also did not succeed, because the Americans helped the king of Iran and the Russians did not help the Turks of Urmi, the Assyrians again became subject to oppressions. Why? Because the Muslims portrayed themselves better and said 'Yes, we were with the Russians, but we were mistaken.' They immediately changed sides and became allied with the king. The Assyrian was oppressed. So, slowly they (the Assyrians) began to leave Urmi, because their strength diminished. (19) An Assyrian only has two children. They started not to have six, seven, eight to help them with farming, with cultivation. A Muslim used to marry three or four wives, and suddenly in a period of ten years, (the family of) a Muslim used to increase. But the Assyrians could not increase in number in this way and remain in Urmi, and keep (residence in) Urmi. They were forced to leave, because there were no jobs in Urmi. They left there. Gradually the wife was

left alone and the Muslims in the surrounding area were many. The husband began to become worried. He wrote to the wife 'Come to the town.' Afterwards (this situation developed) until (they said) 'Come to Kermanshah' or 'Come to Abadan' or 'Come to Tehran.' Gradually the community all left. They looked at each other and left. This is why they left, why the Assyrians left Urmi.

(20) Now, first, let me describe Urmi, so we know what the place is like. Urmi is divided into three parts. One part is this side of Sulduz, that is south-west of the lake, the lake of Urmi. One of them is Urmi itself. The other is the eastern north side, let's say, or the north-eastern, which is Salamas. A number of people lived in Salamas, Salamas and Gavilan, and a number lived in Urmi. A number of people lived in Sulduz. (21) Why? Because the rivers that descended from the mountains and entered the lake of Urmi—our people, since they were farmers, established villages around these rivers and lived there. There were rivers on this side of Sulduz. They came down from the mountains of Mahabad into the lake. There were rivers from the mountains of Turkey which descended into the lake. There are rivers from the mountains almost of the Ural range, those of Jilu, which descended into the lake, in the region of Salamas. (22) On the plain of Urmi at the time of the war, in 1918, we only had seventy-two Assyrian villages. Before we had more villages, but these had become small and (the Assyrians) came—because Islam increased around them, they were afraid, and came and lived in large villages. That is, there were many very small villages around, perhaps on the maps the villages of Urmi amount to one hundred and thirty or one hundred and forty villages. But in 1918 seventy-two villages remained. (23) They subsisted only on farming. In the northern region, where they lived in the mountains, they made a livelihood from sheep. They did not have many cattle, since cattle cannot live easily. Most of them had sheep and lived by milking the sheep and selling the wool of the sheep, butter, cheese and such things. But the group who were on the plain had cattle and had crops. Most of them had orchards, vineyards and apple orchards. In summer, we may say that the fruit that ripened first was apricots. They would dry the apricots and sell them, because one can easily dry an apricot. (24) After these (apricots), they would sell apples and pears, if it was necessary, if they needed to. If not, they kept them for themselves. They dried these also so they would keep for their winter—they called them <sup>+</sup>kaxə. They would cut up the apple, dry it in the sun and keep it for the winter. Now, they had grapes. They used to make grapes into raisins, they made them into blanched grapes, they made them into syrup, they made them into wine and they made hanging preserved grapes, again for winter. They had hanging grapes—that is they would conserve them in air that was slightly cool and moist. They would keep until winter. Not moist but dry, and they would keep until winter. They passed their life

in this way. (25) There were jujube fruits, walnuts, raisins. They preserved these. Their work was mainly in the summer. For five months, six months in the summer they would cultivate potatoes, onions, beetroot. Everything that they needed, that was necessary, they would gather for winter. Also for their cattle they would gather grass, they would gather hay, from the wheat that they harvested. They cut them up and (kept) the wheat for themselves and its hay for the cattle. (26) That is called 'hay'. They preserved it and together with grass they put it in barns. They kept it for winter to give to the cattle. Because they tried to keep the cattle for five months, perhaps six months, on the plain, then the other six months they would stay in the stable, so they would have food for them.

(27) The Assyrian people in Urmi before the war, indeed many years before the war, in 1830, were all Church of the East. That is they were all one church. They were the church of, the Church of the East. (Starting) from 1831 or 32, Perkins, the first missionary, comes and gradually other missionaries come. They see that there are Christians there, Christians there. They establish schools for these Christians. Gradually our people (start) to study in the schools and they are successful, until later when the First World War takes place, they abolish the schools. (28) The missionaries come from different places. They come from France, they come from England, they come from America, they come from Russia, they come from Italy, from Rome. Each one preaches to his flock, wishing to gain for themselves some of these Christians with his own particular beliefs. (29) There a division took place in the people, in the Assyrian community, who according to need went over to different churches, that is the churches became different from one another. At that time there was an argument within the Assyrian community, between one another. They attempted to conduct their argument mainly through writing. There were four or five magazines. A magazine was published in the plain of Urmi. There was printing. There were fonts. So they argued, they argued with each other in those magazines. The more their argument continued, hatred developed among one another. They began not to like one another. Perhaps this was a cause for the fact that the strength of the Assyrians diminished. (30) This was one of the reasons that the Muslims around them began to see that this community was weak, was not very strong. Before they would fear it, but now they began not to fear it. They had an influence on them in commerce. If some of the Muslims were allied to the Catholics, they purchased mainly the goods of the Catholics. A group of Muslims who were allied with the Americans, they bought vegetables, they bought wheat, they bought everything mainly from the evangelical churches, or the people who were from among the Presbyterians or Evangelicals. But this section does not relate to what you asked. I beg your pardon. But I wanted to

make this known, because it mainly had the effect that the bond of unity, the bond of working together was broken. Their life gradually began to deteriorate.

(31) In the town, in the period that there were missionaries, many of our people who had some education used to go to America to study. They would return and become doctors, they were well-off. That is during that period they were making money, their livelihood through their education. We had schools. In those schools male teachers and female teachers that were there used to teach. (32) In the market, let's say, if there was a shop for selling, buying and selling, they would mainly sell textiles, our Assyrians, or would make sewn work. There were not many in jobs involving iron. There were people who made ovens, cooking pots, tools for cooking, but these (jobs) were done by Muslims. (33) Our community, our people were mainly either tailors, tailors, doing tailoring, or were teachers, or sold textiles. We had a very small number who sold wood or sold vegetables. I am talking about only those of the town. There was also a very small number who sold cheese, tea, sugar. They had a shop, a small shop, and they used to do this job. We had very few people who had a restaurant, that is a place for serving food. We had very few people who had a lodging place, that is hotels. We did not have many since at that time in Urmî there were not many people who went and stayed for a night or two nights, for there to be a need for there to be a place (to stay). (34) There were a few places they called a travellers' lodge. This was a place where for a few hours a car or a bus would come, it would come and remain until after a few hours it would leave, or until it left the next day. A person would stay in the travellers' lodge. Before buses came out, there were carriages, there were coaches. On account of this there were not many hotels. In these travellers' lodges they built very large rooms. You would see everybody (together, as many as) seventy people asleep in one room, husband, wife, an old man, an old woman. (35) For this reason our people did not want to have a travellers' lodge because they did not like this way of earning a living. They were mainly in (the trade) of selling textiles, or we had a few in the gold business. Mostly (it was) the Jews (who) were in the gold business. They (the Assyrians) were teachers, some of them had shops, or (they were) tailors. They earned their living in this way, (that is) the people in the town. The account of the people of the villages is different.

(36) The town of Urmî is not very big. If we are talking about that time, that is in earlier years, the town of Urmî is not big. If you want to go by foot from one side of it to the other side, perhaps you could reach the other side in twenty minutes or half an hour, whatever route you take in Urmî, the town of the Urmî. (37) Our Assyrians were mainly in the northern part of Urmî, and a small number were right on the east side, which leads to the villages, that is the part, the way, the road that leads to the villages. Two rivers are on the

east side of the town of Urmi. On those rivers there are many villages. (38) The road that leads to the east side, towards Tabriz and towards those villages—we had some Assyrian people there, because they were closer to the travellers' lodges that I am talking about, because a travellers' lodge was close there and they (the villagers) would come close by there with a carriage, with a coach or with buses. So their relatives bought houses in those areas. (39) But the other group was living mainly on the northern side of the town of Urmi. This was more beautiful, that is it was the area of rich people. The upper class people of Urmi used to live there. Later, the other group, about whom I am talking, in the east, gradually stopped (living there), that is they moved to the northern area. The majority of Assyrians used to live in one place. (40) Their houses, like all the houses in Urmi, began to be built with bricks, that is baked brick. The houses were (built) with baked brick. Their courtyards were big. They had a bathroom. At that time the European type of bathrooms had not yet come (to Urmi). They had a bathroom like (that of) the Muslims. But since the Assyrians had learnt from the missionaries, their houses were more beautiful than the houses of the Muslims. They had a very beautiful bathroom, which they put on the other side of the courtyard. Although it was like that of the others, the Muslims, it was much more beautiful, since they had learnt, as I said, they had learnt from the missionaries. (41) Their houses were more beautiful. They had bedrooms. They had stoves for winter, two stoves, if their house was big, two stoves. They would gather wood. They had a storeroom, a storeroom for wood. They would bring wood from the village. They would bring hanging preserved grapes from the village. (This was) because in the village—all the people who lived in the town, either had orchards in the village or had relatives there. They brought to the town walnuts, raisins, chickpeas, everything. They used to live as high-class people. Their clothing was very beautiful. Their children who were studying in the schools were very intelligent, that is the Assyrians in the town were the foremost (members of the population), let's say ninety-eight or ninety-five out of a hundred, the first level.

## B2      Village Life (Yonan Petrus, <sup>+</sup>Mušava, N)

(1) You have asked me to tell you a few things about agriculture with regard to <sup>+</sup>Mušava, but what I want to say holds for all our villages that are in the plain of Urmi and the plain of Salamas. (2) We, in the plain of Urmi and Salamas, we had altogether a hundred and thirty-three villages, villages that were only (those) of Assyrians. We had some that were mixed with Armenians. I have all their names, yes I have their names here. (3) Now, in these villages agriculture was

all the same. It was not different. In villages that belonged to us, every house of every village had a section of a vineyard, vineyard and in his (the householder's) vineyard there are grapes, grapes for eating, and so from the grapes they used to produce raisins, and (there were) vegetables. Their livelihood was from there. They used to lay out the vegetables and take them to the town and sell them, then they would buy what they needed, and bring it back. (4) Also from the (produce of) the vineyards they would cook molasses. They used to bring the grapes in water-jugs, they used to press them and then they used to pour the must into cauldrons. They used to light a fire beneath them and cook molasses. They used to dry raisins—she is pointing to me so that I mention raisins. They used to lay out raisins on the slopes (of the rooftops) for the winter. These were food for winter. They used to make preserved grape-clusters, preserved grape-clusters. They used to hang up grapes, exactly as they were fresh (from the vineyards) in cellars—they used to have a cellar—in the dark. They used to hang them up for winter. They used to sit around an oven and used to bring some of those preserved grape-clusters. They used to take them down and serve them to guests and they would eat them. (5) They used to make wine, very good quality wine in jars. This was in all the villages, not just in our village. In all the villages of the plain of Urmi this was the custom.<sup>2</sup> We had some small villages, we had large villages but they all had this custom. (6) Now, other than vineyards they had fields, but (first) I'll say one other thing,<sup>3</sup> in the vineyards they used to make huts with wood, they used to place four supports like this, a hut, huts, so during the day girls used to sit in the huts so that there would not be any thieves (breaking) into the vineyards and so forth. Around us were Muslims. None of the Muslims had any vineyards. They had no vineyards or fruit orchards. They all belonged to us, the Assyrians and also the Armenians. There were few Armenian villages in the plain of Urmi. (7) So during the day girls would sit (there), they used to be vineyard-keepers so that thieves and so forth would not come. Birds too used to come to eat the grapes and they used to drive them away<sup>4</sup> and at night the lads used to go. I myself together with the lads did this task one year. Thieves used to come and we used to catch them and so forth. (8) Now, they used to take the vegetables, as I said, to the town and sell them. They used to buy many things, sugar or things that did not exist in the villages, and bring (them) for they were necessary, textiles and clothing, such things. At the same time they used to have fields. In the fields they used to farm wheat, they

used to farm barley. They used to harvest wheat and barley at (harvest) time in summer. In the villages there were threshing-machines. They used to take these to the threshing floors, and on the threshing-machines—they used to pull these with cattle, or oxen or asses—they used to extract the wheat from the ears of wheat. (9) They used to extract it (the wheat) and take it to a watermill, which was (in the village). In the watermill they used to grind it and make it into flour, in order to take home and bake bread. In the villages there were ovens, many ovens, deep like this, in which they used to bake bread. So they used to use a board, a rolling pin together with a dough-cushion, on which they used to put the bread, then on this they used to place it in the oven. It stayed there for four or five minutes, and baked well. (10) (It was) very fine bread. Nothing like the bread of the villages—nowhere in these places (here) will you find such fine bread. There are many things. Yes, with regard to cattle, they used to have also cattle. They used to produce yoghurt, they used to produce butter, milk, they used to have everything from the cattle. Now, in those fields other than wheat, they used to cultivate watermelons, muskmelons, different types of these fruits. (11) They used to cultivate these or if a proportion (of them) were surplus, they used to sell (them) and earn a bit of money, the others they used to eat. Many young boys and young girls used to go to these orchards and so forth, singing, telling tales and dancing. So all homes used to have (these), every house used to have a piece of land, and used to have vineyards.

(12) Now the plain of Urmi was very beautiful. I have a book (of) two American missionaries, the very first missionaries who came to the plain of Urmi. The name of one of them was Mr. Smith and the other one was Dwight. These two gentlemen came. When they came, at that time the roads had not (yet) been laid with asphalt the roads were surfaced (with sand), they had not (yet) been laid with asphalt. So there were no cars, so that people could come and go in cars, they used to travel by horses, mules and donkeys. (13) When these men arrived with their horses to the very top of the mountain, there we had a very high pass which they used to call Kučiyyə, they used to call it the Kučiyyə pass. When they arrived there, they dismounted from their horses and looked at the plain of Urmi. From there the plain of Urmi looked very beautiful. Next to the plain we have a sea. They call it the lake of Urmi, the sea of salt. (14) They saw it and write in their book, the book that they wrote to their board in Boston here in America, they say 'We have travelled to many countries of the world, we have seen many plains, we have gone to many places'—of course they speak about the people they have met, the people, such things—they say 'We have not seen a plain of such beauty. Nowhere is there a plain of such beauty. On one side of it it is all mountains, now in the middle of summer all the mountains, upon (each one of) them the mountain peak is white with snow. Below the whole plain is

green. On the other side something blue is seen, that is the sea. We would be very happy if you gave us the opportunity, if you gave us permission to stay right here, and preach in this place.' They, of course, go to meet some bishops that we had, four or five bishops. (15) They go around the villages and so forth and meet them. They also go and see all the old books that we had. They mention where they have gone, Kose, or other places where they have met Mar Abraham, Mar Joseph, Mar Elijah and Mar John—we had four bishops at that time. They have written in their book how they meet them, how warmly they receive them with love. So the plain of Urmi, I think it is one (of the most beautiful places). This is not because we ourselves were born and grew up in it. We are very sorry that we have now lost it. (16) The plain of Urmi was at one time completely Assyrian. There were no Muslims there. But at the time when Nadershah, one of the kings of Iran came—he was a very, very fanatic person, he hated the Christians more than was necessary—he took our Assyrians from the plain of Urmi and deported them to the far end of the country, Kochan, Mashhad, to those parts. From there he brought *afšars*, whom we now call <sup>+</sup>*hošarə*—we call all those people that live in the plain of Urmi who are Muslims <sup>+</sup>*hošarə*, <sup>+</sup>*hošarə* means *afšari*. (17) The last name of Nadershah was also *Afšar*. He took them and brought them there. He took away our Assyrians and reduced (their numbers) there. At one time the whole of the plain of Urmi in fact (was Assyrian). The lake there, its name is the lake of Urmi. Urmiyya itself, Urmiyya means the place of water, the nest of water, the source of water. This word Urmiyya is an Assyrian word. It belongs to our (language).

(18) The majority of the houses ... in the villages we had various houses, it depended on the people, for example, how poor he was or how rich. We had houses of two, three storeys with red brick, burnt, baked brick. We had houses—generally, the majority of the houses of a village they used to make them from ... They used to go outside the village, (where) we had sods of earth. They used to cut what we called sods, they used to cut sods. They used to bring back the sods with mud and place them on top of each other and in this way they used to build up the wall. They used to build a house with them. Now, on top of them everything was wood. They used to lay laths and beams. (19) They used to lay pillars beneath the beams, if the roof of the house was big. In winter a lot of snow used to fall. A lot of snow used to fall in winter. I myself remember, I was young and my father was old, I used to go up together with my father and every day we had to throw off the snow from the roof, every day, every day, so much snow used to fall. Now it is not like before. The roofs—as I said, the roof, they used to place a piece of wood, thick like this, from this wall to that wall. If the house was big, they used to place also a pillar underneath (coming up) from the ground up to there, so that it would not collapse. So they used to place a few

pillars<sup>5</sup> thus. Then there was a small stick. They used to cut them up. They used to chop them into small pieces. They called those laths. Yes they called those laths. They called the long piece of wood a beam. (20) They called those laths. They used to lay those sticks equal (i.e. parallel) like this, so that they fitted together like this. On those they put laths, from this side. On the laths they put dry branches of trees, which we used to call twigs, or they used to place on them (i.e. the laths) straw-mats. (21) Then on those they would pour mud, mud that was not very watery. They used to pour the mud and stamp on it. Then they used to smooth it. After it had dried, another type of mud used to be made. They used to put straw in it. They used to put straw in it, they used to stamp it very well and prepare it well. (22) They used to take it up to the roof and smear the roof with it. They used to do this in summer so that it would dry. After it dried, when it rained or snowed and so forth, water would not come down into the house.

### B3 Agriculture and Village Life (Natan Khoshaba, Zumallan, N)

(1) Rice—they used to water the ground. Then they used to drive a plough through it, so that it goes back and forth, in the water, always in the water, so that all its soil was like slush. (2) Then, after they mixed it well, they mixed the ground and it became good (for planting), it (the rice) had a seedling, which they call a rice-stalk. They used to uproot it, bring it from another place and plant it, in the field that they had ploughed, because it has become soft, both watery and muddy. The seedling takes root as soon as it is planted. You understand? This, I have seen it done like this. Well, perhaps there were other parts (to the process), but I have seen them plant it like this. (3) Formerly they ploughed, watered it well and worked it with ploughs, going back and forth. Now tractors go back and forth. They beat the soil like this ... and it is mixed well. Then they bring (the seedlings) and they plant it out. (4) They used to make this into plots, big plots. It used to have edges so that when they filled it with water, water would not be everywhere. When they fill it, there must be about twenty centimetres of water in it, like a pond. (5) Now, it used to have ditches. They used to make for it (the plot) something like walls. A plot was big, let's say one thousand metres, two thousand metres, but its sides were blocked so it would fill with water, because it (the rice) likes a lot of water. They fill it this much with water. The water cannot flow this way and that way. They used to build walls, let's say, and surround it with ditches. (6) The rice used to ripen. After it ripened, they used to harvest it with a sickle. They would harvest and place (it on the

ground) in handfuls. Then, at times they would tie the various handfuls. They made it like a sheaf (of corn). They took them and placed them on a wagon, took it and ground it on the threshing floors. You understand? They ground it so it would pour, yes so it would pour. Then they cleaned it there, they threshed it, and took it home. (7) The hay of the rice, yes, they use this too for cattle. You understand? Well, (when) they have pounded it and its plant (i.e. its grain) has poured out, its hay can be (used) for cattle.

(8) We would leave the ground fallow when we wanted it to produce good wheat. We would let it rest for a year. We would plough it three times and it would rest for a year. In the second year we would dig ditches in it. After we had ploughed it, we watered it. Before watering it, after we had sown it, we would build ditches, so that the water would not disperse and each basin in turn could absorb it. Now, in these basins we would make a connection so that the water would not fall in one place. This connection was rather short, so that it would distribute water in between and the whole section, the basin, would be watered. (9) So, some thirty or forty (basins) would be (laid) one after the other, but one ditch would bring all the water, each basin (taking water) in turn. We would make an opening and the water would run into the basin and it would be watered. We closed it and poured (the water) into another. Yes, we irrigated it all in this way. (10) Yes, at times we would irrigate it twice with water. If the rains were abundant, we would not irrigate it at all, for if we watered it a lot, it would be flattened. Then we would harvest it bunch by bunch with a sickle. We would make bunches of it into sheaves. After we made it into sheaves, we made it into stacks and gathered it into heaps. Then with carts, which we had, with carts—we used to attach oxen to them—we would transport (the produce) and bring it to the threshing floors and they would thresh it. They placed it in a ring, as they called it. (11) Then we would throw one sheaf at a time. We used to bind a stick to the middle, so we would know where the middle of the ground (of the threshing floor) was. Then we would throw one sheaf at a time, we said we threw a 'leg.' We used to scatter it, then we attached a threshing-machine to oxen, we tied it, and they walked around until they made it into hay. Its wheat grain would pour out. Then we would release them and we would gather it and make it into a pile. You would see all the straw in this way for a month, twenty days, forty days, we called it this ('straw') at that time until we made it into hay and gathered it together. Then we would go up, if there was wind, and winnowed it, the hay would go its own way, and the corn seed would fall to the side. (12) Then we gathered it into a heap. We would bring home what belonged to us. But as for what belonged to a landlord, he had to come and place a mark on it, so that we do not take from it until, when he has time to come, he divides it.

(13) A vineyard also was just like this. They used to plant it. It used to have a vine. They used to cut from this vine. They used to bring and plant it. It had roots, which it developed. Then there had to be basins. They used to plant it (the vine) almost in a basin. They looked after it for one year, two years, then it yielded grapes. Grapes, yes, if there were surplus grapes, then they would gather them and make them into blanched grapes. We had a platform. We used to smear the platform with potash. We had potash at that time. They used to make it into a concoction. They would boil the grapes in the potash (concoction). They would press down the grapes and take them out. Then they would spread them out. They would almost cook them by boiling, so they would dry quickly. They spread them out on the platform. As for the remaining tasks, they produced wine, they made raisins, they cooked molasses from the grapes. They made preserved hanging grapes. They made a lot of use out of them.

(14) Potash—there was a plant. They used to burn that plant. After it had burned, it was like a black stone. They brought some of it, broke it up and pounded it. They put it in a metal basket in water, until it dissolved. After it had dissolved, they poured it into a pan. Under the pan they lit a fire and the water boiled. We filled the metal basket with the grapes, we plunged them in the boiling water. We took them out and spread them out, for it would colour them, yellow. Yes, they used to be blanched rapidly and they quickly dried after being in that water. They became blanched grapes. Yes, this is what pertains to potash. (15) As for preserved hanging grapes, their method (of preparation was that) we brought (grapes) and separated the good ones. We spread out the preserved grapes for a few days on the platform. They would wither slightly. Then we would tie them up with—at that time we had what we call a reed, then a string, we hung them with a string in basements. They were preserved and in winter they ate them. There were raisins, which they had dried and then ate. (16) As for wine, that too was a good quality wine. They spread it (the grape must) out in order for its water to reduce. Then they squashed it and put it into pots. It remained thus for a few days then they sealed its (the pot's) mouth, until whenever they wanted to drink, they would come and open it, they would take it in a cup and drink it. (17) Well, as I said, they would pick the grapes, they would spread them out, then they would press them. They would thoroughly extract the grape pulp and bring the juice—we had large jars. We filled the jars with it. It used to remain (like that) for a few days, then we sealed their mouth. It remained until winter, when it matured, they opened it and drank from it. They took it with a cup and filled buckets with it, which they brought in and placed in the middle of a gathering (of people) and handed it around in a cup. You would drink and pass it on to another person on one side, who would drink in turn. They drew benefit from the wine.

(18) They gather the wheat into a heap, because they mark what belongs to the landlord with a stamp, so that if somebody<sup>6</sup> touches it, this seal mark is broken and he can tell that this person has stolen it. So, we guarded it day and night so that nobody would touch the mark, for the landlord would come and say that you have stolen some of the wheat. So they put a mark on it until the time that he came to divide it. In ten or twenty days, when the time came, he would come and divide it. He took half and we brought back half. (19) So we used to put a mark on it. But if it was our wheat, from our lands, we did not put a mark on it. We gathered it into a heap and took it home in the evening. If it belonged to the landlord, whenever he wished, he would come and divide it. So, they put a mark on it, so that if somebody touched it, it would indicate that you have stolen some of it. He had a man who would come in the evening and mark it and go away. In the morning he would come back and go around all of them (i.e. the piles of wheat) and see whether any seal mark had been broken. If one were broken, he would say 'You stole from this last night.'

(20) Now, every vineyard stood by itself, every vineyard stood by itself. (Let's say) I am the owner of a vineyard, I would build a booth. Now, if I were wealthy, I would build a booth with bricks, I would make it into a house for myself. But, if I do not have (money) and am not rich, I would make a booth of wood. I would go up and sit on it. I would guard the vineyard. I would see from afar where a thief had entered. I would say 'Hey, so-and-so, why are you stealing this property of mine?' Until the time the grapes ripen and we picked them and brought them home, we were there. We slept at night and sat in the day, during which time we would snooze, but at night on the whole we slept in front of them (the grapes), we slept on the booth until morning so people did not loot our vineyards and grapes.

(21) In the threshing floors, at that time, there was very little wind. Now we have made all the wheat and hay by the threshing machine. We have put them in a heap. So we are waiting for the wind to come, so we can winnow them. The wind does not come. So, when it comes, wherever we are, we run and go up onto the heap and winnow. (22) Now, Uncle Aziz, may God grant him rest, Julia, I mean, the name of his wife, Layya, brings lunch. He is winnowing, then—pardon me<sup>7</sup>—he needs to go to the toilet. He says 'This food would have been very good if it did not make you defecate.' He does not know whether to eat lunch, or go aside (to the toilet), or winnow in the wind, for the wind does not always blow. We shall never forget it, he says this aloud, while there were many people on the threshing floors.

<sup>6</sup> Literally: a hand.

<sup>7</sup> Literally: (Let it be) distant from here.

(23) Tobacco—its seed is very small. It is very small. So now (if) we plant it, we make a mound of a basin, we make it high like this. We flatten it, we beat it down. We put the seed there, we scatter it. Then we put fine animal droppings on it. Then, twice a day we water it. We sprinkle water on it with a watering-pot. We give it water for forty days. It becomes a shoot. We pour water onto it for forty days so that it will grow as a shoot. (24) Then, the ground of tobacco turns into lumps, so we break it all up with a mallet, so it will be fine. The ground is a hectare or two hectares. It all falls apart and we break it up. Then we dig it with a spade and chain.<sup>8</sup> We turn it into very small basins. OK? (25) Then we go and uproot (the tobacco) from the plots and bring it and plant it all in the basins. We plant them all. We give it three lots of water. Then we leave it for a certain time, so that it will take root. Then we water it, we hoe it. We hoe it. Now it has grown this high. If it has weeds, we weed it, yes, we weed it. (26) We have come (to the point) where the tobacco has become my height and it has sprouted leaves. We see that its leaves have ripened from the bottom. Each time we pick three leaves from the bottom of it. We go early in the morning, when it is not hot. When it is hot, it is not possible, it would droop and we cannot pick it. But early in the morning, when the sun has not risen, we go and pick, and fill pannier baskets, which we place on our back and bring home. (27) They sit and pass a needle through it,<sup>9</sup> leaf by leaf. They pass a needle through the tobacco, each leaf separately. With a needle they put it on a string. They thread it on a string. We have wooden frames, which we made and put nails on one side and the other side. The string is two metres long. We attach one end of it to this side and one end to the other side. It is full of tobacco. We fill the frames with tobacco, put it in the sun and it would dry. (28) After it has dried, we gather it in bundles and bring it and put in a storeroom. After we have put it in the storeroom, it would stay there in autumn, and the winter came. Now the job of gathering it from the field is complete. We come and dig in the storeroom a hole in a certain place and cover it in order to hang it there and to become moist, because it was dry. (29) There, in that hole, which we have dug in the ground, we hang it, and it all remains there for a night. Then it becomes soft and we bring it and put it in the house. We take off the string, one by one, in order to separate it, the red on one side, what is spoiled on another side, yellow on another side. We make it all into bundles. You understand? (30) After we thread it together in bundles. Then we have a box. We put all the bundles in the box. Then, this

---

<sup>8</sup> A *+carduvar* is a digging instrument consisting of a spade held by one man and connected to a chain or rope, which is pulled by another man (§ 15.2.8.).

<sup>9</sup> Literally: They cause it to be passed through by a needle.

box has a sack like this. In this sack it is all stacked in this box. We compress it with a press and tie the box, the sack. The tobacco remains in the sack. So all this tobacco—we have put it through a needle in this way, leaf by leaf, we have brought it and dried it. Then we separate it leaf by leaf and make a bundle. We put it into the box. We then take it from the box to the town and sell it. Tobacco involves this amount of work. One (crop of) tobacco involves twelve months of work. The task is fiddly and very taxing.

(31) We used to have animals, each person three or four. We had a stable. They had an eating place, which we made for them thus. We tied (them) up here and put food there. They ate clover and hay. So, they did not go out in winter. It was cold. They stayed in the stable all the time. We cleaned under them three times a day. We gave them food. We used to bring (water) in a bucket and give it to them to drink. Then, we had cattle (to work) the land, what we called oxen, with which we ploughed. We had dairy cattle. We milked them. They gave birth once a year. Now, we would use their milk. They used to make clarified butter. They drank milk. They produced butter from the milk. They made three or four things from the cows. A man's livelihood at that time in the villages was by cattle. There was nothing else. They acquired milk by milking, they produced butter, they produced clarified butter, which they cooked in their cooking pot. In summer, when the weather became warm, they (the cows) used to go out, they went out in the morning, and in the evening they used to come back to the stable so that (people) would milk them.

(32) As for houses, at that time we had big houses. The whole family, five people, six people—we all slept in one house. We had an oven, an oven like this. We dried the excrement of the cattle and it became dried blocks of dung. In the winter we burnt it in the oven. So, in the morning we kindled it and all the dung blocks and dung cakes became warm. The oven remained warm until the next day. We used to gather around it, pull a quilt rug over our legs and sit there. (33) So, the cold was very intense. Jugs—we had water in these jugs. We placed them in the house. We lined them up like this. In the morning we got up and saw that they were frozen. We have slept here and they are ice here, the jars have frozen. Such was the cold. We did not have much heat apart from the oven. During the day we warmed up with this and at night we would go under a quilt and sleep. The cold was very intense. In the houses, I have said, we placed water there, and in the morning we got up and saw that it has frozen. We have slept here and the water has frozen there. This is how cold it was. (34) We had a stream that came from the village. Now, this used to freeze a lot. My father—may God grant rest to your deceased and to him—the whole village came there and filled (jars) with water, now every place that froze he would break. During the day they would fill (jars) and at night it froze.

So, he broke it. Once the ice was such that the jugs did not reach the water. They let them down by ropes, filled them, and pulled them in, because every day the ice had frozen so much, we used to break it, but the next day it was frozen again. The thickness of the ice was so great. (35) It was a very difficult life. There was no food. Once there was no wheat. It was very scarce. Their food was bread made from barley or millet. Much later people went to Russia and the like and brought back money and so forth. They acquired land and sowed wheat. Gradually they progressed and wheat increased. People began (eating) wheat and did not eat barley, we may say, they did not eat millet. They only ate wheat. (36) Gradually people bought cattle. They milked them and consumed their milk, they ate their clarified butter. You understand? All these things were much later, but the years when we were very young, before our time (during the time of) those (Assyrians) who came from Russian, when the Russians came to Iran, there was great poverty, very great. There were people who did not find bread to eat. There were Muslims there near our village, we (used to have) sandals, they would make sandals from the skin of cattle, shoes. Now, when they were torn, they used to throw them onto the ash. They used to empty out the ash. We had a heap. They emptied the ash of the oven there. At night they came and found the sandals, they went and softened them and washed them, then they ate them. There was such hunger.

(37) In the village, as for what concerns the house, we had blocks of turf. With a spade we cut the turf in the form of a brick. They took some mud, they placed a turf, then placed mud, again they placed a turf, then mud. There were some who built like that. There were some who built them all with mud. They would process the mud so that it would be hard. They laid a foundation thus and would go up (with building) as far as the beams, three metres. (38) Then there were logs of wood, which we cut, brought and laid like this. We called them 'beams.' Now, there was nothing on top of them and we laid down laths. On the laths we put rushes. There were many rushes. We harvested and brought them, then laid them so that there would not be any soil. Then we put a layer of mud and pressed it down. Then we smeared it on it. We found a special soil, we found soil, we poured water (on it) and stamped it down. We made the mud hard. We called it *+maleta* (layer of mud). We took it up bucket by bucket on our shoulders. (39) We laid it there, where we have laid the rushes, onto the rushes, so it does not drop down. Those laths, those beams would hold it, but first we laid beams and then we laid laths, than we laid rushes, then we laid that layer of mud. We trod it down and processed it well so that it became like chewing gum, so that it would stick well. Then after it dried, at that point we applied mortar, in which we mixed straw. We processed it well and spread it. The straw did not allow the mud to crack. It used to hold it together. In the mortar we would mix

straw and we spread it. (40) We used to dig an oven. We (also) bought one in the city, brought it (to the village) and installed it. We stoked it from today in the morning, until tomorrow morning. We gathered together in its heat, around it we pulled a cloth over our legs, so that it would provide warmth. For us life was like this. (41) At that time we did not have two floors, unless we had them built as rooms on two floors and we would make the lower ones into, for example, storerooms. You understand? Underneath we would make a storeroom and gather things, raisins and walnuts. If we had tobacco, we would put tobacco on the beams, we strung it out, and it remained there. The house was a single unit. You would see we used to sleep ten people or twelve people in one house, all of us bedding down like that. The cold was very intense, but we were used to the weather of that season.

#### B4      Hunting (Natan Khoshaba, Zumallan, N)

(1) Quails, in the morning, before sunrise, we used to go, when the quail does not hear any sort of sound, we used to go, we had a net, a net. On this, in the middle of it, it had handles. On this in the middle of it there was a stick, which we used to attach like this. After we had attached it, we had a stick, which we had attached, and one that we had tied here from our belt. We had drawn over it a tent, coming across like this, coming across like this. If the quail saw us, it would not flee. (2) So we use to put the net there in front, and it made us resemble a buffalo, cattle. Therefore, when we made the net like this, it would think that it was, for example, cattle. We took soil and threw it on it. It (the quail) would slowly go and see where there was a place to enter to hide itself. It sees the net, which is in front, and thinks it is a thorn bush. It enters into the net. Now there are four or five, a group enters the net. They enter the net, we run and knock down the stick that we have put in front, and they remain in the net. (3) They stay in the net, which we have tied. We open it. We catch one at a time from under the net and place them in this (bag) with our hands. We catch them with our hands. Now, they are five or six, we catch them and put them here, and tie its mouth. We begin again to catch them in this way. When it gets a little lighter, or when there are sounds, it hides itself. But early in the morning, we go before sunrise, and (we find) it eating. It does not hear a sound. It is grazing in groups. But after a while, it would hear sound, and it would go and hide,<sup>10</sup> and we cannot find it. That is what there is to say about quails.

---

10 Literally: crouch.

(4) As for other animals, (we had) these rabbits. There used to be rabbits at that time. They used to go with a shotgun. They used to see a rabbit that was asleep, (see) that it was asleep in a fallow field or in a vineyard. They used to see their eyes. It is asleep. They shot it with a shotgun. But later the young folk (had) good guns, which came out (later). They would wake it up, it ran and they shot it. But when we were young, our fathers—there were not many means available—used to fill the gun with gunpowder, with cartridges. Now they did not have many and so they had to look for where it was asleep and shoot it, because, if it had got up, it would possibly run away, they would shoot the gun, but there is no more (cartridges) in the gun, they had no more than two, three or four. But later when bullets came out, the young lads would wake it up, it would run and they would shoot it. You understand? (5) But in the old days, it used to be asleep, our fathers, when we were young, did not have so many means. They made two or three cartridges of gunpowder. They saw where it was asleep, so they could shoot before it ran away. It was possible that if it got up and they shot the gun, it would not hit it. The gun would go off in vain. But afterwards, bullets became more abundant and the young lads were not concerned, they would load what we call a double-barrelled rifle, with two (barrels), if one did not hit it, the other one, boom, would hit it. But this did not exist before. They used to load gunpowder cartridges. They knocked it down with a ramrod.

(6) [GK: Were there pigs?] No, at that time, there were not any in our village. There were pigs in the mountains. Those people who had a shotgun, a powerful shotgun, would go to the mountains and shoot pigs. They would shoot one or two pigs—but not everybody, only a very few people. Now, however, there are many people who go. (7) Now, they used to go (to hunt) ducks. There was a lot of water. There were springs, from which warm water would flow. They used to set off with these—they would make a ring with string like this. They would stick in a peg here. This ring of string would come to here like this, a ring this size. Here they would scatter wheat. The duck would come at night to graze. It sticks in its beak and when it raises the string, the ring would fall on its neck. It could not fly away. The peg is here. You understand? (8) Early in the morning they would go out. You see that three or four are caught, and they take them and bring them back. They would throw down the ducks. We small children were asleep, and you would see that my father had thrown down three or four, a drake, a duck. They were fine fat ones. The hunting of ducks was like this. They used to catch them. At times they shot them with a gun, but it was better with those snares. They did not involve any expense. They made them from the hair of a horse, (from its) tail. We called them ‘snares.’ (9) They inserted a peg from this end, they used to tie it to a peg, it would come to here so long and they used to make a ring this size. In this place they scattered wheat. When it put its

beak in and raised its head, this would tighten the ring. It would tighten, and the duck would remain there. In the morning they would go and there would be four, five or ten, however many snares they had laid there. This is what there is to say about ducks.

(10) [GK: Sparrows?] Sparrows used to come into the barns, the hay. We had windows (in the barn), we have filled it (the barn) with hay for winter. It (the sparrow) comes there into the stacks of hay, both because it is warm and also because it wants to eat wheat. Now, a hundred, two hundred, have come into the barn, let's say. It has a window. We had a net. We opened the net. It (the sparrow) would come in a flock and go out. We tightened the net like this. Thirty, forty, fifty remained in the net. We took them out one at a time, and pulled off their heads, then put them aside. We would clean them, made them into a stew and eat them. They used to be tough. So, there were people who crushed them and made them into meatballs together with their bones. A meatball was like this, very substantial and tasty. Sparrows. That is what there is to say about sparrows. I have caught many sparrows.

(11) As for other birds, I have said there were some who had a gun, these people would go and shoot birds with a shotgun. There were doves, there were Jehu birds. In the fields there were pigeons. They shot them if they had a gun. They shot them, brought them back, cooked them and ate them. We had two people at that time who had a shotgun. One of them in the three months of winter, when it was very cold, had shot three hundred rabbits. He had shot three hundred rabbits. He had kept their skin and dried it. We had a pedlar, let's say a shopkeeper, in the town, whose name was Mixayøl. They used to take them (the rabbit skins) to him and he gave them money for them. He used to buy them. Then, I don't know, they used to make them into overcoats, into collars. Their skins were beautiful and warm. He would buy them. He would bring them to Jews. The Jews would buy them. They would sew overcoats, on the collars of which there was this rabbit skin. It was furry. You understand? So, there were such things in the village. We have seen them.

(12) As for fish, we used to go out with a net (to catch) fish. Fish. The river is coming from here. The river is coming from here and this place is a dead end, let's say. The water comes back to here, it is a dead end. You understand? We would come, we had a net. We slowly entered (the water) and caught it (the fish) with a net. With three or four nets and people we would enter (the water) and catch it with a net, which we put in the water. One of us would go and drive the fish from the other side with a stick. It would come and hit our legs. It would know (them). We raised the net and threw it there. We caught fish like that. Not with a hook, we fished with a net at that time. (13) In our river there were two types of fish. One type of fish we used to call white fish. One we used to call

the (fish) with a moustache, because it had a moustache. So, we had a type of white fish. This was very tasty and we used to catch them. Our river had two types of fish. We used to catch them. We caught fish in winter, we caught them in summer, and we ate them. We brought back the small fish, which we caught, many. We cut down a thorn bush in the field or the woods—a thorn bush, the thorn bushes which are like this, the small ones. My grandfather used to put the thorn bush into the oven, each branch. He used to put in two of them. The thorn bush was one metre high. In all it has many branches. He would hang them on those and put it in the oven. They became red like a tulip. (14) In the morning, when the oven is lit, after it has finished, its embers remain. He would place all (the fish) and grill them. They would all cook on that thorn bush and he would take them out. Then he would serve them and say 'Eat!' He would split the big ones like this. He would fill them with onions, mint, basil, red pepper. He would stuff them and tie them up with a string. He put them on the bottom of the oven. There were embers. They used to cook. He turned big fish over. He stuffed them all with pepper, aubergine, onions and the like. He tied them with a string. He put them in the oven. They cooked on the ash. Now, potatoes, he used to slice them all in two and stick them in the other side of the oven. He filled it (the oven) like this. They became red like a tulip. He used to take out a tray this big and place it there: 'Eat the potatoes!' We would salt them and eat them. They were very tasty. They were (like) a kebab.

### B5 Weddings and Festivals (Natan Khoshaba, Zumallan, N)

(1) In the village, at that time, when we used to reach the age of marrying,<sup>11</sup> we did not have the right to go and say to the girl 'We want to marry you.' The father and mother made a decision as to which girl they would request in marriage for us. We would not be able to make any protest. They would say 'We want to bring for you such-and-such a girl.' He (the young man) would not have been able to say 'No.' If they were satisfied, they would go and ask for her hand in marriage. They would go and take her. Then we could talk to one another, one or two times, but that was very rare. You understand? (2) So, they held the wedding. They would go, for example, to seek her hand, and when they have asked for her hand, they would have held a betrothal party. They would go with drum and pipe. They brought her (the bride) from the villages in coaches, carriages. They would go and bring him (the groom). They would hold the wedding in a

very big house. It would hold, for example, two hundred people, one hundred people, big. (3) There were storage bins of flour, large bins, boxes let's say. We young children used to climb up and sit on the bins. We used to climb up and sit on those bins, which were full of flour. Now, we children would climb up like this, twenty or thirty people. They (the others) are sitting here, (there is) so much noise, men, women, everybody. There was one man who was the master of ceremonies and one was the wedding organizer. Now, if a person wanted to make somebody dance, first he needed permission from the wedding organizer and the master of ceremonies (who would say) 'Take so-and-so to the front (onto the dance floor)', and they would take him. (4) If I, for example, am the wedding organizer, I would say to you 'Master of ceremonies, take such-and-such a young man to dance at the front.' They would take him into the gathering and he would dance. You understand? He would dance. So, whoever these two individuals wanted (to dance), they were the leaders of the wedding. Whatever they said, the people would obey them, these two individuals. They would elect them, the two individuals, (saying) 'At this wedding you make sing whoever you wish, who should dance,' they must do this job. So, life, as I have said, was very hard and money was scarce. (5) So now, they held the wedding. The husband and wife seldom slept together. They did not have enough space. In recent years, after we had grown a little,<sup>12</sup> they made a little room, and for one or two months, three months, the newlyweds<sup>13</sup> would sleep there. Then (they would sleep) again among the family, where twenty people, fifteen people were asleep in the house. Life was very backward. Food was very scarce. So, these things were (like this). We saw them. Do you understand?

(6) Easter, we held Easter for three days. At that time, on the first day, Sunday, we went to pray, at the church. We had a priest and he held the service. Then, after lunch, those that were like the dignitaries of the villages would go round, whoever has had an accident or somebody deceased, they would gather and go to his house. They would wish him a happy Easter and offer him their condolences. The first day until lunchtime they used to be in church. After lunch if there were people who had died, the senior people would go and offer their condolences. Now, ten people, fifteen people would go around, wherever there was somebody who had a family member who had passed away, died, they visited to offer their condolences. (7) On the second day, they would go and wish one another a happy Easter. Now, they kept to a sequence. The village was thirty or forty houses. Today you are in your own home, (then) in the house

<sup>12</sup> I.e. when the speaker was older.

of somebody else. You see they used to convey festival blessings for ten days, for fifteen days. Now, we young children used to go and dance the *+janiman* dance and play 'holes in the ground' on the heaps where they had thrown cattle dung, which was stamped down. We played games every day for a week, from this Sunday until the next Sunday. Now, there was a drum, they played the drum, we went to dance *+janiman*. This was what we young children did for a week. The days of Easter were three days, but we had games in the afternoon for one week. In the morning we went to work and in the afternoons we came back. We gathered there and played 'holes in the ground,' *+janiman*, one of them would sing *+janiman* beautifully, and everybody would dance and lead a jig in a circle. We had a very enjoyable festival. We had merriment.

(8) Now, as for wine, they used to gather in houses. We had good singers. They used to set up a large house and the singer would sing, (after) they have laid the spread of food. We have flour boxes. We have a large wine jar. They would fill a bucket and place the wine in the middle. They would fill a large bowl and they would give it to you, you would drink it and they would give it to him. In this way the bowl would come back, and arrive there (where it started) emptied. You would see that they used to drink seven buckets, eight buckets of wine. They used to have plenty of wine. They sang, they drank, they ate, they sang, until one or two o'clock at night. There were such things in the villages.

(9) *Dala dalpa*, this took place in the winter. It took place in the winter. It was around February. It had an (appointed) day. On that day the children used to go around and climb on the rooftops and play *Dala dalpa*. They would tie a bowl and let it in through a roof-window, they let it in through a roof-window. Now, whatever you had, whether you had raisins, or you had sweets, you would put in this (bowl) and they would pull it up. They would go round the whole village. Then afterwards, after they finished, you would see how they would light a fire on the rooftops. They would drink wine and sing. You (would see how) ten people are on this roof and ten people are on that roof. They do this in the winter, the older youngsters. The young ones, as I have said, went around the rooftops with that bowl, they let it in through the roof-window, people gave them raisins, they gave them walnuts, they gave them preserved hanging grapes. Whatever they had they would give to him in that (bowl) and he would pull it up, from this roof to that roof, going round all the roofs like this, three or four children.

(10) We had the day of (the festival of) the Bride of the Ascension. Forty days after Easter was the Bride of the Ascension. The Bride of the Ascension, we would dress up a bride, in the form of a bride, three or four people, the bride, two people, a person, the groom, followed her. We followed behind them. We gathered in your house, in his house. They used to give us eggs. Now, they

used to give us eggs, they used to give us clarified butter. (1) Then we gathered together. After she finished and we had gone around the whole village, we used to go to the huts of the vineyards. We went into the vineyards outside the town. We brought there a frying pan and the like. We lit a hearth fire and cooked an omelette, each in his own group, for example five people in this hut, five in that hut. You would see four or five huts. We sat in them, cooked and ate the eggs that we had gathered from the village. We had made the bride and gone all around from house to house. Then they used to sing there. They had good songs. Do you understand? There were such things at that time. This is what I have to tell about the Bride of the Ascension.

**B6      Events in 1946 on the Urmi Plain (Yulia Davudi, <sup>†</sup>Hassar  
+Baba-čanja, N)**

(1) I am speaking about the year forty-six in the village of <sup>†</sup>Hassar <sup>+</sup>Baba-čanja. There is a village that is (called) <sup>†</sup>Hassar in the area of Serə, not that one, but <sup>†</sup>Hassar <sup>+</sup>Baba-čanja is in the area of other villages, Čamacıyya, <sup>†</sup>Ada, <sup>†</sup>Mušava, Қarajaluy, all of these (villages) are there in that place. (2) Now, I was nine years old. Muslims came and gave guns to the village. After twenty days they came back and took the weapons, I remember as if it is before my eyes. My father did not know that they were gathering up the guns, but they came upon him and took his gun. They took his gun. He had a pistol, a small pistol, they also took that from him. They took him out, they took him away to the village of <sup>†</sup>Baba-čanja, because my father had previously looked after the inhabitants of <sup>†</sup>Baba-čanja. He had not allowed the Kurds to oppress them, oppress them and rob them. He thought they were his friends. (3) But at that time the Muslims turned out to be treacherous against him. They took him away and took all of our property. It was winter. Autumn had recently finished.<sup>14</sup> They took everything, but they put our pigs into the oven. They took all the rest of our property. For one month they removed things from the village of <sup>†</sup>Hassar. (4) Then we were in the village of the Muslims. There they took my father outside. They said to my mother 'Go and bring two hundred *tumans* of money, and we shall not kill your husband.' My mother went off into the village of the Muslims, but she could not find anybody who would give her two hundred *tumans*. They sent her away and she went. I took my brother and sister from them and I followed my father

---

14 Literally: It was recently autumn.

in the snow. My mother came back and my father said to them 'I know you will kill me. Kill me quickly, because I do not want to see you.' He asked for a cigarette and they gave him a cigarette. He smoked it. He said 'Now shoot me. I do not want to see you.' Because they were all his friends, all from the village, from the villages, they were all neighbours. (5) He said 'Shoot me!' Then my mother came back. She started screaming and beating her head 'Don't kill my husband. I have young children.' She threw the children in front of them. They kicked in the stomach my two-year-old sister and my four-year-old brother, and they died. They struck my father here and he fell. They mounted horses and went away. Then we stayed there, beating our head, taking blood and smearing it on our head, my mother screaming, we ..., but my father was still breathing. (6) Just at that moment a horse came. A horse came and my mother ran and threw herself down and said 'Kill also me. Kill me.' Then that man threw himself down and did not let the horse crush, trample my mother. Then other Muslims dismounted and said (to him) 'Come and drink tea.' He said—excuse me—he swore. He said 'I do not want to drink your tea. I cannot leave this family in this way! I do not want your tea.' He took us and put us in a place, covered slightly like this, the place where they keep the filth and the like of cattle. He put us there. He put us there. They took my father away to the bank of the stream. They laid him there and put some earth over him. (7) After two days they came and said to my mother, they came and said to my mother 'Your husband—they have removed the earth and crows are eating him, they are eating him.' A Muslim had gone and taken gold teeth from his mouth and left him exposed. Crows were coming and eating him. Then people all hid themselves so that they would not kill them. But my uncle, the brother of my mother, and the husband of my aunt came and took my father and put him in a carriage. A carriage is a coach, a carriage. They put him in it and they took us to the village of the family of my grandfather, Karajaluy. There, they buried my father in the church there and we remained in the house of the family of my grandfather. I remember what happened up to then. (8) After that we grew up. They put me in a convent. I remained for two years in a convent. They put my brother in a house of (French Catholic) missionaries, of priests. (This was) in order for us to stay there. Then they returned again to the village. The people of the village all returned to the village. But it was all made ... there was smoke in it, there were cattle in it. They cleaned it all and put it in order. After that they took everything, our properties, vineyards, gardens, they took them all. But beforehand all our cultivable land was cultivated. (9) The family of my father and mother had come from Russia. They had brought many things with them, a lot of money. They had brought everything from Russia. But they took everything. Then my mother became a widow, without a husband. The husband of my aunt invited her to Tehran, and

her father and mother invited her to Tehran. They took them to Tehran. Now,<sup>15</sup> I married Behnam, my husband. I married him and (joined the family of) my father-in-law Rabi Šavul.

### B7      Village Life (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) [GK: Let's start with the churn.] The churn was in the village. We put in it yoghurt and tied its mouth with the stomach of cattle. We had made it attractive. We used to call it a <sup>+</sup>*kramta* ('stopper'). We put the stopper on the mouth of the churn. We put yoghurt in it and tied it. At the top there was a hole so that air could come out. We put in yoghurt, we put water in it, and we began to churn. We brought it (forward). We pushed it away and we brought it forward to and fro. Under it there was a stand,<sup>16</sup> made of wood, low at the bottom and high at the top, so the churn would go down and up. A woman or a man would sit in order to churn it. He would put a cloth under it and kept churning the churn. Perhaps it took half an hour until the butter was produced. When we opened it, we saw whether it needed water, or did not need water. Perhaps it was necessary to put water into it. So, then we opened its mouth and we emptied it into big vessels, a saucepan. (2) A saucepan (<sup>+</sup>*kazanča*) is made of metal (and is) black. We put it on the oven and we heated water in it. We emptied the contents of the churn into the saucepan. We took off all of its butter from the surface. The buttermilk remained. We made the buttermilk into *jajəc*. We put the *jajəc* into the saucepan. We put it in the saucepan. We put a little salt in it. We put it on the oven, as I said, the oven, and we lit it, its length, its depth was one metre twenty centimetres, and perhaps its width was also a metre, or more. We would light it and put it on this. It would boil. We put it in a bag and it became *jajəc*. (3) This *jajəc*, when its water has evaporated, we make like ... it becomes cheese. We had herbs for it. We put in basil. We had onions, butter, which we put in them, in the *jajəc*, for breakfast. Butter, *jajəc*, cheese, cream (*jira*), we took the cream (*jira*) from the top of the milk. Early in the morning, before we warmed the milk, we took the cream from the top if it. When we heated the milk and it cooled, the top of it became a skin, we called it *kurrušta* (skin). The milk would become slightly warm, not very warm. We put in a spoon and stirred it, so that the milk would become yoghurt, in pots. We had pots (*kadalə*), we called them enamel pots, like the saucepan I showed you,

enamel, which did not absorb water. There were pots. We put the milk in these and it would become yoghurt. So our breakfast consisted of these. (4) We had chickens. They laid eggs. A rooster. A rooster. We had a rooster for the chickens. Here, the chickens here produce eggs without a rooster. We had a rooster for them. It used to crow and looked after the chickens. We had a lot of eggs. We did not have a refrigerator in the village, we put them in salt. Churning pot, we had churning pots, we put salt also in those. We put many things in them, like pots, such as wine, which we put in them. So, we put the eggs in salt, because so long as they remain in salt the eggs would not go off. You could perhaps keep it in salt for one year, in sea salt, we had a sea by us in Urmī. We had a sea, it had salt, white, big like this. So we kept it in that. (5) As for meat, when people came, meat would be slaughtered. We did not have shops. When meat was slaughtered, we took a lot and we fried the meat. We fried it, we boiled it and it cooked, we put clarified butter on it, salt on it, and put it in pots. When we wanted to cook anything, we dug out some of the cooked meat fat, its name was *kalya*, we took it out, we put it in a saucepan and we cooked. We cooked stew, they call it *yaxni* (stew), soup. They call it *yaxni*, which is made of meat, potatoes, chickpeas, which we used to put in it, aubergines. All these came from our own crops, from the village, only meat came from outside. (6) From time to time we slaughtered one of our cattle, from time to time we slaughtered our chickens. So meat (was cooked in) a saucepan with meat fat. The meat fat was produced thus. We preserved everything. In winter we put everything outside in the snow. My father used to slaughter pigs and hang them outside. He used to hang them and go every morning and cut from them and bring back pig fat, he made <sup>+xvisa</sup> (bread fried in fat), <sup>+xvisa</sup>, with bread. (7) Then we had what we call a <sup>+kulina</sup> (storage box). A <sup>+kulina</sup> (storage box) was this type,<sup>17</sup> long, but it (extended) upwards, it was two metres high. One of its sides, one of its compartments, of the storage box, was for flour. You would pull it from below and flour would come out, but you would put it in from the top. One side was for wheat. (There is a) pantry (<sup>+dalapča</sup>), as they call it. A pantry is the door that you open where we used to put bread. (8) We used to bake our own bread, very fine flat breads (<sup>+lavaša</sup>). We had dough, we used to knead ourselves. They were made with water, flour, and perhaps we made some with milk, which we would call <sup>+patirə</sup>. But (when made) without milk we called it bread, flat bread (<sup>+lavaša</sup>). We put in it water, flour, salt, <sup>+bulču</sup> (leavening dough). <sup>+bulču</sup> is (like) yeast, but we fermented it ourselves, from the flour, from one dough to another dough. (9) We buried a ball of dough, a ball of dough in flour and

---

until the next time it would be there hissing and ready. So when we wanted to use flour, again to make dough, we put the flour on the side. But we had a very big vat, a vat. The leaven was in water, we made it into dough, we mixed it, we made it into dough. It took perhaps two hours before the dough matured, before the dough rose, before it matured. After that we lay out balls of dough. We would light the oven. (10) How was our oven kindled? We had a vineyard, a vine, grapes. They would cut them all down, we would gather them, tie them into bundles, and bring them back to the storeroom for winter. The cattle—excuse me—when they made their filth, we would clean away the filth in the stables and put it in a basket. We took it on our back and threw it down outside. We stamped it down, it was hard as the ground. (11) Then men would cut it with a spade. Men would cut it very big, from here to there, as big as that. Dung cakes (*camrə*) as big as that. We call these *camrə* (dung cakes). These—men would cut the dung heap (*sulta*), its name is *sulta*. They dug it like this, cut it and made it like this, so that the sun would enter under them, so that they would dry. When they had dried, we brought them inside for the winter, for the oven. (11) Excuse me again—we took out the filth of cattle to another place and put water in it. We made something like mud, we processed it with our legs into mud and kneaded it with our hands, long like this. The name of these is dung cakes, *+paṭuxə*. These were large dung cakes, but the others were a little thinner. (12) I say to my brother,<sup>18</sup> we used to gather wood, bark strips (*+ṭalašyata*). Bark strips are (from) a tree, you take its bark, we called them *+ṭalašyata*. We put these in the dung cakes, and with the wood of the vine, with the long dung cake (*+paṭuxta*), long dung cakes, we lit the oven. The oven had a long airhole. They put the airhole in the oven under the ground. They make an airhole. They place a thick piece of wood and they build (the oven). Then, after it (the structure of the oven) dries, they take out the wood. Here is the oven and here is the airhole, which you close for the fire to remain good. But when you are newly kindling it, you have to adjust it, so the air enters the oven and so the fire burns. They call this an airhole, the airhole of the oven. We had a cloth which we had prepared for us to stuff into the hole so that the oven did not take in (air). But when we were newly kindling it, we had to take it away. We had a *tandurta*, a small oven, for us to cook in every day.

(13) We had a house, we said 'room (for) guests,' winter house. The winter house had the oven in it. In the guest room we had a stove. We put wood in the stove. We put long dung cakes in it. We put small dung cakes in it. We cooked on it. We had a hot plate. This (word) hot plate (*pliṭa*) is Russian, I am sure, because

my father's family brought them. They laid a hot plate and cooked on that. (14) I say to my brother, we had vegetable garden plots (*cardiyə*).<sup>19</sup> Plots, that is for the cultivation of herbs, basil, aubergines, peppers, spinach, many things, beetroot, cabbage. We cultivated all of these in our own vegetable garden. They were needed for winter, when we needed to cook with them. Many things, herbs. Our herbs were parsley, we call it *jafari*, (the word) *jafari* is Persian, coriander, leek. We had all of these. We used to make *dolma*. We chopped it finely, we put rice in it, meat and we made *dolma*. We made *dolma* with cabbage and other things. So life was very good. (15) We preserved as pickles the basil, peppers, aubergines. We filled jars with pickles. As for the grapes that we had in the vineyard, we brought back the grapes and crushed them. From their juice we made grape molasses. We cooked grape molasses, very well. Its colour was white like butter. We added soil, we had a (special type) of soil, which they brought from Gawilan. We would dig the soil from the ground and put it in the grape juice, for that you would get up in the morning and add the soil. (16) People would climb up the grape-press. Its name was *čaraz*. They made it like this. It had a hole. When they did like this, the grape juice flowed down from the grape-press into a cauldron. You would take this in buckets and put it in the pot, with the soil. Then you stirred it and they mixed the grape juice together with the soil. Scum would come out (of the juice). In the morning you would get up, you had to take it off early in the morning. All the mud and dirt had come out onto the surface. You would see, however, that the grape juice was juice fit for drinking, pure. You had to strain it. We would put the mud in a sack. Its juice would flow down again. We cooked this, but its juice flowed by itself. That grape juice was very pure and fine. We used to make grape molasses (like that). From that grape juice we used to make wine. From that grape juice we used to make vinegar, vinegar, which we put on the pickles. The pickles were very tasty.

(17) I say to my brother, soap, I have said to you now, we used to make our own soap. We would put soda on bones. When you put soda on bones, on something, it melts it all and makes it like water. You put it on the oven and cook it. You put it on the surface of water and it comes out like fat, fat, oil, which you put on the surface of water and it stays. Then we would cut it into big blocks, as we called them, blocks of soap. We laid it up so that it would all dry. But we would take blocks from it. We had soap for perhaps ten years. We used to wash clothes with it. (18) We brought water from a stream. We did not have water from pipes. We had to go and bring it from the stream. The stream was perhaps five hundred

metres away. It came from a group of villages, from our villages, it came from Xanišan, also from Karajalu, <sup>+</sup>Babajan, it entered our village, then it went down to <sup>+</sup>Spurğān, Xanišan, Yanjija. It was all the same stream. You know what a stream is? A river, but this is a part (flowing) from a river. It comes to villages so that people can irrigate their crops with it. (19) For example, if you wanted to irrigate your field, or irrigate your vineyard, or your kitchen garden—we used to cultivate a kitchen garden—you would irrigate them from that stream. You would take (water), take it (for your land), I would take it and bring it (to my land). Other people would all take from this stream and irrigate (their land). It is called the stream of <sup>+</sup>Spurğān, because this stream goes to <sup>+</sup>Spurğān. There were fish in it. (20) We used to cultivate a kitchen garden, as I have just said, we cultivated a kitchen garden. There were watermelons in it, very fine round watermelons. We had a seed, the <sup>+</sup>şaddu seed. It was a white and black seed, which was called <sup>+</sup>şaddu. It was round. We had long ones, which were what were called *xonə*. One type of long watermelon we called *xonə*. We had musk melons (*başılı*), first these were a small green musk melon (*cəndura*). We used to put them under the ground in the soil, we put soil over it. You would see that (when) they all came out they have become musk melons (*başılı*). They call these *başılı*. You put the green musk melon (*cəndura*) under the soil and it comes out from under the soil. You pick it and it is a musk melon (*basılı*). Also large musk melons (*şallakə*), green in colour, long like this, very sweet, called *şallak*. Cucumbers, green musk melons, these came from the kitchen gardens.

## B8      Weddings (Yulia Davudi, <sup>+</sup>Hassar <sup>+</sup>Baba-čanja, N)

(1) A boy and a girl would fall in love with one another and see one another. Beforehand, however, the father and mother would say, for example, ‘The daughters of so-and-so are good,’ for example ‘the daughters of Geoffrey are very good, Geoffrey is a very fine man. His wife is good.’ So we would bring their daughter for our son. The father and mother would tell this to their son and their son would see the girl, would go to see the girl. They would go and ask for her hand. (2) The father and mother would go to make the marriage request. The boy would say to the girl ‘I shall send my father and mother to make a marriage request, to come and ask for your hand from your father and mother. If they (agree to) give you away, I shall marry you.’ They go to make the marriage request. They go and enter a house: ‘Hello! Greetings! How are you? Please sit down! Please sit down!’ (3) They sit down. They bring tea. ‘What will you drink?’ They say ‘We shall not drink anything and we shall not eat anything until we tell you our request.’ ‘What is your request?’ ‘We have come (because)

our son has entered your door and seen a flower. That flower is in your garden. We want to pick it and bring it to our garden.' (4) Then they eventually agree. They say 'Good, we have relatives, whom we have to summon (to consult).' They summon the father, mother, paternal aunt, maternal uncle, everybody, there to the house in order to consult them. They come and they ask the father. The father defers to the mother. He says 'The mother has brought her up. I must ask her mother, because her mother has brought her up.' Her mother says 'I agree. I shall make her a bunch of flowers which I shall put on the chest of the boy.' (5) But they know who the boy is. They know whose son he is. They are pleased to give their daughter (to him). Then they ask the paternal aunt of the boy and she says 'This is her aunt, she has a right to know also.' Her paternal aunt gives the floor to her husband, to her aunt, to her brother, to her maternal uncle. The whole group is thus sitting down. When the betrothal takes place, they invite everybody. They give them the news, then they ask everybody and they all agree. They applaud since the betrothal has taken place. (6) After a while they go to a betrothal party, betrothal party, the girl holds a betrothal party, the betrothal party is (the responsibility) of the girl. They hold a betrothal party, food, bread, tea, drink, they serve everything. The girl invites people to the betrothal party to her house. They eat, they drink, they dance, they jig. (7) The betrothal party finishes and they fix the time of the wedding—the wedding is (the responsibility) of the boy. Sometimes they request him to make a big wedding. Sometimes they request him to make a small wedding. If they request a big one, a big wedding, a big wedding means that they invite many people. A small wedding means that they invite, for example, thirty or forty people or so. (8) The time of the wedding arrives. In the villages they slaughter cattle. When they slaughter cattle early in the morning, they play drum and pipe music on the roofs so that people hear and get up. They call this (music) *sar-<sup>+</sup>subay*,<sup>20</sup> *sar-<sup>+</sup>subay*, they play the drum on the roofs and the whole village gets up. (9) They take cattle to slaughter. All the people gather. They slaughter the cattle and holding hands they begin to dance and jig. They cook the cattle. Then they invite people and they all come to the wedding from the villages nearby. If it is in a village, everybody knows each other and they come to the wedding from the villages nearby. They slaughter a large head of cattle, they cook rice, they serve pickles, wine, arak, everything and they eat, drink, dance, jig. They hold the wedding for seven days and seven nights, with drum and pipe, seven days and seven nights they would hold the wedding for their son. (10) Then people come there and give wedding gifts. Their wedding gift was money, that is a

hundred *tumans*—there were *tumans*—or two hundred *tumans*. There were not dinars. The dinar was used elsewhere,<sup>21</sup> the *tuman* (was the currency) for Iran. They gave a wedding gift of two hundred *tumans*, one hundred *tumans*, three hundred *tumans* to the boy, to help him. (11) Well, everybody then goes away. He also goes (to live) in the house of his father, the house of his mother, while beginning to go out to work in the vineyards and estates, but he lived with his father and mother. The bride had to obey his father and mother.

### B9 Games (Alice bet-Yosəp, Zumallan, N)

(1) I want to tell the names of some of the games that we played during our childhood in the villages. Their names are as follows. (2) I shall talk about the first one—you have reminded me of it—, *banoša*. (In the game) *banoša* there were two teams—boys and girls, we used always to play mixed—one team of which stands to this side and one team—they stood several metres of ground from one another. Then one (girl) from among them comes out, who is the head of the team, the leader of the team. She says this line ‘the rosebud will drop from me’.<sup>22</sup> Of course Turkish has become mixed into our speech. ‘The rosebud will drop from me’,<sup>23</sup> who will remain from us and from you? Then one would run from among these ones and one from those. They would select who should run. For example on this side the strong ones would select the strongest one to go and fetch the weaker one from the other side. (3) Then this one would run and go and cut through the hands of the others—they have held their hands together. He must run and go and strike in between their hands. Then when he breaks through their hands,<sup>24</sup> he takes and brings back whomsoever he wants from among them, and they would increase, their number would increase. This was one of our games. When they, that team, finish,<sup>25</sup> there is a victory by<sup>26</sup> this side—it has beaten the other side.

(4) Another one was *tabyuldašən*, again the name is Turkish, *tabyuldašən*. Everyone would choose his male friend or female friend, as I said we had boys and girls mixed together. They would hold hands but only one pair. They would

<sup>21</sup> Literally: on this side (i.e. in Iraq).

<sup>22</sup> This can be interpreted as a slightly altered version of the Azeri sentence: bənovşə bəndən düşə (Elisabetta Ragagnin, personal communication).

<sup>23</sup> Apparently a rhyming variant of the previous Azeri sentence.

<sup>24</sup> Literally: their hand.

<sup>25</sup> I.e. they run out of members.

<sup>26</sup> Literally: between.

(then) run after all the others, but they were running freely, only these ones are holding hands, who would beat the back of any friend that they caught, not very hard, but they used to hit him like this until his friend would arrive and release him, or, I mean,<sup>27</sup> he would rescue him from being hit. This was one type (of game).

(5) We had *dala dalpe* in October—here when they do ‘trick or treat,’ we used to do (it) there. It seems that this was ours, of the Assyrians—because (when) it was autumn, all the harvest was gathered into the houses, the storerooms were all full of raisins, walnuts, almonds, everything. So we boys and girls, the children, used to go—this game was on the roofs—from the roof we used to pass down a rope. We had tied a basket, a small basket, a small basket with a handle, onto that rope. We used to pass it through the window. The people of the house would all have been sitting around the oven. Well, it is winter and the cold has started, the oven (is lit). So they—the elderly woman of the house would get up, she would give and place in that basket whatever there was. These were jujube fruits, raisins, walnuts. She would place (them) in the small basket, and we would pull it (the rope). We would go around the entire village, roof by roof. It was not just us, there were many different groups. For example our group would have been six people, another group ten individuals, like this. All we children of the village that night were busy with this. It used to take place in autumn. Well I do not know whether it was the thirty-first of October, as they (here) do it, this I do not know. These (children here) do ‘trick or treat’ and gather things.

(6) There was another game which was Weaver of Holes. We would all hold hands. Again one of them would enter into the middle, who would call out to whomsoever he wanted. He would run and would go in through these holes until he catches him, the one whom he has selected to run after, until he catches him. Then everyone would have a turn.<sup>28</sup> Some would not have a turn. The name of this was Weaver of Holes.

(7) We had another one which was very similar to baseball, which the Americans and the English play, to baseball. We used to call it *+yazan* ('circle'), *+yazan* we called it, in which there are two sides, one of them throws the ball and the other one hits it with a stick. When he hits it far, the one who is standing here, he would run. They have placed bases, bases. It was very similar to baseball. This one—I think those coming from Baghdad, whom we had (in Urmi), had learned it from the English and they had taught it to us, and it had remained since then, I think so.

<sup>27</sup> Literally: for example.

<sup>28</sup> Literally: The turn would come to everybody.

(8) 'á̄tvalan šák̄ka pàlla| kát xá pállea súr̄eva 'á̄txa| késa kàrya,| xá késa +yaríxa p̄-idan dok̄àxvala.| +'ávun b-+rappàxvaləl kùya maxáxvaləl b-dó késa,| b-késa +jùra bət-maxáxva +al-késa sùra.| cmá-t ráxka 'azàlva| b-+pasulyátə ci-banàxvalun.| 'á̄xnan xà-axča +pasulyáy vádlan,| ó xína p̄t-atíva| ó xína har-á̄txa.| 'íta 'án +pasulyátəl cmá 'á̄xnan bùš +rába ráxka mòxyux| 'á̄xnan +karmànəx.| bás b-dà +pásla.

(8) We had *šakka palla* which consisted of a small stick like this, a short piece of wood, and we held a long piece of wood in our hands. We would throw it and strike it hard with the piece of wood, we would strike the small piece of wood with the big piece of wood. We would count how far it went with steps. We made so many steps, then the other one would come, and the other one (did) just the same. So we would be the winners when we hit it the furthest (as shown by) the (measurement by) steps. (We played) just in this way.

(9) *Dæcca dæcci*—(this was played in the winter) on the oven, (when) we were not able to go out, a lot of snow had settled and the roads were blocked, so we had to play at home, we had no choice. The whole family would sit—they had taught us (this game) to keep us busy. One of them would bend down as they were sitting on the oven. The others would bang on his back. They would say: 'Stamp, stamp of a weight, their hands<sup>29</sup> are manly, red<sup>30</sup> apple knot, apricot under the trunk,<sup>31</sup> whose hand is under the knot?' Now we we all put our hands like this, yes, we put them like this. The one who is bending down must know whose hand is the one that is below. Then when he does not know, he would again stay there, they would again bang on his back, until he knows whose is the hand that is put down first, on top of which all the other hands are criss-crossed. This was one type (of game).

(10) We had 'base' which was at the time of fruit kernels. The boys used to play this game a lot. They used to make a small hole beneath a wall then they would throw kernels like this. Some would fall into the base, some would fall around (the base). They would count only those in the base. These they have won for themselves. Then another one would come, then another one. They would throw kernels into the base like this.

(11) 'Gate gate'—now it was like this, two boys and girls hold hands, the others pass under their hands, and quickly another (couple) after them, and likewise they pass under their hands, and come out over there. They have all made<sup>32</sup> gates. For example, give me your hand Joseph. We all have held (hands) like this. Now, for example, ten couples, we have held hands. You and your girlfriend would go under here and stand at the end. Then the other one would pass under, then the other one would pass under. In this way they block their passage. Suddenly, now Joseph and I have held our hands, you are coming together with your girlfriend to pass. We know, for example, you are a good singer. We lower this (gate) and do not let you pass. They say 'What is his fine?

<sup>29</sup> The word is apparently based on Azer. *əl* 'hand'.

<sup>30</sup> *+lala* seems to be an abbreviation of *+halala* 'tulip'.

<sup>31</sup> *xuda canda* are artificial forms made up for the rhyme.

<sup>32</sup> Literally: held.

What must he do for us to allow them to pass and go?' They say 'A song.' So he would sing. Now one of this couple must sing in order to pass from here. He sang and finished. This was our amusement. 'So come, pass through and go!' (12) There were also old people who played this, not very old, but those who were married with children. For example, I remember our parents played this. Now, its beauty was this, they used to play it at festivals. We used to observe Easter and Christmas in our community very strictly, that is very seriously. It used to last maybe a week, both Christmas and Easter. Now the villages are not very far from each other. There was a time when they would go from this village to that in the 'gate' game, singing all the time. They would go and then come back, again in the evening they would return. This was our game.

#### B10 Village Life (Alice bet-Yosəp, Zumallan, N)

(1) Winter approaches in autumn, October. For example in October they bring everything in, fruit, fruit. Now as for the grapes, they used to thread them all on a rope and hang them in a basement. We had basements like storerooms. We had raisins, several types of raisins. The big grapes, like this, we used to call *jabušta*. Some of them would become dry while still in a bunch (on the vine). I do not know why it was so, they were nicer (like that). You would put it on your plate while in a bunch, so you would pick it while still in a bunch. They would not pull them apart. (2) Our fruits included raisins, jujube fruits, and there were many pears and quinces. They would likewise thread them on ropes and hang them up. They used to last for two months, almost three months, like that, they remained in the storeroom. These things were the produce that we had. We used to cook grape molasses. We crushed the grapes. We cooked tomatoes and made a preserve. The syrup that I am talking about, the molasses of Urmi, we cooked with crushed grapes. We cooked many preserves, from fruits, quinces, apricots, peaches. We cooked preserves from them. We cooked it with sugar. We put fruits into the sugar and they became like honey. When their liquid became thicker, we would take them (off the heat). We cooked many of these preserves. I remember we often cooked this with grape molasses. We did not use sugar much. (3) There were pickles. We made various different types. We made many mixed. In one type we filled peppers, we filled them with herbs. We filled the middle of the pepper, which was empty. We had Jerusalem artichokes. Jerusalem artichokes—we have its plant in the garden. A little later, if we take it out, under it there are artichokes. We called it 'earth apples,' its name was 'earth apple,' but it should be 'earth potato,' something like that. These too (are put) in pickles. (4) Fried meat and meat, now fried meat was very well known. This

was found in all houses. That is, every family had to make for itself fried meat, because it was winter and snow used to cut off every place. The slaughterers of cattle did not come much, but we had one, we would bring a man from afar who would slaughter the cattle in the village and they used to divide it, that is everybody used to buy it. Everybody used to become aware that at one side of the village cattle had been slaughtered, then people would go and buy. Now, that happened rarely in winter. So, what should they do? Everybody had in their stables their animals and cattle, in particular a calf, which they would mark, they used to mark already in spring that we would make that one into fried meat this year. So they took greater care of it, they fattened it, fed it and in autumn they slaughtered it. (5) They slaughtered it and fried all its meat in oil (and put it) in pots. There we did not have refrigerators. But in autumn, the cold comes and all the storerooms are cold. There was fried meat, there was yoghurt, there were pickles, there was cheese. We had to make cheese in the season of June, in the month of June, since at that time there is a lot of sheep's milk. They make it with sheep's milk. They would, likewise, bring it and sell it. We (our family) ourselves did not make cheese. Rather we had to buy it and bury it in pots in the ground so that it kept until winter. We called this 'buried cheese.' We have it even now. What was (there in the village), now here we all make it. Yes, cheese. We had a lot of cheese in the winter. All of our feasts involved cheese, pickles, arak, wine. These were at weddings etc. (6) Logs of wood, yes. We used to gather the logs of wood, chop them up and arrange them all for the stove. There was the long dung cake, again we would gather it from the field. There was the small dung cake. Everybody every day would go out and put the filth that his animal had made in a particular place. Throughout the summer this place has been trodden down making it hard. Then in autumn they cut it into blocks. They would cut it, arrange it, and it would dry. They would then bring them into barns. We had a covered place (in which we put them). With these we lit (fires). We lit the oven with these dung cakes. They kept the whole house warm with them, with the dung cakes, with the logs of wood. (7) As for wheat, it was its time, it was its season, we used to wash it in autumn, whoever had sown their own wheat. They had to wash and sort it all in autumn. In autumn jobs in the village were numerous. Whoever did not have wheat would buy it, (they would buy) a lot of wheat, for example, they would buy six sacks like this, a lot. Then it was necessary (to process) all of the wheat in one or two days, they washed it, they spread it out, they dried it, they cleaned it of stones in case there were any in it. (When it was) ready, they fill sacks with it (and) again (place them) there. (8) So, every once in a while they need to go to grind (the wheat) on the water-mill to make it into flour. They would take one of those tall sacks, grind it and it would come back as flour. This was for dough, so they would always have flour.

Where did they keep the flour?—in a storage bin, in a storage box, wheat in a storage bin and flour in a storage box. These were boxes that they had made with large planks. These were their names. When they bring the wheat from the threshing machine, from the threshing floors, when it has been processed by the threshing machine and extracted (from the heads of wheat), the wheat is abundant and it goes into the storage bin. The storage bin was half (the size) of this garage. They made it of boxes, with a plank, a big box. It had different types of doors. They raised a plank, a hole, and the wheat flowed down from the hole. Then they would drop the plank and it would close, its door would close. It was higher than ... high like that door, high like that. It was much higher than us children. So, this was full of wheat. (9) There was another, which was full of flour. Now, they made flour, they used to grind it in the autumn on watermills. The millers would come only occasionally, because there were not many watermills, for example there was one in our village, but in three or four other villages there was not any. They all come to mill on the watermill of our village. (10) As for hay, again they would bring in the food of the animals in winter, they brought it in during the autumn and put it in the storerooms. During the whole winter we have hay and clover. They used to cultivate clover. Every house had clover. They sowed it, harvested it, made it into balls and brought it into the storerooms for the cattle. This was the food of the animals. (11) Straw—we would weave many baskets from the stems of wheat—it was the job of us girls. The stem of wheat is long. They would take it and soften it in water. When we have softened it, it would not break any more. With this we wove baskets. The men, in fact, used to weave. The men used to weave a basket like this—bring me that yellow one—, large pannier baskets for transporting grapes, for the produce of dried raisins, like this, but big, high like this. It was the men who used to weave these. There was a type of tree called osier, osier. The twigs of the osier were like this. They used to weave pannier baskets.

(12) [GK: baking of bread?] Yes, (there was) also baking of bread. There were baking women. They used to prepare dough for (a supply of bread for) almost two months, for thirty days, sixty days, they used to bake like that. They baked in one day. After two months they would again be in need (of bread). Now it was water with flour, they would knead for one day, but they had to put leaven into it so that it would be leavened. How do you do the leavening? Today I have taken leaven from a neighbour. They preserved it from hand to hand. They did not let it finish. They would not forget it, the women were not supposed to forget. They had to keep a ball of dough. Now, if she has brought it from a neighbour, she had to give one to the neighbour and keep one for herself. So in this way there was always one dough ball. They used to bury it in the flour, in the flour storage box. Then they soften it in the evening in all that flour and mix it with water and

flour. In the morning they get up and see that it has risen, it has been leavened. (13) So, first they would make dough balls. The more people there were for this baking of bread, the more help there was, the quicker they would finish. But the baker woman was one person and another was the one who rolled (the dough). I, my mother, and the wife of my maternal uncle used to bake for us, for the whole family, the relatives. My mother used to be the roller (of the dough). (14) A (rolling) board, it was a large round board, this high. There is a rolling pin, which we also have now, and also a baking cushion. The woman who was baking bread would put it on the baking cushion and stick it onto the oven. The oven is hot. [GK: How many types of bread were there?] How many types are there? One (of the types that) we had (was) a flat bread, another was a loaf. We did not have so many types. As for loaves, when the dough was coming to an end, they opened up a few dough balls just a little, like this round, but thick. The old folk used to like it, the elderly, who used to eat it with milk. Other than cakes, we also made unleavened bread. They had nothing in them, we did not put cake-filling in them. It was a dough-ball like this, which we used to open. But cakes had to have cake-filling in them, we put cake-filling in cakes.

(15) [GK: yoghurt?] Ah yes, yoghurt was indeed like this. Shaking the churn pot took place twice a week. They would boil the milk. They would milk the milk themselves in the evening. We used to warm it all in the morning. We put it into pots. Three days later it is yoghurt ready (to eat). Now, the (filled) pots would be left over sometimes, this is the story of Yutam, pots were left over, that is twice a week, occasionally three times a week, twice a week. (16) As for the churn pot, that depends on how much yoghurt we have. Yes, now we would put (the contents of) three pots, four pots into one large churn pot. Mother used to shake it. She used to shake, shake it so much until its butter stood on the top (of) the buttermilk. She would take the butter and what remained was buttermilk. She put the buttermilk in a bag. She filtered it, for a whole day the bag went drip, drip. What remained was buttermilk cheese. What remained was buttermilk cheese, the remains of the (buttermilk) ... when she filtered the buttermilk. When the surplus water of the buttermilk goes away, buttermilk cheese remains. They make jajəc. They boil it and make jajəc. As for the waste liquid, they used to throw it away. They used to wash their hair in it, it was like shampoo for them, the water of the buttermilk cheese, yes the waste liquid.

(17) There was the washing of clothes, it was once a week. They would heat the water. There were not (facilities) like here, where we always have water by opening the tap. There you had to fetch water from the stream. We heated it at home on the oven, on the hearth, kindling the fire with the wood of ... Then,

the mothers washed them (the clothes) all by hand. We took them to the stream and rinsed them, we rinsed them with water. Then we brought them back and hung them out. We had clothes lines which we tied and we hung them (the clothes) out.

(18) Now in the autumn we had (the custom of) whitewashing houses. The women used to whitewash by themselves. We used to go, we had a white mountain, which was special, from it came the white mud, whitener, we called it 'whitener' at that time, still now it (is known as) whitener, the whitewashing of houses. They brought it, the men would bring a lot, then the women would soften it into a paste in water. They made many buckets. Then they took fine brooms, which we had. These too we brought from the fields. They would take hold of these fine brooms and the mothers would go up on ladders and whitewash walls, and everything. This took place in the autumn before the festivals, the festival (of Christmas), for the festival the houses had to be white and the curtains laundered. (19) We used to weave wall-carpets (<sup>+</sup>*kurana*), yes. We had ones like this with the width of this table, three feet, all around the walls, so that we did not lean on a wall that was cold. We had (such as these), which we used to weave, we used to weave them and attach them to the wall, so that we could lean on them. These were wall-carpets. We had mats, which we wove with *jayan* grass. This was like this rug, which they used to lay. All the rooms were full of mats. Later came carpets and rugs, on which we laid our bedding, but originally we sat on mats, we would weave mats.

(20) [GK: How did they heat houses?] Yes, I have said, with logs of wood, with dung cakes. Every morning they had to light the oven. They would fill it, stoke it a lot and bury them under the ashes in the morning, after the smoke has finished. They buried them under the ash, then, at this time (as we speak), in the afternoon, they would take out some ash, so the heat would come out. The cooking pots are all lined up there, below, many (pots of) water were lined up below. We always had water in pots (*talma*), which boiled ready in the oven.

(21) [GK: The summer?] The summer [GK: In summer where did you sleep?] on the roofs, mostly on the roofs. During the years that we were (in the village), there were rooms, there were two floors that were built, but long ago they slept on roofs during the summer. Every evening they went up to the roof by a ladder. They would spread out bedding there. In the morning we would get up again. I remember we had to sprinkle the roof every evening so that it would be cool. We would sprinkle it and open up the bedding, already three or four hours before we went up to sleep. We had to do these things. The bedding would stay there on the roof for two or three months, then we brought it down.

(22) Weddings were just like here, the whole family would gather together to help. First there is the marriage request. Several people would go and present

the marriage request to the family of the girl. They say 'Yes, come, let's talk.' Several people go and ask for her hand in marriage. They give a betrothal gift, a small ring, or they place something small on her neck, so that another man would not go and (ask) for the girl, (showing that) they have requested her hand, as it were marking her. After that there is the betrothal party. The family of the mother of the girl, the father of the girl, must hold the betrothal party and invite people, relatives. They serve food, serve drinks. There are cakes and sweets on that day, for example. After the betrothal party comes the wedding. The family of the boy initiates the wedding. The wedding lasts two days, three days, four days, a large wedding, with the presentation of wedding gifts, such weddings lasted four days. Drummers would come. We did not have drum-players in the village. They used to come from other villages. As for guests, guests came from all the villages. (23) So, many guests came. There were two hundred people. At times a wedding (had) four hundred people. All the villagers had to divide these four hundred people (among themselves). We used to divide them (among ourselves), ten would go to one house, seven in another house, eight in another house. There were relatives among the guests. There may or may not be relatives, it was like that, but they were Assyrians. We had to put them up for the night until the wedding finished, because they could not sleep in the house of the wedding. This was the organization of the wedding. (24) At the beginning, a night before the wedding there is the henna ceremony, which they put on their hands. They gather in the house of the bride, they make the henna and take it to the house of the boy. Now, the next day they used to slaughter a head of cattle, if they were available, perhaps they would slaughter two heads of cattle that were ready for the wedding. The drummers are constantly in the village, there is constant jollity, dancing, singing, they are constantly playing. Then, on the first day (of the wedding) they go and bring the bride. When they have brought the bride—let's say we bring her for example from another village. (25) The first day they gather, the close relatives gather (and make plans): the second day the henna night, the third day the bride comes. When the bride came, they used to steal her, first, the neighbours used to steal her, this was a custom ... then they would offer her hospitality. Now, when they bring the bride from another village, one of the relatives or neighbours offered her hospitality. First she entered their house, let's say, they would wash away the dust from their hands and face. There was a big feast, which they had to offer her, they offered her hospitality. Then the family of the father-in-law would go and bring her from that house, bring her out with drum and pipe music, and take her to the house of the bridal chamber, in the house of the groom. They would have organized a large house and there the wedding would take place. (26) On that night they gathered for the wedding-gift ceremony. The

wedding-gift ceremony was where everybody gave a gift, in the form of money, to the holders of the wedding. Just as we, for example, have given or that man has given to all the village when they have held a wedding, now it is their turn and they must give money, some money for the wedding of the son of that man, who spends a lot on the wedding. This practice also exists now.

### B11      St. Zayya's Cake Dough (Victor Orshan, Zumallan, N)

(1) Greetings to you. My name is Victor Urshan. I am from the village of Zumallan. Zumallan is one of the villages on the plain of Urmi. It is situated near the Nazlu river. (2) The story is about one of the customs that we have in the village of Zumallan by the name of (the festival of) the cake dough of St. Zayya.<sup>33</sup> (The festival of) the cake dough of St. Zayya began when a ... when our family was living in Urmi together with my paternal aunt, with another family, by the name of Yuav Muradkhan, the name of whose wife was Xlita. This lady could not have a child. She requested St. Zayya (to allow) her to have a son. Then this son was born and she named him Odishu. (3) Then for this purpose (of celebrating this event) these three houses began every year to gather among themselves flour, oil, (from which) they made cake dough and divided it among themselves. Later this news was spread among the inhabitants of our village, who heard that this was taking place, and the event began gradually to grow. (4) In this way it happened that instead of just three families, all the families of the village began to help in this connection. They designated a day for which they would prepare and on which they would go to the village of Zumallan. They would have bought beforehand a lot of flour, oil. They also took food, some herbs and bread for those people who came. (5) In the beginning this event was a custom only for the inhabitants of our village. They used to gather for one day and hold this event from morning until the time of the setting of the sun. They met one another, they talked with one another. They would spend a day with each other eating and drinking. With this (festival of) cake dough a memorial took place. (6) But this initiative grew bigger. It began to take place in the whole of Urmi. When this day came, because our village had many threshing floors and lawns, and the people, especially since in recent years an Islamic revolution took place in Iran, did not have places to go out to, did not have places to go to for enjoyment and so forth, for this reason when this day came, the people gathered in the open space of the village of Zumallan and the inhabitants of Zumallan

were perhaps in their thousands there. (7) Because this initiative had grown a lot, they established a committee, with a number of organizers, who one, two or three days previously would go to buy things, goods, food, drink and make preparations and so forth. On that day they would all hold this event in the village. (8) In the village there were two churches, one of them by the name of St. Ephrem and the one of them by the name of St. Mary. In the courtyard of the church of St. Mary in the morning the ladies would have gathered. They used to put together the cake dough that was there in cauldrons, perhaps one could say. After they put the cake dough together, they would make something like small balls of dough and roll them in bread. One could say that they prepared this for up to five hundred people. (9) Then, because the people were increasing and the event grew bigger than their just having food for lunch (consisting of) bread, herbs or sweetmeats—there were times that they used to make sweetmeats. (10) Later they started to buy meat and cook it, they prepared it like the type (of meat cooked for) votive offerings, because the people were many. They used to do this. It may be said that to this very day this is being done in the village of Zumallan on the plain of Urmi. (11) Then, in the years when the revolution occurred, the people of the village of Zumallan began to immigrate to America. They gathered in the colony of California. Also here, because the families of the inhabitants of Zumallan increased, they thought about this day, because they knew that there is a day in Zumallan that they jointly hold. They said 'It is better that we also do that here.' (12) In this regard they also here established a committee, composed of several people, from the towns of Los Angeles, San Jose and Turlock, because our people live in these three towns. This began from the town of Los Angeles. I think the first year that it began was in 1991. One year it was in San Jose, one year in Turlock and one year in Los Angeles. (13) For several years the event changed (place), and to this day people hold this festival. They gather starting on Friday evening to prepare the (meat for the) votive offering, more than cake dough, as I said, because guests and visitors are many. They do not spend the day only eating cake dough. For that reason they increased the event and made it bigger. (14) Nowadays it is known as one of the customs of the inhabitants of our village, Zamallan. By looking at this, also other villages began, as they had their own customs, such as festivals of saints that they used to hold. As far as I know, the village of <sup>+</sup>Mušava gathers every year. The village of <sup>+</sup>Ada holds traditions that they used to have. So this story is a brief account concerning the village of Zumallan about the cake dough of St. Zayya, which is being told by Victor Orshan from the village of Zumallan. Thank you.

## B12 Molasses (Victor Orshan, Zumallan, N)

(1) Again in the village of Zumallan there were people who had orchards. Each family had a plot or two plots or a *tanap*<sup>34</sup> of orchards. Now, in the summer the people used to go to the orchards and gather grapes. (2) These grapes used to be gathered in pannier-baskets. They used to bring them on their backs to the houses. One may say that each family used to have a wine-press. They had to carry these grapes on their backs from the vineyard up to the winepress. In the wine-press they used to crush the grapes in order to extract their juice. After crushing the grapes—they used to pour the juice of the grapes into what we used to call ‘bins.’ These bins—they used to have dug up the ground and placed them in the ground up to their middle. (3) After they poured the grape juice into the bins, there was (a kind of) soil, they used to go to some clean hills and find it, (it is known) by the name of *+xorana* ('whitener'). They used to bring it and mix a little of it with the grape juice. At night and as morning broke, when they came, the grape juice, which was mixed like muddy water, by the morning was, as they say, clear as a bell. (4) Then from this pure grape juice they used to take a little and pour it into a cauldron. They used to beat a little egg-white and throw it in it. They used to place this cauldron on the hearth. In the early years, according to what I remember, they used to put wood on the hearth, but in recent years, because the people had money and could purchase oil, they had mostly made oil hearths. They used to perform the same task, but more easily and cleanly. (5) They used to boil the grape juice for half an hour, or perhaps forty-five minutes, depending on the size of the cauldron. Then the juice would come out as grape molasses. The colour of the molasses was black. They used to collect it in pots. For days they had to place a stick in this molasses. They used to beat it. Through the beating of the molasses its colour used to change from the colour black and it used to become white. (6) Then it thickened and became almost like butter, but its colour was slightly reddish. One may say that every family used to do this thing, the cooking of molasses. They used to do this thing in summer so that they would have molasses for the entire period of winter. (7) The topic, the question arises regarding the (origin of the) name *nipuxta* ('molasses'). We have always heard it as being a single name, but we have not researched it much as to what its meaning is. According to one group (of people) it originates in the (Persian) word *na-poxte*. That is maybe a Persian had seen and said 'What are you doing?' Then they said 'We are cooking' he saw something and perhaps said 'This is *na-poxte*', that is 'it is not cooked.' This word, in the course of the

years, changed and assumed the form *nipuxta*. (8) There is another group of people who instead of *nipuxta* say *meye poxte*, because *me* in Persian has the meaning of wine. Molasses too is produced from grape juice, but of course it has not turned into wine. Thus they said *meye napoxte* ('uncooked wine') and again with the passage of the years this word has turned into *nipuxta*, as we know it today. (9) They used to practice these traditions, one may say, in the villages of Urmi for cooking molasses. Until now too, we still practice this tradition here in America, in the city of Turlock, even here in the city of Los Angeles. That is we go and buy grapes, we crush them and cook them, just like the system that we used to practice in the village. We practice it here too. So this too is one of the traditions of the Urmi people that they have practiced for a period of many years and they have preserved it to this very day.

### B13      Vineyards (Victor Orshan, Zumallan, N)

(1) At a time when the inhabitants of the village of Zumallan used practice agriculture, they used to cultivate (the land) or they used to have kitchen gardens and vineyards. Now in order to irrigate these kitchen gardens and vineyards it was necessary for them to ask for water from large irrigation channels. (2) So, they had to go and see the landlord of those villages. He had a man who was responsible for this matter who was called the foreman. They had to give the landlord a certain sum of money. Now the man or the farmer to whom he had given (a deadline) on such-and-such a day or such-and-such a week had to have paid his money beforehand. So he used to go and see that foreman and say 'I have paid the money to the landlord. Today it is my turn.' (3) Then, from there they would open the sluice gate of the water. The water—perhaps it may be said that they brought the water more or less a kilometre by irrigation channel and brought it up to that place, to the vineyard that they wanted to irrigate or to the cultivated land that they wanted to irrigate. (4) Now, for this reason at times there were fights. You would see a farmer who has gone to bring water but he has argued with the foreman but now whose fault it was is not known. It seems the foreman has taken more money from another when he should have granted it (the water right) to so-and-so and he has given it for another (field). (5) So there were fights and so forth. This is a memory I have, maybe fifty years ago in the village of Zumallan I saw this and heard it.

### B14 Village Life (Jacob Petrus, Gulpashan, S)

(1) All the houses of the village, in the villages, every house had an oven, an oven in which they mostly baked bread, or they cooked in a pot, a pot. They put a pot (in the oven), a pot of clay, we had pots of clay. They would put them in the oven. The foods of the oven were very tasty. (2) Now, during the day they used the oven for baking bread, then in the evenings, when guests arrived, in that oven house they laid for them a table, they lay it thus on the top of the oven, or if not, they laid out a blanket and the people would dangle their legs in the oven, all (keeping) warm. There was no need to light a stove. So the oven house was very warm, with your feet in the oven, it was very pleasant. So, they would sit. If a guest has come to (visit) you, he sits there. They sit, tell stories, sing, eat and drink. It was very pleasant. (3) Then came, then the stoves came out, a stove for (burning) wood. In the village the stoves were for (burning) wood. Now, in the old days there was no electricity in the villages. Now electricity has come. There is everything, but in the old days it was very pleasant, in the old days everything was natural, everything. But now that cars have increased (in number), travelling<sup>35</sup> has increased, we do not have ovens. But in the villages there are a few. (4) The flat breads that we have nowadays have not been made in an oven. We have (also those) that are made in the oven. They are more expensive. We have bread made in the oven, which they sell, oven bread. It is very delicious, and it is more tasty than the one they make with oil or diesel fuel. But the one of the oven is something different, very tasty, very delicious.

(5) In the villages—I'll talk about (the villages) of the old days. Now the villages have become like the town. But in the old days the walls were of clay bricks, unbaked bricks. They would make bricks and they would dry in the sun. They would build walls from them. They would build a wall like that. (6) Above it there was wood, they put wood. Here they are wood, but our wooden beams were round, wood like this. When they cut the tree, they make the wooden beams like this. Then on these they put laths. Laths are thin strips of wood. They sit on the (beams). The beams, the thick beams, between these they put laths, and on that mud. These are wooden beams, thick wooden beams. Like this, thud, they are (put) near to each other, near to each other, twenty or thirty centimetres apart from each other, they make them all like this. So on these they laid laths, laths, planks like this that are not thick, thin planks. The laths sit on those (beams). (7) Then on these—we say in our language ‘mortar,’ ‘mortar,’ this is mud, they bind the mud with straw. What is straw? Wheat, when they make

wheat, (when they) clean it, it is their straw husks that remain. In this wheat are wheat grains, the rest is straw, which they give to the cattle and they eat it. It is like grass for the winter. (8) So, they mix it, it is like concrete, this straw is mixed with mud. Now, when the mud dries, it should not crack. It becomes (like) reinforced concrete, it does not crack. (9) So, they put it on the roof and water does not flow through the roof. But now they put cement on the roofs and they put insulation now. We had a kitchen garden in the village, our booth, like a house in the vineyard. Our booth was like that. All the walls were of mud bricks and its roof was like that, logs of wood, and its top of mud, like that.

(10) [GK: In Tyare there was something that they used on the roofs, which they call *mandurta*. Was there such a thing in Urmi?] Yes, that is right. There are some people who put that on the roof. Sometimes when water leaks through the roof they come and put salt on the roof, they scatter dry salt on it. Then they roll something like that on the roof and it compresses it. It compresses it and the water does not flow down. It is like that, a round stone. They scatter salt, then with this stone, heavy stone, they roll on the roof, so the roof does not leak. It is hard. (11) Now this is also found in the town. Some old houses that have remained, people do the same thing now. Well, people who are poor do not have it. Their houses are cheap houses. They sometimes do so. (12) In the houses of the village the living in the house is different. The houses of the village have a very big courtyard. On one side there, it has a storeroom. It has an oven house. It has a cooking house. Toilets and the like are not inside, it is outside. For the house of the cattle they have, for example, a stable. They have a stable. As for the house, it depends what kind of house it is. The house, we had a house, of the family of my father in the village, I remember on this side was the house but the house of the cattle was on the other side of the house. (13) We had a barn, which had clover for the cattle and the like. There they would make a different house on one side and on the other side. The house of my grandmother, my grandmother was on that side. I remember her house. Above was the living area and underneath it was the stable. Underneath it was the stable. So the house was warm, because the cattle below in the stable were warm. Above, which was the house, was warm. But it was different. It was a very beautiful house. When the cattle would come and go on the path from the stable from there, they would go out into the courtyard and go off in the morning, but above it was a very beautiful house.

**B15      Village Life (Nadia Aloverdova, Guylasar, Armenia)**

(1) Our Assyrians who were living here before, we had cattle, they kept cattle and sheep. In the morning the herd went out and came back in the evening. They milked the cows. With this milk they produced cheese for themselves. They leave a large proportion of the cheese for winter, because in the time of winter there is nothing to eat, they make do with the cheese. Apart from salted cheese we have buried cheese. (2) Say 'How do we make this cheese?' You milk the cow, while (the milk is) warm you put pepsin into it. We call it rennet, rennet. In the old days they used to make rennet with the intestine of a sheep. They made rennet with that. We used to set cheese with that. Now we put pepsin in cheese, in very warm milk we put pepsin. It sets, like butter, it resembles yoghurt. (3) You separate it so that its water comes out. We strain it with a strainer. We squeeze it and the water comes out. Then we put salt on it, so it becomes hard. After that we take salt water, we take salt water with an egg, the egg of a chicken. It must be thus, so that the egg appears on the surface like a kopeck, so that it is not over-salted nor insipid, so that the cheese does not go bad. We put the salted cheese in salt water. If we want to keep it for the winter (we made) buried cheese. (4) With milk we cooked jajəc. We boil the milk. You boil yoghurt buttermilk. The milk curdles. You put salt in it. The buttermilk, let's say the buttermilk curdles. We strain it and it becomes fine. We mix it with cheese. We break up the cheese and mix it with this jajəc. We bring thyme from the mountains. We gather this thyme in the summer and dry it. We mix the dry thyme in the jajəc, in the cheese. We squeeze it all into a pot. (5) They make the pot with clay and fire it. They bury it (the cheese) in it, we say. Squeezing it all in this pot, you put a white cloth on its top containing holes, we say gauze. In the old days our women used to tie it on their head. They used to make it into a headscarf, gauze, a bandage with which they bind their hands. From that piece you make four folds and put it on the cheese. (On this) they put unwashed wool. The cloth prevents dirt from going in. (6) After that, you tie it with another cloth. You turn it upside down. You put ash in a certain place. The ash, when you burn wood, you put the ash in a pile. You invert the pot in the ash so that all its water drains. The wool draws the water. It draws all the water in this way from the cheese and it goes into the ash. You cover the pot thus so that half of it is covered in the ash so that air does not enter. In winter you open it. You take off the wool and so forth. Buried cheese, very tasty—with this the community subsists. (7) They bake flat bread. Our bread is flat bread. We bake it in the oven. Many people are not able to bake flat bread. They used to make loaves. Still other than loaves we used to have what they made with beans. What do they call them? *+jalla*. They bake *+jalla*. In these they put onions, red beans. They put them on the

oven. They were very tasty. Now our young people have forgotten all these. My grandmother used to make *harisa* (meat with crushed boiled wheat) in a pot. She put it in the fire, in the oven. She used to cover it with fire. (8) The pot had a lid like this, which covered it. They smeared it with mud so that the water, when it boiled, would not spill. Well, you see they make *harisa* with chicken and they make it with grain, with husks. They pound the raw grain and they take off its husk. Wheat, they beat wheat, its skin comes off and it becomes raw grain. We do not cook it, what we cook is the grain, but as for the raw grain, you put in some chicken meat, you chop it up and put it in it. You put in water, you cover its mouth and put it in the oven. It cooks and it becomes like porridge. It becomes thick like that. You take it in a spoon; when you take it, it stretches out like this. They call this *harisa*. It is very tasty. (9) Again in the pot we used to cook red beans. As for red beans, we used to put water on them. Whoever had walnuts would crush walnuts and put them in it. A little oil, again they cover its top with soil and smear it, then put it on the fire. They cover it with fire. As soon as it boils, the thing opens and we know that it is cooked, we took them out, we scraped them out of it (the pot). (10) Then we made *+gabama*. We take a pumpkin and we clear out its inside. They fill it with rice, honey, if they want to make it with something sweet, they put raisins in it. They cover its top and again cover it (and put it) on the fire. It cooks. It draws everything inside it and becomes pulp. (11) There are some who eat the pulp with oil, there are some who put milk on it and eat it. When they cut the pumpkin, and it is in layers, in the middle part there is rice, you eat it, it is very tasty. We call this *+gabama*. I do not know whether you now do it or do not do it, I do not know. Well, various things, let us say we make *dolma* of vine leaves, vine leaves. We roll vine leaves into a *dolma*, there are also cabbage (leaves) as well as vine leaves. They put dill in the vine leaves, but in cabbage *dolma* they mix all the herbs into the pot, they put in various types of herbs. But in that one (*dolma* of vine leaves) they put a sprig of dill together with coriander, they do not put in anything else.

#### B16      The Assyrians of Armenia (Nadia Aloverdova, Guylasar, Armenia)

- (1) The family of Malik Tuma flees from Iran, from the village of Yanjöjja, in the year 1828 from the Afshar dynasty. Eighteen families enter the territory of Armenia. They go up into the mountains (to a place) they call 'pool,' 'the pool of Ashur.' There, where they stay for two years, they look in the forest (and see that) there are many bears, wolves, foxes, and so forth. They are constantly eating their cows and so forth. (2) They said 'We are used to living in a flat place. We have not lived in the mountains. Sounds come from these forests and we cannot

sleep. There are those bears and so forth, lions. All these are annoying us. Let's get up and go down (the mountain). Let's go. If we reach our country, we shall stay there. If not, let's see what we shall do.' (3) From there eighteen families return and arrive near to the stream of <sup>+</sup>Azād. There is a stream there, its name is <sup>+</sup>Azād, they say <sup>+</sup>Azād <sup>+</sup>Avān. Now, for six months the headmen looked after the Russians. The army of the Russians was in Iran and our forefathers looked after them. (4) Then, when they knew that our forefathers were returning and going to Iran, they called them and said 'Come here. There is a village (here), stay and live (in it). If you are happy, stay.' Our forefathers mount their horses and come and arrive here. (5) Here there is a fortress. Previously the Afshars used to fight with the Armenians, so they had built a fortress. They come to the environs of the fortress and see that it is a flat area, with good water, and they stay here. They say 'Here it is good.' Next to the fortress, the Afshars had a tomb, the tomb of the Afshars is here, in this centre of ours, where now there are the shops and so forth, no? There were the tombs of the Afshars. (6) They are tombs, we say 'tomb' (*fōr*). There they are not baptized. We say cemetery (for us), because our people are baptized, we are Christians. But the Afshar community does not baptize like that of ours, so for them they say 'grave' (*fōr*). They do not say 'cemetery.' (7) The Assyrians who come here, next to the fortress, build houses. Gradually they build a church. They had brought a church with them, St. Quryaqus. St. Quryaqus was himself four years old when they killed his father, because the faith had come into the community and he was preaching. They killed his father. They said to his wife 'If you go in the way of your husband, we shall kill your son before your eyes.' Julietta was the mother of St. Quryaqus. (8) St. Quryaqus said 'Mother, you may abandon this path, but if my father stuck to this path, I know that my father was a wise man and held to the right path. I shall go on the path of my father.' They take the child and throw him down from the stairs. He rolls and rolls, falls and splits his head open. His mother comes and says 'If my four year old child has understood what life is, how can I revert from faith?' They kill also her on top of him. (9) Now we on the day of St. Quryaqus, on which he was given birth by his mother, in Iyyul, the 28th of the month, we every time hold a festival on that day, it is the festival of this St. Quryaqus, this church. Our forefathers brought it with them and here made a small church. They brought its sanctuary stone and we built it here. We made it huge. It was small. They brought it here and we built a huge church. That exists, I am looking at it now. (10) Then they stay here, years and weeks pass, in short in the year 1830 they think about enlarging the church. In the year 1840 they build this church. We are Nestorians, we Assyrians coming from Yanjējja. We are Nestorians, when here the laws change, the Armenians have their own faith, the Russians have their own faith, with the result that we go and accept

orthodoxy from the Russians, we become orthodox and change our faith from (being) Nestorians to being orthodox. In the year 1885 our Assyrians accept this faith. This church is changed from (that of) the Nestorians to orthodoxy.

(11) Much time passes, there are many Assyrian priests. There is Ephrem, there is Iso, there is Mixayəl, there is Father Sandu. We had many such priests. The last of all is Father Mixayəl. They exile him and send him to Siberia. The repression takes place in the year thirty-seven. Here in the year thirty-seven they annihilated many of our Assyrians. Then in the year forty-one when there was the war, many were annihilated. (12) After that they exiled many. What should we say, they arrested our colonel, Rabi +Barkaraxān, who was a high-ranking person in China. They said 'You together with Bərya wanted to make a revolt.' There was an intelligent Armenian, the lad said 'As God lives, man, they will send you to Siberia. Come and tell lies.' He says 'How can I lie?' 'Say that we met with Assyrians and they want to make me king, so that we go to our country. You will be saved with this.' +Barkaraxān does this. (13) He says 'We had gathered there and were talking with our Assyrians, and the Assyrians selected me as king. They said "Come, let's go and return to our country. There you will be king." That man was saved in this way and survived. He comes home. His children have already grown up, but both of them, both his son and his daughter, have gone mad. That man suffers a lot and he has not been bad for our Assyrians, the whole village remembers him. (14) Our forefathers stayed here and live like this. In the end Stalin issued an order in the year fifty-two, saying 'Whosoever, wherever he lives, should know that language.' We, since we had accepted orthodoxy, we accordingly learnt the Russian language, (the language of) Russia, reading and writing in the Russian language. The school for Assyrians closed. They opened it as (the school for) the Russian language. Since we are staying here in Armenia, we do one lesson of Armenian, the others are in Russian. Every Assyrian wants his own language. Now, if our Assyrians were not a crab, fish, bird, they would be a government. They think of one thing, each thinks about himself.

### B17      Village Life (Merab Badalov, Canda, Georgia)

(1) As for a game, in our childhood we used to play what was called *+baduša*. We used to call it *+baduša*. *+Baduša* is a sharpened stick. We used to make mud into mortar so that the *+baduša* would stick in. One of those who were hitting it would stick it in, the other had to make it fall. If you made it fall, you won it. It was yours. Then we would hit another one. Three or four of us would play *+baduša*. We used to win sticks for keeps and take them home in the winter. We

were young children. (2) We also used to play 'belt.' We used to place the belt like this in order to make a circle, a circle. Three people are inside and three are outside. You must steal the belt from the circle. If you steal a belt, then you beat with this and drive (the others) away and you must steal another one. (3) Now you steal also that. Then you steal the third one. Now, those who are inside must take the belt from your hand in order to win, either one must win or the other. If they took it, then they go into the circle and the others go outside.

(4) At night, I remember, we used to go to the house of my grandfather and grandmother. They used to have maize. They had a lot of maize. The floor of their house was earth. They had laid there a pile and we used to sit hulling the maize. All of the grandchildren of my grandfather, his daughters-in-law, we used to sit hulling the maize. The old men used to tell us stories while we were hulling the maize. We were helping them. (5) In winter they baked flat breads on (the walls of) the oven. Until a time such as this they baked all day long. They laid them out in the wood, in tens, and we took them to the town. My mother took them to the town and sold them, or she used to buy some food, and also used to buy flour and bring it back so that they could bake again the next day. By this we lived.

(6) [GK: Was there a watermill?] We had a watermill here. The place of the watermill remains, but it itself is not there. We would take wheat and maize and grind them. Yes, we remember that watermill well. It was a mill (operated by) water. A stream came from above. It had a trough (for carrying water) (*śiva*). It had (what we call) a trough (*śiva*) in our language. The trough was made of planks. Underneath there was a wheel. The water would pour on the wheel and it would turn. On an axle on top it had a stone, two stones, one was stationary, the one on top turned. Water made it work. (7) They used to put wheat in it in a ... What was the name of that thing? It was made of planks, where we used to pour the wheat they placed a stick. That stick, that stone when the stick that it was operating, the thing of the wheat, was moving, or (the wheat) had to pour down as one.<sup>36</sup> They used to stop it according to its measure as much as was necessary. If a lot came, the flour was coarse. (8) When the miller stopped it, he would do this with a rope. He turned it and stopped it in its place. Then he checked the flour with his hand (to see) whether the flour was flowing well. It must not come out hot nor must it come out coarse. (As) he ground it, he poured out a sack above in the plank, and a sack of flour flowed down from the stone. (9) Then they would bring it home and sieve it. They would make the coarse flour into mash. Do you know what mash is? They used to make

both the flour of wheat and also the flour of maize into mash. The coarse flour they made into mash. They cooked it in boiling water and they put oil in it, oil or milk. The fine flour they would bake into bread. They kneaded it. We used to have (natural) leaven. Now they put yeast or a chemical in it. (10) Formerly we used to have leaven. We used to ask for the leaven from house to house: 'Give your leaven (for me to take) with me for me to bake. I shall bring it back tomorrow.' Leaven, sour dough, so that it would leaven the other one. I do not know whether you have learnt (about) leaven? They would knead and cover the dough in order for it to leaven. When it leavened, they would then lay out balls of dough and bake flat breads, loaves, in the oven. In winter this was the work of ... mainly women would bake, when men did not have work, right? At that time the women would bake (with the) flour and we would take it and sell it. We would buy (things), and bring back food for the children.

(11) [GK: How was the harvest?] Look, we did not witness the harvest.<sup>37</sup> We did not witness it, since we are too young.<sup>38</sup> I have seen thus, I have heard that they used to harvest, they used make (the produce) into ears of wheat and bring them home. They had a horse or a head of cattle. They used to tie a buffalo to that thing. It would turn it in order to extract the wheat. We have not witnessed that. It was not (in) our time. That was a different age. It was before our (time), (in the time of) our fathers, my grandfather and also my father, it was in *their* time. (12) Threshing floor—we did not witness the threshing floor. (When) we arrived, there was a collective farm. When they introduced the collective, they all used to gather there in the collective, they gave work to the people, then they gave them, for their work, they gave them some bags (of produce) in order to pass the winter.

(13) Those who had a vineyard of grapes, vineyard of grapes, in various places within it they used to cultivate beans in its strips. Land at that time was scarce and they did not give much land to people. Our lands were few. They farmed so they would have grapes and would have beans, as much as the land would suffice. We used to cultivate mostly beans in the old days. They would cultivate cabbage, cucumbers, beetroot, what was necessary for winter, for themselves, potatoes.

(14) From the vine we would make wine. (On) a vine there are grapes. How did we make wine? We had a grape-press that was made (for the purpose). My grandfather had a grape-press that was made (for the purpose). Underneath he

---

37 Literally: We did not arrive at the harvest.

38 Literally: Our years are few.

had placed planks, distant from one another, holes which had strips. We placed the grapes there and we went up barefoot. (15) They used to take us children up, three or four people, and we would squash (the grapes). Underneath it had a small hole, from where the wine came into a pan. They would take it and put it in a barrel, into an earthen jar. Then, when it was becoming sour, and the alcohol of the wine is becoming strong, then they sealed its mouth. They put on a stone and sealed it with gypsum, with yellow earth, and stored it away for winter. After that they opened the jar, cleaned it and took out the wine for drinking.

(16) They used to keep a pig for winter. They had cattle. They made fried meat. This fried meat is ours, of the Assyrians, the meat of a large head of cattle, a cow. They fried it. They put oil on it. They put also this aside for winter. It keeps for a long time without going off, because it is fried in oil. It had (with it) potatoes, it had ... we passed the winter slowly.

(17) Arak, we used to make arak from what remained of the wine, the grape must. From this we used to extract arak. We had a pan for arak. We still have it. Have you not shown him? [addressing another man] There is a pan for arak. There is a pan for the production of arak. They put the arak in a barrel. It stays until its boiling stops. (18) When it is boiling, it does not produce arak. Its boiling must stop. After its boiling stops, they put it in the pan. This has a lid and they cover it. The lid has a hole. Yes, through this hole they put it into a pipe, into a trough. There is water. The steam that is boiling, the steam goes into the pipe. The steam cools in the water. Yes, it turns into drops. Yes, from the pipe drops flow down into a bottle. We store them (the bottles of arak) for their later use.

(19) The churn was churned by a woman. First they boil the milk. They put in a spoonful of sour starter, yoghurt, in it. It remains until the next morning, it remained from the evening until morning, it becomes yoghurt. They put the yoghurt in the churn. They tie its mouth with ... they tie the mouth of the churn and under it they put a bolster. A bolster is round, long like this. They placed it under the churn, under its stomach. (20) They push the churn back and forth, up and down, until it comes, the yoghurt becomes butter. They take off the butter by itself, then what remained was buttermilk. With buttermilk we used to cook stew. You have heard about stew? Stew. They make stew with beetroot, with coriander, celery. This is an Assyrian thing, it is an Assyrian dish. Nobody else knows it. Nobody else knows this stew. (21) They used to melt the butter, make it clarified butter and put it in jars. They made all possible preparation for the winter, because life in winter was difficult. They had to buy for themselves and for their future needs. The churn was like that. Even now we still have a churn, but we do not use it anymore.

(22) [GK: Do you have ovens?] We have an oven. I myself was baking yesterday, I was baking flat breads. If you had been (here), you would have seen, yes. Yesterday I myself baked, I and my wife. My wife was rolling with the rolling pin. A rolling pin is a round stick like this. Its name is *+dorana* in the Assyrian language, yes. There is a board. On the board they put a dough ball. They roll it with a rolling pin. Then they put it on their arms. (23) They spread it out, spread it out. We have a baking cushion. We have a baking cushion like this. You lay it on the baking cushion. The baking cushion has a hole under it. You hold it like this. Yes, with the baking cushion you put the flat bread in the oven. It bakes in one minute. It becomes brown and is ready, fine Assyrian flat bread. When we bake flat bread, (we bake) twenty or thirty of them, then, after flat breads, they bake loaves, a loaf. (24) A loaf has its own baking cushion. The one of a loaf is round. It is a small baking cushion. They put the loaves in the oven. They cover them. They must bake quite a lot, until they are brown. Then they take them out of it. For one week—formerly the old folk used to bake for one month. They laid them out to dry them. Then they put them aside, so that they would not have to bake every day in the winter. (25) Later they would take out the dried bread and moisten it. They rolled it in a damp towel so it would become soft. Yes, they used to eat some of that. Now they bake once every week. Yesterday I baked for one ... for it to be sufficient for us for one week, for all the family to eat. It is tasty. The bought bread does not have, has no taste of anything. We light the oven with wood, with wood, yes with wood. (26) An oven is made of yellow clay, which is fired. It is placed like this so that you can stand and put (bread) in it. Formerly our oven was in the ground. The women used to sit on the ground, on a cloth, then they put it (the bread) in it. But later they put the oven on the surface, slightly above, so that you could stand on your feet and bake. They stand on their feet and bake in this way.

(27) [GK: Was there a washing-beater?] Yes, formerly they had a washing-beater. They would put the clothes and pummel them with that stick, or with their hands, the big clothing of bedding, that is sheets. How can they? They could not wash them by hand. They did them like this. They wet them and covered them with ash. I remember that they washed them with ash. You know 'ash'? The ash that is in the oven—when there is wood, with that ash, they sieved it, with that ash. In the old days there was no soap. They used to wash clothes with ash. Later soap came, soap like this, big soap, of the Russians, they left soap, a certain type. (28) Then tubs came out. Formerly they were wooden tubs, tubs were made of planks. Do you know what a tub is? (They put) in it whatever they wash. Then iron ones came out. After the wooden ones, iron ones came out. They also kneaded dough in a wooden tub that we had, called a

kneading trough. It was called a kneading trough, where they knead dough, bread dough that they kneaded. It was a trough of wood, it was called a kneading trough. Now it is a basin, it is a basin of iron, of aluminium. Yes, its name was kneading trough. (A basin) of dough was called a kneading trough.

(29) [GK: Did you have irrigation channels?] Did we have irrigation channels? Yes. There was a channel here in this small street like this. There is the channel. There is a channel. Another is a little over there. Those channels were made like that. A big channel used to come from high up, then it split into the streets. When the water was abundant, it was sufficient. Another time—by turns. Today it is my turn. Then it is his turn. Whoever's turn it is, he would irrigate. They used to release the channel into kitchen gardens and orchard basins. We made orchard basins (*bavay*), yes a basin (*bava*). (30) What is an orchard basin (*bava*)? We made a basin like this. Around it we would raise the earth. In it you would cultivate onions. A basin has sides, so that the water that you release into it does not spill from the other side, but the basin drinks it. In this way we used to make everything with basins, (in) a kitchen garden. There were basins of beans, basins of cucumbers, basins of onions, garlic, every basin by itself. The name of this is 'basin' (*bava*). Basin, what should I tell you? We used to make it like this, longish, and here we would make a basin-bank, basin-bank. You do not know what a basin-bank is. A basin-bank, like this when you raise the soil, like this, yes? Yes, in this way the basins are separated from one another. In this way the basins (are made) by banks, yes. (31) Yes, in that basin you would release the water, which would go and reach its end, and it would hold it. Then you would release it on the other side and it would flow into the other basin. We would irrigate the kitchen garden for three or four hours. We irrigated it all. Then we released the water, and another person would come, a neighbour, a relative, our neighbour, and would irrigate, those whose turn it was after us to irrigate. Now there are no irrigation channels. They have finished. They have collapsed. Nobody takes care of them. We have no water. Now we irrigate from a well. We irrigate from a well by electricity, a motor, pump, we irrigate everything with a hose. [GK: Where does drinking water come from?] Drinking water—we have a well. We have a well. There are also some who have water. You must have seen those (from) which (water) comes (taps), in these also there is drinking water, which have holes and flow by themselves.

(32) [GK: How were houses in Canda in the old days?] When they had just arrived, some of the houses, I remember them, were houses of mud. They were made of mud brick, brick. They themselves used to build with mud, with straw. You know what straw is, yes? Straw, dry grass, they mixed it with the mud and made bricks. They dried them in the sun. With these they used to build a house.

One, in a single one ... four walls, one house. They made for it a large bed, for them all to sleep together, father, mother, children. They all slept in that same bed.

(33) They made platforms. A platform (*saccunta*), a platform (*saccun*). It is built a metre in width for sleeping, for sleeping, (it belonged to) the old times, the old times. This was not, however, in our time. They put hay under them, hay, hay. When wheat remains, hay, the dried grass, they slept on this. This was a long time ago, yes. (34) Platforms, what is a platform? They build on the side of the wall, with that mud, or they build with those mud bricks, a metre, a little less, a wall, next to the wall, they build another wall, but a low one for sleeping on, for eating on. When they came, there was no wooden bed, they had nothing. When our people first came here, they had nothing. They lived in pits, pit, half of the house was in the earth. Half of it was covered with earth, like this, pit. (35) Pit, that means, half of it was in the earth, half of it on the surface, underneath, so that it would be warm. As for beams, they laid wooden logs. They laid reeds, bunches of reeds, they tied bunches. They put earth on this, so it would be warm. They made it round like this, then they lined up some of those bunches of reeds on it, so that the water would not flow down into it, but would flow down on the edge. It used to happen that when heavy rain fell, it leaked and became wet. (36) [GK: The roof?] Yes, there were also roofs. (In the singular one says) *jara* and *jara* is also correct. That is correct. [GK: Was there leaking?] There was leaking, yes, so that it would not come from above, they would roll something on it. [GK: Did they shovel the snow?] Yes, they shovelled the snow. When there was snow, they used to shovel it. They are not, however, able to shovel rain. When rain fell heavily, they were not able to shovel it and then it used to leak. (37) The snow—they used to go up, sweep it and clean it off. They swept it from the roof so that it would not flow down. Two (old) houses remained in my childhood, I have seen them. [GK: With what did they sweep?] With what did they sweep?—with a broom. They used to make a broom with ... there is a grass there where the graves are. There is a broom plant. There is also a broom plant that grows in kitchen gardens. They made the brooms, ready, so they would have them in winter. (38) Now after a month, already the time of the broom will come. We must (tie) a broom. Now too we are tying a broom to sweep the yard, our own broom at home. [GK: Were there windows?] There was a window. There was an unglazed window, in the houses of mud bricks. Where would they have windows from? At that time there was no glass. Maybe one person had glass. There were unglazed windows. They called it unglazed window (*cava*).

(39) There was such a time when cattle, a cow, and also people lived together. They brought the cow into the house in the winter. When it wanted to urinate,

the head of the house would know about it, he would take a bowl and hold it beneath it, so there would not be a smell. As it urinated, he would hold it before it and it would urinate. He would then take it out and pour it away. (40) [GK: Were all the animals in the house?] Not all, (only) the cow, together with its young, the cow. A chicken did not have to be in the house. A pig did not have to be in the house. Here in Georgia it is not so cold that they got cold. A pig does not get cold. A pig stays outside. [GK: What is the name of the house of pigs?—the nest of a pig. They used to make the pig's nest like ... in the ground, they made a pit in the ground. A pig spends the winter there in a pit. The ground is warm. They would dig the ground like this. They would cover it and put earth on it, so the pig would be warm, poor creature. (41) Chickens had a coop. They called it a chicken coop (*ninə*), where there are chickens, where they roost, they call it a coop. Yes, the house of chickens is called a coop, coop. They used to lay pieces of wood like this. They used to go up on those pieces of wood and roost. They covered the top so that rain would not come onto them. They used to put a sieve for the eggs, an old sieve, in which they put straw, so that the hen would lay eggs in the sieve. They would make it brood when an excess of its eggs accumulated and when the chicken was clucking, clucking, when it lays a lot of eggs it clucks. (42) Then it produces chicks in that sieve on the grass. They make her brood on the eggs. They put twenty-one eggs under her. It was like that. I do not know why. Now also they do this, twenty-one eggs. Yes. They make her brood (on them) and she produces small chicks, yes, the chicken. Then the chicks grow, so they would have (chickens) in the future. They slaughter the older ones. The younger ones grow and become chickens. The name of the chickens' nest is coop (*ninə*).

(43) [GK: What is the name of the house of bees?] They called it a bees' nest. They have their own nest, their own box. This has a hole. They go out and come in, making food for themselves. They make food themselves from this tree, from the blossom, this is a hawthorn tree, a hawthorn, a hawthorn. They take most of the honey from this. Well, now, now is the time for the production of honey. I must see, in these days I must produce honey. You produce some for yourself and you leave some for them, because also they indeed in winter cannot find food. From that food of theirs we take half of it for us and half of it for the bees.

(44) There is a willow tree. There is a hawthorn tree. There is a pear tree, apple tree, mulberry tree—‘mulberry’ (*tutya*) is surely our language—walnut tree, hazelnut tree, plum trees, this is the plum tree. There is the sweet cherry tree. There is the dark cherry tree. What else can I tell you?—black sour plum.

(45) [GK: Flowers?] Flower—in our language I only know the one name ‘flower’ (*varda*)—red, white flower, yellow flower. Thus (they are called) by

their names, our names are not (given) to them. It is possible (that there are names) of ours, but we do not know. It is possible (there are names) of ours. There is saffron.

(46) For winter we used to make for the cattle, we make also now, we harvest grass, we dry it and make a stack. We harvest stalks of maize (*pučeča*). I do not know if *pučeča* is our language. Maize, when maize dries, you take off the head of maize. You make the maize that you harvest into a bundle. We arrange these bundles on top of each other, so that the rain does not flow down into them, so that they do not rot. In winter we feed them a bundle of maize stalks and we put an armful of grass in the stable. (47) In the morning we get up and they clean under them. They milk them. They put food down for them. They bring them in and give them water to drink when it is cold. When there is some warmth, they go outside, they drink water. They feed them. They bring them back, and put them again in the stable. They put—they have mangers, their name is ‘mangers.’ Mangers are made of a plank. They put grass in the mangers, so they do not scatter it under their feet, for winter grass, also maize stalks. Maize stalks, when the maize plants are cut, when the maize plants are dry, when their root dries, this is called ‘maize stalk’ (*pučeča*). We make this into bundles. We also harvest grass with a scythe in the countryside. We bring it home and put in a heap, and in winter we take some of this and feed them.

(48) [GK: What did you used to do for winter?] We fried preserved fried meat (*kalya*). They stored potatoes, potatoes by themselves, cabbages. They made pickles. You know what pickles are, right?—pickles of chilli, of cabbage, of tomatoes. They had beans, two or three bags of beans. I tell you they used to slaughter a pig. They used to put it in salt water so that it would not rot. They took it out, they washed it, and made *dolma*, they preserved leaves, leaves of the vine. Vine leaves—this *dolma* is an Assyrian leaf, *dolma* consisting of leaves with white cheese, with garlic. We make them now also. (49) They used to cook *harisa*, *harisa*. Have you heard of *harisa*? *Harisa*—they used to cook wheat. They put meat in it. Formerly they more often put goose in *harisa*. Now they make it with chicken. Well, they used to have maize flour and they used to make mash. They slowly passed the winter.

(50) [GK: Was there snow?] In the time of my childhood there was a lot of snow. I remember when I was young my grandmother used to open up a path in the courtyard with a shovel. It was a metre or more than a metre high. At that time good produce was available. Now there is drought, and produce is not available. When the snow came, it filled the trees, the fruit. Now less snow comes. It is colder. The freeze is intense. (51) The roads were very bad. The roads—they used to go with effort with carts, with buffaloes from here,

from this street. Over there, I live over there, there was a channel there. There a cart used to sink (and get stuck)—you know a ‘cart,’ right? It has two wheels. They tie a buffalo to it with wood. A cart would get stuck, I remember in my childhood, the carts that used to get stuck, they tied two yokes to them, two yokes, that is, one that was tied to it was not sufficiently strong and they added another, in order to pull the cart out. (52) A yoke was made of wood, sitting on the neck of a buffalo. They would tie it (the buffalo) from underneath with ropes so that it could pull the cart. The cart had two shafts, as they call them, shafts. It was made with these shafts—shaft, shaft. A shaft consists of two pieces of wood. On these shafts they fixed planks, this was for the placing of something on it. In front, where the shafts were there was again a yoke, which they made, so that they could place the yoke on the neck of the buffalo, and they tied it with ropes, with the result that it applies force with its neck and pulls with its shoulders. But when it happened that it did not have the strength, with the shafts of another cart they tied another buffalo at the front with ropes so that this also would help to pull it. (53) I remember that. Yes, I remember that, fifty years ago, fifty years ago. The place that was before our door. The worst place was before our door. There was a lot of mud there. Later, gradually, they brought and laid some stones and so forth and they fixed it.

(54) [GK: How did they heat houses?] Before the time when stoves came in, there was a fire in the middle of the house. Their house was one room, it was one room. Indeed I am saying, in one corner there were cattle, animals. On the other side they had a bed for themselves, for sleeping. In the middle they had what they called a central fire. Above there was a hole, a window light was left (open). A window light was left in the ceiling above so that the smoke could escape. (55) They used to light the fire in the middle of the house. They lit the fire and they warmed themselves with that fire. The cooking pot was hung over the fire. They made something with wire, on which the pan was tied. They cooked in their pot there, on the fire. Later, as I remember, this was not there anymore, there was a stove, a stove made of iron. Now also we have installed stoves. Yes, we have installed stoves, we warm ourselves with wood. Now some have gas, we warm ourselves with gas. (56) [GK: Where did the women cook?] On the fire. They had a copper pan. The stirring spoon was wood, but they had a pan. They cooked everything in that. Anybody who had two or three—they used to live rather well. Yes, they called it a copper pan. Copper and something were also mixed together, aluminium. Those pans are still in use. There are some who still have some in the basement, who have old ones, but they do not use them anymore. Yes, in that copper pan, suspended on the fire, they used to cook. [GK: in the yard?]—In the summer in the yard, in the winter on the central fire. In the winter the fire burned in the house to give warmth. Also their pot was

suspended on a wire, and they cook with this. They put everything in one vessel and ate with their hands. This was not very long ago, something like seventy or eighty years ago.
